

LOUISIANA DEPARTMENT OF EDUCATION

Career Development Fund (CDF) Technical Assistance Review Report

September 6, 2018

Key Findings	
1	Since the CDF mechanism was instituted in 2014-2015, almost all districts and charter schools have used at least some CDF funds for ineligible expenditures.
2	Select districts have accrued enormous carryover balances of CDF funds, while at the same time indicating a lack of funding for expenditures that would be appropriate uses of CDF funds (examples: statewide IBC testing and credentialing; software and Nepris licenses; in-person and virtual teacher training; equipment for high-demand pathways like C4M, I/T, skilled trades; etc.).
3	In too many LEAs there is little or no communication between the Finance team and CTE leaders about the receipt / use of CDF funds. This has led to several dysfunctional outcomes, including: a) Business Managers are not entirely clear about the restrictions on how CDF funds may be used, or (in some cases) how much in CDF funds their LEA received; b) CTE leaders don't know how much their LEA has received in CDF funds and what approval they have to spend these funds.
Attached is a spreadsheet (pdf and Excel) indicating the CDF allocations and expenditures for each district for the period 2014-2015 through the just-ended school year, 2017-2018. <i>Dark-red shaded cells indicate districts that are late in submitting their 2017-2018 CDF End of Year Report (available for download as an Excel spreadsheet):</i> https://www.louisianabelieves.com/courses/all-things-jump-start/policy-and-program-implementation	

As indicated this Spring, the purpose of this CDF Technical Assistance Review is to help LEAs cure any deficiencies in the reporting and/or expenditure of CDF funds. **All LEAs will be given the opportunity to cure any review findings without penalty or sanction.** Therefore, the key action steps resulting from this technical assistance review are:

- 1) a webinar at 4pm on Tuesday, September 25 (link: <https://ldoe.zoom.us/j/137540785>) to help business managers and CTE leaders: a) understand the purpose and appropriate uses of CDF allocations; and b) determine how they can communicate more effectively about the requirement that CDF funds *must* increase the opportunities their students have to participate in high-quality, high-demand Jump Start pathways;
- 2) the LDOE Jump Start team will reach out to districts that have carryover CDF funds above \$75,000 to determine their definitive plan for properly expending these funds in 2018-2019; and
- 3) one-on-one consultations with select districts who have made improper past expenditures to make sure future CDF expenditures are appropriate. *All districts may request this consultation at any time.*

Starting in 2018-2019 the LDOE reserves the right to reclaim unexpended or improperly expended CDF funds, based on the Guidelines for Use of CDF Allocation (attached).

Note: per new CDF policy, LEAs received the first of two CDF payments – equal to 75% of their prior-year CDF allocation - in their July MFP remittances. The balance of CDF funds will be remitted in March.

For help in understanding the CDF allocation – and for all other Jump Start questions – contact: JumpStart@la.gov

The Process for Developing the CDF Technical Review

LDOE Finance provided the Jump Start team with the final year-end figures for all LEA CDF allocations. From 2014-2015 through 2017-2018, CDF allocations were part of each LEA's February or March MFP remittances. (The attached spreadsheet shows the annual allocations in separately-labeled worksheets).

The Jump Start team inserted the CDF expenditures indicated in each LEA's CDF End of Year Report. The Jump Start team also reviewed the conversations held each year with various LEAs as or after they submitted their CDF End of Year Report. Among the results noted from these prior year's conversations:

- instances where LEAs queried about whether an expenditure would be appropriate for CDF funds, and decided not to make the expenditure when notified that their intended use was not CDF-qualifying. Example: paying for the credentialing costs of a Regional IBC;
- instances where an LEA had already made an inappropriate expenditure using CDF funds, and were so informed by Jump Start team members. In these cases, the Jump Start team responded: "We're looking forward, not backwards," and accepted the CDF Year End Report (often late) with the agreement that the LEA would make only CDF-qualifying expenditures in the future; and
- instances where LEAs requested the ability to make expenditures on Regional pathways, as a way to build towards offering a related Statewide pathway. *The Jump Start team universally approved these requests.*

The Jump Start team then reviewed the carryover totals for LEAs, noting where there had been prior communications indicating the LEAs intention to commit the carryover sum to a specific major project.

Based on this review, the Jump Start team determined the following action steps: 1) a webinar to reinforce key tenets of CDF policy, guiding business managers and CTE leaders towards more effective collaboration on CDF allocations; 2) one-on-one consultations with districts that have large carryover balances and no stated plans for the use of these funds; and 3) targeted one-on-one consultations with districts that have experienced difficulty making proper CDF-qualifying expenditures in the past, while making our team members available upon request for any LEA that seeks guidance and support.

Additional Action Steps

Based on feedback from districts, the Jump Start team will enhance the CDF Year End Report spreadsheet. Specifically: a) the Jump Start team will send each district their carryover balance on or about June 1; and b) the Jump Start team will upgrade the Year End Report spreadsheet to automatically calculate the imputed carryover amount intended by the LEA based on indicated expenditures.

The CTE Leadership Academy will also make available on the www.lactealeaders.com website tools for managing CDF allocations. These tools will be discussed during the March 2019 Academy Regional Meetings (dates / sites tbd).

Final Note

Based on requests from districts, CDF allocations are now paid out twice each school year: 1) in July (the greater of 75% of the prior year's CDF allocation or the minimum amount for LEAs); and 2) March. This gives LEAs the entire school year to use CDF funds to maximize student opportunities.

Starting in 2018-2019 the LDOE reserves the right to reclaim unexpended or improperly expended CDF funds, based on the Guidelines for Use of CDF Allocation (attached).

LOUISIANA DEPARTMENT OF EDUCATION

Guidelines for Use of CDF Allocation (Updated for 2018-2019)

This document provides comprehensive instructions regarding a funding source for career and technical education (CTE) courses: the Career Development Fund (CDF). The sections of this document include:

- 1) Purpose of CDF Funds
- 2) How Much CDF Funds Each District / Charter School / Special School Receives
- 3) When Districts/Schools Receive CDF Funds (new!)
- 4) Allowable CDF Expenses
- 5) Non-Allowable CDF Expenses
- 6) CDF Reporting Requirements / Carrying Over Funds
- 7) CDF-Qualifying Courses

1) Purpose of CDF Funds

CDF funds are intended to support increased student access to high-value CTE courses and training.

BESE and the Legislature realized that it costs schools more to offer CTE courses in high-wage employment sectors (e.g., welding, information technology, manufacturing, etc.). That's why they included dedicated funds in the MFP – CDF funds – for the exclusive purpose of making high-value CTE courses and training available to more students across Louisiana.

2) How Much CDF Funds Each District / Charter School / Special School Receives

Districts, charter schools and special schools receive a 6% MFP adder (\$238) for each student enrollment in a CDF-qualifying course.

BESE and the Legislature realized that there is a certain minimum amount of money below which CDF funds would not have a significant positive impact on smaller districts and charter / special schools. Therefore, there are minimum amounts of CDF established in the MFP:

- Districts receive the greater of: a) \$25,000; or b) the sum of 6% adders for all their students' CDF-qualifying courses;
- Charter and special schools receive the greater of: a) \$10,000; or b) the sum of 6% adders for all their students' CDF-qualifying courses;

Career Development Fund (CDF) Snapshot	
Funding	<ul style="list-style-type: none">• 6% MFP adder (\$238) per student enrollment by course• Minimum CDF allocation of \$25,000 per district and \$10,000 per charter and special school• A greater percentage of CDF funds will be paid at the beginning of the school year to increase student opportunities (see next section)

Louisiana Believes

LOUISIANA DEPARTMENT OF EDUCATION

Guidelines for Use of CDF Allocation (Updated for 2018-2019)

3) When Districts/Schools Receive CDF Funds (new!)

Districts and charter/special schools will receive most of their CDF allocation each July, so they can invest these funds to maximize student opportunities for the coming school year.

Starting with the 2018-2019 school year, the July MFP remittance for districts and charter/special schools will include the greater of:

- a) Their minimum \$25,000/\$10,000 CDF allocation; or
- b) 75% of their previous year's CDF allocation.

Each February the final CDF allocation due districts and charter/special schools will be trued up based on actual student enrollments. Any additional CDF allocation due each district or charter/special school will be included in their February MFP remittance.

Providing the majority of CDF allocations at the start of the school year will enable districts and charter/special schools to provide additional opportunities for students in all of the areas where CDF funds can be spent.

4) Allowable Expenses for CDF Funds

CDF funds must be spent to increase student access to high-value CTE courses and training.

Specific approved uses include:

- Teacher training towards attainment of Jump Start statewide credentials, which can include Super Summer Institute training and externship stipends for externships in high-demand industry sectors. (WIC-approved high-demand industry sectors include: Automotive Service Repair; Construction Crafts; Culinary; Healthcare; HVAC; Information Technology; Manufacturing; **Medical**; and Transportation and Logistics);
- Facilities, materials and equipment expenditures related to student attainment of statewide credentials. *This type of expenditure may include:*
 - the cost of student **statewide** industry-based credentials;
 - the cost to license software systems like Nepris (and related training) that provide students with access to experts in high-demand industry sectors;
 - career counseling services and software (like Career Compass and Kuder) that help students learn about how they can pursue the courses and industry credential for high-demand industry sectors;
 - Facilities, materials and equipment expenditures related to obtaining statewide credentials (i.e., welding shops, computers for approved credentialing courses, medical uniforms, food for ProStart, supplies for construction crafts, etc.)

Louisiana Believes

LOUISIANA DEPARTMENT OF EDUCATION

Guidelines for Use of CDF Allocation (Updated for 2018-2019)

- Transportation of students and teachers to sites where high-value CTE courses and training are available. Qualifying sites include community and technical colleges as well as industry training organizations. Transportation costs include all the costs schools incur for transportation, including driver costs and benefits. Bus Tokens are also allowable expenses.
- Expenses occurred by having a JAG-Specialist on staff, including salary and benefits.

5) NON-Allowable CDF Expenses

- Salaries or benefits for teachers, except for externship stipends in high-demand industry sectors;
- Student tuition. Supplemental Course Allocation (SCA) funds can be used to pay for student tuitions for courses offered by approved Course Choice course providers;
- Teacher training for credentials other than Jump Start statewide credentials.

6) CDF Reporting Requirements / Carrying Over Funds

- It is the LDOE's intent to make CDF reporting requirements minimal and intuitive.
- No districts or charter schools will be penalized if their initial CDF paperwork submissions are incorrect or incomplete. No funds can be lost – the Jump Start team will simply contact you to make sure your submission is corrected and/or completed.
- At the end of the year districts, charter schools and special schools will need to complete a one page [CDF End of Year Report](#) that simply asks for an accounting of how funds were spent and in which Statewide and/or Integrated Pathways.
- Additional resources regarding CDF Funds are available on the [All Things Jump Start](#) web portal inside the Policy & Program Implementation Ball.
- CDF funds may be carried over from one fiscal year to the next. The LDOE will track these funds. *At some point, districts, charter schools and special schools will be required to spend accumulated CDF funds by a designated date. To assist school systems in curing any deficiencies in the reporting and/or expenditure of CDF funds, there will be a [CDF Technical Assistance Review](#) for each school system during July and August, 2018.*
- Funds that are carried over can be noted on Object Code Line 900 "Other Uses of Funds"

Louisiana Believes

LOUISIANA DEPARTMENT OF EDUCATION

Guidelines for Use of CDF Allocation (Updated for 2018-2019)

7) CDF-Qualifying Courses

- The most current CDF-Qualifying Courses can be found are available on the [All Things Jump Start](#) web portal inside the Policy & Program Implementation Ball in the section entitled, "Jump Start Funding Resources".
- This list changes every school year based on the trends in the Louisiana economy, and our dedication to making sure that CDF funds are applied to CTE programs that are not yet available to sufficient numbers of Louisiana students.
- Starting 2018-2019, this list will be updated only once each year.

Please send any questions, concerns or recommendations to JumpStart@la.gov
