

Grade 4 - Math

This task will ask students to solve a multi-step word problem appropriate to Grade 4 involving knowledge of the four operations with whole numbers.

QUESTION:

Ms. Morales has a bag of beads.

- She gives Elena 5 beads.
- She gives Damian 8 more beads than Elena.
- She gives Trish 4 times as many beads as Damian.

Ms. Morales has 10 beads left in the bag.

answer.	eaus did Daillian and Trish each receive:	Show or explain now you arrived at each
PART B: How many be	eads were in Ms. Morales' bag before ar	y beads were given to students?
beads		

DART A. How many heads did Damian and Trick each received. Chay or explain how you arrived at each

ANSWER:

Elena – 5 beads Damian – 13 beads Trish – 52 beads Total in bag – 80 beads

Elena has 5 beads so Damian has 5 + 8 = 13 beads.

Trish has $4 \times 13 = 52$ beads.

Altogether there are 5 + 13 + 52 = 70 beads. I know that 80 is ten more than 70, so there were 80 total beads.
