

Office of Teaching and Learning, Division of Numeracy

Dear Parents and Guardians,

Attached are _____'s K–3 Beginning-of-Year Numeracy Screener results. This brief screener checks important math skills needed for success at their current grade level. The results help teachers identify your child's strengths and areas where additional support may be helpful. These results also help determine which students may benefit from additional support, including high-dosage tutoring.

Based on their screener results, your child:

- ☐ is currently meeting expectations and does not need High-Dosage Tutoring at this time;
- ☐ will receive High-Dosage Tutoring to support their learning in the following area(s):
 - ☐ Quantity Recognition
 - ☐ Comparison and Relationships
 - ☐ Order and Spatial Sequence
 - ☐ Number Structure
 - ☐ Estimation
 - ☐ Equal Structures
 - ☐ Spatial Unit Structure
 - ☐ Word Problems/Contextual Operations
 - ☐ Counting Strategies
 - ☐ Number Naming
 - ☐ Basic Fact Fluency
 - ☐ Operations and Calculations
 - ☐ Mental Multiplicative Strategies
 - ☐ Algebraic Thinking and Expressions

Math skills build on one another like building blocks. Strong foundational skills help students successfully learn grade-level math and become confident problem solvers. You can help your child strengthen these skills at home by:

- **Using Zearn:** Encourage your child to complete assigned Zearn lessons and talk with them about the math strategies they are learning.
- **Using the Family Roadmaps to Math Success in Louisiana:** Use your child's grade-level Family Roadmap for simple activities and ideas to practice important math skills at home.
 - [Kindergarten Family Roadmap](#)
 - [Grade 1 Family Roadmap](#)
 - [Grade 2 Family Roadmap](#)
 - [Grade 3 Family Roadmap](#)

If you have any questions, please do not hesitate to contact your child's teacher and/or school for additional support.
