

**Family Math Engagement**  
**Grab & Go: Operations with Decimals**

This activity would be  
best used by:

Schools  Families

**Materials:**

- Bank Ledger
- Sales Ad from the paper
- Grocery Receipt

**Steps:**

1. To add and subtract decimals, have children add up a banking ledger.
2. To have children multiply decimals, find a sale paper ad and have them multiply the cost of one item by 3.
3. To have children divide decimals, have children divide a total cost of a recent grocery bill by 4.

**Lagniappe:**

- Ask your child to create a grocery list of their favorite items. Look up the items' prices and let the student add the prices to get a subtotal. Then have them multiply the subtotal by your tax rate to get the grand total.
