

Family Math Engagement Grab & Go: Money Practice

This activity would be
best used by:

Schools Families

Materials:

- Paper and pencil
- Purchase Receipts (or create receipt examples)
- Calculator (parent use)

Steps:

1. Find purchase receipts or create receipts using money amounts that include dollars and cents.
2. Fold the Receipt so the total is hidden from view.
3. Discuss with the child that you add the purchases' amounts, subtract discounts, and add taxes.
4. Your Child will add and subtract money amounts.
5. Check the accuracy of the work using a calculator, if needed.
The child should explain his/her thinking and math process.

Lagniappe:

- Solve real-world problems involving money.
- In fifth grade, students will be able to understand money expressed as a decimal rather than separate units of dollars and cents.
- This is additional practice with money involving decimals used after "Upper Elementary Grab & Go: Money."
