

2024-25 Louisiana Special Education Formal State Complaint Decisions

This document contains a copy of the decisions of each Louisiana special education formal state complaint filed on or between July 1, 2024, and June 30, 2025. Each case filed during the relevant timeframe is included in the informational table below. If a decision has been issued, the decision will appear below. This document is updated at least monthly on the last business day of the month.

If you have any questions or concerns, please contact the Department at DisputeResolution.DOE@la.gov.

Louisiana Special Education Complaint Investigation

45-C-01

LOUISIANA DEPARTMENT OF EDUCATION

August 29, 2024

Scot Hebert
Coordinating Supervisor of Special Education
Vermillion Parish School System
220 South Jefferson Street
Abbeville, LA 70510
scot.hebert@vpsb.net

Re: Findings-Decision in Special Education Formal Complaint No. 45-C-01 on behalf of [REDACTED]

On July 2, 2024, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning the Vermillion Parish School System ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by:

1. failing to comply with district policies and procedures for the use of physical restraint and seclusion by utilizing physical restraint and seclusion under inappropriate circumstances, using inappropriate procedures for implementing physical restraint and seclusion, and failing to provide the Parent with notice of instances of physical restraint and seclusion involving the Student;
2. failing to provide the Student with access to a free and appropriate public education by:
 - Establishing inappropriate annual goals for the Student;
 - Providing the Student with inconsistent access to speech services;
 - Failing to implement an Individualized Health Plan for the Student;
 - Providing the Student with inappropriate specially designed instruction; and,
 - Denying the Student access to appropriate instruction while the Student was removed from [REDACTED] educational placement;
3. failing to provide the Student with a manifestation determination review following a change of placement resulting from the student being subjected to more than ten days of disciplinary removal;
4. failing to place the Student in the least restrictive environment by denying the Student the supplementary aids and services necessary for the Student to be educated in a less restrictive environment; and,
5. failing to ensure the participation of the school nurse in meetings of the Student's Individualized Education Program ("IEP") Team.

The Parent provided a complaint form and a five-page narrative of events. The District provided an eight-

page narrative response and 22 exhibits in response to the complaint. As the Department's assigned investigator, I reviewed the complaint and all documents submitted by the parties. I also conducted phone interviews with the Parent and with representatives of the District.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than one year prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **July 2, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between **July 3, 2023**, and **July 2, 2024**.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school. During the 2023-24 school year, the Student was enrolled in the [REDACTED] and was eligible for special education and related services as a student with autism. The Student's IEP team, which had previously met in February of 2023 to adopt an initial IEP for the Student, met on October 23, 2023 to review and, if necessary, revise the Student's IEP. The Parent participated in the meeting.

The October 2023 IEP included information from an evaluation of the Student which was completed in January of 2023. The evaluation indicated that the Student exhibited developmental delays in the areas of adaptive, social/emotional, cognitive skills, and expressive and receptive language skills. The evaluation also reported deficits in the areas of gross and fine motor skills, sensory processing skills, and articulation skills. The IEP stated that the Student's health needs were considered but were not a concern at the time.

The October 2023 IEP indicated that the Student's behavior at school interfered with [REDACTED] ability to make academic progress. The IEP noted that the school had been using breaks, time in a sensory room, and visual aids to address the Student's undesired behaviors, which included eloping, hitting, and other aggressive behavior. The October 2023 IEP included annual goals for the Student in the areas of self-help, gross motor, early language/AAC, personal responsibility, social/emotional, math readiness, and English/language arts readiness.

In support of the Student's goals, the October 2023 IEP included accommodations for the Student. Related to [REDACTED] social/emotional and self-help goals, the Student was provided access to a sensorimotor room. The IEP also included occupational therapy services for 30 minutes weekly, speech/language pathology services for 30 minutes weekly, adapted physical education for 30 minutes weekly, and special education instruction for 325 minutes daily. All services were to be provided in the special class setting.

Following the adoption of the October 2023 IEP, the Student continued to elope and engage in aggressive behaviors towards others. In the spring of 2024, the District initiated a reevaluation of the Student. On April 11, 2024, the District disseminated the reevaluation report. The report indicated that the evaluation was conducted, in part, to address concerns about elopement and aggression. The evaluator concluded that the Student's elopement and aggressive behaviors were impeding [REDACTED] ability to participate in [REDACTED] educational program. The evaluation report recommended that the Student be provided environmental modifications or adaptations to increase [REDACTED] sensory processing and sensory regulating techniques, which

the evaluation identified as contributing factors to the Student's elopement and aggressive behaviors.

On April 23, 2024, the Student's IEP Team met to review the evaluation report and, if necessary, revise the Student's IEP. The Parent participated in the IEP Team meeting. The IEP stated that the Student had been exhibiting insufficient progress towards the social/emotional goal from the October 2023 IEP, which addressed the Student's ability to follow class rules and participate in cooperative play. The IEP also identified kicking, hitting, biting, and eloping as daily behaviors. The IEP established goals for the Student in the areas of fine motor, peer interactions/sensory processing, gross motor, language, behavior, adaptive, math, and English/language arts. The Student's goals in math and English/language arts were based on the Louisiana content standards for kindergarten students.

The IEP included a number of accommodations, including some setting considerations for the Student. Specifically, the IEP stated that the Student would receive specified seating and would be provided small group instruction. The "Setting Considerations" section also stated that the Student benefited from sensory breaks and that [REDACTED] had access to a "calming center" in the classroom for sensory breaks that allow the student to regulate [REDACTED] sensory overload in order to continue with instructional activities with [REDACTED] peers."

The IEP also included occupational therapy services for 30 minutes weekly, speech/language pathology services for 30 minutes twice a week, adapted physical education for 30 minutes weekly, and special education instruction for 208 minutes daily. All services were to be provided in the special class setting.

Following the April 2024 IEP Team meeting, the District staff responsible for establish the "calming center" utilized a printed copy of the Student's April 2024 IEP to guide their efforts. The printed copy of the IEP did not include the full text description of the "calming center" accommodation due to the limited size of the text box in which it was entered. As a result, District staff were unaware that the "calming center" was supposed to be in the Student's classroom and, instead, set it up in an unused classroom in nearby building.

During the remainder of the 2023-24 school year, the Student was taken to the "calming center" on a number of occasions when the Student exhibited behaviors indicating that the classroom environment was overstimulating. On each occasion, the Student was accompanied by District staff and continued to receive specially designed instruction and related services as identified in the April 2024 IEP, albeit in a different setting than the one identified in the IEP.

The District did not document any instances of physical restraint or seclusion involving the Student during the 2023-24 school year. Each of the District staff members in contact with the Student received training concerning the "Seclusion and Restraint District Policy" in August of 2023, and many of the District staff members working with the Student received training from Crisis Prevention Institute, Inc. in October of 2023 concerning de-escalation and non-violent crisis intervention techniques. Upon questioning by District administrators after the complaint was filed in this matter, staff at the Student's school reported placing a hand under the Student's arm while holding [REDACTED] other hand while transitioning the Student to minimize the risk of elopement or physical aggression. No District staff members reported physically restraining the Student.

The Parent filed the complaint that forms the basis of these findings and decision on July 2, 2024.

Subsequent to the filing of the complaint, the District produced a printed copy of the Student's April 2024 IEP that includes the full text addressing the "calming center." Additionally, the Student's IEP Team met and established more specific parameters for staff-student physical contact and school-to-parent communication protocols concerning the use of the "calming center."

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by:

1. failing to comply with district policies and procedures for the use of physical restraint and seclusion by utilizing physical restraint and seclusion under inappropriate circumstances, using inappropriate procedures for implementing physical restraint and seclusion, and failing to provide the Parent with notice of instances of physical restraint and seclusion involving the Student;
2. failing to provide the Student with access to a free and appropriate public education by:
 - Establishing inappropriate annual goals for the Student;
 - Providing the Student with inconsistent access to speech services;
 - Failing to implement an Individualized Health Plan for the Student;
 - Providing the Student with inappropriate specially designed instruction; and,
 - Denying the Student access to appropriate instruction while the Student was removed from [REDACTED] educational placement;
3. failing to provide the Student with a manifestation determination review following a change of placement resulting from the student being subjected to more than ten days of disciplinary removal;
4. failing to place the Student in the least restrictive environment by denying the Student the supplementary aids and services necessary for the Student to be educated in a less restrictive environment; or,
5. failing to ensure the participation of the school nurse in meetings of the Student's IEP Team.

While the investigation of this case determined that the District did not violate applicable law as alleged by the Parent, the evidence presented established that District did fail to implement the Student's IEP consistent with the IEP developed in April of 2024. The District's failure to provide the Student with a "calming center" within the Student's classroom is addressed in subsection B, below.

A. Restraint and Seclusion

In this case, the Parent alleges that the District failed to comply with its policies and Louisiana law concerning the use of physical restraint and seclusion. However, the record in this case does not support the conclusion that the Student was ever subject to physical restraint or seclusion by the District. Louisiana Bulletin 1706 § 540 defines "physical restraint" as:

- a. bodily force used to limit a person's movement;
- b. does not include:
 - i. consensual, solicited, or unintentional contact;

- ii. momentary blocking of a student's action if said action is likely to result in harm to the student or any other person;
- iii. holding of a student, by one school employee, for the purpose of calming or comforting the student, provided the student's freedom of movement or normal access to his or her body is not restricted;
- iv. minimal physical contact for the purpose of safely escorting a student from one area to another; or
- v. minimal physical contact for the purpose of assisting the student in completing a task or response.

The record does not contain any documentary evidence indicating that the Student was ever subject to interactions with District staff that constituted physical restraint as defined above. Additionally, no District staff were able to recall an instance in which the Student was subjected to physical restraint upon a post-complaint review by the District.

Similarly, the establish facts and relevant law do not support the conclusion that the Student was ever subjected to seclusion. Louisiana Bulletin 1706 § 540(A)(5) defines "seclusion" as "procedure that isolates and confines a student in a separate room or area until he or she is no longer an immediate danger to self or others." Applying this definition to the facts in this case, it is important to note that the Student was never alone in the "calming center." The Student was accompanied by at least one District staff member each time the "calming center" was used. Therefore, the determination of whether the use of the "calming center" constituted seclusion depends on whether the Student was "isolate[d] and confine[d] ... in a separate room" while ■ was in the presence of District staff.

The Department's conclusion is supported by the general structure of Louisiana's regulatory scheme concerning seclusion. Louisiana Bulletin 1706 § 541(F) requires seclusion rooms to have an observation window and be free of any objects that would pose a danger to the student. Both of these requirements appear to presume that a "secluded" student will be alone in the room. Louisiana Bulletin 1706 § 541(D) refers to a student being "placed in a seclusion room" and subsection (E) requires that a school employee be able to see and hear the student at all times. Read as a whole, the body of Louisiana regulations concerning seclusion lead to the conclusion that "seclusion," as defined by Louisiana regulation, requires that a student be placed in a room without accompaniment. That was not the case in this matter; therefore, the Department concludes that the Student was not subjected to seclusion when ■ was relocated to the "calming center."

Because the Student was not subjected to restraint or seclusion, the District was not required to implement its procedures for the use of those interventions. The Department concludes that the allegation that the District failed to comply with applicable law concerning the use of physical restraint or seclusion is unsubstantiated.¹

¹ The analysis of the issue in this section intentionally avoided acknowledgement of the fact that "calming center" was not being implemented consistently with the Student's IEP. The purpose of that avoidance was to allow for analysis of the allegation concerning physical restraint and seclusion without drawing focus from the actual circumstances of the District's use of the "calming center." Issues arising from the mis-implementation of the

B. Provision of Services, Manifestation Determination Review, and Least Restrictive Environment

The majority of the Parent's allegations relate to a set of circumstances occurring near the end of the 2023-24 school year. Specifically, the allegations relate to the use of the "calming center" for the Student and the Parent's contention that the use of the "calming center" constituted a disciplinary removal of the Student and, therefore, warranted the application of the disciplinary procedural safeguards. Many of these allegations fail for the same reason – because the use of the "calming center" did not constitute a disciplinary removal.

The conclusion that the District's use of the "calming center" did not constitute a disciplinary removal is based on two main considerations. Firstly, the "calming center" was identified in the Student's IEP as a setting-based, therapeutic intervention for times when the Student was experiencing difficulty regulating [REDACTED] behavior in primary classroom. Secondly, the District ensured that the Student continued to receive services consistent with [REDACTED] IEP in the "calming center."

The record in this case contains no indication that the Student's relocation to the "calming center" was a District-imposed consequence for the Student's behavior. The "calming center" was identified in the Student's IEP as a location in which the Student could experience reduced sensory stimuli. The District's use of the "calming center" between April of 2024 and the end of the 2023-24 school year were consistent with this purpose – to provide the Student with an alternative instructional environment when the classroom environment was interfering with the Student's ability to participate in educational activities.

Additionally, the record supports the conclusion that the District provided services to the Student consistent with the IEP while [REDACTED] was in the "calming center." The April 2024 IEP called for the full provision of services to the Student in the "calming center," and the District's delivery of services to the Student in the "calming center," with the exception of the delivery location, was consistent with the IEP.

Because the "calming center" was documented on the Student's IEP as a setting-based intervention intended to provide the Student a less sensory-stimulating environment, was not utilized as a disciplinary consequence, and did not deny the Student to access to educational services consistent with the IEP, the Department concludes that the use of the "calming center" did not constitute a disciplinary removal. Therefore, the Department must also conclude that the Parent's allegations concerning the District's failure to provide speech-language pathology and special education services and failure to convene a manifestation determination review are unsubstantiated.

The Department also concludes that the allegation that the District failed to comply with the requirements of least restrictive environment is unsubstantiated. The Department's analysis of this issue did not rely on the actual location of the services to the Student – a room located in another building from the Student's classroom. Instead, the analysis focused on the placement determination which resulted from the April 2024 IEP Team meeting. At that meeting, the team agreed that the "calming center" would be a space within the Student's classroom. Therefore, the Student receipt of services in another building was not a violation of the requirements of least restrictive environment; it was a simple failure to properly implement the educational plan developed at the April 2024 IEP Team meeting.

"calming center" are addressed in the following section.

While the misplacement of the “calming center” was not intentional, it did result in the Student receiving services in a location that was materially different than the one anticipated by the IEP Team and, consequently, noncompliance with a core tenet of special education – that students be provided services consistent with their IEPs. Corrective actions relative to this instance of unintended noncompliance are identified in Section IV, below.

C. IEP Content: Annual Goals and Individualized Health Plan

Pursuant to Louisiana Bulletin 1706 §320(A), each student’s IEP is required to contain a statement of measurable annual goals that are designed to meet the student’s needs that result from the student’s disability to enable the student to be involved in and make progress in the general education curriculum. Pursuant to Louisiana Bulletin 1706 §324(A), the IEP Team, when developing an IEP, must also consider health needs of students with disabilities to be met during the school day. In this case, the Parent alleges that the Student’s annual goals were inappropriate and that ■ was not provided an Individualized Health Plan during the 2023-24 school year.

The Parent’s allegations concerning goals are unsupported by the record. The goals in the Student’s October 2023 IEP and April 2024 IEP were reasonably related to the needs of the Student as identified in District-administered evaluations and medical information provided to the District. The Parent argued that the goals identified in the Student’s IEPs overemphasized social and emotional goals over academic goals. This argument is not supported by the record.

The Student’s October 2023 IEP was intended to be implemented only during the Student’s enrollment in a preschool program. Considering the lack of a fixed academic curriculum for preschool programs in Louisiana and the consistency of the Student’s goals with the needs identified in ■ January 2023 evaluation, the Department concludes that the goals on the Student’s October 2023 IEP, which included goals in math and English readiness, were reasonably calculated to address the needs of the Student as a preschooler.

The Department also concludes that the goals contained in the April 2024 IEP were appropriate. The April 2024 IEP, the implementation of which would extended into the Student’s kindergarten enrollment, amended the academic goals of the Student to ensure that they were in line with the kindergarten curriculum and retained goals in the other areas of need identified through prior evaluation and progress monitoring of the Student. The Department concludes that those goals were reasonably calculated to provide educational benefit to the Student and that the Parent’s allegation that the District failed to identify appropriate goals for the Student is unsubstantiated.

The Parent’s allegation concerning an Individualized Health Plan for the Student is similarly unsupported. The Department concludes that the District acted appropriately in its efforts to identify and address the medical needs of the Student. The IEP Team’s decision to forego a health goal or an Individualized Health Plan at the October 2023 IEP Team meeting was reasonable based on the information available. Neither the medical records submitted to the District in October of 2022 nor the Student’s January 2023 evaluation indicated that the Student had a heightened risk of requiring medical care during the school day. At the October 2023 meeting, the Parent did not raise any particular concerns about the Student’s health needs.

Based on the absence of any documented need health-based services at school and the lack of any particular parental concerns, the Department concludes that the District's failure to incorporate an Individualized Health Plan in the Student's October 2023 IEP was not a violation of the applicable laws.

New information about the Student's health was provided to the District at the time of the Student's April 2024 evaluation. The provided medical records indicated that the Student was taking medicines at home related to specific medical diagnoses. Based on that information and the lack of material change to the Student's medical needs at school, the evaluation recommended that no health plan be adopted at the time. Correspondingly, the April 2024 IEP Team reasonably determined that neither a health goal nor a health plan were required for the Student and that the Student's health needs would continue to be monitored. The Department concludes that the April 2024 IEP Team's actions were consistent with the law and that the Parent's allegation concerning the District's failure to provide an Individualized Health Plan is unsubstantiated.

D. IEP Team Composition

The Parent alleges that the District violated applicable law by failing to include a school nurse in the Student's IEP Team meetings. Louisiana Bulletin 1706 § 321 provides regulations concerning the composition of IEP Teams. Nothing in that provision specifically requires that a school nurse be present at an IEP Team meeting. However, Louisiana Bulletin 1706 § 321(A)(6) and (C) provide for school districts and parents to invite other individuals with "knowledge or special expertise regarding the student, including related service personnel as appropriate" to IEP Team meetings. In this case the Parent alleges that the absence of the school nurse at the Student's IEP Team meetings constituted a violation of law. As a potential related service provider to the Student, the nurse would need to be invited to the meeting as someone with "knowledge or special expertise regarding the student." Given the absence of any school-based medical needs by the Student and consistent evaluation recommendations that the Student's health needs at school did not require an individualized health plan, the District's failure to invite the nurse to the Student's October 2023 and April 2024 IEP Team meetings was reasonable. The Parent's allegation – that the absence of a school nurse from the Student's IEP Teams was a violation of law – is unsubstantiated.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IV. Corrective Action Plan

The competent evidence considered during the formal complaint investigation proved that the District failed to properly implement the Student's IEP. Specifically, the District did not properly implement the Student's "calming center" accommodation due to miscommunication. In order to ensure that such noncompliance does not recur:

- By no later than **October 4, 2024**, the District shall review and, if necessary, revise its policies and/or procedures addressing how the District ensures that each individual who is responsible for the implementation of IEPs within the District is informed of his or her obligations for IEP implementation; and,
- By no later than **October 7, 2024**, the District shall submit to the Department evidence that policies and/or procedures were reviewed and, if necessary, revised to ensure that all District staff who are responsible for the implementation of IEPs within the District are informed of their related obligations, including evidence that any revised policies and/or procedures were distributed to all District staff who are responsible for the implementation of IEPs.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. 45-C-02 on behalf of [REDACTED]

On July 3, 2024, [REDACTED] (hereinafter referred to as the "Parents") filed a Request for Special Education Formal Complaint Investigation concerning the Allen Parish School Board ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parents' minor child [REDACTED] ("the Student"), the Parents alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to conduct an evaluation that was completed timely and evaluated the Student in all areas of suspected disability, and 2) failing to conduct an eligibility determination within the prescribed timeline and to have all required participants at the eligibility determination.

The Parent provided a complaint request form, a five-page narrative, and 28 documentary exhibits. The District provided a five-page narrative and 17 documentary exhibits in response. As the Department's assigned investigator, I reviewed the complaint and all documents submitted by the parties. I also conducted phone interviews with the Parents and a representative of the District.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than one year prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on July 3, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between July 4, 2023, and July 3, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school. During the 2021-22 school year, the Parents requested an evaluation of the Student to determine if [REDACTED] was eligible for special education and related services as a student with a disability. The District conducted the evaluation and issued the evaluation summary report in January of 2022.

The evaluation report indicated that the Student was [REDACTED] and was [REDACTED]. The Student was referred for evaluation due to parental concerns about the Student's diagnoses of Autism

Spectrum Disorder, Sensory Integration Disorder, Attention Deficit-Hyperactivity Disorder, and Seizure Disorder and concerns about the Student's social/emotional development and academic performance. The evaluation consisted of a review of screening activities, a review of cumulative records, a review of interventions, a student interview, student observations, a family interview, a teacher interview, a developmental assessment, an educational assessment, an occupational therapy assessment, a review of medical information, a behavioral assessment, the Student's present levels of functioning, and a discrepancy statement.

Screening activities indicated that the Student was at risk only in the area of health, and cognitive and achievement testing indicated that the Student was performing in the average ranges for all measured domains. Similarly, the Student's academic performance data indicated that ■■■ was performing satisfactorily in all subject areas other than reading, in which the Student was assigned a "D" grade for the second grading period of the 2021-22 school year. The Student had performed similarly during the 2020-21 school year, earning satisfactory grades in all subject areas other than reading, which ■■■ failed. The evaluation report indicated that excessive absences by the Student likely contributed to ■■■ poor academic performance in reading. An evaluation of the Student's early literacy skills indicated that she would continue to benefit from interventions in the area of reading. A classroom observation of the Student found ■■■ to be on task for 97% of the instructional time.

The January 2022 evaluation included an interview with one of the Parents in which information was provided about the Student's medical and behavioral needs. The Parents reported that the Student had not experienced any seizure activity in approximately a year and that ■■■ was administered some medications at home. The Parents also reported that the Student experienced difficulties regulating ■■■ behavior at school and that ■■■ undesired behaviors occur more frequently at home than at school. An interview with the Student's teacher confirmed that the Student's academic performance and behavior in class were consistent with that of ■■■ classmates and that ■■■ did not suspect that the Student was a student with dyslexia.

The remaining components of the evaluation also demonstrated that the Student was functioning at or above the level of ■■■ same-aged peers. The developmental assessment and occupational therapy assessment both indicated that the Student was progressing adequately in those domains. The behavioral assessment indicated a wide disparity between the Student's behavior at home and at school. The Parent interview portion of the behavioral assessment indicated that the Student exhibited a number of clinically significant behaviors, while the teacher interview portion indicated that the Student exhibited a handful of behaviors that were clinically significant or at-risk of becoming clinically significant but that she considered most of the Student's behaviors to be in the normal range.

The evaluation report indicated that the Student likely did not meet the eligibility requirements for special education and related services because the Student's educational performance was not being adversely affected by the Student's disabling conditions. The evaluation report considered the Student's eligibility under both the autism and other health impairments categories and found that the Student did not meet the requirements for either based on the lack of an adverse impact on ■■■ educational performance. On January 10, 2022, the District convened a meeting to determine the Student's eligibility for special education

and related services. One of the Parents participated in the meeting, where it was determined that the Student was not eligible for the same reasons articulated in the January 2022 evaluation report – because [REDACTED] disabilities did not impact the Student’s ability to access the general education curriculum. The Student was also referred to the school-based 504 team to determine [REDACTED] eligibility for accommodations under Section 504 of the Rehabilitation Act of 1973.

Based on the outcome of the January 2022 evaluation, the Parents requested an Independent Educational Evaluation (“IEE”) at District expense. The IEE was completed by evaluation staff from a neighboring public school district. The IEE summary report was disseminated in November of 2022, shortly after the Student began the second grade.

The findings of the November 2022 IEE were substantially similar to those of the January 2022 evaluation. With performance and assessment data indicating that the Student was performing in the average range of nearly all domains measured. The report indicated that the Student’s academic performance remained above average, with no grade lower than a “B” in the first term of second grade. The Parents continued to report low functioning by the Student at home. Staff interviews indicated that the Student’s ability to self-regulate in the classroom had improved and that the Student functioned adequately in the classroom. The IEE concluded that the Student did not “exhibit reduced efficiency in [REDACTED] school work related to [REDACTED] diagnoses,” and determined that the Student was likely not eligible for special education and related services on that basis.

On November 10, 2022, a meeting was convened to determine the Student’s eligibility for special education and related services under the eligibility classification of autism or other health impairment. One of the Parents participated in the meeting, where it was determined that the Student was not eligible for the same reasons articulated in the November 2022 IEE report – lack of adverse educational impact. The IEE recommended that the Student continue to receive academic interventions and accommodations pursuant to an Individualized Accommodation Plan.

In the spring semester of the 2023-24 school year, the Student was again evaluated by the District at the request of the Parents. Parental consent to evaluate the Student was granted on September 15, 2023. The evaluation summary report was disseminated on April 8, 2024, while the Student was an [REDACTED] enrolled in the [REDACTED]. The Parents specifically requested that the Student be administered a psychoeducational evaluation to address parental concerns about the impacts of the Student’s medical diagnoses, which consisted of the same diagnoses identified in the January 2022 evaluation along with new diagnoses of insomnia and depression.

On November 28, 2023, the District sent the Parents a request to extend the timeline for the completion of the Student’s evaluation due to complications coordinating with the independent psychological evaluator. An independent psychologist was used at the request of the Parents. The Parents consented to the extension.

The evaluation consisted of a review of screening activities, a review of previous evaluations, a review of cumulative records, a review of interventions, a student interview, student observations, a family interview, a teacher interview, an educational assessment, a review of psychological assessment, an adaptive behavior

assessment, a behavioral assessment, an autism assessment, a speech/language assessment, an occupational therapy assessment, a review of medical information, a health assessment, the Student's present levels of functioning, and a discrepancy statement.

Screening activities indicated that the Student was at risk in the areas of health, assistive technology, social/emotional/behavior, educational, and attention deficit-hyperactive disorder; each of those areas were addressed in the evaluation. Cognitive and achievement testing indicated that the Student was performing in the average ranges for all measured domains. Similarly, the Student's academic performance data indicated that ■■■ was performing satisfactorily in all subject areas, earning no grade lower than a "C" in second grade and maintaining "C" grades or better during third grade. The Student's performance on a measure of early literacy skills again showed that ■■■ was experiencing deficits and required literacy interventions, with the evaluator recommending a continuation of the Student's supported instruction. The evaluator's review of the interventions provided to the Student found that they had been implemented with fidelity, including the literacy interventions of one-to-one assistance and an additional 30 minutes of scaffolded instruction.

The findings of the psychoeducational evaluation of the Student, which was conducted by a private provider at the District's expense, was substantially similar to those of the prior evaluation and IEE. The evaluation found that the Student exhibited characteristics of autism spectrum disorder and attention deficit-hyperactive disorder. The evaluation found that the Student's cognitive abilities were in the average or high average range in all domains. The evaluation also found that the Student's academic performance was average or low average in most domains but that the Student demonstrated a relative weakness in activities related to reading.

The psychoeducational evaluator noted that the Student's reading deficits likely warranted consideration of whether the Student had a specific learning disability in basic reading skills. The evaluator also stated that the Student appeared to meet the criteria to be found eligible for special education and related services under the categories of other health impairment – related to the Student's insomnia and attention deficit-hyperactive disorder – and autism. The evaluator recommended that the Student receive small group or one-to-one interventions in reading and identified a number of other accommodations intended to mitigate the effects of the Student's disability-related skill deficits at school.

On February 26, 2024, the District contacted the Parent to schedule an eligibility determination meeting. On March 11, 2024, a meeting was held to consider the Student's eligibility for special education and related services. Prior to the meeting the Parents were provided with a copy of the evaluation summary report. The Parents attended the meeting along with an advocate. Five members of the District's pupil appraisal team also attended. The private psychologist that conducted the psychoeducational portion of the 2024 evaluation indicated that she planned to attend the meeting but was unable to be contacted at the time of the meeting. The meeting did not result in an eligibility determination, and the District agreed to make some requested amendments to the evaluation report and the schedule a follow-up meeting.

On March 28, 2024, the eligibility team met again with the same participants. The school nurse left prior to end of the meeting. The private psychologist was again unavailable to participate in the meeting, the date

of which was selected to accommodate the Parents' schedule. The team determined, over the objection of the Parents, that the Student was not eligible for special education and related services. In total, the eligibility determination meetings lasted approximately eight hours.

Following the meeting, the District provided the parent with a *Prior Notice of Proposed or Refused Action* explaining the eligibility team's reasoning. The notice identified the information reviewed by the team, which included Response to Intervention data; screening results; existing data inclusive of educational history, academic performance, and cumulative records, previously conducted evaluations; information provided by the Student and the Student's family and teachers; student observations, educational, adaptive behavior, autism, speech/language, and occupational therapy assessment results; educational evaluation results from an outside provider; and medical information. The notice stated that the team found that the Student was not eligible under the categories of autism, specific learning disability, or other health impairment because [REDACTED] educational performance was not adversely impacted by [REDACTED] disability-related needs. The notice also stated that the team had determined that the Student did not meet the category-specific requirements for eligibility under the categories of autism or specific learning disability.

The recommendations contained in the evaluation were shared with the Student's 504 Team and were incorporated into the Student's Individualized Accommodation Plan.

On July 3, 2024, the Parents filed the complaint that forms the basis of these findings and decision.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by 1) failing to conduct an evaluation that was completed timely and evaluated the Student in all areas of suspected disability, or 2) failing to conduct an eligibility determination within the prescribed timeline and to have all required participants at the eligibility determination.

Timely and Comprehensive Evaluation

The Parents allege that the District's 2024 evaluation was not completed timely and that it was not comprehensive. These allegations are not supported by the facts or law presented in this case.

Louisiana Bulletin 1706 § 302(C)(1)(a) requires school districts to complete initial evaluations within 60 business days of receiving parental consent. Approximately 110 business days passed between September 15, 2023 – the date that the Parents provided consent for the evaluation – and February 26, 2024 – the date that the District began attempting to schedule a meeting to review the evaluation and determine the Student's eligibility. However, the Parents consented to a 60-day extension of the evaluation timeline to provide sufficient time for coordination and completion of the independent psychoeducational evaluation. Taking into account that extension, the District completed the evaluation – from parental consent to provision of the evaluation report to the Parents – within the extended timeline. Therefore, the Department concludes that the allegation that the District failed to timely complete the 2024 evaluation of the Student is unsubstantiated.

Louisiana Bulletin 1706 § 305(C)(4) requires that students under evaluation be assessed in all areas related

to suspected disability. In this case, the Parents allege that the District failed to evaluate the Student in all areas of suspected disability. However, the facts of this case do not support that allegation. The most recent evaluation of the Student – the only one which took place during the relevant look-back period of this complaint – considered a wide array of information about the Student. The review included previously existing information about the student, such as screening activities, prior evaluations, cumulative records, and interventions provided to the Student, and newly gathered information about the Student, such as a student interview, student observations, a family interview, a teacher interview, an educational assessment, a review of psychological assessment, an adaptive behavior assessment, a behavioral assessment, an autism assessment, a speech/language assessment, an occupational therapy assessment, and a health assessment. The evaluators considered information about the Student relative to the legal classifications of autism, other health impairment, and specific learning disability.

Based on the information provided in connection with this complaint, the Department is unable to identify any areas of suspected disability in which the Student was not assessed during the 2023-24 evaluation. Moreover, the 2023-24 evaluation was substantially similar, in scope and in results, to the two prior evaluations of the Student. Each of those evaluations reached similar conclusions about the Student's cognitive functioning and ■ academic achievement and functional performance. Considered together, the similarity of the three evaluations serves as cross-validation of the results reached therein and leads to the conclusions that the District's 2023-24 evaluation of the Student was comprehensive. Therefore, the Parents' allegation that the District failed to conduct a comprehensive evaluation of the Student is unsubstantiated.

Timely and Properly Staffed Eligibility Determination

The Parents allege that the District's March 2024 eligibility determination was not completed timely and that it was not made by a team that was properly composed. These allegations are not supported by the facts or law presented in this case. Louisiana Bulletin 1706 § 307 establishes procedures for determining whether a student is eligible for special education and related services as a student with a disability but does not establish a timeline for the completion of eligibility determinations. Louisiana Bulletin 1706 § 307(A)(1) requires that the group that determines a student's eligibility be comprised of qualified professionals and the parent of the child.

In this case, the District began making efforts to convene an eligibility determination beginning on February 26, 2024. Those efforts resulted in multiple eligibility determination meetings being held over several weeks. The final meeting, on March 28, 2024, resulted in the determination that the Student was ineligible. In the absence of a specific timeline for the completion of eligibility determinations, the Department must evaluate the reasonableness of the District's efforts to complete the eligibility determination. Under the present facts, the Department concludes that the District's efforts to complete the eligibility determination were reasonable and did not result in any undue delay. Therefore, the Parents' allegation that the District failed to conduct a timely eligibility determination for the Student is unsubstantiated.

The Parents also allege that the District failed to have appropriate staff at the eligibility determination meetings. Specifically, the Parents allege that the District erred by failing to include the private evaluator

and the school nurse in the eligibility determination. As described in Louisiana Bulletin 1706 § 307(A)(1), the group of professionals conducting an eligibility determination should possess the relevant information and expertise to determine the student's eligibility and the educational needs of the student. In this case, the Student's eligibility determination meetings were attended by a group of five members of the District's pupil appraisal team that had participated in the Student's evaluation. One of those members, the school nurse, left the third meeting of the team prior to the end of the meeting. Nonetheless, the Department concludes that the team that considered the Student's eligibility was properly composed. Specifically, the Department concludes that the presence of the private evaluator was not necessary due to the comprehensive nature of her evaluation report, which provided sufficient information for the eligibility team to make the relevant determination without the private evaluator's in-person participation in the meetings. Similarly, the Department concludes that the school nurse's absence from a portion of the eligibility determination process did not adversely impact the eligibility determination team's ability to address the issues before it, particularly because the Student's educational performance was the key consideration in determining that the Student was not eligible. Therefore, the Department finds Parents' allegation that the District failed to properly staff the Student's eligibility determination meeting is unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. 45-C-03

Dear Jannean Dixon and Dr. Harris:

On August 14, 2024, the Louisiana Department of Education received a copy of a Notice to LDOE of Formal ERP Status Form, which indicated that the parties to this formal complaint reached a mutually agreeable settlement and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 45-C-03. No further action is required by either party.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. 45-C-07 on behalf of [REDACTED]

On August 14, 2024, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning the Noble Minds Institute for Whole Child Learning ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 (1) by failing to provide the Student with access to a one-to-one paraprofessional for support and (2) by failing to provide the Student with assistance related to his toileting needs and dietary restrictions.

The Parent provided a complaint form and seven exhibits, consisting of two photographs and five screenshots of correspondence with District staff. The District provided a four-page narrative response and three exhibits in response to the complaint. As the Department's assigned investigator, I reviewed the complaint and all documents submitted by the parties. I also conducted phone interviews with the Parent and with representatives of the District.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than one year prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on August 14, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between August 15, 2023, and August 14, 2024.

II. Findings of Fact

The Student was enrolled in a [REDACTED] at a public school outside of the District for the 2023-24 school year. The Student has been identified as a student with a disability in 2022, and he received services pursuant to an Individualized Education Program ("IEP"). An IEP was developed for the Student on April 4, 2024 (referred to hereinafter as "the April 2024 IEP").

The April 2024 IEP included information about the Parent's concerns. The IEP stated that the Parent was concerned about the Student's toileting skills, including the school's "lack of support for potty training." The IEP also stated that the Student's most recent evaluation, which was completed on February 29, 2024,

indicated that the Student required assistance with completing self-care tasks independently. The IEP included an objective for the Student in the area of self-care, grooming, and hygiene skills.

The April 2024 IEP indicated that the Student exhibited a number of disruptive behaviors, including elopement and physical aggression, at school in order to avoid unwanted tasks. The IEP stated that the Student received accommodations, individualized behavior interventions, and one-to-one paraprofessional support to address his behavioral needs.

The April 2024 IEP stated that the Student was performing comparably to same-aged peers in academic subjects. The IEP indicated that the Student spent most of his academic day in the general education classroom and that he was pulled out of the classroom to receive special education instruction and related services. The Student received special education instruction in a special classroom setting for 30 minutes twice a week and was supported in all settings by a one-to-one paraprofessional. The IEP also indicated that the Student was provided a number of classroom accommodations and that the Student's assignments were modified.

At the end of the 2023-24 school year, the Student was admitted to the District as a kindergarten student for the 2024-25 school year through the local school board's centralized enrollment process. On August 5, 2024, the Student's prior school district released jurisdiction of the Student in the Department's centralized special education record-keeping system. On August 7, 2024, the Parent attended an open house at the District and informed District staff that the Student required toileting assistance and had a restricted diet. On August 8, 2024, the District obtained jurisdiction of the Student through the Department's centralized special education record-keeping system.

On August 9, 2024, the Parent communicated with District staff concerning the availability of a one-to-one paraprofessional for the Student. The District informed the Parent that the Student would be assigned to a resource classroom which was staffed with three teachers and included approximately six students. The District indicated that the level of supervision in that setting would be appropriate for the Student.

On the morning of August 12, 2024, the Parent communicated to the resource room teacher that the Student would arrive to school with lactose-free milk and that he would be wearing a diaper and had five additional diapers in his book bag. The administrator confirmed that the Student's milk would be refrigerated and expressed gratitude for the information about the Student's diapers.

On August 12, 2024, the Student attended school in the resource room. Throughout the day, the Student was observed by the District's special education coordinator to determine the appropriateness of the setting. The coordinator observed that the Student was able to complete grade-level assignments with support, that his social interactions and behavior in class were appropriate, and that he accessed classroom facilities – including the restroom – independently. Based on these observations, the coordinator recommended that the Student be observed in a regular education setting on the next school day.

On August 13, 2024, the Student attended school in the general kindergarten classroom. The Student was again observed behaving, socializing, and using classroom facilities appropriately. The Student was

recognized at the end of the day for exemplary behavior and task completion. Based on these observations, the District determined that additional evaluation data was needed to identify the Student's current levels of performance.

Following the end of the school day on August 13, 2024, the Parent emailed District staff stating that the Student had experienced behavior incidents at school and on the school bus and that he arrived home from school in a soiled diaper. District staff informed the Parent that staff in the general education classroom were unaware of the Student's need for assistance with toileting, that the Student was observed accessing the restroom appropriately, and that the Student did not inform anyone of a soiled diaper. District staff also stated that current District staffing was not sufficient to assist the Student with diaper changing; specifically, that the District would need to make arrangements to obtain properly-trained staff to provide toileting assistance. District staff also requested that the Parent provide medical documentation of the Student's need for toileting assistance and indicated that the District planned to consult with the Louisiana Department of Children and Family Services about the appropriate procedures for providing assistance to the Student. The Parent agreed to provide medical documentation.

Later on August 13, 2024, the Parent informed the District that the Student was unenrolled from the District.

The Parent filed the complaint that forms the basis of these findings and decision on August 14, 2024.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 (1) by failing to provide the Student with access to a one-to-one paraprofessional for support or (2) by failing to provide the Student with assistance related to his toileting needs and dietary restrictions.

In this case, the Student was newly admitted to the District and had attended a public school under the jurisdiction of another public agency during the 2023-24 school year. Louisiana Bulletin 1706 § 323 states that "[a]t the beginning of each school year, each public agency shall have in effect, for each student with a disability within its jurisdiction, an IEP." The Parent alleges that the District failed to comply with this provision by failing to provide the Student with access to a one-to-one paraprofessional and support for his toileting and dietary needs.

While the record in this case contains evidence that the District was uncertain of how best to support the Student, the evidence does not support a finding of noncompliance. The District first received information about the Student's disability-related needs on August 8, 2024, when the District received the Student's April 2024 IEP. The IEP indicated that the Student required one-to-one support at all times and that the Student required unspecified assistance with toileting. The IEP contained no indication that the Student's diet was restricted. On August 12, 2024, the first day of school, the District learned of the Student's dietary restrictions when the Parent notified District staff that the Student had brought lactose free milk to school.

Based on this information, the District placed the Student in an age-appropriate resource room on the first day of school to ensure that the Student received sufficient one-to-one support. While the resource room

was not staffed with a paraprofessional that was dedicated to the Student, the setting provided sufficient supervision with three adults supervising only six students. The resource room teachers were aware of the Student's dietary needs and that the Student was wearing a diaper, and the Student was observed attending to self-care needs appropriately throughout the day. Given the limited information available to the District and the short time-frame available to adjust staffing levels, the Department concludes that the District's placement and provision of services to the Student on August 12, 2024, were appropriate diagnostic measures that did not deny the Student access to a free and appropriate public education.

Based on the Student's exemplary performance on the first day of school, the District chose to observe the Student in a general educational setting on the second day of school. While the supervision level was reduced in the general education classroom, the Student again functioned appropriately, attending to his self-care needs independently. The Student did experience a toileting accident on the afternoon bus ride. For reasons similar to those stated above, the Department concludes that the placement and services provided to the Student on August 13, 2024, were appropriate.

On August 13, 2024, the District was confronted with conflicting information about the Student's functional performance. The April 2024 IEP indicated that the Student required significant supervision in order to perform in a general education setting; however, the District's observation of the Student on the first day of school indicated that the Student could perform adequately in a general education classroom with lower levels of support than indicated in his IEP. His placement on August 13, 2024, like the August 12 placement, was diagnostic in nature, and was substantially similar to the placement identified in the April 2024. Moreover, the record indicates that the Student was able to access the general education curriculum in the general education setting with the supports provided.

Furthermore, the record does not support the conclusion that the District's failed to adequately address the Student's dietary and toileting needs. The record contains no indication that the District failed to address the Student's dietary needs. The District was first made aware of the dietary restrictions on August 12, 2024, and the District's response indicated that the District intended to support the Student's dietary needs. Also, the record contains no evidence that the Student ingested any restricted items while at school.

The Student did experience a toileting accident at school; however, the Department concludes that the accident was not the result of noncompliance on the District's part. While the Student's IEP included several indications that the Student required toileting assistance and the Parent contacted the District on the first day concerning the Student's use of diapers, the District was unaware that the Student required assistance with diaper changing until the Parent emailed the District following the school day on August 13, 2024. Correspondence between the District and the Parent on the evening of August 13, 2024, indicated that the District would make arrangements to provide for the Student's newly-understood toileting needs. However, the Student was unenrolled before any such arrangements could be made.

Considered as a whole, it is clear that the placement and services provided to the Student by the District were not identical to the services that the Student was receiving at his prior school. The Student was not provided with access to a one-to-one paraprofessional and did not receive assistance with a toileting accident on the bus. However, the Department concludes that the actions taken by the District between

August 8, 2024, and August 13, 2024, reflect a reasonable course of actions given the relatively short notice and limited information available to the District.

Because the District provided the Student with services that were substantially similar to those in the April 2024 IEP and those services were reasonably calculated to provide educational benefit to the Student, the Department concludes that the allegations that the District violated applicable laws by failing to provide the Student with access to a one-to-one paraprofessional for support and by failing to provide the Student with assistance related to his toileting needs and dietary restrictions are unsubstantiated.

IV. Corrective Action Plan

The Department determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby terminated and no additional action is required by the Complainant or the District.

Sincerely,

Re: Findings-Decision in State Special Education Formal Complaint No. 45-C-09 on behalf of [REDACTED]

On August 22, 2024, [REDACTED] (hereinafter referred to collectively as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning the East Baton Rouge Parish School System ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Student with required transportation services from August 9, 2024, through August 20, 2024.

The Parent provided a two-page complaint form. The District provided a two-page narrative response and six documentary exhibits. As the Department's assigned investigator, I reviewed the complaint, the District's response, and all materials submitted by the parties. I also conducted a phone interview with a representative of the District.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than one year prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on August 22, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between August 23, 2023, and August 22, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was eligible for special transportation services pursuant to an Individualized Education Program ("IEP").

The 2024-25 school year began on August 8, 2024. On August 15, 2024, the Parent contacted the Department to report that the Student had not received transportation services from the District

during the 2024-25 school year. The matter was referred to the District. On that same date, a representative of the District attempted to speak with the Parent. The Parent informed the District that the Student was not receiving special transportation services, and the District undertook actions to establish special transportation for the Student.

On August 20, 2024, the District began providing transportation services to the Student.

After the filing of the complaint, the District made unsuccessful efforts to contact the Parent to discuss the resolution of the complaint. The District also sought to establish a timeline with the Parent for the delivery of compensatory education services related to the Student's absences from August 8, 2024, through August 20, 2024. The District also determined that the failure to provide transportation services for the Student resulted from an administrative error related to a school transfer, and the District established processes to ensure that similar errors did not recur.

III. Conclusions of Law

Upon review of the information provided, the Department concludes that the District failed to comply with the requirements of Louisiana Bulletin 1706 by failing to provide the Student with required transportation services from August 8, 2024, through August 20, 2024.

Louisiana Bulletin 1706 § 323 requires school districts to ensure that all students with disabilities are provided services pursuant to an IEP at the beginning of each school year. In this case, the District did not provide the Student with transportation services from August 8, 2024, through August 20, 2024. Therefore, the Department finds that the allegation that the District violated applicable law by failing to provide transportation services to the Student is substantiated.

IV. Conclusion

The Department determined that the District failed to comply with applicable law concerning the delivery of services pursuant to an IEP. The District first identified the noncompliance on August 15, 2024, and promptly took action to initiate transportation services and to ensure that the administrative error did not recur. Additionally, the District has attempted to coordinate the delivery of compensatory services to the Student.

In order to ensure full correction this noncompliance, the District shall implement the following corrective actions:

1. On or before **October 25, 2024**, the District and the Parent shall meet to develop a plan of compensatory services to be provided to the Student. The plan shall provide for the delivery of all services prior to January 10, 2025.
2. On or before **October 28, 2024**, the District shall submit to the Department a plan of corrective actions that has been approved by the Parent. If the Parent and the District are

unable to agree on a plan, the District shall submit a proposed plan of corrective action for approval or amendment by the Department.

3. Upon completion of the delivery of services pursuant to the plan of corrective action and by no later than **January 10, 2025**, the District shall provide evidence of completion, such as service logs, to the Department.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. 45-C-12 on behalf of [REDACTED]
[REDACTED]

On August 26, 2024, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning [REDACTED] ("the District"), a Type 2 charter school, with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child of [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to properly respond to parental requests to meet to review and revise the Student's Individualized Education Program ("IEP") based on new information provided by the Parent and 2) failing to consider independent educational evaluation data provided by the Parent.

The Parent provided a complaint request form, a one-page narrative, and 35 pages of documentary exhibits. The District provided a five-page narrative and 12 documentary exhibits in response. As the Department's assigned investigator, I reviewed the complaint and all documents submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on August 26, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between August 27, 2022, and August 26, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled in the District. During the 2023-24 school year, the Student was enrolled in the [REDACTED] and received special education and related

services pursuant to an IEP.

On May 24, 2023, the District issued an *Integrated Report of Individual Evaluation* concerning the Student. The report indicated that, over the prior eight months, the Student had been screened in the areas of vision, hearing, health, educational, speech and language/communication, gross motor, assistive technology, sensory processing, and social/emotional/behavioral. The Student was determined to be “at risk” in the areas of educational, speech and language/communication, and assistive technology. The evaluation consisted of teacher interviews, a review of academic performance, a student interview, and a 15-minute observation of the Student. The evaluation determined that the Student qualified for special education and related services as a student with a specific learning disability.

On May 24, 2023, the Student’s IEP Team met to develop an IEP. The IEP included annual goals in the areas of language, mathematics, written expression, and reading. The IEP indicated that the Student would attend all academic classes in the regular setting and that ■■■ would receive 90 minutes of special education instruction daily.

During the 2023-24 school year, the Parent developed concerns about the Student’s academic progress and the Student’s inability to recount school activities when at home. In February of 2024, the Parent obtained a private psycho-educational evaluation of the Student. The evaluation found that the Student had difficulty learning at the pace of ■■■ peers, following instructions, and providing information about ■■■ school activities. The evaluation included measures of the Student’s intellectual functioning, academic achievement, oral language skills, adaptive behavior skills, and behavior. Following administration of the measures, the evaluator determined that the Student demonstrated below average intellectual and adaptive functioning and had more trouble maintaining focus than same-aged peers. The evaluator also determined that the Student’s academic performance was in line with ■■■ intellectual functioning. The evaluation recommended a number of classroom interventions related to the Student’s identified needs. The Parent provided a copy of the private evaluation report to the District on March 4, 2024.

On March 12, 2024, the Parent sent a follow-up communication to the District requesting that the Student’s IEP be reviewed and revised based on the information contained in the private evaluation. On April 5, 2024, the District’s special education coordinator responded to the Parent and made an attempt to schedule the meeting ten days later. The District also stated a preference for scheduling the meeting before statewide testing began.

The Parent and the District met by phone on April 9, 2024, to discuss the private evaluation results. At that meeting, the parties determined that the Student’s IEP Team would need to meet to incorporate changes related to the new evaluation data. A meeting was initially set for April 11, 2024, but the Parent was unable to attend on that date. The meeting was held on May 29, 2024,

and the Parent participated.

The May 29, 2024, meeting resulted in some revisions to the Student's IEP. The Student's IEP was amended to update the present levels of academic achievement and functional performance. No changes were made to the accommodations or services provided to the Student.

On June 6, 2024, the Parent withdrew the Student from the District.

On August 26, 2024, the Parent filed the complaint that forms the basis of these findings and decision.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by 1) failing to properly respond to parental requests to meet to review and revise the Student's IEP based on new information provided by the Parent or 2) failing to consider independent educational evaluation data provided by the Parent. Specifically, the Parent alleges that the District did not properly respond to [REDACTED] requests to consider amending the Student's IEP following the provision of an independent educational evaluation to the District.

Louisiana Bulletin 1706 § 503(C) requires school districts to consider independent educational evaluation data provided by parents. Additionally, Louisiana Bulletin 1706 § 324(B)(1)(b) requires school districts to review and, if necessary, revise the IEP of a student to address information about the student provided by the parents.

In this case, the Parent provided the District with independent evaluation data on March 4, 2024, and requested that the District consider amending the Student's IEP on March 12, 2024. An IEP Team meeting was held to review the independent evaluation and, if necessary, amend the IEP. At that meeting, the District made changes to the IEP based on information contained in the evaluation data provided by the Parent. Therefore, the Department finds that the District did consider the independent evaluation data provided by the Parent.

While the record demonstrates that the District did consider the information provided by the Parent, the Department must also consider whether the delay between the Parent's March 12, 2024, request for an IEP Team meeting and the May 29, 2024, IEP Team meeting was reasonable. The Department concludes that the delay, while lengthy, was reasonable under the circumstances. Specifically, the Department finds that the 78-day delay was the result of attempts to find a mutually agreeable time that did not interfere with statewide testing and that the impact of the delay was minimal because the new IEP was unlikely to be implemented during the waning weeks of the 2023-24 school year.

Based on the information provided in connection with this complaint, the Department is unable to conclude that the District's actions surrounding the Parent's provision of a private evaluation were inappropriate. As stated above, the District undertook reasonable efforts to review the private evaluation and, eventually, to incorporate the data from that evaluation into the Student's educational program. Therefore, the Parent's allegations – that the District failed to properly respond to parental requests to meet to review and revise the Student's IEP and failed to consider independent educational evaluation data provided by the Parent –are unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Tyrell T. Manieri III

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-13** on behalf of **all students with disabilities attending the "Life Skills" program at [REDACTED]**

On **September 4, 2024**, Laureen Mayfield (hereinafter referred to as the "Complainant") filed a Request for Special Education Formal Complaint Investigation on behalf of all students with disabilities attending the "Life Skills" program at [REDACTED] ("the Students") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, the Complainant alleged that the Bienville Parish School Board ("the District") violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 (1) by failing to ensure that placement decisions were made by a group of persons including the parents and other persons knowledgeable about the student, the meaning of the evaluation date, and the placement options, (2) by failing to ensure that placement decisions were made in conformity with the least restrictive requirement provisions, and (3) by failing to ensure that students were reevaluated before being placed in a more restrictive environment.

The Complainant provided a complaint form, a five-page narrative, and three exhibits. The District provided a five-page narrative response and eight exhibits in response to the complaint. As the Department's assigned investigator, I reviewed the complaint and all documents submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **September 4, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between **September 5, 2022**, and **September 4, 2024**.

II. Findings of Fact

The District began operating the Life Skills Program ("the Program") at the beginning of the 2024-25 school

year. The Program was an academic-focused program designed to educate older students who were at risk of withdrawing from school and did not need significant assistance with tasks of daily living. The Program was designed to provide these students with access to academic instruction, along with supplementary aids and services, outside of a traditional school setting. The students enrolled in the Program received instruction at their individualized level through instructional software, and they were supported by a special education teacher. The Program was located at [REDACTED]; no other programs for school-aged students were located at the [REDACTED] campus. At the beginning of the 2024-25 school year, the Program served three students, who shall be identified herein by their initials.

Student [REDACTED]

At all times relevant to this complaint, [REDACTED] was eligible for special education and related services as a student with an emotional disturbance. [REDACTED] was placed in a home instruction program, utilizing instructional software, as a student in the [REDACTED] grade during the 2023-24 school year. Prior to the beginning of the 2024-25 school year, [REDACTED] reached the age of majority. G.L.'s postsecondary goal was to work in pet care or gardening, and [REDACTED] Individualized Education Program ("IEP") included a goal related to the preferred vocations and a goal related to behavior, which targeted work avoidance and inappropriate statements.

On August 30, 2024, [REDACTED] IEP team met. The District provided notice of the meeting, and [REDACTED] and [REDACTED] participated in the meeting. The IEP team determined that [REDACTED] would be allowed to meet graduation requirements through means other than statewide assessment. The IEP team determined that [REDACTED] required instruction in the core curriculum and counseling services. Finally, the IEP team determined that the appropriate placement for [REDACTED] would be the Program. All members of the IEP team were in agreement with the proposed services and placement.

Student [REDACTED]

At all times relevant to this complaint, [REDACTED] was eligible for special education and related services as a student with a moderate intellectual disability. [REDACTED] participated in the LEAP Connect curriculum. [REDACTED] reached the age of majority and completed a Certificate of Achievement in 2021. J.P. did not attend school during the 2023-24 school year. [REDACTED] reenrolled in the District for the 2024-25 school year. On August 22, 2024, [REDACTED] provided consent for a special education evaluation. [REDACTED] was previously evaluated in 2020, during his prior enrollment in the District.

On August 30, 2024, [REDACTED] IEP team met. The District provided notice of the meeting, and [REDACTED] and [REDACTED] legal guardian participated in the meeting. The IEP team developed an IEP for the Student. [REDACTED] postsecondary goal was to work in automobile detailing or health care support, and his IEP included a goal related to the preferred vocations and goals related to each of the core academic subjects. The IEP team also determined that the appropriate placement for [REDACTED] would be the Program. All members of the IEP team were in agreement with the placement. On September 27, 2024, [REDACTED] evaluation was completed.

Student [REDACTED]

At all times relevant to this complaint, [REDACTED] was a minor child and was eligible for special education and

related services as a student with other health impairments. [REDACTED] was last evaluated in 2022. [REDACTED] was diagnosed with a number of medical conditions which impacted his school performance, including Attention Deficit Hyperactivity Disorder, Mood Disorder, Adjustment Disorder, Trichotillomania, Anxiety, and Asthma. [REDACTED] will reach the age of majority before the beginning of the 2025-26 school year.

[REDACTED] was enrolled in eighth grade at his home-based school during the 2023-24 school year and spent most of the day in the regular education classroom. [REDACTED] was pursuing a regular diploma. [REDACTED] exhibited a number of behaviors at school which adversely impacted his ability to make progress in the regular education curriculum. [REDACTED] performed slightly below the basic standard in the core content areas during the most-recent administration of statewide assessments. [REDACTED] IEP included a goal related to behavior and goals related to [REDACTED] academic needs in English/language arts and mathematics.

On August 30, 2024, [REDACTED] IEP team met. The District provided notice of the meeting, and [REDACTED] and [REDACTED] mother participated in the meeting. The IEP team determined that [REDACTED] required instruction in the core curriculum and counseling services. The IEP team also team determined that the appropriate placement for [REDACTED] would be the Program. All members of the IEP team were in agreement with the proposed services and placement.

Near the end of September of 2024, the Program was discontinued and [REDACTED] returned to his home-based school. In October of 2024, the District initiated a reevaluation of [REDACTED]

The Complainant filed the complaint that forms the basis of these findings and decision on September 4, 2024.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 (1) by failing to ensure that placement decisions were made by a group of persons including the parents and other persons knowledgeable about the student, the meaning of the evaluation date, and the placement options, (2) by failing to ensure that placement decisions were made in conformity with the least restrictive requirement provisions, or (3) by failing to ensure that students were reevaluated before being placed in a more restrictive environment.

Staffing of Placement Determinations

Louisiana Bulletin 1706 § 116(A)(1)(a) requires that placement decisions be "made by a group of persons including the parents and other persons knowledgeable about the student, the meaning of the evaluation data, and the placement options." Louisiana Bulletin 1706 § 520(A)(1)(b) states that the parental rights identified in the IDEA transfer to students when they reach the age of majority. In each instance in which a student was placed in the Program, the placement determination was made by the IEP team following an IEP team meeting. The IEP teams were comprised of individuals who could reasonably address the issues presented by a placement decision. In each instance, the IEP team meeting was attended by the parent or adult student who had received notice of the meeting and did not object to the placement decision. Based on this evidence, the Department concludes that the allegation that the placement decisions for students placed in the Program were not properly staffed is unsubstantiated.

Least Restrictive Environment

Louisiana Bulletin 1706 §116(A)(1)(b) requires school districts to comply with the least restrictive environment provisions; most notably, the requirement that each student with a disability be educated in the school that he or she would attend if non-disabled unless the student's IEP requires a more restrictive setting. Louisiana Bulletin 1706 §114 more specifically identifies the requirements of least restrictive environment, including that students with disabilities be educated with students who are non-disabled to the maximum extent possible and that special classes and other removal of student with disabilities from the regular education setting occurs only if the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily.

The three students placed in the Program were enrolled in different educational programs, were pursuing different objectives, and were receiving individualized curricular modifications affecting instruction or assessment. The key similarities between the three students was their difficulty sustaining academic success in a traditional setting and their susceptibility to withdrawing from an educational program. Two of the three students were beyond Louisiana's age of compulsory education at the time of their placement in the Program. One of those students had been in a home-based program and the other had been unenrolled. The third student was in the final year of compulsory attendance and would be able to unilaterally withdraw from school after reaching the age of majority following the completion of the ninth grade.

Considering the intent of the Program and the students enrolled therein, the Department concludes that – for each of the affected students – the Program provided services that were chronologically age-appropriate for the students and granted the students access to all required services. While the placement did remove the students from interactions with peers, the three students each presented circumstances under which the team determining placement could have reasonably determined that the benefits of increased academic performance in a less distracting environment outweighed the harm of reduced peer interactions. Based on these considerations, the Department concludes that the allegation that the District violated the least restrictive environment provisions is unsubstantiated.

Evaluation Prior to Placement Change

Louisiana Bulletin 1508 § 1101(A)(3) requires local educational agencies to conduct an evaluation “when a significant change in placement is proposed, which means moving the student to a more restrictive environment where the student will be in the regular class less than 40 percent of the day.” In this case, only one of the students, ■■■, experienced a “significant change in placement” when placed in the Program. ■■■ was placed in a home instruction prior to placement in the Program. Placement in the Program provided ■■■ with more exposure to peers and constituted a less restrictive placement than the home-based setting. ■■■ was not enrolled in an educational program prior to placement at the Program; therefore, ■■■ placement in the Program constituted an initial placement rather than a change of placement.

The District admitted in its response that ■■■ was not evaluated prior to being placed in the Program.

However, [REDACTED] has since returned to the home-based school and is currently being evaluation. Given that the placement in the Program lasted for only a few weeks, [REDACTED] was returned to his initial placement, and a triennial reevaluation of [REDACTED] is underway, the Department concludes that the District has taken adequate measures to address the failure to evaluate T.M. prior to this placement in the Program. The Department also concludes that, given the novel circumstances presented herein, this instance of noncompliance is unlikely to recur. Therefore, the Department concludes that this allegation – that the District failed to evaluate students prior to placement in the Program – is unsubstantiated due to prior correction of any noncompliance.

IV. Corrective Action Plan

The Department determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby terminated and no additional action is required by the Complainant or the District.

Sincerely,

Tyrell T. Manieri III

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-15** on behalf of [REDACTED]
[REDACTED]

On **September 19, 2024**, [REDACTED] (hereinafter referred to as the “Parent”) filed a Request for Special Education Formal Complaint Investigation concerning [REDACTED], a charter school under the jurisdiction of NOLA Public Schools (“the District”), with the Louisiana Department of Education (“the Department”) pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the [REDACTED] (“the Student”), who is the Parent’s adult child, the Parent alleged that the District violated the Individuals with Disabilities Education Act (“the IDEA”), the Louisiana Children with Exceptionalities Act, or the Department’s implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to implement the Student’s Individualized Education Program (IEP), and 2) failing to comply with District policies and procedures for the use of physical restraint.

The Parent provided a complaint request form, a one-page narrative, and several images depicting the Student’s daily reporting form and the Student during the school day. The District provided a six-page narrative and 16 documentary exhibits in response. As the Department’s assigned investigator, I reviewed the complaint and all documents submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint “shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The Department received the complaint on **September 19, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between **September 20, 2022**, and **September 19, 2024**.

II. Findings of Fact

During the 2023-24 school year, the Student was enrolled in the [REDACTED] and received special education and related services pursuant to an IEP. On March 21, 2024, the Student’s IEP Team met to review the document and consider revisions. The March 2024 IEP indicated that the Student was participating in the LEAP Connect alternative curriculum, that most instruction was provided in the

Essential Skills Classroom, and that the Student was accompanied by a one-to-one paraprofessional throughout the school day. The IEP stated that the Student utilized minimal oral communications and that the Student primarily communicated through hand signs and an assistive technology device.

The IEP also indicated that the Student had exhibited inappropriate behaviors, including some aggressive behaviors, at school and that the inappropriate behaviors typically took place in the morning as the Student traveled to school by bus. The IEP stated that a functional behavioral assessment had been conducted, but the March 2024 IEP did not include a behavioral goal or a behavior intervention plan. The IEP also stated that the Student would be attending a different school during the 2024-25 school year and that the Parent had some concerns about the Student's transition to the new school. The IEP stated that the Student would receive door-to-door transportation services on a bus with an attendant.

At the end of July 2024, the Parent communicated concerns about the Student's transfer to a new school – specifically, the Student's behavior on a longer bus ride – to District staff. District staff responded to the Parent's concerns and indicated that the Student's IEP would be implemented when the Student began attending the new school. Based on concerns about the Student's transition, the District conducted an interim functional behavioral assessment and adopted an interim behavior intervention plan. The interim plan addressed strategies for supporting the Student's behavior throughout the day and a crisis plan for circumstances where the Student was at-risk of or was actively engaging in inappropriate behaviors. The crisis plan required the implementation of Therapeutic Crisis Intervention in Schools ("TCIS") de-escalation strategies and authorized the use of TCIS physical interventions in circumstances where the Student's behavior presented a risk of physical harm to the Student or others.

The first day of the 2024-25 school year for the Student was August 5, 2024. On that day, the bus arrived late to pick the Student up from home. The Student arrived at school without incident and entered the cafeteria, where ■■■ was supervised by a paraprofessional. While in the cafeteria, the Student became upset about some difficulties with a technology device. As District staff attempted to escort the Student from the cafeteria to a less populated area of the school, the Student became impatient and began hitting and attempting to pull staff to the ground.

In response to the Student's aggressive behavior, District staff placed the Student in a seated hold for approximately 20 minutes. Six District staff, each of whom had received TCIS training in the use of de-escalation strategies and physical restraint, took turns restraining the Student until the risk of physical harm had subsided. The Parent was contacted by videoconference during the time that the Student was being restrained. After the Student was calmed, the Student was able to participate in the remainder of the school day. The Parent came to pick the Student up at the end

of the day, and the District agreed to shorten the Student's bus ride and provide additional adult support on the bus. A *Notice and Documentation of Seclusion and /or Restraint* form was completed and indicated the circumstances surrounding the use of physical restraint.

The Student attended school on August 6 and 7 under the new transportation procedures. The Student exhibited some noncompliant behavior when exiting the bus at [REDACTED] home, and the situation was resolved verbally with the assistance of the Parent.

On August 8, 2024, the Student attended school. On the bus ride home from school, the Student became agitated and grabbed a staff member by the hair. The Student was physically restrained by two trained staff members for approximately 15 minutes and was released when the risk of harm had subsided. A *Notice and Documentation of Seclusion and /or Restraint* form was completed and indicated the circumstances surrounding the use of physical restraint.

On August 9, 2024, the Student was suspended for two days as a result of aggressive behavior toward District staff. The Parent was notified of the suspension by telephone on the morning of August 9, and a *Louisiana Department of Education School Behavior Report* form was completed to document the suspension.

An IEP Team meeting was held on August 13, 2024, to address the inappropriate behaviors that had been observed from the Student during the prior week. The IEP Team amended the Student's education program to state that the Student would be transported to school without other students present, ensure that the Student did not spend extended periods in public areas of the school, and to shorten the Student's school day. The Parent participated in the IEP Team meeting.

The District conducted an internal investigation of the circumstances surrounding the Student's first week of school. The District concluded that its actions concerning the Student has been appropriate and consistent with District policies and procedures.

The IEP Team met again on September 19, 2024, and amended the Student's IEP to address additional goals and services and to update the IEP with baseline data from the District's 2024-25 observations of the Student.

On September 19, 2024, the Parent filed the complaint that forms the basis of these findings and decision.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by 1) failing to implement the Student's IEP, or 2) failing to comply with District policies and procedures for the use of physical restraint.

IEP Implementation

Louisiana Bulletin 1706 § 323(C) requires local educational agencies to have an IEP in effect for each student with a disability at the beginning of each school year. In this case, it is clear that the Student experienced some difficulties during [REDACTED] first week of the 2024-25 school year. However, the record in this case does not support the conclusion that those difficulties were the result of the District's failure to implement the Student's IEP.

While the complaint included a broad claim that the District failed to implement the Student's IEP, the complaint focuses on the District's actions surrounding the Student's aggressive behaviors. However, the complaint contains no indication of how the District's actions failed to comply with the requirements of the Student's IEP.

At all times relevant to this complaint, the Student was accompanied by a one-to-one paraprofessional and was allowed access to the services, accommodations, and supplementary aids identified in [REDACTED] IEP. Furthermore, the District made efforts to ensure that those services were adapted – adopting an interim behavior intervention plan and amending the IEP as needed – as it became apparent that the Student's behavioral deficits would be a substantial impediment to a successful transition to the new school.

Based on the information provided in connection with this complaint, the Department is unable to conclude that the District failed to implement the Student's IEP during the 2024-25 school year. As stated above, the challenges experienced by the Student upon enrollment in a new school were unfortunate, but they were not the result of noncompliance by the District. Therefore, the Parent's allegations – that the District failed to implement the Student's IEP – is unsubstantiated.

Restraint and Seclusion

Louisiana Bulletin 1706 §§ 540 - 543 establishes requirements for the use of physical restraint and seclusion by local educational agencies. Pursuant to those provisions, educational agencies must ensure that physical restraint is only implemented by individuals who are trained in the application of physical restraints. Agencies must also ensure that physical restraint is only used in response to an immediate and impending threat of a person causing substantial injury to the self or others and must document each instance in which physical restraint is applied.

In this case, the Student was physically restrained by District staff on two dates – August 5, 2024, and August 8, 2024. On both occasions, the physical restraints were: (1) implemented when the Student's conduct presented an imminent risk of harm to District staff, (2) applied by individuals who had received TCIS training, and (3) timely documented on a physical restraint and seclusion reporting form. In each instance, the record demonstrated that the physical restraints did not result in physical harm to the Student and that the restraints were only applied to the extent necessary

to address the Student's dangerous behavior. Therefore, the Department concludes that the allegation that the District failed to comply with the requirements of law concerning the application of physical restraint is unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. This investigation is hereby closed, and no additional action is required by the Parent or the District.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-16** on behalf of ██████████

On **September 20, 2024**, ██████████ (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning the Washington Parish School System ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the ██████████ ("the Student"), who is the Parent's minor child, the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Student with an appropriate placement; specifically, the parent alleges that the District's decision to promote the Student has denied the student sufficient access to the general education curriculum.

The Parent provided a complaint request form, a three-page narrative, and several documentary exhibits. The District provided a narrative and eight documentary exhibits in response. As the Department's assigned investigator, I reviewed the complaint and all documents submitted by the parties and interviewed the Parent and a District staff member.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **September 20, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between **September 21, 2022**, and **September 20, 2024**.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled in the District and received special education and related services pursuant to an IEP. In April of 2022, the District completed an initial evaluation of the Student, who was enrolled in ██████████ at the time. An assessment of the Student's early academic and language skills indicated that the Student performed in the "Below Average" to "Average" range in all domains. The evaluation also determined that the Student

exhibited a language disorder and was at-risk for an articulation disorder. The evaluation also identified deficits affecting the Student's gross motor, fine motor, visual motor, prewriting, and self-care skills. Based on the results of the evaluation, the Student was determined eligible for special education and related services as a student with a developmental delay.

During the 2022-23 school year, the Student was enrolled in [REDACTED]. The Student received one hour of special education instruction in the regular education setting and one hour of special education instruction in the resource setting daily. The Student also received speech therapy, occupational therapy, and adapted physical education services. During the course of the school year, the Student struggled in the core academic subjects and finished the year with "Unsatisfactory" scores in mathematics and English/language arts. A reading screener used throughout the school year indicated that the Student required intensive assistance with reading instruction. Although the Student did not meet the District's performance criteria for promotion to [REDACTED], the School Building Level Committee ("SBLC") promoted the Student following the District's alternate promotional criteria for individuals with disabilities.

During the 2023-24 school year, the Student was enrolled in [REDACTED]. The Student received seventy minutes of special education instruction in the regular education setting four days a week. The Student also received speech therapy, occupational therapy, and adapted physical education services. During the course of the school year, the Student struggled in the core academic subjects and finished the year with an "F" in mathematics and a "D" in English/language arts. A reading screener used throughout the school year indicated that the Student required intensive assistance with reading instruction.

The Student's IEP Team met on April 16, 2024. At the meeting, the Parent expressed concerns about the Student's educational progress and stated a preference that the Student be retained in the [REDACTED] for the 2024-25 school year. The IEP Team amended the Student's IEP to increase the amount of special education instruction to 75 minutes daily. On May 14, 2024, the SBLC team met to consider the Student for promotion. The SBLC team meeting did not include the Parent, and the Parent was not provided notice of the meeting. The team determined that the Student would be promoted to the [REDACTED] for the 2024-25 school year and recommended that the Student's IEP be amended to increase the level of academic support.

Following the conclusion of the 2023-24 school year, the Parent received the Student's final report card, which indicated that the Student had been promoted to the [REDACTED]. The Parent communicated concerns about the Student's promotion to District staff on multiple occasions. On August 29, 2024, the Student's IEP Team met. The Parent again requested that the Student be placed in [REDACTED]. The IEP Team increased the Student's special education minutes, reinstating the provision of special education instruction in core subjects in the resource setting.

On September 18, 2024, District staff met with the Parent to discuss her concerns about the Student's placement. The Parent again renewed her request for the Student to be placed in [REDACTED]. On September 19, 2024, the District sent a *Written Notice of Proposed or Refused Action* form to the Parent. The notice indicated that the decision to promote the Student was made by the SBLC based on concerns that retaining the Student in [REDACTED] would not meaningfully benefit the Student's progress in reading and language. The notice indicated that the SBLC determined that increased special education support in the [REDACTED] would provide the Student with a reasonable opportunity to make progress in the general education curriculum.

On September 20, 2024, the Parent filed the complaint that forms the basis of these findings and decision.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District failed to comply with the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Student with an appropriate placement; specifically, the parent alleges that the District's decision to promote the Student has denied the student sufficient access to the general education curriculum.

Louisiana Bulletin 1706 §§ 114-120 contain a number of provisions governing the placement of students with disabilities. Relevant to this case, Louisiana Bulletin 1706 § 116(A)(1)(a) requires that placement decision be made by a group that includes the parents of a student and Louisiana Bulletin 1706 § 116(A)(5) prohibits a student with a disability from being "removed from education in age-appropriate regular classrooms solely because of needed modifications in the general education curriculum." Based on the record in this case, the Department concludes that the District failed to comply with the parental participation requirement but is unable to conclude that the placement determination was inconsistent with the least restrictive environment provisions.

Louisiana law authorizes SBLCs to determine the promotion or retention of students with disabilities under certain circumstances. In order to comply with the requirement that parents participate in placement decisions, Louisiana Bulletin 1508 § 303 requires the parents of a student with a disability to participate in any SBLC meetings where a specific child is being considered. On May 14, 2024, the SBLC team met and promoted the Student to [REDACTED] without the participation of the Parent. Therefore, the Department concludes that the allegation that the District's decision to promote the Student was not compliant with the requirement of law is substantiated.

Despite the procedural defects in the District's May 14, 2024, placement determination, the Department is unable to conclude that the decision to promote the Student to the [REDACTED] was inconsistent with the requirements of least restrictive environment. Among those

requirements is a requirement that students with disabilities be educated in age-appropriate regular classrooms to the maximum extent appropriate. In this case, the record clearly indicated that the Student was struggling to maintain pace with the regular education curriculum; however the District's decision to address the Student's deficits through increased special education services rather than retaining the Student reflects a reasonable application of the requirements of least restrictive environment to the difficult circumstances presented in this case.

To be clear, the District's placement decision is defective on the basis that the Parent was denied meaningful participation in the SBLC process. However, the Department is unable to conclude that, based on the information available to the District at the time, the placement decision violated the requirements of least restrictive environment or otherwise denied that Student access to a free and appropriate public education. Therefore, the Department concludes that the allegation that the District's placement of the Student violated the requirements of least restrictive environment is unsubstantiated.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IV. Corrective Action Plan

The competent evidence considered during the formal complaint investigation proved that the District failed to ensure that the Parent participate in a placement determination concerning the Student. In order to remedy the noncompliance and ensure that such noncompliance does not recur:

- By no later than **January 17, 2025**, the District shall convene an SBLC meeting to reconsider the promotion of the Student to [REDACTED] for the current school year and, if necessary, establish any alternative criteria that will be used to determine the Student's promotion or retention at the end of the current school year;
- Based on the outcome of the SBLC meeting, provide the Parent with a *Written Notice of Proposed or Refused Action* describing the outcome of the meeting, the information considered in reaching the decision, and the rationale for the decision **within one week of the SBLC meeting**;
- By no later than **January 17, 2025**, the District shall provide written guidance to the chairpersons for each SBLC in the District concerning the requirement that parents participate in SBLC meetings in which a specific child is considered; and,
- By no later than **January 24, 2025**, the District shall submit to the Department evidence that the SBLC meeting was held with the Parent, that the *Written Notice of Proposed or Refused Action* was sent, and that the written guidance was sent to all relevant District staff.

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-21** on behalf of [REDACTED]

On **September 30, 2024**, [REDACTED] (hereinafter referred to as the “Parent”) filed a Request for Special Education Formal Complaint Investigation concerning the St. Tammany Parish School Board (“the District”) with the Louisiana Department of Education (“the Department”) pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent’s minor child [REDACTED] (“the Student”), the Parent alleged that the District violated the Individuals with Disabilities Education Act (“the IDEA”), the Louisiana Children with Exceptionalities Act, or the Department’s implementing regulations published in Louisiana Bulletin 1706 by:

1. failing to convene an Individualized Education Program (“IEP”) team meeting to discuss the Student’s lack of expected progress;
2. failing to install cameras in the Student’s self-contained classroom;
3. failing to adequately respond to a parental request for the re-evaluation of the Student;
4. failing to provide appropriate supports and services related to the Student’s behavioral needs at school; and,
5. failing to provide the Student with an adequate placement; specifically, providing insufficient space and supervision for the Student in [REDACTED] assigned classroom.

At the time of filing the complaint, the Parent provided a complaint request form, a complaint cover letter, a supplemental narrative, and 27 images. As the Department’s assigned investigator, I reviewed the complaint, the supplemental materials submitted by the Parent, and the Student’s special education records from the 2022-2023 through 2024-2025 school years.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint “shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The Department received the complaint on **September 30, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between **October 1, 2022**, and **September 30, 2024**.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school, was receiving special education and related services as a student with autism, and was making adequate progress in the general

education curriculum. The Student was evaluated during the 2021-2022 school year, and the evaluation report was issued on May 19, 2022. A Behavior Intervention Plan ("BIP") was developed during the 2022-2023 school year to address the Student's conduct at school. The Student's performance on 2022-2023 standardized test indicated that ■ was performing at the "Unsatisfactory" level in English/language arts, social studies, and science and performing at the "Approaching Basic" level in mathematics. During the first nine week period of the 2023-2024 school year, the Student maintained "A" and "B" grades in all academic subjects.

The Student's IEP Team met to review and revise the Student's IEP on October 26, 2023, when the Student was in the ■. The Parent participated in the IEP Team meeting and raised concerns about the Student's self-harm and the use of cameras in the Student's classroom. The General Student Information section of the IEP indicated that the Student had a history of engaging in self-harm and aggressive behaviors toward others. The IEP indicated that the Student engaged in inappropriate behaviors in order to avoid academic tasks and that the inappropriate behaviors had been increasing in recent weeks. The IEP included goals in the areas of communication/language, gross motor/Adapted Physical Education, behavior, social studies, science, mathematics, and English/language arts. The IEP indicated that the Student would receive instruction in the Reduced Numbers Classroom ("RNC"), a self-contained classroom, and would receive Adapted Physical Education, Occupational Therapy, and Speech-Language services. The team also reviewed the Student's BIP and maintained its focus on task-refusal and aggression while adding additional reinforcements based on the Student's interests.

On August 27, 2024, shortly after the beginning of the Student's ■ year, the Student exhibited an incident of aggressive behavior and was detained by a law enforcement officer during the school day.

The Student's IEP Team met on August 29, 2024, to review and revise the Student's IEP and BIP. The Student's IEP goals and services remained substantially similar to the prior IEP. The Student's BIP was amended to indicate that the School Resource Officer would not participate in the implementation of the Student's behavioral interventions. The IEP Team met on September 3, 2024, and added transportation services to the IEP. The IEP Team convened again on September 17, 2024, for the annual IEP review meeting.

On September 23, 2024, the Parent granted consent for a reevaluation of the Student.

On September 30, 2024, the Parent filed the complaint that formed the basis of the Department's investigation.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by: failing to convene an Individualized Education Program ("IEP") team meeting to discuss the Student's lack of expected progress; failing to install cameras in the Student's self-contained classroom; failing to adequately respond to a parental request for the re-evaluation of the Student; failing to provide appropriate supports and services related to the Student's behavioral needs at school; or, failing to provide the Student with an adequate placement; specifically, providing insufficient space and supervision for the Student in ■ assigned classroom.

1. Review and Revision of IEP

Louisiana Bulletin 1706 § 324(B) requires that each school district in Louisiana ensure that each student's IEP Team meet to review and, if necessary, revise the student's IEP in instances where the student is not making expected progress towards IEP goals or to address new evaluation data provided by the student's parent. During the 2023-2024 school year, the Student was making adequate progress in the regular education curriculum as evidenced by [REDACTED] above-average classroom grades and consistent, albeit comparatively low, standardized test scores. When the Student's inappropriate behaviors escalated at the beginning of the current school year, the District quickly convened an IEP Team meeting to revise strategies for addressing the Student's aggressive behaviors.

Based on the Student's maintenance of expected progress during the 2023-24 school year and the IEP Team's responsiveness to the disciplinary incident which took place on August 27, 2024, the Department finds that the District's actions were in compliance with the requirement that an IEP Team meeting be convened to consider a lack of expected progress by the Student. Additionally, the evidence presented in this matter does not support the conclusion that the Parent requested that the IEP Team meet to consider new evaluation information about the Student at any time during the 2023-2024 or 2024-2025 school years. Therefore, the Department concludes that the Parent's allegation that the District failed to comply with relevant law by failing to convene an IEP Team meeting is unsubstantiated.

2. Cameras in Self-Contained Classroom

Louisiana Revised Statutes 17:1948 requires that each school district in Louisiana install cameras in certain special education classrooms within 90 days of a parental request. While the Parent raised concerns about the operability of the camera that had been installed in the Student's classroom prior to the October 2023 IEP Team meeting, the evidence does not indicate that the Parent requested the installation of the camera. In the absence of a Parental request for the installation of a camera in the Student's classroom, the Department is unable to conclude that the District violated the requirements of R.S. 17:1948; therefore, the Parent's allegation that the District failed to comply with relevant law by failing to install cameras in the Reduced Numbers Classroom is unsubstantiated.

3. Re-evaluation

Louisiana Bulletin 1706 § 304(A) requires that each school district in Louisiana conduct a reevaluation of each student with a disability if the district determines that a reevaluation is necessary to determine appropriate services for the student or if the student's parent requests a reevaluation. In this case, the Student was evaluated in May of 2022. As discussed above, the Student demonstrated expected progress during the 2023-2024 school year, and the District initiated a reevaluation of the Student after obtaining parental consent on September 23, 2024, following an escalation in aggressive behavior by the Student at school. Additionally, the evidence presented in this matter does not support the conclusion that the Parent requested that the District conduct a reevaluation of the Student at any time during the 2023-2024 or 2024-2025 school years. Therefore, the Department concludes that the Parent's allegation that the District failed to comply with relevant law by failing to convene and IEP Team meeting is unsubstantiated.

4. Behavioral Supports

Louisiana Bulletin 1706 § 324(A)(2) requires that each school district in Louisiana consider the use of positive behavioral interventions and supports and other strategies to address students whose behavior impedes their own learning or the learning of others. At all times relevant to this complaint, the Student received behavioral interventions pursuant to a BIP, and the Student's IEP included a behavior goal addressing the Student's task avoidance and aggressive behavior. While the Student did experience a significant disciplinary incident near the beginning of the 2024-2025 school year, the IEP Team quickly responded by amending the Student's IEP and BIP to include additional services and revised interventions. The Department finds that the District's efforts to address the Student's behavior were appropriate and concludes that the Parent's allegation that the District failed to comply with relevant law by failing to provide the Student with appropriate behavioral support is unsubstantiated.

5. Placement

Louisiana Bulletin 1706 § 116 requires that each school district in Louisiana provide each student with a disability with an educational placement that conforms to the requirements of the least restrictive environment provisions. In this case, the Parent alleges that classroom to which the Student was assigned, the RNC, lacked adequate physical space and that the students in the RNC lacked adequate supervision.

The Department lacks legal authority to evaluate the physical capacity of classrooms and defers to local fire officials concerning the appropriate use of physical spaces within the school. Additionally, the Department finds that the staffing in the RNC, a 1:1 adult-to-student ratio, was sufficient to address the needs of the students enrolled therein. During the timeframe relevant to this complaint, the RNC consisted of four students who were supervised by four adults. Based on these findings, the Department concludes that the Parent's allegation that the District failed to provide the Student with an adequate placement is unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-22** on behalf of [REDACTED]

On **October 2, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning the Livingston Parish School Board ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to timely evaluate and identify the Student as a student with a disability.

At the time of filing the complaint, the Parent provided a complaint request form and 19 exhibits. The District provided a narrative response. The Parent then submitted seven additional exhibits. As the Department's assigned investigator, I reviewed the complaint and all exhibits submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **October 2, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between **October 3, 2022**, and **October 2, 2024**.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school. The Student has been diagnosed with Attention Deficit Hyperactivity Disorder. During [REDACTED] enrollment in the District, the Student has demonstrated difficulties with academic tasks and has engaged in inappropriate behaviors at school. As a result of academic concerns for the Student, [REDACTED] began receiving services pursuant to the District's Response to Intervention program in January of 2020, when the Student was in the [REDACTED].

From January of 2020 through October of 2023, the District's School Building Level Committee ("SBLC") monitored the Student's academic achievement and functional performance at school, and the Student continued to receive Tier 1 interventions in the areas of reading, writing, and mathematics. The Student made adequate progress in the general education curriculum during this time period. The SBLC met in December of 2021 and November of 2022 to review academic and behavioral data concerning the Student,

and the SBLC did not elect to implement behavioral interventions through the Response to Intervention program at those times.

During the 2023-2024 school year, when the Student was in [REDACTED], instances of inappropriate behavior became more frequent, and the Student continued to exhibit difficulty when engaging in academic tasks. In October of 2023, the SBLC met to review information about the Student's school performance. The SBLC took note of the Student's continuing academic difficulties and began providing the Student with academic interventions in reading and mathematics under Tier 2 of the Response to Intervention program.

In November of 2023, the Parent provided the District with a letter from the Student's physician stating that the Student had been diagnosed with Attention Deficit Hyperactivity Disorder. The letter indicated that the Student had been prescribed medication related to the diagnosis. The letter also recommended a number of accommodations that may benefit the Student in the educational setting. The accommodations included: preferential seating, simplified instructions, small group instruction, assistance with organization, additional time for testing, quiet environment for testing, frequent school-parent communication, daily homework checks, positive reinforcements, and adequate opportunities for physical activity. A similar letter had been provided by the physician in December of 2022.

The SBLC met and considered the Student in January and April of 2024; again, the meetings focused on the Student's academic and behavioral difficulties. At the April meeting, the SBLC discontinued the Student's academic interventions and began implementing Tier 2 behavioral interventions for the Student. The SBLC also planned to reconvene in the fall of the 2024-2025 school year to assess the Student's behavioral interventions and review updated academic data.

The Student participated in statewide standardized testing during the 2023-2024 school year. The Student achieved the "Basic" performance level in mathematics and English/language arts. The Student achieved the "Approaching Basic" performance level in science. The Student also completed a reading assessment, which indicated that the Student was at or approaching grade-level in most of the domains tested. The Student demonstrated a weakness in domains related to reading comprehension.

The SBLC met in August of 2024 to consider the Student's academic and functional performance. The SBLC determined that academic interventions were not appropriate and maintained the Tier 2 behavioral interventions that had been implemented at the end of the prior school year. A few days after the meeting, the Parent requested that the Student be considered for services under Section 504 of the Rehabilitation Act of 1973 ("Section 504") and provided consent for an evaluation. The District initiated an evaluation of the Student pursuant to Section 504.

On August 26, 2024, the SBLC met to consider the Student. The SBLC implemented Tier 3 academic and behavioral interventions in response to concerns about the Student's behavior and academic performance.

The Parent obtained a private psychological evaluation of the Student. A report dated August 27, 2024, described the results of that evaluation. The evaluator acknowledged the Student's diagnosis of Attention Deficit Hyperactivity Disorder and history of behavioral difficulties at school. The evaluator reported that the Student exhibited overall cognitive abilities in the average range. The evaluator also reported that the

Student exhibited behavioral characteristics of Attention Deficit Hyperactivity Disorder, such as difficulties sustaining attention, organizing work, and managing behavior in the classroom, which would likely impact [REDACTED] ability to complete academic tasks. The evaluator recommended a number of accommodations to address the impacts of the Student's disability in the school setting; the accommodations included, structured routine, task breakdowns, visual aids, positive reinforcement, frequent breaks, quiet work environment, behavioral interventions, social skill training, teacher collaboration, and routine monitoring.

On October 2, 2024, the Parent filed the complaint that formed the basis of the Department's investigation.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to timely consider the Student as a student with a disability.

Louisiana Bulletin 1706 § 101 requires that each school district in Louisiana ensure that all students with disabilities be identified, located, and evaluated. Louisiana Bulletin 1706 § 905 defines a "student with a disability" as a student who exhibits the characteristics of one of the categories of disability listed therein and who, by virtue of those characteristics, needs special education and related services. The resolution of this matter relies on the application of the second criteria – that a student, because of the effects of a disabling condition, requires special education and related services. Louisiana Bulletin 1706 § 905 defines a "special education" as instruction that is specially designed to meet the unique, disability-related needs of a student. Louisiana Bulletin 1706 § 905 defines a "related services" as "developmental, corrective, and other supportive services as are required to assist a student with a disability to benefit from special education."

The record in this investigation supports the conclusion that the Student had been medically diagnosed with Attention Deficit Hyperactivity Disorder, that the Student was receiving medical treatment related to that diagnosis, and that the Student demonstrated behaviors consistent with that diagnosis during the school day. However, the record does not support the conclusion that the Student required special education and related services in order to access the general education curriculum.

From the Student's initial consideration by the SBLC until the filing of this complaint, efforts to assist the Student at school focused on providing the Student with access to accommodations and other supportive interventions. Each of the stakeholders involved in educational decision-making for the Student, which included the Parent, the District, the Student's physician, and the Student's private evaluator, recognized that the Student's behaviors were consistent with the diagnosis of Attention Deficit Hyperactivity Disorder and that the behaviors were interfering with his ability to make expected progress in the general education curriculum. However, none of those stakeholders suggested that the Student's disability impeded his ability to access the general education curriculum in such a way that specially designed instruction or related services were required.

The Student's physician, in 2022 and 2023, recommended that the District implement a number of instructional and behavioral accommodations to address the Student's deficits. The Student's private evaluator similarly suggested a number of accommodations in August of 2024. Additionally, neither the Parents nor District staff indicated a belief that the Student required special education and related services

over the nearly five years that the Student has been participating in the District's Response to Intervention program.

The Department concludes that the District acted in accordance with the IDEA, the Louisiana Children with Exceptionalities Act, and Louisiana's implementing regulations in its actions concerning the Student. From the 2019-2020 school year through the 2022-2023, the impacts of the Student's disability were adequately addressed through the Response to Intervention program. As the Student's began exhibiting more difficulty during the 2023-2024 school year, the District implemented changes to the Student's education program through the Response to Intervention program. Finally, during the 2023-2024 school year, when the use of more intensive behavioral interventions proved ineffective and the District determined that individualized interventions were likely needed, the District initiated an evaluation under Section 504 to determine if the Student has a disabling condition that affects one or more major life activity.

Based on the information presented, the Department concludes that the Student's academic achievement and functional performance did not support a reasonable belief that ■ was a student with a disability as defined in Louisiana Bulletin 1706 § 905. Therefore, the Department concludes that the allegation that the District failed to timely identify and evaluate the Student is unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. 45-C-23

Dear [REDACTED] and Dr. Million:

On November 7, 2024, the Louisiana Department of Education received a copy of a mediation settlement agreement, which confirmed that the parties to this formal complaint reached a mutually agreeable resolution and that the complainant officially withdrew the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 45-C-23. No further action is required by either party.

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-24** on behalf of [REDACTED]

On **October 8, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning her two minor children (the Students) who were attending a public school under the jurisdiction of St. Landry Parish Schools ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's children [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to provide parent with prior written notice of an August 12, 2024 meeting and 2) failing to provide the students with services in the least restrictive environment.

At the time of filing the complaint, the Parent provided a complaint request, a narrative complaint, and six pages of documentary exhibits. The District provided a narrative response and documentary exhibits labeled Exhibits A through N. As the Department's assigned investigator, I reviewed the complaint, the District's response, and the supplemental materials submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **October 8, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between October 9, 2022, and October 8, 2024.

II. Findings of Fact

At all times relevant to this complaint, each of the Students was enrolled at a District school and was eligible to receive special education and related services as a student with a disability.

During the 2023-34 school year, the District and the Parent had disputed the Parent's use of a wireless transmitter during the school day. The dispute involved the use of a multifunction wireless transmitter that the Parent affixed to one of the Students each day. The transmitter allowed the Parent to track the device's location and to send and receive audio using the device. The District requested that the Parent complete an agreement setting parameters for the use of the device at school. Specifically, the agreement prohibited the use of the device by the Parent to receive audio transmissions from the device during the Students' school day. The agreement included exceptions for circumstances involving health or safety risks, including the

unexpected removal of the device from the school's campus. The Parent refused to sign the agreement or provide other assurances to the District that the device would not be used to listen to conversations between third parties, including students and staff, during the school day.

On August 2, 2024, the District contacted the Parent to discuss the use of the transmission device during the 2024-25 school year. The 2024-25 school year began for students on Thursday, August 8, 2024. The Students did not attend school on August 8, 2024. On August 9, 2024, the District sent the Parent a notice indicating that the District required assurances that the device's use would not be used to transmit audio during the Students' school day to protect the confidentiality of third parties. On Saturday, August 10, 2024, the Parent informed District staff that the Students would begin attending school on Monday, August 12, 2024.

On August 12, 2024, the Parent and the Students went to the Students' school. District staff members met with the Parent to discuss the use of the transmitter device. The District again requested that the Parent agree not to transmit audio during the Students' school day and provided exceptions for health and safety concerns. The Parent refused to sign the agreement or provide other assurances to the District that the device would not be used to listen to conversations between third parties, including students and staff, during the school day. The Parent removed the Students from school on August 12, 2024.

On August 16, 2024, the District contacted the Parent to request a meeting to discuss the use of the transmission devices at school. For the next several weeks, the District made several attempts to meet with the Parent to resolve the matter. The later communication included warnings that the Students' prolonged absences from attending school would be referred to the District's child welfare and attendance office. On October 1, 2024, the District referred the Students to the Supervisor of Child Welfare and Attendance as a result of each student having been absent for 26 days from August 12, 2024, through September 25, 2024.

On October 8, 2024, the Parent filed the complaint that formed the basis of the Department's investigation.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by:

1. failing to provide the Parent with prior written notice of an August 12, 2024 meeting; and,
2. failing to provide the Students with services in the least restrictive environment closest to their home.

Meeting Notice

Louisiana Bulletin 1706 § 322 requires that each school district in Louisiana "ensure that one or both of the parents of [a] student with a disability are present at each IEP Team meeting or are afforded the opportunity to participate." That provision also states that school districts shall provide parents notice of such meetings.

In this case, the District had requested before the school year began that the Parent contact District staff to discuss the use of wireless transmitters to track the Students' location throughout the day. In correspondence, the Parent did not respond to the request to discuss the transmitters and indicated that the Students would begin attending school on August 12, 2024.

On the Students' first day of school, several members of the District's staff were present to ensure that appropriate procedures were in place for the use of the transmitter during the school day. The District staff

met with the Parent when she arrived at school with the Students to discuss the use of the transmitter. The Parent contends that the District did not provide sufficient notice of the August 12, 2024, meeting. However, this argument misconstrues the requirements of law concerning parental participation in meetings concerning students with disabilities.

The parental participation requirements contained in the IDEA and Louisiana law apply to specific meetings – such as Individualized Education Program (“IEP”) team or placement meetings – and create a general requirement that school districts take reasonable efforts to ensure that parents are reasonably informed of circumstances that impact the education of their children. The Parent’s interactions with District staff on August 12, 2024, were not meetings related to the development of the Students’ IEPs or their educational placements. Therefore, the specific notice requirements for those types of meetings are inapplicable in this case, and the relevant question becomes whether the District’s efforts to communicate with the Parent about the use of transmitters on August 12, 2024, provided the Parent with a reasonable opportunity to participate.

The District did provide the Parent with an adequate opportunity to participate in the conversation which took place on August 12, 2024. At the time of the conversation, the Parent and the District has been in communication for nearly six months concerning the use of wireless transmitters at school. Additionally, the District had communicated with the Parent prior to the school year to request a meeting to address unresolved issues concerning the use of the transmitter. When the Parent arrived at the school on August 12, 2024, the Parent should have been aware of the need to discuss the use of the transmitter and of the District’s position on the use of the transmitter, which had been consistently communicated to the Parent in a number of letters since March of 2024.

Considering the District’s repeated efforts to resolve this matter with the Parent and the substantial efforts of the District to inform the Parent of the District’s position on the matter, the Department concludes that the District’s actions were reasonable and consistent with the requirements of law concerning parental participation. Therefore, the Department concludes that the Parent’s allegation – that the District failed to comply with the requirement to provide reasonable opportunities for parental participation – is unsubstantiated.

Least Restrictive Environment

Louisiana Bulletin 1706 § 116 requires that each school district in Louisiana ensure that each student with a disability is educated in the least restrictive environment. In this case, the Parent alleges that the Students’ placement was not in the least restrictive environment; however, the Parent has provided no evidence in support of the claim that the Students’ placements failed to comply with the mandates of least restrictive environment. Additionally, the record in this case indicates that the Students were enrolled in a traditional school pursuant to in-district transfers that were requested by the Parent and granted by the District, and that the Students had not attended a District school for several months at the time of the filing of this complaint. Based on this information, the Department concludes that the Parent’s allegation – that the District failed to place the Students in the least restrictive environment – is unsubstantiated.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. 45-C-25 on behalf of [REDACTED]

On October 21, 2024, [REDACTED] ("Parent"), acting on behalf of her minor child ("Student"), filed a formal complaint with the Louisiana Department of Education ("Department") against Caddo Parish Public Schools ("District"), pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Specifically, the Parent alleges that the School District violated the applicable laws by:

1. Failing to respond to the Parent's request for an Independent Educational Evaluation (IEE);
2. Failing to install cameras in the areas where the Student receives services; and
3. Failing to provide the Parent with access to education records relevant to the Student, specifically information regarding an incident that occurred on October 3, 2024, and the qualifications of the Student's teachers.

The Parent submitted a formal complaint form, accompanied by a two-page narrative and one exhibit in support of her allegations. In response, the District submitted a four-page narrative statement and twelve exhibits, generally and specifically denying the allegations in the Parent's complaint.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on October 21, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between October 22, 2022, and October 21, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled in a school operated by the District. During the 2024-2025 school year, the Student received special education and related services as a student with a disability. The District's first day of school for students was August 8, 2024.

A. Request for Independent Educational Evaluation

On May 1, 2024, the Parent submitted written correspondence to the District formally requesting an IEE

at public expense. The District responded on June 24, 2024, stating that the evaluation would occur during the fall of the 2024–2025 academic year. Dissatisfied with the delay, the Parent sent a follow-up email on July 26, 2024, expressing frustration regarding the District’s failure to promptly provide the requested IEE.

The District contends that it removed itself from the evaluation process, asserting that it fulfilled its obligation by referring the matter to Bossier Parish Pupil Appraisal Services and was not responsible for “directly addressing” the independent evaluation. On August 30, 2024, Bossier Parish Pupil Appraisal Services agreed to conduct the IEE, and the District provided the examiner with the Student’s demographic information on September 4, 2024.

On September 20, 2024, Bossier Parish Pupil Appraisal Services issued a Notice of Proposed or Refused Action (“NRPA”) to the Parent, declining to conduct the IEE. The NRPA cited Louisiana Bulletin 1706 § 503(B)(1), asserting that the Parent’s concerns pertained to the development and implementation of the Student’s Individualized Education Program (“IEP”), rather than a disagreement with the District’s evaluation, and that such concerns did not constitute grounds for an IEE.

B. Request for Camera Installation in Special Education Classroom

On August 13, 2024, the Parent submitted a request for the installation of cameras in all areas where the Student received special education services, pursuant to Louisiana Revised Statutes 17:1948. The District received the request on August 14, 2024, and acknowledged receipt the same day.

On August 26, 2024, the District sent the Parent a Request for Audio/Video Recording Eligibility Decision, accompanied by a letter outlining the next procedural steps. The District conducted a special education camera in-service at the Student’s school on September 30, 2024, providing the Parent and each student attending classes in the affected areas with a notice of installation and operation of audio and video recording equipment.

The District completed the installation and activation of the cameras on October 15, 2024, within sixty-two (62) calendar days of the request.

C. October 3, 2024 Incident

On October 3, 2024, the Student sustained a scrape to the elbow and multiple scratches during an incident on the playground. A paraprofessional escorted the Student to the school nurse’s office for treatment, where a bandage was applied before the Student returned to the playground. The District attempted to contact the Parent regarding the incident and successfully informed the Student’s grandmother the same day.

The District conducted an internal investigation and communicated its findings to the Parent via email on October 16, 2024. The District’s review of surveillance footage allegedly confirmed that the Student entered the playground, began running with other children, and fell behind play equipment.

D. Request for Certified Personnel Information

The Parent requested information regarding the qualifications of personnel assigned to the Student’s education and support but did not specify the date of the request. On October 16, 2024, after the complaint had been filed, the District provided a written response outlining the qualifications and certifications of the personnel working with the Student.

On October 8, 2024, the Parent filed the complaint forming the basis of this investigation, asserting that the District's actions constituted violations of IDEA and applicable state laws and regulations.

III. Conclusions of Law

Upon consideration of the relevant facts and applicable law, the undersigned finds that the District **violated** the Individuals with Disabilities Education Act (IDEA), the Louisiana Children with Exceptionalities Act, and/or the Department's implementing regulations as set forth in Louisiana Bulletin 1706 by failing to provide an Independent Educational Evaluation within the legally prescribed timeframe. However, the District did **not violate** applicable regulations by failing to install cameras in the areas where the Student receives services, nor did it deny the Parent access to educational records relevant to the Student, including information regarding the incident that occurred on October 3, 2024, and the qualifications of the Student's teachers.

Accordingly, while the allegation regarding the untimely Independent Educational Evaluation is substantiated, the remaining allegations are unsubstantiated.

A. Independent Educational Evaluation

Pursuant to Louisiana Bulletin 1706 § 503(B)(1), a parent is entitled to request an independent educational evaluation if they disagree with an evaluation conducted by the public agency responsible for their child's education. Upon receiving such a request, the District is required, within fifteen (15) business days, to either (1) initiate a due process hearing to establish the appropriateness of its evaluation or (2) provide the IEE at public expense, as mandated by § 503(B)(2).

In the present matter, the Parent formally requested an IEE on May 1, 2024. However, the District failed to issue a timely response, waiting until June 24, 2024, at which time it merely provided an update stating that the IEE would occur at an unspecified point in the fall of 2024. The District further failed to initiate a due process hearing to defend the adequacy of its evaluation, as required under Louisiana Bulletin 1706 § 503(B)(2).

The District's failure to act within the prescribed timeframe, coupled with its unilateral and indefinite postponement of the IEE, constitutes an unreasonable delay in direct contravention of Louisiana Bulletin 1706 § 503. Moreover, the examiner's subsequent denial of the Parent's IEE request on September 20, 2024—on the grounds that the Parent's concerns related to the Student's IEP rather than the District's evaluation—is inconsistent with § 503(B)(1) and does not provide a legally sufficient basis for denial.

Accordingly, the District's actions, or lack thereof, resulted in a procedural violation of the Parent's rights under the Individuals with Disabilities Education Act (IDEA). Based on the foregoing, the Parent's allegation is substantiated.

B. Finding No. 2: Request for Camera Installation in Special Education Classroom

Louisiana Revised Statutes 17:1948 prescribes the statutory framework governing the installation and operation of video and audio recording cameras in self-contained special education classrooms. Under La. R.S. 17:1948(G), a public school governing authority is required to install cameras within ninety (90) calendar days of receiving a valid parental request. Further, La. R.S. 17:1948(C) mandates that school districts adopt policies regulating the procedures for camera installation requests, the approval or denial of such requests, notification of individuals within the recorded area, the storage and retention of recordings, and the process for reviewing video footage, including any applicable limitations.

In this case, the Parent submitted a written request for camera installation on August 14, 2024, pursuant to La. R.S. 17:1948. The District completed installation and activation of the cameras on October 15, 2024. The Parent asserts that the District failed to comply with the statutorily prescribed timeline and further alleges a violation of District policy due to improper delay.

The District's camera policy, titled *Procedures Implementing Cameras in Special Education Classrooms/Settings*, provides in relevant part that "[t]he assessment, purchase, installation, and operation of the video/audio recording equipment will generally take place within 30 School Business days after the request is determined to be valid (unless an extension of time is needed to obtain additional information, secure equipment, arrange for installation, Acts of God, or other issues outside of district control that impede the process). The requestor will be notified of extraordinary delays exceeding 45 days from the date of request." This internal policy establishes a discretionary rather than a mandatory timeline, affording the District flexibility in the installation process where warranted.

While La. R.S. 17:1948 requires school districts to promulgate policies addressing camera installation procedures, it does not impose an obligation upon the District to adhere to a specific internal timeline beyond the statutory ninety-day requirement. Accordingly, as long as installation is completed within the ninety-day period prescribed by law, the District remains in compliance with its statutory duty.

Here, the District installed and activated the cameras within the statutorily required timeframe. Although the District's internal policy contemplates a shorter timeframe, it does not create a legal mandate beyond what is required under state law.

Accordingly, based on the evidence presented, the District is not in violation of La. R.S. 17:1948. The Parent's allegation that the District improperly delayed installation beyond the legally prescribed timeframe and in violation of District policy is without merit.

C. Finding No. 3: Access to Records

Louisiana Bulletin 1706 § 613(A) establishes a parent's right to inspect and review education records that are collected, maintained, or used by a public agency concerning their child. Such records must be made available without unnecessary delay and, in any event, no later than forty-five (45) days after a request is made. Additionally, § 613(B) extends the parent's rights to request explanations or interpretations of education records, obtain copies of records when failure to provide them would prevent meaningful access, and authorize a representative to inspect and review the records on their behalf.

Louisiana Bulletin 1706 §611 adopts the definition of education records set forth in the Family Educational Rights and Privacy Act ("FERPA"), 20 U.S.C. §1232g and 34 C.F.R. §99.3. Under FERPA, education records include all records directly related to a student and maintained by an educational agency, but exclude records related solely to individuals employed by the agency, such as personnel files.

i. October 3, 2024 Incident

The Parent asserts that the District failed to provide a sufficient explanation regarding the Student's injuries sustained on October 3, 2024, and inadequately documented the incident. The District conducted an internal investigation and provided a summary of its findings to the Parent via email on October 16, 2024, including a general explanation of what was observed in surveillance footage and

paraprofessional reports.

Louisiana Bulletin 1706 § 613(B)(1) requires a public agency to respond to reasonable requests for explanations or interpretations of education records. If a parent expresses dissatisfaction with a school's account of an incident, the school should reasonably clarify whether the parent is requesting access to specific records or merely seeking a more detailed explanation. While the Parent did not explicitly request access to records related to the October 3, 2024 incident, a general assertion that an explanation is "insufficient" may reasonably be interpreted as a request under § 613(B)(1).

However, in this case, there is no documented request from the Parent seeking specific records regarding the incident. Louisiana Bulletin 1706 §613(A) mandates compliance only when a request is made. As no such request is documented in this instance, the District is not found to be in violation of Louisiana Bulletin 1706 § 613 regarding the October 3, 2024 incident.

ii. Request for Certified Personnel Records

The Parent further asserts that she requested documentation regarding the qualifications of personnel assigned to the Student but did not receive a response. The District provided a written response on October 16, 2024, after the Parent filed the complaint underlying this decision. This response detailed the qualifications and certifications of the relevant personnel.

FERPA defines education records as records that are directly related to a student and maintained by an educational agency. Such records typically include grades, disciplinary records, special education evaluations, and IEP documents. However, personnel records—including a teacher's or staff member's qualifications, licensure, or credentials—are not considered education records under FERPA and therefore are not subject to parental access rights under Louisiana Bulletin 1706 § 613.

As the information requested by the Parent pertains to employee qualifications rather than specific records related to the Student, the District was not required to provide such records under §613. Although the District ultimately provided the requested information, the Parent was not legally entitled to access it under FERPA or Louisiana Bulletin 1706.

IV. Corrective Actions

In light of the District's failure to comply with its obligations under Louisiana Bulletin 1706 § 503, the District shall:

- Within fifteen (15) calendar days of this determination, provide the Parent with written authorization for an IEE at public expense, in accordance legal requirements. The District shall not impose any unreasonable restrictions or delays in facilitating the evaluation.
 - If the Parent has obtained an IEE at their own expense due to the District's failure to provide one timely, the District shall fully reimburse the Parent for all costs associated with the evaluation within thirty (30) calendar days of receiving appropriate documentation of expenses.
- Convene an IEP meeting within thirty (30) calendar days to determine whether compensatory educational services are warranted due to the delay in providing an IEE and, if so, to develop a plan for the timely provision such services.
- Review its policies and procedures concerning responses to IEE requests to ensure full compliance with Louisiana Bulletin 1706, and train relevant staff members on the legal

requirements and procedural safeguards set forth in Louisiana Bulletin 1706 § 503.

- As soon as possible and no later than May 23, 2025, the District shall submit documentation to the Department verifying compliance with the above corrective actions. The documentation include, but is not limited to, the following:
 - Evidence of the provision of the IEE at public expense or reimbursement for a privately obtained IEE.
 - Copies of revised policies and procedures regarding IEE requests.
 - Documentation of staff training sessions, including sign-in sheets and training materials.
 - A copy of the IEP team's determination regarding compensatory education.

The Department will issue a letter of closure in this complaint upon the District's satisfactory completion of the required corrective action.

Sincerely,

Domonique Dickerson

Re: Corrected Findings-Decision on Reconsideration of Complaint No. **45-C-25** on behalf of [REDACTED]

On February 26, 2025, the Louisiana Department of Education ("the Department") issued a Findings-Decision Letter regarding the Special Education Formal Complaint Investigation Request referenced above that was filed against Caddo Parish Public Schools ("the District") by [REDACTED] ("the Parent") on behalf of her minor child, [REDACTED] ("the Student"). On March 3, 2025, the Parent sent the Department a request for reconsideration ("Request") asking that the Department reconsider the complaint investigator's findings and/or conclusions. The Parent asserted that the complaint investigator erred by 1) concluding that the Parent did not formally request records from the District, 2) concluding that the District adequately responded to the Parent's request for information about an incident involving the Student, and 3) concluding that the District's failure to provide the Parent with access to a video recording of the incident was not a violation of the applicable laws.

A party who files a request for reconsideration is required by Bulletin 1706 § 153(I) to prove that the complaint investigator erred in a finding of fact and/or clearly misapplied the law. A request for reconsideration is an administrative review by the Department of the complaint investigator's factual findings and conclusions of law to determine whether those findings and conclusions can be reasonably supported by the information submitted during the complaint investigation. Upon reconsideration, the panel has determined that the findings of fact and conclusions of law alleged by the Parent to be in error are reasonably supported by the record of this investigation and the applicable law.

Alleged Errors 1 and 2: Request for educational records and information about October 2, 2024, incident

In resolution of the Parent's allegations that the District failed to provide the Parent with access to requested educational records and information about an October 2, 2024¹, incident, the complaint investigator determined that the District adequately responded to the Parent's request for additional information by email messages on October 15, 2024, and October 16, 2024. The investigator's conclusion was supported by the record of the investigation.

Specifically, the record demonstrates that the Parent was provided with information about the incident by

¹ The February 26, 2025, decision erroneously identifies October 3, 2024, as the date of the incident.

email on October 15, 2024, that the Parent expressed dissatisfaction with the District's handling of the initial incident and the content of the October 15, 2024, email, and that the District responded to the Parent's October 15, 2024, concerns with additional information by reply email on October 16, 2024. While the Parent did request information about the statements of District staff who were present during the incident, the record provides no indication that written statements were created and the Request for Reconsideration points to no such evidence. The Parent also fails to identify any other communications with the District which could reasonably be construed as a request to access educational records of the Student.

Furthermore, the record does not support the Parent's contention that the District failed to adequately respond to the October 15, 2024, request for additional information about the incident. The District's October 15, 2024, and October 16, 2024, emails to the Parent provided information concerning the observations of District staff. As with the prior alleged error, the Parent fails to provide any evidence supporting the contention that the District's responses were incomplete or failed to include information to which the Parent was legally entitled.

The Parent's dispute with the District concerning the incident which occurred on October 2, 2024, arises from the Parent's belief that the District failed to adequately supervise the Student and to properly document injuries that the Student sustained as a result of the incident. Most notably, the Parent's October 15, 2024, email stated that she believed that the District lacked proper documentation of the incident. However, that belief is inconsistent with the Parent's argument herein – that the District is withholding additional information or records concerning the incident.

The record in this matter supports, in part, the Parent's initial contention, that the District did not create and maintain educational records concerning the October 2, 2024, incident. Moreover, the record is devoid of any evidence that the Parent requested access to education records of the Student. Therefore, the Parent's allegation that the investigator erred by finding that the District had not failed to provide her with access to the Student's educational records is not supported by the record.

Similarly, the investigator's conclusion that, to the extent the Parent's communications with the District constituted a request for an explanation of educational records under Louisiana Bulletin §613(B), the District complied with applicable law by providing a reasonable explanation of the incident by email on October 15, 2024, and October 16, 2024. Again, the Parent's contention relies on her unsupported belief that the District was in possession of additional information about the incident that the District withheld from the Parent. However, the record contains no support for that contention; instead, the Parent's October 15, 2024, correspondence indicates that the Parent doubts the existence of documentation concerning the incident. Therefore, the Department affirms the conclusions of the complaint investigator that the District did not violate the provisions of Louisiana Bulletin 1706 by failing to provide the Parent with access to educational records or a reasonable explanation of those records in response to the Parent's communications concerning the October 2, 2024, incident.

Alleged Error 3: Request for access video recordings

The complaint investigator did not make explicit findings concerning the Parent's allegation that the District failed to provide the Parent with access to surveillance video footage of the October 2, 2024, incident. However, the issue is being considered herein as a reasonable extension of the Parent's allegations concerning the District's failure to provide access to educational records. As with the prior alleged errors,

March 21, 2025

the Parent again relies primarily on her October 15, 2025, email to the District. However, this contention fails for the same reason as the prior two – because the record demonstrates that the Parent did not – whether directly or by inference – make a cognizable request to access education records of the Student, including video footage of the October 2, 2024, incident.

Additionally, the applicable law² does not support the conclusion that the District would have been required to provide access to a video recording of the incident even if the Parent had made a valid request for access. Specifically, Louisiana Bulletin 1706 §613 provides for parental access to “educational records” and defines that term as records that are “directly related to a student” and “maintained by an educational agency.” While the record in this matter demonstrates that a District staff member reviewed the video footage in order to provide additional information to the Parent, the record does not establish that the video footage was considered as part of the educational decision-making process concerning the Student or that the video footage was maintained by the educational agency.

In the absence of evidence indicating that the Parent requested access to the video recording or that the Parent would have been entitled to such access had a request been made, the Department determines that the conclusion of the investigator – that the District did not violate Louisiana Bulletin 1706 by failing to provide the Parent with access to the video recording – is affirmed.

Conclusion

Upon reconsideration of the February 26, 2025, decision, the panel has determined that the findings of fact and conclusions of law were reasonably supported by the information submitted during the complaint investigation. Therefore, the reconsideration panel affirms the February 26, 2025, decision of the complaint investigator.

² The decision in this matter addressed an allegation concerning the implementation of R.S. 17:1948 concerning the installation of cameras in special education classrooms. While that provision does address parental access to video recordings, the applicability of the law (and the District’s corresponding policy) is limited to cameras located in special education classrooms. The video recording at issue in this matter was taken by a camera outside of a special education classroom; therefore, the provisions of R.S. 17:1948 and the District’s policy are inapplicable in this case.

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. 45-C-26

Dear [REDACTED] and Kerri Soo:

On November 15, 2024, the Louisiana Department of Education received a copy of a Notice to LDOE of Formal ERP Status Form, which indicated that the parties to this formal complaint reached a mutually agreeable settlement and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 45-C-26. No further action is required by either party.

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-27** on behalf of [REDACTED]

On **October 14, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning her minor child (the Students), who was attending a public school under the jurisdiction of Bossier Parish Schools ("the District"), with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's child, [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, and the Department's implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to implement the Student's Individualized Education Program ("IEP") and Behavior Intervention Plan ("BIP"); 2) failing to provide appropriate supports and services related to the Student's behavioral needs at school; and, 3) failing to provide the Student with a placement consistent with the requirements of least restrictive environment.

At the time of filing the complaint, the Parent provided a complaint request and a two-page narrative complaint. The District provided a narrative response and 38 documentary exhibits. As the Department's assigned investigator, I reviewed the complaint, the District's response, and the supplemental materials submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **October 14, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between October 15, 2022, and October 14, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was eligible to receive special education and related services as a student with a disability. The Student was initially determined eligible for special education and related services under the classification of autism by another school district in Louisiana.

The Student was enrolled in the District during the 2023-24 school year. During that school year, the Student's IEP team met to revise the Student's IEP on six occasions. At the conclusion of the 2023-24 school year, the Student was placed in an off-site, virtual education program as a result of concerns about disruptive

behaviors while receiving in-person educational services. The Student was evaluated by the District on February 8, 2024, before [REDACTED] placement in the virtual education program.

The Student began the 2024-25 school year enrolled in the [REDACTED] at a District school, attending school on a reduced schedule, and receiving services pursuant to an IEP that had been adopted on August 1, 2024. The IEP included annual goals in the areas of self-help, communication, behavior, fine motor, mathematics, and reading. The IEP indicated that the Student had exhibited aggressive behaviors toward students and staff when asked to perform non-preferred tasks at school. On August 1, 2024, the IEP team also determined that the Student's placement would be changed to an in-person, 150-minute school day with all services provided in the special education setting.

The Parent participated in the August 1, 2024, IEP team meeting and the team's development of a BIP to address the Student's physical aggression, tantrums, and general noncompliance. The BIP identified a number of interventions for use by District staff, including the use of social stories and a cool down area. The District requested and the Parent provided consent for the completion of a functional behavior assessment of the Student at the August 1, 2024, meeting.

During the 2023-24 school year, the Student exhibited a pattern of aggressive behavior, which was documented on *Louisiana Department of Education School Behavior Report* forms as follows:

- On August 20, 2024, the Student refused to participate in a number of activities, ran around the classroom during instruction, and struck a staff member.
- On August 22, 2024, the Student refused to participate in classroom activities, threw objects at students and staff members, climbed on classroom furniture, ran around the classroom, and dumped out classroom toys. The Student was sent to the time out room for 30 minutes.
- On August 26, 2024, the Student grabbed and squeezed the genital area of a District staff member and made a comment about the staff member urinating. The Student was referred to the school counselor.
- On August 27, 2024, the Student eloped, dumped the books from a bookshelf, threw items at District staff, stood on classroom furniture, screamed, stated that [REDACTED] would "destroy every teacher" and struck, bit, and pulled the hair of District staff. The Student's father met with the school principal concerning the incidents. The District reported bite-related injuries to two staff members as a result of the Student's actions.
- On August 30, 2024, the Student eloped three times, threw crumpled paper, knocked over chairs, climbed on classroom furniture, bit a District staff member, and threw a computer across the classroom. The Student participated in a social story activity.
- On September 5, 2024, the Student eloped three times, refused to participate in classroom activities, bit two District staff members, and threw toys that struck a student and a District staff member. The Student was sent to the time out room for 30 minutes.
- On September 6, 2024, the Student eloped, slammed computers shut, attempted to tackle District staff members, climbed on furniture, and bit and struck District staff members. The Student was sent to the time out room for 30 minutes. The District reported bite-related injuries to two staff

members as a result of the Student's actions.

- On September 9, 2024, the Student refused classroom activities and threw and climbed on classroom furniture. The Student was sent to the time out room for approximately 30 minutes.
- On September 10, 2024, the Student eloped, bit three District staff members, climbed on furniture, blew [REDACTED] nose on the floor, refused to participate in classroom activities, and pinched and struck several District staff members. The Student was sent to the time out room on two occasions for approximately 30 minutes each time. The District reported injuries to two staff members as a result of the Student's actions.
- On September 12, 2024, the Student eloped four times, climbed on furniture, struck a student with a book, threw toys and other items at District staff members, stepped on a student, threw a computer, and removed papers from the classroom wall and threatened to eat them. The Student was sent to the time out room on two occasions for approximately 15 minutes each time and served one day of in-school suspension on September 13, 2024. The District reported an injury to a student as a result of the Student's actions.
- On September 16, 2024, the Student eloped, climbed on furniture, threw furniture and computers, and attempted to kick a District staff member in the face. The Student was sent to the time out room for approximately 90 minutes.
- On September 20, 2024, the Student eloped, tried to rip the buttons from a District staff member's clothes, and struck and bit several District staff members. The Student served one day of in-school suspension on September 23, 2024. The District reported a bite-related injury to a staff member as a result of the Student's actions.
- On September 23, 2024, the Student refused to participate in in-school suspension activities, threw blocks, threw classroom furniture, and stated a desire for school staff to die. The Student was required to serve the one-day, in-school suspension again on September 24, 2024.
- On September 26, 2024, the Student eloped, refused to participate in classroom activities, struck District staff members, climbed on classroom furniture, threw objects, and struck, pushed, and attempted to bite a District staff member. The Student served one day of in-school suspension on September 27, 2024.
- On September 27, 2024, the Student refused to participate in in-school suspension activities, threw a computer twice, threw classroom furniture, and struck, pushed, and attempted to bite a District staff member. The Student was required to serve the one-day, in-school suspension again on September 30, 2024. The District reported an injury to a staff member as a result of the Student's actions.
- On October 2, 2024, the Student eloped, refused to participate in classroom activities, threw and climbed on classroom furniture, damaged a computer, struck and bit District staff members, struck [REDACTED] head on the floor, and stated a hatred for school staff. The Student served a 90-minute, in-school suspension on October 3, 2024.
- On October 4, 2024, the Student eloped six times, took items from another student, struck another

student with objects, struck a District staff member, and threw rocks on the playground. The Student served a 90-minute, in-school suspension on October 4, 2024.

The District provided the Parent with daily behavior reports concerning the Student from the beginning of the 2024-25 school year through the filing of the complaint that forms the basis of the Department's investigation. The reports indicate that the District was implementing the interventions identified in the Student's BIP and that the Student was exhibiting disruptive and aggressive behaviors that negatively impact the ability of the Student and other students to access the educational services being provided.

During the relevant time period, the Student's IEP was amended on August 29, 2024, to adjust the accommodations being implemented relative to the Student's transition from task to task. The IEP team also determined that the Student would remain on a reduced school day and that the placement would be reconsidered in the future.

On October 14, 2024, the Parent filed the complaint that formed the basis of the Department's investigation.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by:

- 1) failing to implement the Student's IEP and BIP;
- 2) failing to provide appropriate supports and services related to the Student's behavioral needs at school; or,
- 3) failing to provide the Student with a placement consistent with the requirements of least restrictive environment.

While this case involves three allegations of noncompliance, the three allegations each stem from the Parent's dissatisfaction with the District's efforts to address the Student's behavioral needs. Therefore, the three allegations will be discussed collectively herein.

Louisiana Bulletin 1706 § 324(A)(2) requires that each public agency, "in the case of a student whose behavior impedes his or her learning or that of others, consider the use of positive behavioral interventions and supports, and other strategies, to address that behavior." Additionally, Louisiana Bulletin 1706 § 114 requires that "unless the IEP of a student with a disability requires some other arrangement, the student is educated in the school that he or she would attend if non-disabled."

In this case, the Student exhibited behaviors that impeded both ■ learning and the learning of other students in the educational setting. The District was aware of the Student's behaviors and met on several occasions during the 2023-24 school year to amend the Student's educational program in an effort to address the behaviors that were being exhibited at school. Eventually, the Student's IEP team placed the Student in a virtual education program during the 2023-24 school year as a result of aggressive behaviors at school.

The Student's IEP team also met before the start of the 2024-25 school year to ensure that proper supports were in place to support the Student's return to a less restrictive environment – a in-person, reduced-day schedule. The supports contained in the Student's August 1, 2024, IEP and BIP were reasonably calculated to address the Student's aggressive behaviors. As the District became aware that those supports were not resulting in a meaningful reduction in the instances of disruptive behavior by the Student, the District reconvened the IEP team approximately one month into the 2024-25 school year to adjust the Student's

educational program.

Considered as a whole, the District's actions regarding the Student's educational program during the 2023-24 and 2024-25 school years were reasonably calculated to provide the Student with educational benefit and were provided in conformity with the Student's IEP and BIP. The record in this case demonstrates that the District was continually seeking new information about the Student and new strategies for addressing ■■■ challenging behaviors at school. While the District's efforts have not shown the results sought by the Parent, the District's actions at each stage demonstrated an interest in addressing the Student's behaviors and a commitment to increasing the Student's exposure to the general education curriculum in the general educational setting.

The record also demonstrates the Parent's dissatisfaction with the general restrictiveness of the Student's placement during the 2024-25 school year. In this case, the District's efforts to educate the Student in the general educational setting – like its efforts to mitigate the Student's aggressive behaviors – have been less successful than the Parent would like. Nonetheless, the Department concludes that the Student's placement during the 2024-25 school year has been consistent with the requirements of least restrictive environments. The record clearly demonstrates that the Student's presence at school – even while receiving intensive supports in a restrictive placement – serves as an impediment to the Student's learning and the learning of other students. Therefore, the Department concludes that the placement of the Student on a reduced school day was appropriate.

Based on the findings of fact and conclusions of law contained herein, the Department concludes that the Parent's allegations – that the District failed 1) to implement the Student's IEP and BIP; 2) to provide appropriate supports and services related to the Student's behavioral needs at school; and, 3) to provide the Student with a placement consistent with the requirements of least restrictive environment – are unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Re: Findings-Decision in State Special Education Formal Complaint No. 45-C-28 on behalf of [REDACTED]

On October 21, 2024, Amythist Kearney ("Complainant"), acting on behalf of [REDACTED], the parent of the minor child who is the subject of this complaint ("Student"), filed a formal complaint with the Louisiana Department of Education ("Department") against St. Tammany Parish Public Schools ("District"). The complaint was submitted in accordance with Louisiana Bulletin 1706, §§151-153.

I. Statement of the Case

In the complaint, the Complainant alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), the Louisiana Children with Exceptionalities Act, and the Department's implementing regulations set forth in Louisiana Bulletin 1706. Specifically, the Complainant contends that the School District denied the Student a Free Appropriate Public Education ("FAPE") by failing to enroll the Student in a district school.

The Complainant submitted a formal complaint form, a two-page narrative, and four supporting exhibits to substantiate their allegations. In response, the District voluntarily submitted a corrective action plan to address the alleged violations.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the applicable legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §151 - 153." The Department received the complaint on October 21, 2024. Accordingly, the investigation was limited to alleged violations of law that occurred between October 22, 2022 and October 21, 2024.

II. Stipulated Corrective Actions

The District submitted a proposed corrective action plan to the Department addressing the allegations outlined in the complaint. A copy of this plan is attached. Upon review, the Department determined that the District's proposed corrective actions adequately address the allegations and are substantially equivalent to any corrective action that would have been ordered had the allegations been substantiated.

As the District has voluntarily agreed to undertake corrective actions sufficient to remedy the concerns raised in the complaint, the Department will not issue formal findings or conclusions of law. Instead, the District

must provide evidence demonstrating its compliance with the corrective actions, as detailed in Section III. The District's willingness to engage in these corrective actions and its agreement to report its progress to the Department do not constitute a finding of noncompliance by the Department.

III. Required Actions

To comply with its February 14, 2025, corrective action plan, the District shall:

1. Promptly enroll the Student in the appropriate District school, implement the Student's Individualized Education Plan, and provide compensatory educational services to address any learning deficits resulting from missed instructional days.
2. Ensure the delivery of compensatory services, including conferring with the Parent regarding the time and location of such services.
3. Submit documentation to the Department as soon as possible, but no later than May 23, 2025, including:
 - a. Evidence that the Student has received compensatory services in conformity with the February 14, 2025, corrective action plan.
 - b. Progress monitoring reports provided to the Parent detailing the Student's receipt of compensatory services in accordance with the District's corrective action plan.

Upon the District's satisfactory completion of the required actions, the Department will issue a formal letter of closure regarding this complaint.

Sincerely,

Domonique Dickerson

Voluntary Corrective Action Plan Related to 45-C-28 Complaint Investigation

- Confirmation that the student has been, or will be, promptly enrolled in the appropriate District school.
 - Kerri Soo, Director of STPPS Students with Exceptionalities, Susan Munster, Assistant Director, and, parent, [REDACTED] met on November 8, 2024, for an Early Resolution Meeting. The student returned to [REDACTED] on November 14, 2024.
 - All absences between the dates of October 8, 2024 and November 13, 2024 are excused.
- Assurance that the student's IEP has been reviewed and is being implemented to ensure compliance with educational needs.
 - An IEP meeting was conducted on October 7, 2024. This plan is being followed with fidelity and has been reviewed with personnel providing support and instruction to ensure compliance with educational and behavioral needs.
- A plan for providing compensatory educational services to address any learning deficits resulting from missed instructional days.
 - The initial plan provided the student access to additional educational services through multiple opportunities to meet [REDACTED] academic needs. Certified teachers worked with the student to provide instruction during the daily App period throughout the week of semester exams, on Saturdays and after school.
 - The student has been offered the opportunity for additional instruction during summer through the Extended School Year program.
 - The parent, principal, assistant principal, assistant SWE director and all the student's teachers met on Thursday, February 13, 2025, to discuss progress, update grades and update the initial plan. All parties present agreed that the student will be fully caught up by the end of the third quarter. [REDACTED] will continue to be afforded opportunities for additional instruction and support throughout the remainder of the school year during the APP period, after school on Fridays and during Saturday morning sessions. The student will also have the opportunity to access additional support during the summer through the Extended School Year program.

Please see the latest plan update (sent via email to the parent) to complete the remainder of instruction and assignments following 2/13/25 meeting:

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. 45-C-29

Dear [REDACTED] and Director Ortego:

On November 6, 2024, the Louisiana Department of Education received a copy of a Notice to LDOE of Formal ERP Status Form, which confirmed that the parties to this formal complaint reached a mutually agreeable resolution and that the complainant officially withdrew the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 45-C-29. No further action is required by either party.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-30** on behalf of [REDACTED]

On **October 22, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning the Livingston Parish Public Schools ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by 1) failing to provide the Parent with records concerning physical injuries sustained by the Student at school; and 2) failing to implement the Student's Individualized Education Program concerning the Student's medical condition related to exposure to excessive heat.

The Parent provided a complaint request form, several hundred pages of documents, and 133 photographs, which were provided in hard copy and on a flash drive. The District provided a narrative response and a copy of the Student's January 14, 2023, Individualized Education Program ("IEP"). The Parent then submitted seven additional exhibits. As the Department's assigned investigator, I reviewed the complaint and all exhibits submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **October 22, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between **October 23, 2022**, and **October 22, 2024**.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was eligible to receive special education and related services as a student with a developmental delay. The student initially enrolled in the District as a [REDACTED] student for the 2023-24 school year.

An interim IEP was adopted for the Student on September 6, 2023. The Parent participated in the IEP team meeting. The IEP indicated that the Student was "heat-sensitive" and that the Parent raised concerns about excessive heat during the Student's bus rides. The IEP also indicated that the Student would receive health

services pursuant to an Individualized Health Services Plan which was developed on September 14, 2023. The health service plan indicated that the Student had been diagnosed with [REDACTED]. Neither the IEP nor the health plan included any emergency procedures or any services related to the Student's heat sensitivity.

During the 2023-24 school year, the Student's class attended physical education in an air-conditioned gymnasium and recess was held indoors during periods of excessive hot or cold weather. A District employee conducted wellness checks of the Student several times per day – in the morning, during diaper changes, and in the afternoon. The wellness checks included visual inspections of the Student's body to identify any scratches, bruises, or other injuries to the Student.

The wellness check which was conducted on October 23, 2023, did not identify any new injuries to the Student. On October 24, 2023, the Parent sent an electronic mail message to the District concerning a scratch on the Student's chest. A District employee questioned the Student's teachers and paraeducators and determined that District employee's had not observed any injuries to the Student on October 23, 2023. The District did not create an incident report concerning the Parent's claim.

On October 27, 2023, the Student attended a non-academic gathering at school. The Parent also attended the gathering and interacted with District staff. At the end of the gathering, the Parent checked the Student out of school. District staff did not observe any injuries to the Student when the Parent checked the Student out. On October 29, 2023, a Sunday, the Parent sent District staff an electronic image depicting bruising on the Student's body. The Parent claimed that the bruising had occurred on October 27, 2023, and removed the Student from school from October 30, 2023, through November 20, 2023.

An initial IEP was adopted for the Student on December 14, 2023. The Parent participated in the IEP team meeting. The IEP indicated that the Student was "heat-sensitive" and indicated that the Student would continue to receive health services pursuant to the Individualized Health Services Plan that was developed on September 14, 2023. The IEP did not contain any specific procedures to be followed in connection with the Student's heat sensitivity.

On March 14, 2024, the Student's afternoon wellness check did not identify any injuries to the Student. After school, the Parent reported to District staff that the Student had a bruise on his back. A District employee investigated that Parent's claim and found no evidence that the injury occurred at school.

On October 22, 2024, the Parent filed the complaint that formed the basis of the Department's investigation.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by 1) failing to provide the Parent with records concerning physical injuries sustained by the Student at school; and 2) failing to implement the Student's IEP concerning the Student's medical condition related to exposure to excessive heat.

1. Access to Records

Louisiana Bulletin 1706 § 613(A) establishes a parent's right to inspect and review education records that are

collected, maintained, or used by a public agency concerning their child. Such records must be made available without unnecessary delay and, in any event, no later than forty-five (45) days after a request is made. Additionally, § 613(B) extends the parent's rights to request explanations or interpretations of education records, obtain copies of records when failure to provide them would prevent meaningful access, and authorize a representative to inspect and review the records on their behalf.

Louisiana Bulletin 1706 §611 adopts the definition of education records set forth in the Family Educational Rights and Privacy Act ("FERPA"), 20 U.S.C. §1232g and 34 C.F.R. §99.3. Under FERPA, education records include all records directly related to a student and maintained by an educational agency, but exclude records related solely to individuals employed by the agency, such as personnel files.

The Parent asserts that the District failed to provide a sufficient explanation regarding injuries to the Student which were discovered by the Parent on October 24, 2023, October 29, 2023, and March 14, 2024. In each instance, the District conducted an internal investigation and determined that the injuries to the Student were not observed at school.

In each case, the District's investigation was appropriate and reached the reasonable conclusion that the Student's injuries were not observed by District staff. The October 24, 2023, bruising was not observed by District staff at the prior end-of-day wellness check. The October 29, 2023, bruising allegedly occurred during a school day in which the Parent was present at school, and no bruising was observed during the end-of-day wellness check. Additionally, the October 29, 2023, bruising was not reported to the District by the Parent for two days after the bruising allegedly occurred at school. The March 14, 2024, injury was also not observed by District staff during the prior end-of-day wellness check.

Considering the evidence as a whole, the Department determines that the District reasonably concluded that the injuries to the Student did not occur at school. Therefore, the District was under no obligation to create records of the non-occurrence of the incidents alleged by the Parent. In the absence of such records, the District could not have violated the Parent's right to access educational records of the Student.

Louisiana Bulletin 1706 § 613(B){1} also requires a public agency to respond to reasonable requests for explanations or interpretations of education records. If a parent expresses dissatisfaction with a school's account of an incident, the school should reasonably clarify whether the parent is requesting access to specific records or merely seeking a more detailed explanation. The Department also finds that the District's actions complied with the requirements of law concerning reasonable requests for explanations. In each instance in which the Parent alleged that the Student had been injured at school, the District conducted a reasonable review of the circumstances and provided a full accounting of the information possessed by the District.

Based on the information presented, the Department concludes that the District complied with the relevant provisions Louisiana Bulletin 1706 in its responses to parental allegations of school-based injuries. Therefore, the Department concludes that the allegation that the District failed to provide the Parent with access to educational records of the Student is unsubstantiated.

2. Heat Sensitivity

Louisiana Bulletin 1706 § 324(A)(2)(f) requires school districts to “consider the health needs of students with disabilities to be met during the school day based on a health assessment.” Furthermore, paragraph (B)(1) requires that the IEP of each student be revised to address a lack of expected progress or new information provided by the parents.

In this case, the Student’s heat sensitivity was acknowledged in the Student’s interim and initial IEPs and in the Student’s September 14, 2023, Individualized Health Services Plan. The Parent participated in the development of each of the IEPs and did not voice any specific concerns or present and specific measures to be implemented to avoid issues with the Student’s heat sensitivity. Additionally, the record contains no indication that the Parent had informed the District that the Parent believed that the Student was suffering the ill effects of heat exposure at school prior to the filing of the complaint in this matter.

Based on the information submitted in this matter, the Department concludes that the District adequately addressed the Student’s heat sensitivity based on the information available to the IEP Team. Specifically, the Department bases its conclusion on the facts that 1) the IEP team had no specific information concerning the Student’s needs related to heat sensitivity, 2) the Parent participated in the development of the Student’s IEPs and did not voice concerns about the lack of specific heat-sensitivity protocols therein, and 3) the Parent did not inform the District that the Student had experienced the ill effects of heat exposure at school prior to the filing of this complaint. These conclusions lead to the ultimate determination that the Student’s IEP appropriately addressed the Student’s needs related to heat sensitivity and that the Parent’s allegation – that the District failed to properly accommodate the Student’s needs related to heat-sensitivity – is unsubstantiated.

IV. **Corrective Action Plan**

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department’s implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Re: Findings-Decision in State Special Education Formal Complaint No. **34-C-31** on behalf of [REDACTED]

On **October 22, 2024**, [REDACTED] (hereinafter referred to as the “Parent”) filed a Request for Special Education Formal Complaint Investigation concerning Caddo Parish Public Schools (“the District”) with the Louisiana Department of Education (“the Department”) pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent’s minor child [REDACTED] (“the Student”), the Parent alleged that the District violated the Individuals with Disabilities Education Act (“the IDEA”), the Louisiana Children with Exceptionalities Act, or the Department’s implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to provide the Student with an appropriate placement to allow the Student access to a free, appropriate, public education, and 2) failing to review and, if necessary, revise the Student’s Individualized Education Program (“IEP”) to address the Student’s lack of expected progress in the general education curriculum.

The Parent provided a complaint form containing a narrative of events. The District provided eight exhibits in response to the complaint. As the Department’s assigned investigator, I reviewed the complaint and all documents submitted by the parties. I also conducted a phone interview with the Parent.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) states that a formal complaint “shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The Department received the complaint on October 22, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between October 23, 2022, and October 22, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school. During the 2023-24 school year, the Student was enrolled in the [REDACTED] and was eligible for special education and related services as a student with autism. For the majority of the 2023-24 school year the Student was receiving services pursuant to an IEP that provided for special education instruction in the general education setting for 60 minutes each week and special education instruction in the special education setting for 60 minutes each week. The IEP noted that the Student was making “insufficient progress in the general education setting” and that the Student was not obtaining passing grades in [REDACTED] biology, business applications, or art courses. The Student’s IEP included goals in the areas of communication, social/emotional, motor/adapted

physical education, science, English, and mathematics. The IEP also stated that the Student wanted to pursue employment in the food industry after secondary school and that the Student would utilize alternative criteria to demonstrate proficiency in courses with associated statewide testing requirements.

During the 2023-24 school year, the Student participated in statewide testing in English/language arts, mathematics, science, and social studies. The Student performed in the “Unsatisfactory” range on each of the tests.

The Student began the 2024-25 school year as a [REDACTED] enrolled in Principals of Business, Algebra I, Speech I, Physical Education, English II, and Physical Science. On September 9, 2024, the IEP Team reconvened and amended the Student’s IEP. The team addressed parental concerns about the Student’s placement – specifically, the Parent’s requests to provide the Student with more instruction in a special setting and to reevaluate the Student. At the time of the meeting, the Student maintained failing grades in [REDACTED] mathematics, English/language arts, physical science, and speech courses and was maintaining a “D” grade in [REDACTED] business course.

The Parent filed the complaint that forms the basis of these findings and decision on October 22, 2024.

The District conducted a number of observations of the Student in November of 2024. Each observation was conducted while the Student was receiving specially designed instruction. The observers generally found the Student to be on-task and making progress on course activities.

The Student’s IEP Team met again on December 2, 2024, to review the results of the Student’s reevaluation, which had been conducted on November 6, 2024. The results were largely consistent with the results of the Student’s prior evaluation, finding that the Student exhibited autistic behaviors and characteristics, moderately impaired adaptive behavior, a language disorder, sensorimotor deficit, gross motor deficits, and deficits in reading fluency, mathematics calculations, and written communication.

The Student’s IEP Team met for a third time during the 2024-25 school year on January 13, 2024. The team added an annual goal for the Student concerning English I, which the Student was repeating after failing the course during the prior school year. The team also increased the Student’s specially designed instruction, amending the service plan to provide for 50 minutes per day of specially designed instruction in the special education setting and discontinuing the provision of special education instruction in the general education setting.

At the conclusion of the fall semester of the 2024-25 school year, the Student continued to make minimal progress in [REDACTED] general education coursework.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District failed to comply with the IDEA, the Louisiana Children with Exceptionalities Act, and the Department’s implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Student with an appropriate placement which would allow the Student access to a free, appropriate, public education and by failing to review and, if necessary, revise the Student’s IEP to address the Student’s lack of expected progress in the general education curriculum.

The Parent's complaint alleged two defects in the District's actions concerning the Student – that the District failed to make adequate adjustments to the Student's educational plan and placement in response to the Student's lack of expected progress in the general education curriculum. Because of the interrelated nature of educational programs and the placement in which those programs are delivered, the issues are addressed collectively herein.

Concerning the Student's academic performance, Louisiana Bulletin 1706 § 324(B) requires each public agency to revise, as appropriate, the IEP of students who demonstrate a lack of expected progress in the general education curriculum. Concerning the Student's placement, Louisiana Bulletin 1706 § 115 requires each public agency to maintain a continuum of alternative education placements sufficient to meet the needs of students with disabilities for special education and related services. Additionally, Louisiana Bulletin 1706 § 114 states that students should be placed in special classes, separate schooling, or otherwise removed from the regular educational environment only when the use of supplementary aids and services in the regular education environment is insufficient to provide the student with reasonable access to a free and appropriate public education.

In this case, the Student has demonstrated consistent difficulties making progress in the general education curriculum. These difficulties are demonstrated in the Student's performance in core courses and on statewide assessments and warrant re-consideration and, if necessary, revision of the Student's educational program.

While the Student's IEP Team did meet on three occasions during the current school year, the only substantive changes were an increase in special education services from two hours per week to approximately five hours per week and the provision of all special education instruction in the special education setting. However, it is unlikely that the modest increase in special education instruction reflected in the Student's most-recent IEP will allow the Student to make meaningful progress in the [REDACTED] general education curriculum as [REDACTED] also attempts to recover credits that were not completed during the prior school year.

Though the record in this investigation is insufficient to determine an appropriate educational program for the Student, the record does support the determination that the Student's current educational program is not reasonably calculated to provide the Student a meaningful opportunity to obtain a high school diploma. Therefore, the corrective actions required herein include consideration of the Student's transition plan, including the Student's post-secondary goals and individual graduation plan.

On the basis of these findings, the Department concludes that the Parent's allegations – that the District failed to comply with applicable law by failing to provide the Student with an appropriate placement and failing to review and, if necessary, revise the Student's IEP to address the Student's lack of expected progress in the general education curriculum – are substantiated.

IV. Corrective Action Plan

The Department determined that the District failed to comply with applicable law concerning the provision of a free and appropriate public education in the least restrictive environment. In order to address this noncompliance and to ensure the continued provision of a free and appropriate public education to the

Student, the District shall implement the following corrective actions:

1. On or before **March 14, 2025**, the District shall convene a meeting with the Parent and appropriate members of the Student's IEP Team to 1) consider the Student's post-secondary goals and revise the Student's individual graduation plan accordingly, 2) adopt an IEP that is reasonably calculated to enable the Student to make meaningful progress according to the individual graduation plan, and 3) select a placement for the Student that will support the Student's efforts to achieve ■ annual and long-term academic goals.
 - a. If the Student will continue to pursue completion of a Louisiana diploma under alternative proficiency criteria, the District shall, within 30 days of the start of the next school year or course, establish minimum performance requirements in the student's IEP relevant to graduation requirements.
2. The District shall implement the revised IEP without undue delay. By **April 4, 2025**, the District shall provide documentation, including the revised IEP, meeting sign-in sheets, and service logs or observations of the Student, demonstrating that the corrective actions have been completed.

Sincerely,

Tyrell T. Manieri III

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-32** on behalf of [REDACTED]

On October 22, 2024, [REDACTED] ("Parent"), acting on behalf of her minor child ("Student"), filed a formal complaint with the Louisiana Department of Education ("Department") against East Baton Rouge Parish Schools ("District"), pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), and Louisiana Children's Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Specifically, Parent alleges that the District violated the applicable laws and regulations by:

- Failing to timely disseminate the results of a comprehensive evaluation conducted on February 21, 2024.

Pursuant to Bulletin 1706 §§ 151-153, the Department conducted a review of the record, which includes the Parent's complaint narrative and exhibits, the District's response and exhibits, and email correspondence between the Parent and the District.

The findings of fact and conclusions of law contained herein are based upon a review of the evidentiary record and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on October 22, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between October 23, 2022, and October 22, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student, [REDACTED], was enrolled in a school operated by the District and received special education and related services as a student with a disability.

A. Request for Reevaluation

On February 21, 2024, during an IEP meeting, the Parent requested a full comprehensive reevaluation of the student to establish current baseline data. In response, the District provided the Parent with a Prior Written

Notice on February 26, 2024, seeking consent to proceed with the reevaluation. The Parent electronically signed this notice and, on the same date, submitted a letter through her attorney, affirming consent for the reevaluation.

B. Parent's Participation in Reevaluation Process

The District provided the Parent with assessment instruments necessary for completing the reevaluation, including the Sensory Processing Measure assessment, which was sent home on May 10, 2024, and the Developmental Profile 4 (DP4) Parent Questionnaire, which was also sent on May 10, 2024. Despite receiving these materials, the Parent did not return the DP4 questionnaire. The District issued multiple requests for the completed assessment, including email reminders on May 31, 2024, June 3, 2024, and June 25, 2024. On May 31, 2024, the Parent formally requested the evaluation results and raw data, to which the District responded the same day, explaining that the evaluation could not be completed without the outstanding Parent-completed assessments.

C. District's Communications and Attempts to Complete the Reevaluation

The record reflects consistent efforts by the District to obtain the Parent's cooperation in completing the reevaluation. The District initially requested the completion of assessment materials on May 10, 2024, and followed up on May 17, 2024. On May 31, 2024, the District reiterated that the evaluation remained incomplete due to the Parent's failure to return the necessary assessments. On June 3, 2024, the District clarified that the Vineland Adaptive Behavior assessment was no longer required, as its components had been addressed through a Parent interview, but the DP4 Parent Questionnaire was still outstanding. Despite these repeated requests, the Parent did not submit the DP4 questionnaire. On June 25, 2024, the District formally requested a Parentally Approved Evaluation Extension, citing the lack of the completed DP4 form as the primary impediment to finalizing the reevaluation.

D. Parent's Availability for Meetings and Requests for Accommodations

On June 4, 2024, the Parent informed the District that she was only available on Fridays and could not attend in-person meetings on District property. In response, the District explained that its summer work schedule operated Monday through Thursday and provided virtual meeting options to accommodate the Parent's availability. Despite these accommodations, the Parent continued to request meetings on Fridays, which conflicted with the District's established work schedule.

E. Request for Evaluation Report and Raw Data

The Parent submitted multiple requests for evaluation results, including on May 31, 2024, June 5, 2024, and October 3, 2024. In response, the District consistently explained that the evaluation could not be completed without the Parent's input in the form of the DP4 Parent Questionnaire. Given that the evaluation was still in progress and could not be finalized due to missing Parent-provided information, the District was unable to provide a completed evaluation report or raw data.

On October 22, 2024, the Parent filed the complaint forming the basis of this investigation, asserting that the District's actions constituted violations of IDEA and applicable state laws and regulations.

III. Conclusions of Law

A. Finding No. 1: Reevaluation

Pursuant to Bulletin 1706 § 304(A), a reevaluation must be conducted if a parent or teacher requests it or if the public agency determines that the student's educational or related services needs warrant it. Once a reevaluation is initiated, the public agency must follow the prescribed procedures under Bulletin §§ 305-307, ensuring that the evaluation is comprehensive, uses a variety of assessment tools, and provides meaningful data for educational decision-making. The public agency must also comply with Bulletin § 305(A) by issuing prior notice describing the proposed evaluation procedures. Additionally, the public agency must administer the necessary assessments and ensure that all evaluation components are completed in accordance with Bulletin § 306(C).

In this case, the Parent requested a full comprehensive reevaluation on February 21, 2024, and subsequently provided written consent on February 26, 2024, thereby initiating the evaluation process. In compliance with Bulletin § 305(A), the District provided prior written notice and detailed the evaluation procedures. The District also complied with § 305(B) by selecting a variety of assessment tools, including parent-completed measures such as the Developmental Profile 4 (DP4) Parent Questionnaire. Pursuant to § 305(C), a reevaluation must be sufficiently comprehensive to assess all areas of suspected disability, and input from parents is a required component. Despite multiple requests from the District, the Parent failed to return the DP4 Parent Questionnaire, which was an essential element of the reevaluation.

The applicable regulations recognize that evaluations require parental cooperation. Under Bulletin § 306(A)(2), the IEP Team must review existing data and identify what additional assessments are needed to complete the reevaluation. Here, the missing DP4 questionnaire prevented the District from finalizing the reevaluation. Moreover, under § 306(D)(1), if no additional data is needed, the public agency must notify the parent and explain why, but in this case, the missing questionnaire constituted necessary data, making the reevaluation incomplete.

Additionally, the District's obligation under Bulletin § 307(A) to provide a completed evaluation report arises only when the assessment process is concluded. Since the evaluation remained incomplete due to missing Parent input, the District was not required to issue an incomplete report. Based on the evidence, the District made diligent efforts to complete the reevaluation and communicated repeatedly with the Parent regarding the need for the outstanding materials. The delay in completion was attributable to the Parent's failure to provide necessary data, and not to any noncompliance by the District. Accordingly, there is no violation.

B. Finding No. 2: Parental Participation in Meetings and Evaluations

Pursuant to Bulletin 1706 § 502(B)(1), parents must be afforded an opportunity to participate in meetings regarding their child's evaluation, placement, and educational programming. The record reflects that the District made multiple attempts to schedule meetings and obtain the Parent's participation. The Parent, however, imposed unilateral restrictions on her availability, stating that she was only available on Fridays and refusing to attend meetings on District property. The District, in an effort to accommodate, offered virtual meeting options. The regulatory requirement is for the District to provide a reasonable opportunity

for participation, which was satisfied through these efforts. The Parent's unwillingness to accept alternative meeting options does not render the District noncompliant with § 502. Accordingly, there is no violation.

C. Finding No. 3: Access to Educational Records

Under Bulletin 1706 § 613(A), parents have the right to inspect and review their child's educational records, with the District required to comply within 45 days of a request. Here, the Parent made multiple requests for the evaluation report and raw data, including on May 31, 2024, June 5, 2024, and October 3, 2024. The District responded promptly, explaining that the evaluation was incomplete due to the Parent's failure to submit the DP4 Parent Questionnaire. The right to access educational records applies to completed documents and does not extend to unfinished evaluations. Because the District was unable to finalize the evaluation without the necessary parent-provided information, it was not required to produce an incomplete report. As such, the District complied with § 613, and no violation occurred.

IV. Conclusion

Based on the foregoing that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required.

Sincerely,

Domonique Dickerson

Re: Findings-Decision on Reconsideration of Complaint No. 45-C-32 on behalf of [REDACTED]

On February 28, 2025, the Louisiana Department of Education ("the Department") issued a Findings-Decision Letter regarding the Special Education Formal Complaint Investigation Request referenced above that was filed against East Baton Rouge Parish Schools ("the District") by [REDACTED] ("the Parent") as the parent of [REDACTED] ("the Student"). On March 10, 2025, the Parent sent the Department a Request for Reconsideration, asking it to reconsider the complaint investigator's findings and/or conclusions. The Parent asserts that the complaint investigator erred by concluding that the District complied with Louisiana Bulletin 1706 in its response to a parental request for reevaluation. In particular, the Parent claims that the District failed to comply with various provisions of Bulletin 1706 by failing to complete a timely and comprehensive evaluation of the Student and by failing to provide the Parent with records concerning the reevaluation results.

A party who files a request for reconsideration is required by Bulletin 1706 § 153(I) to prove that the complaint investigator erred in a finding of fact and/or clearly misapplied the law. A request for reconsideration is an administrative review by the Department of the complaint investigator's factual findings and conclusions of law to determine whether those findings and conclusions can be reasonably supported by the information submitted during the complaint investigation. The Department has determined that the decision in this matter was reasonably supported by the information provided therein.

In resolution of the Parent's allegations, the complaint investigator relied primarily on the finding that the District's failure to complete the reevaluation was caused by the District's inability to obtain necessary evaluation data – the Developmental Profile 4 Parent Questionnaire – from the Parent. The Request for Reconsideration provides no factual or legal basis which undermines that finding.

In support of the contention that the reevaluation has exceeded applicable timelines, the Parent cites to Louisiana Bulletin 1706 §§ 305 and 306. However, neither of those provisions contain a timeline for the completion of a reevaluation. The only provision of Louisiana Bulletin 1706 which identifies a timeline for the completion of an evaluation is Louisiana Bulletin 1706 § 302(C), which applies only to initial evaluations. Additionally, Subsection D of that provision contains an exception to the timelines in circumstances where "the parent of a student repeatedly fails or refuses to produce the student for the evaluation."

Considering the lack of an identified timeline for the completion of a reevaluation and the exception for parental nonparticipation contained in the provisions concerning initial evaluations, the reconsideration panel determines that the investigator's conclusion that the District's failure to complete the evaluation was

not a violation of applicable law can be reasonably supported by the information submitted during the complaint investigation. Specifically, the reconsideration panel affirms the finding that the Parent's failure to complete a required component of the reevaluation was the sole cause of the delays in the reevaluation process and that the District undertook reasonable, but ultimately unsuccessful, efforts to obtain the required evaluation data from the Parent.

The Parent's remaining alleged errors – that the evaluation was not comprehensive and that she has been denied access to the evaluation report – are derivative of the previously discussed alleged error and fail for similar reasoning. As discussed above, the complaint investigator determined that District's inability to complete the reevaluation and the resultant lack of a reevaluation report were caused by Parent's persistent failure to provide required evaluation data. The Request for Reconsideration identifies no basis for upsetting those findings of fact and conclusions of law provided by the investigator and simply restated those allegations in substantially the same form in which they appear in the Parent's initial investigation request. Therefore, for the reasons stated above, the reconsideration panel concurs with the reasoning of the complaint investigator and affirms the conclusion that the District reasonably fulfilled its obligations to reevaluate the Student in response to the Parent's February 21, 2024, request for reevaluation.

The reconsideration panel notes that the Request for Reconsideration fails to acknowledge those portions of the February 28, 2025, decision which addressed the effects of the Parent's failure to participate in the reevaluation of the Student. The omission is notable given the investigator's primary reliance on the finding that Parent failed to complete required reevaluation activities in reaching the conclusions of law to which the Parent objects. The Parent similarly omitted any mention of the District's multiple requests for her participation in the reevaluation process and the measures taken by the District to obtain her participation in her initial complaint of October 22, 2024. The Parent's omissions obscured the facts surrounding this dispute and complicated the Department's efforts to reach findings of fact and conclusions of law in this matter. Nonetheless, the complete record in this matter clearly supports the complaint investigator's findings of fact and conclusions of law concerning the District's reevaluation of the Student following the Parent's February 21, 2024, request.

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-33** on behalf of [REDACTED]

On **October 28, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning her minor child, who was enrolled in a public school under the jurisdiction of St. Tammany Parish Public Schools ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to implement the student's Individualized Education Program (IEP) by failing to provide the Student with accommodations and modifications identified therein.

At the time of filing the complaint, the Parent provided a complaint request, a narrative complaint, and 29 exhibits – 19 documentary exhibits and 11 audio-video recordings. Following attempts to resolve this matter through the Early Resolution Process, the District provided a narrative response and six documentary exhibits labeled 1 through 6. As the Department's assigned investigator, I reviewed the complaint, the District's response, and the supplemental materials submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **October 28, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between October 29, 2022, and October 28, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was eligible to receive special education and related services as a student with a traumatic brain injury.

The Student completed [REDACTED] during the 2023-24 school year and earned "A" or "B" grades in core courses.

The Student began the 2024-25 school year in the [REDACTED] with an IEP that had been adopted on April 19, 2023. The IEP identified a number of accommodations, including: modify/repeat/model directions; provide word bank/word assistance; provide printed copy of teacher notes; use of post-it notes, flags,

highlighters, etc. to identify important information and/or directions in [REDACTED] coursework; printed weekly list of projected assignments and/or coursework to student and parent; extended time for assignments and tests; extra time for written work; and, breaks during work periods, between tasks, and during testing. On September 24, 2024, each of the Student's teachers was provided with information concerning the implementation of the Student's accommodations and modifications and procedures for providing the Student with classwork missed during medical absences.

During the time period relevant to this complaint, the District posted the Student's upcoming assignments to an electronic document which was updated at least weekly. The Parent and the Student were able to access the document electronically, and a paper copy of the calendar was provided to the Student on a weekly basis. Beginning in September of 2024, the document was amended to add a "Next Week" column, in which information was included about future assignments.

Between April and October of 2024, the Parent regularly communicated with the District via electronic mail. On a number of occasions, the Parent raised concerns about the implementation of the Student's accommodations. In each instance, the District responded to the Parent addressing the concerns raised.

During the relevant time period, the Student met weekly with a special education teacher to receive a weekly assignment list and discuss any issues arising in the Student's education. The Student did not report any difficulty receiving accommodations or assistance with missed assignments during the weekly meetings, and [REDACTED] achieved a 4.57 grade point average in the first grading period.

On October 28, 2024, the Parent filed the complaint that formed the basis of the Department's investigation.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Student with accommodations and modifications identified in the Student's IEP.

Louisiana Bulletin 1706 § 230 requires each local educational agency in Louisiana to provide "a free appropriate public education to each eligible student with a disability." A free appropriate public education includes special education and related services that are "provided in conformity with an Individualized Education Program (IEP)." Louisiana Bulletin § 905.

In this case, the Parent alleges that the District failed to provide the Student with accommodations contained in the Student's IEP. During the 2024-25 school year, the Student's IEP included a number of accommodations, including the use of post-it notes, flags, highlighters, or other methods to identify important information or directions in [REDACTED] coursework and a printed weekly list of projected assignments and coursework to student and parent. The Parent's allegation focuses primarily on the details of the implementation of these notetaking and coursework planning accommodations; however, the evidence presented in this case does not support the conclusion that the District's actions were noncompliant with applicable law.

In support of the allegation that accommodations and modifications were not provided, the Parent provided a number of exhibits – primarily electronic mail messages – in support of the allegation that the District failed to provide accommodations. However, that evidence demonstrated that the District was providing accommodations related to the Student's notetaking and planning skills and that the Parent had concerns

February 25, 2025

about the District's implementation. The Parent did not provide any evidence substantiating the District's alleged failure to provide the Student with required modifications on assignments and tests.

In response to the complaint, the District submitted exhibits demonstrating that relevant District staff had received timely training concerning IEP implementation, that the Student did not report a lack of accommodations, and that the Student was making meaningful progress in the general education curriculum. Furthermore, the Parent's communications with the District supported the conclusion that each of the Student's teachers was aware of the IEP accommodations and was in regular communication with the Student and the Parent about the implementation of the accommodations.

Based on the information provided, the Department concludes that the Parent's allegation – that the District failed to provide the Student with accommodations and modifications as stated in the IEP – is unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Tyrell T. Manieri III

Re: Findings-Decision in State Special Education Formal Complaint No. **45-C-34** on behalf of [REDACTED]

On November 15, 2024, Corhonda Corley (hereinafter referred to as the "Complainant") filed a Request for Special Education Formal Complaint Investigation concerning the East Baton Rouge Parish School System ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of a minor child ("the Student"), the Complainant alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to implement the student's Individualized Education Program ("IEP") and Behavior Intervention Plan ("BIP") as written.

The Complainant provided a complaint form, a four-page narrative, and four exhibits. The District failed to provide a written response to the complaint. As the Department's assigned investigator, I reviewed the complaint and all documents submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than one year prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on November 15, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between **November 16, 2022, and November 15, 2024.**

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was eligible to receive special education and related services as a student with disability pursuant to an IEP. The 2024-25 school year began on August 8, 2024.

The Complainant submitted an IEP for the Student dated May 22, 2024. The May 2024 IEP indicated that the Student's [REDACTED] due to concerns regarding the Student's behavior.

The May 2024 IEP reported that the Student exhibited disruptive behaviors during the 2023-24 school year, which included [REDACTED]

[REDACTED]
The IEP also indicated that a BIP was developed with specific goals and interventions to address the Student's

behavior.

On November 18, 2024, the Student was disciplined for disruptive behavior, culminating in the Student's [REDACTED] and [REDACTED] behavioral infractions.

The Complainant filed the complaint that forms the basis of this decision on November 15, 2024.

The District failed to submit a written, narrative response to the allegations in the complaint.

III. Conclusions

When a formal complaint investigation commences, Louisiana Bulletin §153(A) mandates that the Department issue a written notice to the local educational agency ("LEA") outlining: (1) the specific information needed by the Department to conduct an independent investigation of the complaint; (2) the reasonable timelines for submitting the requested information; (3) and the LEA's the opportunity to respond to the complaint, including, at its discretion, the opportunity to propose a resolution.

In this case, on November 19, 2024, the Department provided written notice to the District outlining: (1) the allegation asserted by the Complainant and to be investigated; (2) the timeline for submitting a written, narrative response to the allegation in the complaint; (3) the timeline for submitting proposed corrective action plan to resolve the complaint; and (4) the relevant documentation needed by the Department to conduct its investigation. Finally, the written notice issued by the Department stated that failure to provide a response may result in a negative inference.

The District neither denied nor disputed the allegation, nor did it submit any evidence to verify that the Student received services pursuant to the Student's IEP and BIP as written. Consequently, a negative inference was drawn leading to the acceptance of the Complainant's allegation as fact.

IV. Corrective Actions

In order to correct this noncompliance, the District shall implement the following corrective actions:

1. On or before **February 21, 2025**, the District shall convene a meeting with the Parents and appropriate members of the Student's IEP Team to 1) identify the amount of services that should have been provided to the Student but were not due to behavioral infractions and 2) develop a plan to provide the Student with compensatory services that are reasonably calculated to provide the Student with the educational benefit that was denied as a result of services.
2. If the District and the Parents are able to agree to a compensatory service plan, the District shall provide the Department with a copy of the plan by **February 28, 2025**, and shall implement the plan as soon as possible. If the District and the Parent are unable to agree to a compensatory service plan, the District shall submit a proposed plan to the Department for approval by **March 7, 2025**. The Department will review the proposed plan and determine its sufficiency within two business days of receipt from the District; the Department may amend the plan as necessary to ensure compliance with State and federal law.
3. The District shall implement the compensatory services plan. By **May 27, 2025**, the District shall provide service logs demonstrating compliance with the compensatory services plan.
4. The District shall provide training to all District staff that have regular contact with the Student addressing the legal requirements concerning FAPE and IEP, including BIP, implementation. As soon as possible and no later than **May 27, 2025**, the District shall submit:
 - a. a copy of sign-in sheets and training materials documenting the District's provision of

training to relevant staff addressing the legal requirements concerning FAPE and IEP, including BIP, implementation.

The Department will issue a letter of closure in this complaint upon the District's satisfactory completion of the required actions.

Sincerely,

A handwritten signature in cursive script that reads "Domonique Dickerson".

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-35** on behalf of [REDACTED]

On **November 27, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning [REDACTED], her minor child (the Student) who was attending a public school under the jurisdiction of the Special School District ("the District"), with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than one year prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on November 27, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between November 28, 2022, and November 27, 2024.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's child, [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to address the Student's mental health needs and (2) failing to provide the Student with services after October 17, 2024.

At the time of filing the complaint, the Parent provided a complaint request form. The District provided a narrative response, documentary exhibits labeled Exhibits 1 through 7, and proposed corrective actions addressing the Parent's allegations. As the Department's assigned investigator, I reviewed the complaint, the District's response, and the supplemental materials submitted by the parties and conducted telephone interviews with each of the parties.

II. Findings of Fact

After reviewing that proposed corrective action plan submitted by the District, the Department has determined that the District's proposal for addressing the Parent's allegations is consistent with and substantially equivalent to any corrective actions that would have been ordered had the Department determined that the allegation was substantiated.

As a result of the District's agreement to undertake actions sufficient to address the Parent's allegation, the Department will make no findings of fact or conclusions of law with regard to the allegations. Alternatively,

February 27, 2025

the Department shall require the District to provide evidence that the stipulated actions were completed as detailed in Section III. The District's offer to engage in these actions and their reporting of the actions to the Department does not constitute findings of noncompliance by the Department.

III. Corrective Action Plan

1. The District shall provide the Student with compensatory services addressing educational and related services which were not provided to the Student during the fall semester of the 2024-25 school year.
 - a. The compensatory services shall include 48 hours of instructional services. The student did not qualify for School Counseling Services per [REDACTED] Bulletin 1508 Evaluation. [REDACTED] will be offered six (6) hours per week for a total of eight (8) weeks. Classes offered will be those in which [REDACTED] was enrolled in October of 2024: AgScience, Math Elective I, English Elective I and Environmental Science.
 - b. The compensatory services shall be provided by qualified service providers who meet relevant Louisiana standards for the provisions of the services being offered.
 - c. The compensatory services shall be provided to the Student remotely using instructional technology provided by the SSD and shall be delivered after school hours on weekdays.
2. The District shall implement the compensatory services plan without undue delay. By May 27, 2025, the District shall provide service logs demonstrating compliance with the compensatory services plan.
3. The District shall provide training to all school- and district-level staff with responsibilities related to the admission of students. The training shall address the requirements of state and federal law concerning the enrollment of students with disabilities experiencing homelessness. As soon as possible and no later than May 27, 2025, the District shall submit a copy of sign-in sheets (or other, signed proof of staff attendance) and training materials documenting the District's provision of training to relevant staff.

Sincerely,

Tyrell T. Manieri III

Re: Findings-Decision in Special Education Formal Complaint No. 45-C-36 on behalf of [REDACTED]

On December 2, 2024, Erika Suni on behalf of her minor child, filed a Request for Special Education Formal Complaint Investigation regarding [REDACTED], a charter school under the jurisdiction of NOLA Public Schools ("the District"), with the Louisiana Department of Education ("Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child ("the Student"), the Parent alleges that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to comply with the regulations governing the use of physical restraint.

The Parent submitted a formal complaint form, accompanied by a two-page narrative detailing the events in question, along with one exhibit in support of the allegations. In response, the Department provided a narrative statement from the staff member involved in the incident, as well as from the special education coordinator, early programs director, and chief of support services. The District's submission totaled six pages, along with one exhibit, addressing the claims set forth in the complaint.

The findings of fact and conclusions of law contained herein are based upon consideration of the relevant facts and legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on December 2, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between December 3, 2022, and December 2, 2024.

II. Findings of Fact

At all times relevant to this Complaint, the Student was enrolled in a school operated by the District. On September 26, 2024, the Student's Individualized Education Program ("IEP") team convened to develop and implement the Student's initial IEP. The Parent participated in this meeting. During the 2024-2025 school year, the Student received services through the District's [REDACTED] and was deemed eligible for special education and related services as a student with a disability.

The September 2024 IEP was informed by an evaluation of the Student, the results of which were disseminated on September 3, 2024. The IEP determined that the Student's exceptionality of autism

significantly impacted [REDACTED] ability to progress within the general education setting due to academic and cognitive deficits. Specifically, the Student exhibited difficulty with foundational academic skills, including counting, answering questions, sorting objects, and recognizing shapes. However, the IEP noted that with the implementation of appropriate instructional strategies, environmental modifications, and early interventions, the Student was expected to make progress within the general education curriculum.

Additionally, the September 2024 IEP documented the Student's challenges with sensory integration, which adversely affected [REDACTED] ability to engage in independent functional activities within the educational environment. The IEP identified the Student's sensorimotor deficits as contributing to difficulties in transitioning between activities and individuals, sustaining attention, and regulating emotional responses. The Student demonstrated significant difficulty following verbal instructions and frequently required prompts and redirection to complete assigned tasks. When experiencing distress, the Student engaged in maladaptive behaviors, including screaming, crying, throwing objects, head banging, and physical aggression toward himself and others. While the IEP acknowledged the Student's hypersensitivity to tactile stimuli, specifically the presence of messy substances on [REDACTED] hands, it did not identify physical touch as a potential trigger for distress.

According to the evaluation referenced in the September 2024 IEP, the Student's total language score fell more than 1.5 standard deviations below the mean, indicating below-average language abilities for [REDACTED] age. Specifically, the Student's receptive language score was 67, and [REDACTED] expressive language score was 77. The IEP concluded that the Student's disability, compounded by deficits in both expressive and receptive language, significantly impaired [REDACTED] ability to process and respond to verbal communication and to adequately express [REDACTED] needs, thoughts, and ideas. As a result, the Student's communication challenges further impeded [REDACTED] social functioning.

The IEP established six annual goals in the following domains: adapted physical education, motor/physical therapy, communication/language, motor/occupational therapy, social/emotional development, and academic/cognitive skills. To support the Student's progress toward these goals, the IEP provided for specific accommodations, including but not limited to: modified instructions with repetition as needed, cues and prompts to facilitate transitions between activities, visual and picture schedules, small-group and individualized instruction, access to a separate or alternative instructional and testing environment, a designated seating arrangement, the use of manipulatives, and extended time for task completion, as necessary.

Furthermore, the September 2024 IEP prescribed the following special education and related services: adapted physical education for 30 minutes per week, occupational therapy for 30 minutes per month, physical therapy for 30 minutes per week, special education instruction for 30 minutes per week, and speech/language pathology services for 30 minutes per week. Each of these services was to be delivered in the special education classroom setting.

On October 16, 2024, the Parent attended and observed a classroom session within the Student's early intervention program. During the observation, the Student was seated in a small chair at a child-sized work table when a District staff member attempted to engage [REDACTED] in a pop-up alphabet book activity. The Student

declined to participate. In response, the staff member positioned themselves in a chair behind the Student, thereby situating the Student between the table and the staff member. The staff member then placed their hands over the Student's hands to provide hand-over-hand assistance in guiding the Student through the activity. The Student withdrew [REDACTED] hands and engaged in physical aggression toward the staff member by striking them multiple times. In response, the staff member held the Student's hands to prevent further aggression. At that time, the Parent advised the staff member that she was uncomfortable with the use of hand-over-hand assistance, as she felt it restricted the Student's bodily movements and induced distress.

Subsequently, on December 2, 2024, the Parent filed the Complaint that forms the basis of this decision.

III. Conclusions of Law

Upon consideration of the relevant facts and applicable law, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, and/or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to comply with the regulations governing the use of physical restraint.

In the present matter, the Parent alleges that the District failed to comply with the legal and regulatory standards governing the use of physical restraint. Specifically, the Parent contends that the hand-over-hand assistance employed by the District exceeded the permissible threshold for minimal physical contact and unlawfully restricted some or all of the Student's freedom of movement, thereby constituting an impermissible use of restraint. During the incident on October 16, 2024, the Parent identifies two distinct occurrences as constituting physical restraint: (1) the use of hand-over-hand assistance and (2) the hold implemented during the course of hand-over-hand assistance after the Student began striking the District staff member. Given the legal distinctions governing physical restraint, each occurrence must be examined independently to determine whether it meets the statutory definition of restraint under the applicable legal framework.

A. Legal and Regulatory Framework Governing Physical Restraint

Pursuant Louisiana Bulletin 1706 § 540(A)(3), "physical restraint" is defined as the application of bodily force to limit a person's movement. However, the definition of physical restraint expressly excludes the following:

- Consensual, solicited, or unintentional contact;
- Momentary blocking of a student's action when such action is likely to result in harm to the student or another individual;
- Holding a student by a single school employee for the purpose of calming or comforting the student, provided that the student's freedom of movement or normal access to their body is not restricted;
- Minimal physical contact necessary to safely escort a student from one area to another; and
- Minimal physical contact required to assist a student in completing a task or response.

Pursuant Bulletin 1706 § 542, the use of physical restraint is permissible only in situations where a student's behavior presents an imminent risk of harm to themselves or others and may be employed solely as a last resort to prevent injury and ensure safety. In such circumstances, the application of physical restraint must

be limited to the least restrictive degree necessary to effectively mitigate the immediate threat. Moreover, any use of physical restraint must be implemented in a manner that does not cause physical injury to the student, minimizes discomfort, and ensures that the student's respiratory function and ability to communicate remain unobstructed at all times.

Finally, pursuant to Bulletin 1706 § 543, the use of physical restraint is subject to strict limitations designed to ensure that such interventions are employed only when absolutely necessary and in compliance with established legal and safety standards. The use of physical restraint is expressly prohibited as a means of discipline, punishment, coercion, intimidation, staff convenience, or to compel compliance. Any application of physical restraint must be reasonable and necessary under the specific circumstances, and students may not be subjected to restraint that is deemed unreasonable, unsafe, or unwarranted under the given conditions. Furthermore, physical restraint shall not be employed when a student has a known medical, psychological, or other condition that contraindicates its use. When restraint is utilized, continuous monitoring is required to safeguard the student's well-being, and such monitoring must be documented at intervals not to exceed fifteen minutes. The application of physical restraint must cease immediately upon resolution of the circumstances necessitating its use.

Collectively, the legal and regulatory framework governing the use of physical restraint is designed to prevent misuse, overreach, and unnecessary harm. These provisions reinforce the principle that physical interventions should only be employed when absolutely necessary to prevent imminent risk of harm, with a primary emphasis on student safety, proportionality, and the protection of student rights. The overarching intent of these regulations is to strike a balance between addressing immediate safety concerns and safeguarding the autonomy and well-being of students, in full compliance with applicable legal and educational standards.

B. Finding No. 1: Hand-Over-Hand Assistance Does Not Constitute Physical Restraint

Upon review of the record, including the facts set forth in the Findings of Facts and the applicable legal framework, the hand-over-hand assistance provided by District staff does not meet the legal definition of physical restraint as set forth in Louisiana Bulletin 1706 § 540(A)(3).

The legal definition of physical restraint requires the application of bodily force to limit a person's movement. However, Louisiana Bulletin 1706 § 540(A)(3) explicitly excludes "minimal physical contact for the purpose of assisting a student in completing a task or response" from this definition. In the present case, District staff employed hand-over-hand assistance in an attempt to guide the Student through an academic activity using a pop-up alphabet book. The staff member's placement of his hands over the Student's hands was intended to facilitate task completion rather than to restrict the Student's movement in any punitive or coercive manner.

Further, there is no evidence indicating that the physical contact applied by the staff member was excessive, restrictive, or beyond what was minimally necessary to assist the Student in engaging with the instructional task. The Student retained the ability to withdraw from the activity, as evidenced by the fact that ■ successfully pulled ■ hands away when ■ chose not to participate. This further supports the conclusion that the physical contact was not restrictive in nature.

Accordingly, because the hand-over-hand assistance was (1) minimal in nature, (2) directly related to assisting the Student in completing an instructional task, and (3) expressly excluded from the definition of physical restraint under Louisiana Bulletin 1706 § 540(A)(3), it does not constitute physical restraint under the applicable legal standard. The Department concludes that the allegation asserting the District's failure to comply with applicable laws governing the use of physical restraint, specifically concerning the use of hand-over-hand assistance, is unsubstantiated.

C. Finding No. 2: The Hold Employed by District Staff to Prevent Aggression Does Not Constitute Physical Restraint

Upon consideration of the relevant facts and applicable law, the hold employed by District staff to prevent the Student from continuing to strike them does not meet the legal definition of physical restraint under Louisiana Bulletin 1706 § 540(A)(3).

Pursuant to Louisiana Bulletin 1706 § 540(A)(3), the term "physical restraint" specifically excludes "momentary blocking of a student's action if said action is likely to result in harm to the student or any other person." In the present matter, the Student engaged in physical aggression by striking the District staff member multiple times after withdrawing from the hand-over-hand assistance. In response, the staff member held the Student's hands to prevent further aggressive behavior and mitigate the risk of harm.

The nature and purpose of the staff member's action are directly aligned with the exception set forth in Louisiana Bulletin 1706 § 540(A)(3). The intervention was:

- Momentary in duration—The record does not indicate that the Student was restrained beyond what was necessary to prevent further striking.
- Directly related to blocking the Student's action—The hold was employed only after the Student struck the staff member multiple times and was specifically intended to prevent further aggression.
- Implemented to prevent harm—Given that the Student was actively striking the staff member, the intervention was necessary to mitigate an immediate risk of harm to another individual.

Moreover, the hold did not involve excessive force, prolonged restriction, or any coercive intent. The intervention was proportionate to the immediate threat posed by the Student's aggressive behavior, and there is no evidence that it was employed for punitive, disciplinary, or non-safety-related purposes.

Accordingly, because the staff member's actions (1) constituted a momentary blocking of the Student's action, (2) were necessary to prevent harm, and (3) fall within an explicit exclusion from the definition of physical restraint under Louisiana Bulletin 1706 § 540(A)(3), the hold does not meet the legal definition of physical restraint. The Department concludes that the allegation asserting the District's failure to comply with applicable laws governing the use of physical restraint, specifically concerning the hold implemented to prevent harm, is unsubstantiated.

IV. Conclusion

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706.

Therefore, this investigation is hereby closed and no additional action is required by the Complainant or the District.

Sincerely,

A handwritten signature in cursive script that reads "Domonique Dickerson".

Lafayette Parish School System
P.O. Drawer 2158
Lafayette, LA 70502
hcortego@lpssonline.com

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-37** on behalf of [REDACTED]

On **December 2, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning the Lafayette Parish School System ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's child [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Parent with access to the Student's educational records, including video recordings of an incident involving the Student, which occurred on or about October 28-29, 2023.

At the time of filing the complaint, the Parent provided a complaint request and a three-page supporting document. The District provided a written response to the complaint. As the Department's assigned investigator, I reviewed the complaint, the supplemental materials submitted by the Parent, and the District's response.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **December 2, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between December 3, 2022, and December 2, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school, was receiving special education and related services as a student with a disability.

Between October 29, 2024, and November 7, 2024, the Parent sent a number of electronic mail messages to District staff requesting records concerning the Student. The requests included requests for copies of documentary and video records concerning the Student.

On December 2, 2024, the Parent filed the complaint that formed the basis of the Department's investigation. On December 4, 2024, the District informed the Parent that the records, which had been edited to remove identifying information about other students, were available to be picked up. The records totaled approximately four thousand (\$4,000) pages, along with electronic media containing recordings. The

Parent retrieved the records on December 11, 2024.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Parent with timely access to the Student's educational records.

Louisiana Bulletin 1706 § 614 requires that each school district in Louisiana "permit parents to inspect and review any education records relating to their children." That provision also states that school districts "shall comply with all requests without unnecessary delay ... and in no case more than 45 days after the request has been made."¹

In this case, the Parent sent multiple requests to the District for copies of educational records, including documents and video recordings, between October 29, 2024, and November 7, 2024. The District notified the Parent that the records were available to be retrieved on December 4, 2024, 36 days after the Parent's initial request was made. Considering that the Parent's request required the collection of a significant amount of material and the review of that material to ensure the protection of confidential information, the production of the records within 36 days of the Parent's earliest request demonstrates that the District acted without unnecessary delay in addressing the Parent's requests.

Therefore, the Department concludes that the Parent's allegation – that the District failed to comply with the requirement to provide the Parent with timely access to the Student's educational records – is unsubstantiated.

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Tyrell T. Manieri III
Investigating Attorney
Office of Executive Counsel
Louisiana Department of Education
(225) 342-3572 (phone)/(225) 342-1197 (fax)
DisputeResolution.DOE@la.gov

CC: Francis Touchet, Superintendent, Lafayette Parish School System (email only)

¹ The Parent cited Louisiana Revised Statutes 17:406.9 in the initial complaint. That statute does address the provision of records to the parents of Louisiana public school students, but it does not provide for the enforcement of the rights established therein. Therefore, the Parent's allegation is being addressed pursuant to the substantive and procedural law governing this investigation and contained in Louisiana Bulletin 1706.

Louisiana Special Education Complaint Investigation

45-C-38

LOUISIANA DEPARTMENT OF EDUCATION

February 25, 2025

[REDACTED]
[REDACTED]
Bossier City, LA 71112
[REDACTED]

Dr. Vicki Younger
Supervisor of Special Education
Bossier Parish Schools
410 Sibley Street
Benton, LA 71006

Re: Findings-Decision in Special Education Formal Complaint No. 45-C-38 on behalf of [REDACTED]

On October 8, 2024, [REDACTED] ("Parent"), acting on behalf of her minor child ("Student"), filed a formal complaint with the Louisiana Department of Education ("Department") against Bossier Parish School Board ("District"), pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Specifically, the Parent alleges that the School District failed to:

- Provide the Student with appropriate occupational therapy and physical therapy services;
- Deliver sufficient special education instruction;
- Provide the Student with Extended School Year ("ESY") services;
- Ensure appropriate placement for the Student; and
- Ensure that the placement decision was made by a properly constituted team that included the Parent.

The Parent submitted a formal complaint form, a nine-page narrative, a fourteen-page supplemental narrative, a sixteen-page counter-response to the School District's narrative, and nine exhibits in support of her allegations. In response, the District submitted a ten-page narrative and eight exhibits in which it disability generally and specifically denied the allegations stated in the Parent's complaint.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on October 8, 2024. Therefore, the investigation was limited to alleged violations of law that occurred between October 9, 2022, and October 8, 2024.

II. Findings of Fact

At all relevant times, the Student was enrolled in a [REDACTED] operated by the School District and was determined eligible for special education and related services under IDEA as a child with a qualifying disability.

A. Initial IEP

On August 3, 2023, the Student's Individualized Education Program ("IEP") team convened for the initial development of the Student's IEP. Attendees included the Student's Parent, Adaptive Physical Education Teacher, Regular Education Teacher, Physical Therapist, Occupational Therapist, Special Education Teacher,

Speech-Language Pathologist, two Special Education Coordinators, Orientation and Mobility representative, and an officially designated representative of the School District.

The August 2023 IEP was informed by an initial evaluation conducted on July 10, 2023, which classified the Student's primary disability as Developmental Delay. The evaluation further determined that the Student's neurophysiological profile significantly interfered with the Student's ability to function in the educational setting. The IEP identified deficits across multiple domains, including severe deficits in gross motor skills, moderate impairment in language, a moderate delay in pre-academic skills, mild impairment in adaptive behavior skills, moderate impairment in fine/visual motor skills, and mild impairment in sensory processing skills. The Student's medical diagnoses, including visual impairment, hydrocephalus, nystagmus, developmental delay, a history of seizures, and an intraventricular hemorrhage, were also documented.

To address these deficits, the August 2023 IEP established annual goals in the areas of gross motor skills, communication and language, self-help and orientation and mobility, fine/visual/sensory motor skills, and academic/pre-academic skills. The IEP determined that the Least Restrictive Environment ("LRE") for the Student was the home-based setting, where all special education and related services would be provided. The specified services included:

- Adapted Physical Education – one session per week for 30 minutes
- Occupational Therapy – one session per week for 6 minutes
- Orientation and Mobility – one session per week for 3 minutes
- Physical Therapy – one session per week for 6 minutes
- Special Education Instruction – one session per week for 30 minutes
- Speech-Language Pathology – one session per week for 30 minutes

The IEP also included provisions for occupational therapy and physical therapy services to be delivered on a consultative basis.

B. May 2024 IEP

On May 9, 2024, the Student's IEP team convened to review and revise the August 2023 IEP. Attendees included the Student's Parent, Adaptive Physical Education Teacher, Occupational Therapist, an officially designated representative of the School District, Physical Therapist, Regular Education Teacher, Special Education Teacher, Teacher for the Visually Impaired, Orientation and Mobility representative, Speech-Language Pathologist, Special Education Coordinator, and Special Education Program Manager.

The May 2024 IEP maintained the same annual goals as the August 2023 IEP and identified the same deficits in the Student's academic and functional performance. The IEP maintained the home-based placement but introduced Assistive Technology services and slightly adjusted the provision of services. Adapted Physical Education was increased to four times per month instead of weekly. Additionally, Special Education Instruction was expanded to include an additional monthly session of 15 minutes, supplementing the existing weekly session.

The IEP continued to specify that Occupational Therapy and Physical Therapy services would be provided on a consultative basis, with flexibility in delivery throughout the IEP year.

C. August 2024 IEP

On August 9, 2024, the IEP Team convened for an annual review of the Student's IEP. Attendees included the Student's Parent, Adaptive Physical Education Teacher, Occupational Therapist, an officially designated representative of the School District, Special Education Program Director, Special Education Program

Manager, Orientation and Mobility representative, Physical Therapist, Regular Education Teacher, Special Education Teacher, Teacher for the Visually Impaired, Speech-Language Pathologist, and Special Education Coordinator. However, the meeting concluded before the IEP was finalized, necessitating a continuation. The IEP Team subsequently reconvened on August 21, 2024, to complete the review and finalize the Student's IEP.

The School District provided the Parent with a Notice of Proposed or Refused Action ("NRPA"), outlining modifications to the Student's service delivery model, along with the revised IEP and an IEP Amendment Consent Form. The Parent signed the consent form, thereby approving the changes. The IEP became effective on August 22, 2024, the first full day of the academic year.

The IEP Team re-evaluated service delivery and implemented a partial transition to the school environment. Prior to finalizing the modifications, the team considered multiple alternative service delivery models, including full-day placement in an [REDACTED] class, a modified [REDACTED] schedule, school-site services with provider support, a rotational model alternating between home and school environments, exclusive home-based services at the Parent's request, services at a neutral community location such as a public library, and hospital-homebound placement contingent upon medical documentation.

The Parent expressed a preference for maintaining services in the home environment, asserting that it provided the safest and most productive setting for the Student. In response, the IEP Team agreed to a limited transition, modifying the IEP to relocate Adapted Physical Education and Physical Therapy to the school setting, while remaining services continued to be delivered in the home setting. Additionally, Orientation and Mobility services were increased in duration from 3 minutes to 15 minutes per session in the home setting. Special Education Instruction was adjusted to two sessions per week of 20 minutes each, along with an additional weekly 15-minute session. Speech-Language Pathology services were reduced in frequency but extended in duration to one session per month for 45 minutes instead of weekly 30-minute sessions.

The IEP continued to specify that Occupational Therapy and Physical Therapy services would be provided on a consultative basis and could be delivered through co-treatment, collaboration, consultation, or facilitation of adaptive equipment.

D. November 2024 IEP

On November 1, 2024, the Parent requested an amendment to the August 2024 IEP to modify the scheduling of Special Education Instruction. The Parent sought to reduce the number of instructional sessions while maintaining the total instructional minutes. The IEP team reviewed the request and approved the amendment, consolidating Special Education Instruction into one weekly session of forty minutes, replacing the prior structure of two weekly sessions of twenty minutes each. No other services or supports were modified. The amendment was formally implemented on November 11, 2024, and the IEP was thereafter designated as the November 2024 IEP.

III. Conclusions of Law

Upon consideration of the relevant facts and applicable law, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, and/or the Department's implementing regulations published in Louisiana Bulletin 1706.

A. Finding No. 1: Occupational Therapy and Physical Therapy Services

The Individuals with Disabilities Education Act, 20 U.S.C. §1400 et seq., and Louisiana Bulletin 1706 §101 mandate that each eligible student with a disability receive a free appropriate public education in conformity with an IEP. Related services, including occupational therapy, must be provided as specified in the IEP and implemented to support the student's educational progress. See Louisiana Bulletin 1706 §324.

The Parent alleges that the assigned Occupational Therapist failed to provide direct services as required by the Student's IEP and falsified progress reports. However, the District maintains that services were delivered through a consultative model, with the ECSE teacher or other providers implementing therapy goals. The record further reflects that the Occupational Therapist offered to meet with the Parent to discuss concerns, but the Parent declined the proposed meeting.

Louisiana Bulletin 1508 §1503(C)(4) and the Reference Handbook for Occupational Therapy and Physical Therapy in Louisiana Schools recognize the use of consultative occupational therapy services as a valid means of service delivery. Neither the IDEA nor applicable state regulations mandate direct, one-on-one therapy if a consultative approach is appropriate to meet the Student's needs. Given that the Student's IEPs explicitly provided for consultative occupational therapy and physical therapy services, the claim that the District failed to provide these services in accordance with the IEP is not substantiated. Accordingly, the Parent's request for compensatory education lacks sufficient evidentiary support. There is no finding of a violation, and the Parent's allegation is unsubstantiated.

B. Finding No. 2: Delivery of Special Education Instruction and Related Services

Pursuant to Louisiana Bulletin 1706 §101, a local education agency is legally obligated to ensure the timely and consistent provision of special education and related services as specified in a student's IEP. In this matter, the Parent alleges that the District failed to provide the Student with adequate special education instruction and related services, including occupational and physical therapy services.

The evidentiary record establishes that the Student's IEP was revised multiple times between July 2023 and November 2024, reflecting service adjustments based on parental input. The record further reflects that the Parent cancelled and declined to reschedule service sessions across several disciplines, including two special education instructional sessions, two physical therapy sessions, four adapted physical education sessions – despite three rescheduling attempts – seven speech therapy sessions, eight occupational therapy sessions, and two orientation and mobility sessions. The District acknowledges the cancellation of four speech therapy sessions and attempted to reschedule two, but the Parent either declined or failed to respond.

Pursuant to Louisiana Bulletin 1706 §323, a public agency must ensure timely implementation of a student's IEP; however, neither the IDEA nor its implementing regulations mandate that a local education agency ("LEA") provide compensatory services for missed sessions unless the failure to deliver services is attributable to the District's actions rather than parental unavailability or cancellation. Louisiana Bulletin 1706 §323 further underscores that a LEA must make a good faith effort to assist a student in achieving IEP goals, but the law does not hold an LEA accountable for services that could not be provided due to parental noncooperation or refusal.

Here, the District made reasonable and repeated efforts to provide the required services and to engage the

Parent in discussions regarding service implementation. While some sessions were cancelled by the District, the record demonstrates that efforts were made to reschedule, which the Parent declined or ignored. Moreover, the District proactively sought to address concerns regarding service delivery by offering to convene IEP team meetings, which the Parent requested to be cancelled or rescheduled.

Given the documented record of Parent-initiated cancellations and the District's efforts to reschedule, the evidence does not establish that the District failed to make a good faith effort to deliver services outlined in the Student's IEP. Accordingly, there is no finding of a violation, and the Parent's allegation is unsubstantiated.

C. Finding No. 3: Extended School Year Services

Pursuant to Louisiana Bulletin 1706 §106(A), Extended School Year services must be provided only if the student's IEP Team determines that such services are necessary to ensure FAPE. The ESY eligibility determination must be based on one or more of the following criteria: (1) Regression-Recoupment; (2) Critical Point of Instruction; or (3) Special Circumstances.

The Parent alleges that the District wrongfully denied ESY services based on falsified progress reports. The District maintains that ESY eligibility was reviewed under the Regression-Recoupment criteria, as well as the Critical Point 1 and 2 criteria, and determined that the Student did not qualify.

The IDEA does not mandate ESY services unless the Student meets specific eligibility criteria. Here, the IEP Team reviewed relevant data and determined that the Student did not demonstrate regression warranting ESY services. The Parent has not provided sufficient evidence to establish that the ESY eligibility decision was made improperly or contrary to state and federal regulations. Accordingly, there is no finding of a violation, and the Parent's allegation is unsubstantiated.

D. Finding No. 4: Appropriate Placement

Louisiana Bulletin 1706 §§114-117 mandates that students with disabilities be educated with non-disabled peers to the maximum extent appropriate. See also 34 C.F.R. §§ 300.114-300.117. Placement decisions must be made by the IEP Team based on the Student's unique needs, ensuring that the Least Restrictive Environment determination aligns with both the Student's educational and developmental requirements.

The Parent challenges the decision to relocate physical therapy and adaptive physical education services from the home environment to a school-based setting, asserting that the change was driven by administrative policy rather than the Student's individualized needs. Conversely, the District contends that the IEP Team conducted a thorough review of placement alternatives – including home-based services, hybrid models, and full school-based placement – before determining that the Student would benefit from receiving certain services at school while continuing all other services at home.

An analysis of the Student's four IEPs and amendments reflects a consistent determination that the Student's LRE is the home environment, with services tailored to ■ unique needs. The August 2023 and May 2024 IEPs were substantively identical in terms of placement and service provision, with minor adjustments in service frequency and instructional time. The August 2024 IEP relocated two services to the school setting while maintaining all other services in the home. However, this modification did not constitute a fundamental change in placement, as the overall service structure of the Student's educational program remained the same; rather, this adjustment reflected a modification to the location of services within the existing LRE determination. The November 2024 amendment made only a procedural change to the structure of Special Education Instruction without altering the Student's placement or the overall framework of service delivery.

The IEP Team considered multiple placement options, documented the rationale for relocating select services to the school setting, and implemented a gradual approach to school-based services while preserving the home-based LRE. Accordingly, there is no finding of a violation, and the Parent's allegation is unsubstantiated.

E. Finding No. 5: Properly Constituted IEP Team

Louisiana Bulletin 1706 §321 mandates that an IEP Team must include the student's parents, at least one regular education teacher, at least one special education teacher or provider, a representative of the public agency, and an individual who can interpret evaluation results. See also 34 C.F.R. § 300.321. The Parent asserts that the August 9, 2024, IEP meeting was improperly constituted due to administrative reassignments that resulted in two new team members participating without prior notice.

Neither IDEA nor Louisiana Bulletin 1706 §321 requires advance notice of personnel changes within the IEP Team, provided that all mandatory members are present and able to contribute meaningfully to the discussion. The evidentiary record reflects that all required IEP Team members, including the Parent, were in attendance and actively engaged in extensive discussions regarding service delivery options. These discussions sought to address the Parent's concerns while ensuring that the Student's educational programming remained responsive to ■ evolving needs. The placement and location decisions were made by a properly constituted IEP Team in full compliance with legal requirements.

Accordingly, there is no finding of a violation, and the Parent's allegations are unsubstantiated.

IV. Conclusion

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Complainant or the District.

Sincerely,

Domonique Dickerson

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. 45-C-39

Dear Kimona Hogan and Kody Smith:

On February 19, 2025, the Louisiana Department of Education received a copy of a Notice to LDOE of Formal ERP Status Form, which confirmed that the parties to this formal complaint reached a mutually agreeable resolution and that the complainant officially withdrew the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 45-C-39. No further action is required by either party.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-40** on behalf of [REDACTED]

On **December 11, 2024**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning a student attending [REDACTED], a public charter school under the jurisdiction of Inspire NOLA Charter Schools ("the District") with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's child [REDACTED] ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Parent with access to the Student's educational records.

At the time of filing the complaint, the Parent provided a complaint request. The Parent also submitted two electronic mail exchanges on January 6, 2025. The District provided a written response to the complaint along with six documentary exhibits. As the Department's assigned investigator, I reviewed the complaint, the District's response, and the supplemental materials submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 §152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **December 11, 2024**. Therefore, the investigation was limited to alleged violations of law that occurred between December 12, 2022, and December 11, 2024.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was receiving special education and related services as a student with a disability.

During the fall semester of the 2023-24 school year, the Student's mother removed the Parent's name from the Student's educational records. At some point later in the semester, the Parent requested specific educational records concerning the Student and was informed that the school did not have current records establishing the Parent's paternity of the Student. Specifically, the District informed the Parent that he was not listed as a parent in the information provided by the Student's mother and that his name was not listed as the father of the Student on the Student's birth certificate.

The Parent provided the District with a copy of a *Petition to Establish Paternity and Support Obligations*

which had been filed by the State of Louisiana against the Parent during the summer of 2023. On December 9, 2024, the District informed the Parent that the documents were insufficient to establish paternity of the Student and that state and federal law prohibited the release of student educational records to individuals who are not the child's parent or a designee of the child's parent. On December 10, 2024, the Student's mother submitted updated student information which identified the Parent as the Student's father.

On December 11, 2024, the Parent filed the complaint that formed the basis of the Department's investigation.

On December 16, 2024, the District communicated with the Parent concerning the updated information and provided the Parent with the requested records by electronic mail.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide the Parent with access to the Student's educational records.

Louisiana Bulletin 1706 § 613(A) requires that each school district in Louisiana "permit parents to inspect and review any education records relating to their children." That provision also states that school districts "shall comply with all requests without unnecessary delay ... and in no case more than 45 days after the request has been made.

In this case, the Parent made his initial request for documents during a period of time in which the District did not have records establishing that the Student was a child of the Parent or that the Parent was a designee of the child's mother for the purposes of receiving educational records. Therefore, the District's refusal to provide records to the Parent at the time of the initial request was appropriate and the basis for the refusal was clearly communicated to the Parent.

Once the District received suitable documentation that the Parent was the father of the Student on December 10, 2024, the District contacted the Parent and provided the requested records within four business days.

Considering the District's concerns about the legal status of Parent, the Department concludes that the District's actions were reasonable and consistent with the requirements of law concerning the release of student educational records. Therefore, the Department concludes that the Parent's allegation – that the District failed to comply with the requirement to provide the Parent with access to the Student's educational records – is unsubstantiated.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-41** on behalf of [REDACTED]

On **January 7, 2025**, [REDACTED] (hereinafter referred to as the "Parent") filed a Request for Special Education Formal Complaint Investigation concerning her minor child (the Student), who was attending a public school under the jurisdiction of Rapides Parish School Board ("the District"), with the Louisiana Department of Education ("the Department") pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent's minor child, Devin Porter ("the Student"), the Parent alleged that the District violated the Individuals with Disabilities Education Act ("the IDEA"), the Louisiana Children with Exceptionalities Act, and the Department's implementing regulations published in Louisiana Bulletin 1706 by: 1) failing to provide the Student with special education instruction as identified in the Student's Individualized Education Program ("IEP"); 2) failing to provide the Parent with a notice of proposed or refused actions concerning the placement of the Student in an alternative educational placement; 3) failing to provide the Parent with a notice of proposed or refused actions addressing parental concerns about the Student's evaluation in April of 2024; 4) failing to provide the Parent with timely information about the Student's eligibility for extended school year services and proper notice that extended school year services would be discussed at the Student's May 30, 2024, IEP team meeting; 5) failing to provide the Parent with a reasonable opportunity to participate in decisions concerning the Student's graduation pathway; 6) failing to provide the Parent with a reasonable opportunity to participate in September 27, 2024, amendments to the Student's IEP; and, 7) failing to provide the Parent with a reasonable opportunity to participate in September 27, 2024, amendments to the Student's Individualized Healthcare Plan.

At the time of filing the complaint, the Parent provided a complaint request, a 19-page narrative complaint, and 17 numbered exhibits. The District provided a 24-page narrative response and 20 numbered exhibits. As the Department's assigned investigator, I reviewed the complaint, the District's response, and the supplemental materials submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) requires that a formal complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **January 7, 2025**. Therefore, the investigation was limited to alleged violations of law that occurred between January 8, 2023, and January 7, 2025.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was eligible to receive special education and related services as a student with a specific learning disability. In November of 2023, the Student was enrolled in the [REDACTED] and assigned to an alternative educational setting as the result of a disciplinary removal. The circumstances of the disciplinary removal, including the manifestation determination review and IEP Team meetings which took place on November 13, 2023, were the subject of a due process hearing in which the hearing officer found that the Parent's allegations of procedural noncompliance by the District concerning notice of changes to the Student's IEP were unsubstantiated. While in the alternative setting, the Student received 45 minutes per day of specially designed instruction in the regular education setting according to the IEP developed on November 13, 2023. In the Student's placement prior to the alternative setting, the Student received 55 minutes per day of specially designed instruction in the regular education setting and 15 minutes per week in the special education setting.

The Student returned to a traditional school setting in the third quarter of the 2023-24 school year following the disciplinary removal. Shortly thereafter, the District conducted an evaluation of the Student. The evaluation was completed and the report disseminated on March 27, 2024. The evaluation contained educational recommendations in the areas of task attention, impulsivity, academic, occupational therapy, behavior, and organization. The evaluation also recommended that the Student receive approximately an hour of specially designed instruction per day to supplement the Student's regular education instruction. The results of the evaluation indicated that the Student did not require school health services or assistive technology devices beyond those in general use by students at the school.

The evaluation report and a Notice of Proposed or Refused Action were provided to the Parent on March 27, 2024. The documents described the evaluation results – including the Student's lack of demonstrated need for assistive technology or school health services – and the information that was considered as part of the evaluation.

The evaluation was considered as part of the Student's eligibility determination, and the Student was found to be eligible for special education and related services as a student with a specific learning disability and other health impairments.

Near the end of the 2023-24 school year, the District sent written notice to the Parent indicating that the Student was not eligible for extended school year ("ESY") services. Upon request of the Parent, a meeting was held with District staff to discuss the ESY eligibility process. At the end of the 2023-24 school year, the Student was promoted to the [REDACTED].

On August 8, 2024, District staff met with the Parent to discuss the Student's graduation plans. At the time of the meeting, the Student was beginning [REDACTED] year and had made minimal progress in the general education high school curriculum. The meeting participants determined that the Student would pursue a Jump Start Business Management pathway. A second meeting was held by phone with the Parent on August 22, 2024. The participants discussed the TOPS University and Jump Start Business Management pathways and again determined that the Student would pursue the Jump Start Business Management pathway and seek to complete the program on pace with [REDACTED] peer group. The Parent met with District staff again on November 8, 2024, and November 21, 2024, to discuss graduation pathways. No changes were made at either of the meetings in November of 2024.

On January 7, 2025, the Parent filed the complaint that formed the basis of the Department's investigation.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706 by:

- 1) failing to provide the Student with special education instruction as identified in the Student's IEP;
- 2) failing to provide the Parent with a notice of proposed or refused actions concerning the placement of the Student in an alternative educational setting;
- 3) failing to provide the Parent with a notice of proposed or refused actions addressing parental concerns about the Student's evaluation in April of 2024;
- 4) failing to provide the Parent with timely information about the Student's eligibility for extended school year services and proper notice that extended school year services would be discussed at the Student's May 30, 2024, IEP team meeting;
- 5) failing to provide the Parent with a reasonable opportunity to participate in decisions concerning the Student's graduation pathway;
- 6) failing to provide the Parent with a reasonable opportunity to participate in September 27, 2024, amendments to the Student's IEP; and,
- 7) failing to provide the Parent with a reasonable opportunity to participate in September 27, 2024, amendments to the Student's Individualized Healthcare Plan.

Special Education Instruction and Placement in Alternative Educational Setting

Louisiana Bulletin 1706 § 530(D)(1)(a) requires that each student with a disability who is subject to a disciplinary removal of over ten days, "continue to receive educational services . . . so as to enable the student to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the student's IEP." Additionally, Louisiana Bulletin 1706 § 530(D)(5) requires that "the student's IEP Team determines appropriate services."

The Parent provided no evidence supporting the conclusion that the ten-minutes-per-day reduction of special education instruction to the Student during the Student's assignment to the alternative educational setting resulted in a denial of a free and appropriate public education. Specifically, the evidence did not demonstrate that the District either failed to provide the services identified on the Student's November 13, 2023, IEP or that those services were not reasonably calculated to provide educational benefit.

Similarly, the Parent has not provided support for the allegation that the District failed to provide proper notice of the changes which accompanied the Student's disciplinary placement in November of 2023. In this case, the Student was placed in an alternative educational setting as a result of a disciplinary removal. The Parent participated in each of the meetings concerning the underlying disciplinary action, the manifestation determination review, and the IEP Team's determination of appropriate services for the Student. Furthermore, the Parent was sent notice of the changes proposed at the IEP team meeting on November 13, 2024, and the provision of that notice was addressed in a due process hearing, which found that the Parent was properly notified of the actions taken concerning the Student's disciplinary removal.

The record in this investigation supports the conclusion that the District's actions regarding the Student's November 2023 disciplinary removal were compliant with the substantive and procedural requirements concerning the provision of services to students who are subject to extended disciplinary removals. Based

on the findings of fact and conclusions of law contained herein, the Department concludes that the Parent's allegations – that the District failed 1) to provide the Student with special education instruction as identified in the Student's IEP; and, 2) to provide the Parent with a notice of proposed or refused actions concerning the placement of the Student in an alternative educational setting– are unsubstantiated.

Parental Participation and Notices of Proposed or Refused Actions

Louisiana Bulletin 1706 contains a number of provisions which support the participation of parents in the educational decision-making process. Bulletin 1706 § 504 requires public agencies to provide parents with notice before the agency proposes or refuses “to initiate or change the identification, evaluation, or educational placement of the student or the provision of a free appropriate public education to the student.” Bulletin 1706 § 322 requires public agencies to take steps, including the provision of meeting notices, to ensure that parents participate in IEP team meetings.

In this case, the Parent alleges that, between April and September of 2024, she was denied an opportunity to meaningfully participate in educational decisions concerning the Student and that the District did not properly provide the Parent with notices of proposed or refused changes to the Student's educational program. However, the record in this case demonstrates that the District and the Parent met consistently to address changes to the Student's educational program and that the District consistently provided notice of proposed or refused changes to the Parent.

The record also demonstrates a clear pattern whereby, after participating in the educational decision-making process, the Parent disagrees with changes made to the Student's educational program and alleges that the processes surrounding those changes were deficient. The Parent's complaint narrative depicts a school district with little regard for parental input or procedural compliance. However, the record developed in this investigation, including the evidence submitted by the Parent, indicates that the District appropriately engaged with the Parent in all decisions concerning the Student's educational program.

Based on the findings of fact and conclusions of law contained herein, the Department concludes that the Parent's allegations – that the District failed 3) to provide the Parent with a notice of proposed or refused actions addressing parental concerns about the Student's evaluation in April of 2024; 4) to provide the Parent with timely information about the Student's eligibility for extended school year services and proper notice that extended school year services would be discussed at the Student's May 30, 2024, IEP team meeting; 5) to provide the Parent with a reasonable opportunity to participate in decisions concerning the Student's graduation pathway; 6) failing to provide the Parent with a reasonable opportunity to participate in September 27, 2024, amendments to the Student's IEP; and, 7) failing to provide the Parent with a reasonable opportunity to participate in September 27, 2024, amendments to the Student's Individualized Healthcare Plan – are unsubstantiated.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

March 10, 2025

IV. Conclusion

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-42** on behalf of [REDACTED]

On January 9, 2025, [REDACTED] (hereinafter referred to as the “Parent”), acting on behalf of her minor child (“the Student”), filed a formal complaint with the Louisiana Department of Education (“the Department”) against of Zachary Community School District (“District”), pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act (“IDEA”), and Louisiana Children’s Exceptionalities Act, or the Department’s implementing regulations published in Louisiana Bulletin 1706. Specifically, the Parent alleges that the District violated the applicable laws and regulations by: 1) failing to provide the Parent with educational records of the Student; and, 2) failing to provide the Student with speech language therapy sessions as required by the Student’s Individualized Education Program (“IEP”).

The Parent submitted a formal complaint form, a two-page narrative, a five-page supplemental narrative, and multiple exhibits in support of her allegations. In response, the District submitted a two-page narrative and four exhibits addressing the allegations set forth in the complaint.

The Findings of Fact and Conclusions of Law contained herein are based on a review of the materials submitted and the relevant legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint must allege a violation that occurred no more than two years prior to the date of the complaint’s receipt. The Department received the complaint on January 9, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between January 10, 2023, and January 9, 2025.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled in school operated by the District and was eligible for special education and related services under the IDEA as a student with a qualifying disability.

A. Failing to Provide Educational Records

On October 9, 2024, the Parent and the District entered into a Mediated Settlement Agreement, under which the District agreed to provide copies of the Student’s service logs, documentation of accommodations, discipline records, IEP progress reports, and evaluation report within 30 days. The record does not establish that the Parent made prior requests for these documents before the agreement was executed. Accordingly,

October 9, 2024, serves as the first documented request for the records for purposes of compliance with IDEA's records access requirements.

On January 16, 2025, the Parent met with the District and reiterated her prior request for the same records. The District provided some records on January 27, 2025, and additional documents on January 31, 2025.

The Parent, in a February 7, 2025, supplemental complaint narrative, alleged that the service logs provided by the District were fabricated or altered, citing handwriting similarities, ink color variations, and the absence of official letterhead.

B. Service Log Accuracy and Alleged Alterations

Upon receiving the records on January 27, 2025, the Parent immediately expressed concerns regarding their clarity and completeness. The following day, on January 28, 2025, the Parent clarified her request, seeking complete service logs with detailed session information. Additionally, she requested the visitor sign-in notebook to verify the presence of personnel on campus. In response, the District reformatted the logs, included an explanation of service codes, and made the revised logs available for pickup on January 31, 2025. The District asserts that the reformatting was conducted in response to the Parent's request for clarity and that the records remained substantively unchanged.

C. Failure to Provide Speech Language Therapy Sessions

The District admits, and the speech therapy logs confirm, that the Student did not receive any speech-language therapy services in August 2024 and received only two sessions in September 2024 due to a lack of available speech-language therapists. The District hired a new full-time speech therapist in October 2024, and services resumed.

In the October 2024 Mediated Settlement Agreement, the District agreed to develop a compensatory speech therapy plan scheduling eight make-up sessions between January and May 2025 to remedy the failure to provide services in August and September 2024. The failure to provide services to the Student was also identified in during Department's monitoring of the District. The District is required to submit a corrective action plan in response to monitoring findings by May 31, 2025.

III. Conclusions of Law

Upon consideration of the relevant facts and applicable law, the undersigned finds that the District violated the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, and/or the Department's implementing regulations as set forth in Louisiana Bulletin 1706 by failing to provide the Parent with timely access to the Student's educational records. The Parent's first documented request for records was made on October 9, 2024. The District provided an initial set of records on January 27, 2025, followed by additional records on January 31, 2025. As these dates exceed the 45-day regulatory deadline prescribed under Louisiana Bulletin 1706 § 613(A), the District failed to comply with the statutory timeframe for providing access to educational records.

Additionally, the District's failure to provide speech language therapy services as required by the Student's IEP constitutes a denial of a Free Appropriate Public Education ("FAPE") in violation of Louisiana Bulletin 1706 § 101(A).

However, the record does not contain corroborating evidence to substantiate the assertion that the District fabricated or improperly altered the service logs. Instead, the evidence demonstrates that the District reformatted the logs in response to the Parent's request for clarification and provided additional explanatory details to facilitate the Parent's review. Furthermore, the visitor sign-in logs requested by the Parent are not considered "educational records" and, therefore, the District was not required to provide them under the laws applicable to this complaint investigation.

IV. Required Corrective Actions

To address the District's failure to provide timely educational records, the District shall:

- Revise its policies and procedures to ensure future compliance with IDEA's 45-day records access requirement.
- Provide training to relevant personnel regarding records access as set forth in Louisiana Bulletin 1706 § 613.
- Submit the following to the Department as soon as possible and no later than May 31, 2025:
 - A copy of the revised policies and procedures.
 - Copies of sign-in sheets and training materials documenting the District's provision of training to relevant staff addressing the content described above.

To address the District's failure to provide speech-language therapy services in August and September 2024, the District shall:

- Continue implementing compensatory speech therapy services as required by the Department's September 2024 directive.

The District's full compliance with the existing compensatory education monitoring plan will remedy the denial of FAPE. However, if the District fails to adhere to the corrective actions outlined in this decision, additional enforcement measures may be imposed.

Sincerely,

Domonique Dickerson

Re: Findings-Decision in Special Education Formal Complaint No. **45-C-44** on behalf of [REDACTED]
[REDACTED]

On **January 14, 2025**, [REDACTED] (hereinafter referred to as the "Parent"), acting on behalf of his minor child (hereinafter referred to as "the Student"), filed a formal complaint with the Louisiana Department of Education ("the Department") against Cameron Parish School District ("District"), pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), and Louisiana Children's Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Specifically, the Parent alleges that the District violated the applicable laws and regulations by: 1) failing to timely evaluate the student to consider his eligibility for special education and related services.

The Parent submitted a formal complaint form, a two-page narrative, and fifty-one (51) pages of documentary exhibits in support of the allegations. In response, the District submitted a two-page narrative along with two hundred ninety-five (295) pages of documentary exhibits addressing the allegations set forth in the complaint.

The Findings of Fact and Conclusions of Law contained herein are based on a review of the materials submitted and the relevant legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint must allege a violation that occurred no more than two years prior to the date of the complaint's receipt. The Department received the complaint on January 14, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between January 15, 2023, and January 14, 2025.

II. Findings of Fact

The Student, hereinafter referred to as "the Student," was enrolled at District School on October 16, 2023, for [REDACTED]. Shortly after enrollment, the Student exhibited significant behavioral disturbances, resulting in repeated disciplinary actions, removals from the classroom, and interventions by school personnel, external agencies, and law enforcement.

On October 18, 2023, within two days of enrollment, the Student was referred to the principal's office for willful disobedience. The incident resulted in a conference with the principal, and the Student was returned to class. The following day, on October 19, 2023, the Student engaged in severe behavioral dysregulation, physically assaulting a teacher by kicking. As a result, [REDACTED] was removed from the classroom and placed in the

calming room. On October 23, 2023, the Student escalated his behavior, striking and punching a teacher. This conduct led to a two-day out-of-school suspension, from October 23 to October 24, 2023, and the incident was reported to the Child Welfare and Attendance Office.

The Student's behavioral episodes intensified in November 2023. On November 14, 2023, [REDACTED] was removed from the classroom after attempting to slap a paraprofessional and refusing directives. The principal intervened and escorted the Student to the administrative office. While in the presence of the School Resource Officer (SRO), the Student stated that [REDACTED] wanted to "kill kids [REDACTED] age because that is what [REDACTED] head was telling [REDACTED] to do." This statement prompted a threat assessment conducted by a Licensed Professional Counselor (LPC), who determined that the threat was minor. However, the Student was suspended out of school for an undisclosed duration. On November 28, 2023, the LPC responded to an inquiry from the Principal, confirming that the Student's prior threat was assessed as minor. However, the LPC recommended that the Student be referred to Families in Need of Services (FINS) due to escalating behavioral concerns.

On December 6, 2023, the Student engaged in battery against a paraprofessional, leaving a visible bruise. The District filed a formal report with the Cameron Parish Sheriff's Office, and photographic documentation of the injuries was taken. On December 13, 2023, the District convened a meeting attended by the Parent, representatives from the Human Services Authority, the principal, assistant principal, school counselor, and the Student's teacher. Despite acknowledging the Student's continued behavioral difficulties, the District did not initiate an evaluation or implement a structured behavioral intervention plan.

On December 18, 2023, the Student's mother withdrew [REDACTED] from school, and the Student was officially unenrolled on December 19, 2023. However, [REDACTED] was reenrolled at the same school by the Parent on January 22, 2024. The Student's behavioral concerns continued unabated. On January 23, 2024, [REDACTED] engaged in another act of physical aggression, leaving visible bruising on a paraprofessional and kicking [REDACTED] teacher in the leg. This incident resulted in a referral to FINS.

On February 8, 2024, the Student was referred to the office for assault of a school employee, willful disobedience, and treating authority with disrespect, resulting in a one-day out-of-school suspension. On February 20, 2024, [REDACTED] threw chairs and attempted to overturn a table, necessitating direct intervention by school administrators. Two days later, on February 22, 2024, the Student engaged in multiple behavioral disturbances throughout the school day, including a physical altercation in physical education class, throwing a bucket of classroom materials, and screaming uncontrollably while climbing onto his desk.

On February 26, 2024, the school counselor met with members of the Human Services Authority to discuss the Student's behaviors, including concerns regarding [REDACTED] potential for self-harm and the possibility of contacting a crisis hotline. The discussion included whether a special education evaluation should be conducted and whether an IEP should be implemented.

On February 27, 2024, the Student engaged in physical aggression against multiple school employees, kicking them, which resulted in a two-day out-of-school suspension, from February 27 to February 28, 2024. Given the severity and frequency of the Student's behavioral outbursts, the Superintendent verbally recommended that the Parent obtain a psychological evaluation, offering to cover the cost if necessary. Additionally, a formal report was filed with the Cameron Parish Sheriff's Office.

On March 19, 2024, a School Building Level Committee (SBLC) meeting was convened at the request of the Superintendent. The meeting was attended by the Parent, the Social/Emotional Learning Coordinator (SEL), the Educational Diagnostician, the principal, assistant principal, school counselor, and the Student's teacher. At this meeting, the Parent signed formal consent for evaluation, triggering the District's obligation to complete the evaluation within 60 days. However, rather than completing the evaluation, the District extended the process for months, citing a "summer extension of timelines" and attributing delays to the Student's absences and the Parent's failure to provide necessary documentation.

The Student's evaluation noted that behavior charting and interventions were requested prior to the March 2024 SBLC meeting, yet no data had been collected to assess intervention effectiveness. The evaluation stated:

"Typically, when a student exhibits behaviors of extreme concern, such as physical assault, a Functional Behavior Analysis (FBA) is completed to determine the triggers for the behavior, the setting, the time of occurrence, and the function of the behavior. No documentation of completed FBAs was indicated or received. Additionally, the SEL (Social/Emotional Learning) Coordinator had made repeated visits to the school offering behavior strategies to implement, explaining how to modify behaviors, and how to effectively track progress; she also sent an email 11/14/23 to the principal and school counselor with detailed strategies"

On March 25, 2024, the Educational Diagnostician conducted an in-class observation lasting 2 hours and 40 minutes. Following this observation, an FBA was completed, and the Diagnostician recommended a Section 504 Plan and a Behavior Intervention Plan (BIP), rather than an IEP.

On April 24, 2024, a Behavioral Assessment System for Children (BASC-3) rating scale was administered to both the Parent and the Student's teacher. The results indicated clinically significant behavioral challenges across multiple domains, including suicidal ideation, threats of violence, extreme aggression, and emotional dysregulation. The Student frequently expressed suicidal ideation ("I want to die" or "I wish I was dead"), made threats to harm others, lost control when angry, and engaged in self-injurious behaviors. The school psychologist summarized that the assessment information indicated that the Student exhibited significant behavioral difficulties within and outside of the school setting, with significant concerns reported in the areas of hyperactivity, aggression, conduct problems, anxiety, depression, atypicality, withdrawal, and adaptability, which suggests an unusually high level of maladaptive behavior in these areas, noting that Student's behavior should be closely monitored and appropriate behavioral interventions should be implemented.

Despite this April 24, 2024 behavioral evaluation confirming the Student exhibited severe emotional and behavioral challenges, the District failed to complete the IDEA eligibility process in a timely manner. The final evaluation results, confirming eligibility under Emotional Disturbance (ED) under IDEA, were not formally disseminated until January 15, 2025—nine months after parental consent was obtained.

The Student continued to experience escalating behavioral concerns into the 2024–2025 school year. On August 21, 2024, the school district convened a meeting with the Human Services Authority, Families Helping Families, FINS, the Department of Children and Family Services (DCFS), and the Parent, during which the BIP was reviewed and revised. Nevertheless, on August 22, 2024, the Student refused to complete work, left the classroom yelling and crying, and physically struck the teacher, resulting in a referral to the office and

placement in the intervention room. Similar incidents occurred on August 26, 2024, when the Student threatened to strike another student, on August 28, 2024, when ■ threw food at a peer and made concerning statements regarding his home environment, and on September 30, 2024, when ■ engaged in physical aggression against a school employee, kicking and pushing them, which resulted in a one-day out-of-school suspension.

On November 14, 2024, the Student attempted to flee the school building, pushed an administrator, and made statements of self-harm, prompting a response from the LPC and SRO. On November 19, 2024, the Student stated ■ wished ■ had a gun to shoot ■ and did not want to live ■ life anymore, resulting in his removal via emergency intervention to a hospital.

On December 2, 2024, the Student engaged in another behavioral incident, during which ■ struck a glass door, refused to comply with a metal detection screening, flipped a chair, slid a desk across the classroom, and hit ■ head against the wall and floor. As a result, the Parent was asked to check the Student out of school, and the Student was subsequently suspended until December 4, 2024.

On December 4, 2024, the Student was suspended from December 5 to December 16, 2024 and recommended for expulsion following another behavioral incident in which ■ attempted to choke another student, made a “killing remark,” and expressed suicidal ideation. However, the District did not move forward with expulsion, instead conducting a Manifestation Determination Review (MDR) on December 16, 2024, under Section 504. The MDR resulted in the Student being placed on virtual homebound instruction, with the District explicitly referencing the reevaluation of placement pending the completion of the evaluation and IEP process.

In January 2025, the District finalized and disseminated the results of the Student’s evaluation, determining that ■ met the eligibility criteria for Emotional Disturbance under the Individuals with Disabilities Education Act (IDEA). The finalized Individualized Education Program (IEP) placed the Student in a specialized setting outside the general education environment, citing the severity and frequency of ■ behavioral outbursts, ■ inability to self-regulate, and the safety risks posed to ■ and others in a traditional school setting. The District further stated in the IEP that, given the Student’s history of aggression, suicidal ideation, and disruptive behaviors, none of which had been successfully mitigated by a prior Behavioral Intervention Plan, a more structured and intensive educational environment was necessary to provide the behavioral and academic supports required for his progress. The IEP maintained the Student on homebound instruction, initially instituted on December 16, 2024, pending the determination of a permanent educational placement.

On January 15, 2025, the Parent filed a complaint against the District alleging violations of IDEA and applicable state laws.

III. Conclusions of Law

Upon consideration of the relevant facts and applicable law, the undersigned finds that the District violated the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, and/or the Department’s implementing regulations as set forth in Louisiana Bulletin 1706 by failing to timely evaluate the Student for special education eligibility, improperly relying on disciplinary removals instead of providing appropriate behavioral interventions, and ultimately placing the Student on homebound instruction in a manner inconsistent with federal and state law. Based on the foregoing, the Parent’s allegations are

substantiated, and the District is found to be in violation of its obligations under IDEA and Louisiana Bulletin 1706.

A. Child Find Obligations

The Individuals with Disabilities Education Act imposes a Child Find obligation on school districts, requiring them to identify, locate, and evaluate all children with disabilities who may need special education services. This duty is reinforced in Louisiana Bulletin 1706, §111(A), which mandates that each Local Educational Agency (LEA) ensure ongoing efforts to identify and evaluate students suspected of having disabilities, regardless of the severity of the disability or whether the student is advancing from grade to grade.

The District violated its Child Find obligations under Louisiana Bulletin 1706, §111(A) by failing to initiate a timely evaluation despite overwhelming evidence of the Student's persistent and severe behavioral and emotional dysregulation. The District had sufficient reason to suspect that the Student had a disability requiring special education services no later than **November 14, 2023**, when the Student made explicit homicidal and suicidal statements, leading to a threat assessment by an LPC and an out-of-school suspension. Pursuant to Louisiana Bulletin 1706, §302(C), the District was required to complete the evaluation within 60 days, by January 19, 2024. Thereafter, an IEP meeting should have been held within 30 days, by February 18, 2024, with special education and related services beginning no later than February 19, 2024. Instead, the District delayed the evaluation for over nine months, failing to provide the Student with the services to which ■■■ was legally entitled.

Because of this delay, the Student was deprived of critical special education services for approximately 11 months (from February 19, 2024, to January 2025, when the District finally implemented an IEP). This failure constitutes a denial of a Free Appropriate Public Education (FAPE) in violation of Louisiana Bulletin 1706, §101(A).

B. Timely Evaluation Requirements

Pursuant to Louisiana Bulletin 1706, §302(C)(1)(a), once a school district receives parental consent for an initial evaluation, it must complete the evaluation within 60 business days, unless specific exceptions apply. Additionally, Bulletin 1706, §301(A) mandates that an LEA conduct a full and individual evaluation before providing special education services.

The Parent provided written consent for the Student's special education evaluation on March 19, 2024. However, rather than completing the evaluation within the required 60-day timeframe, the District delayed its completion for nearly nine months. As a result, the Student remained without IDEA protections and specialized services for an extended period, despite overwhelming evidence of a disability requiring intervention. The District argues that the Parent's failure to provide documentation and requests to reschedule a December 19, 2024, IEP meeting contributed to the delay. However, this argument is factually and legally flawed for several reasons:

1. The District recognized the need for an evaluation as early as February 26, 2024. On this date, the school counselor met with representatives from the Human Services Authority to discuss the Student's severe behaviors, including possible self-harm and crisis hotline interventions. Despite this

recognition, the District failed to act on its own concerns, further compounding the delay and its impact on the Student's access to appropriate educational supports.

2. The final evaluation itself acknowledged that the necessary behavior charting and intervention data were not collected prior to the March 2024 SBLC meeting, further contributing to delays.
3. The evaluation was already significantly overdue prior to December 2024. By the time of the December 19, 2024, IEP meeting, the District had possessed the Parent's written consent for nearly nine months, in clear violation of Louisiana Bulletin 1706, §302(C)(1)(a). The delay cannot be attributed to events occurring months after the deadline had already passed.

The District also argues that the Student's excessive absences prevented the completion of the evaluation and seeks to invoke the exception outlined in Louisiana Bulletin 1706, §302(D)(1), which applies when a parent repeatedly fails or refuses to produce the student for the evaluation. However, this exception is inapplicable to the present case.

The Student's absences were, in part, the direct result of the District's own disciplinary decisions, including removals from the educational setting due to behavioral incidents. Certainly, the District's decision to refer the Student to outside agencies, including law enforcement, in response to safety concerns, was appropriate and necessary given the consistent and alarming displays of maladaptive behavior that persisted for approximately 15 months. However, while such measures may have been justified for immediate safety and crisis intervention, they did not absolve the District of its affirmative duty to determine whether the Student's behaviors stemmed from a disability requiring specialized intervention.

The District had multiple opportunities to conduct the necessary assessments despite the Student's absences. The District's ability to document at least 21 behavioral incidents over a 15-month period underscores that it had sufficient direct interactions with the Student to proceed with assessments. Furthermore, the argument regarding the Student's absences is particularly inappropriate given its failure to collect and analyze behavioral data prior to and during the SBLC process, as noted in its own evaluation report. Had the District engaged in data collection and progress monitoring during the SBLC process, it could have obtained the necessary information for evaluation in a more structured and timely manner. Moreover, the District had alternative mechanisms available to ensure compliance with its evaluation obligations under IDEA, including reviewing existing records, conducting assessments when the Student was present, and utilizing other permissible evaluation methods.

By failing to conduct a timely evaluation, the District failed to comply with the statutory evaluation timeline set forth in Louisiana Bulletin 1706, §§301 and 302, resulting in the denial of a FAPE.

C. Manifestation Determination Review

Pursuant to Bulletin 1706 §530(F), when a student with a disability is subjected to a disciplinary removal exceeding 10 days, the school must conduct a Manifestation Determination Review to assess whether the behavior was a manifestation of the student's disability. Moreover, if a school had prior knowledge that a student had a disability, IDEA's procedural safeguards apply, even if the student had not yet been formally identified, as mandated by Bulletin 1706, §536.

Here, the December 16, 2024, MDR was procedurally flawed, as it was under Section 504 rather than IDEA despite the District's clear knowledge that the Student was undergoing an IDEA evaluation. The MDR form

listed both IDEA and Section 504, but only Section 504 was circled. However, in the “Action to be Taken” section, the District wrote: “Student will be virtual homebound until the evaluation and IEP is complete. At that time, placement will be reevaluated.”

Moreover, the District’s decision to place the Student on homebound instruction at that time, immediately following the Student’s suspension from December 5 to December 16, 2024, and while an expulsion was pending – demonstrates that the homebound placement functioned as a de facto disciplinary measure rather than an educational intervention.

Instead of allowing the IEP Team to determine the Student’s placement based on the completed evaluation, the decision imposed a significant change in placement before the evaluation was finalized, in violation of procedural safeguards.

Required Corrective Action

To remediate the District’s violations of IDEA and corresponding state regulations, the following corrective actions are necessary to ensure compliance with legal obligations and to provide appropriate educational services to the Student.

1. Given the District’s failure to timely evaluate the Student and its subsequent denial of FAPE, the Student is entitled to compensatory education equivalent to the special education and related services the Student should have received from February 19, 2024, through January 15, 2025. The District shall:
 - a. Conduct a comprehensive IEP Team meeting within thirty (30) business days of this decision to determine the specific amount and type of compensatory education services required to address the Student's educational and behavioral deficits caused by the District's failure to timely evaluate and provide services. At minimum, the compensatory services must include:
 - i. Direct special education instruction equivalent to the number of instructional hours missed due to the failure to implement services timely.
 - ii. Behavioral and mental health supports, including but not limited to counseling, therapeutic interventions, and social-emotional learning supports necessary to address the Student's emotional and behavioral needs.
 - b. Consider whether Extended School Year (ESY) services or additional therapeutic interventions are necessary to address any academic regression resulting from the delay in providing appropriate services.
2. The District shall revise and implement policies to ensure adherence to IDEA’s Child Find, evaluation, disciplinary, and placement provisions.
3. The District shall conduct mandatory training for all relevant personnel, including administrators, teachers, and special education staff, regarding:
 - a. Child Find requirements
 - b. School Building Level Committee/Response to Intervention activities
 - c. Timelines for conducting evaluations
 - d. Proper use of disciplinary measures for students with disabilities
 - e. Manifestation determinations and appropriate educational placements

4. As soon as possible and no later than May 31, 2025, the District shall submit documentation to the Department verifying compliance with the above corrective actions.

All noncompliance identified above shall be corrected as soon as possible and not later than one year from the date of this decision.

Sincerely,

Domonique Dickerson

Re: Findings-Decision in State Special Education Formal Complaint No. **45-C-46** on behalf of [REDACTED]
[REDACTED]

On January 17, 2025, the Louisiana Department of Education ("Department") received a formal complaint from [REDACTED] (hereinafter "Parent"), on behalf of a student (hereinafter "Student"), against the Terrebonne Parish School District ("District"), pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

The complaint alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), and Louisiana Children's Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Specifically, the complaint alleges that the District violated the IDEA and/or applicable state law by: 1) failing to provide the Parent with an opportunity to participate in decisions concerning the Student's educational placement; and, 2) failing to provide the Student with a placement in the least restrictive environment by refusing the Parent's requests to place the Student in an inclusion setting pursuant to the Student's IEP.

The Parent submitted a formal complaint form, a five-page narrative, and supporting exhibits, including but not limited to, correspondence between the Parent and District, the Student's [REDACTED] Report Card, [REDACTED] first and second nine weeks report cards, April 2024 IEP, and November 2024 IEP.

The District responded to the complaint on February 10, 2025, asserting that the matters raised in the complaint had been resolved through mediation and a facilitated IEP meeting. The District submitted supporting exhibits, including but not limited to, special education service provider logs from August 7, 2024, to January 15, 2025; a mediation settlement agreement executed on October 25, 2024, compensatory services tutoring records; documentation of district procedures for scheduling and conducting IEP meetings; staff training materials on IEP development and prior written notice; and portions of the District's service provider handbook.

As the Department's assigned investigator, I reviewed the complaint, the District's response, and all documents submitted by the parties. The Findings of Fact and Conclusions of Law contained herein are based on a review of the materials submitted and the relevant legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint must allege a violation that occurred no more than two years prior to the date of the complaint's receipt. The Department received the complaint on January 17, 2025. Therefore, the

investigation was limited to alleged violations of law that occurred between January 18, 2023, and January 17, 2025.

II. Findings of Fact

The Student is a [REDACTED] student who qualifies for special education and related services under the classification of Developmental Delay.

The Student has deficits in cognitive development, communication skills, fine and gross motor abilities, social-emotional development, and sensory integration. The most recent comprehensive evaluation, conducted on May 6, 2022, confirmed impairments in language development, abstract reasoning, perceptual discrimination, categorization and sequencing, task attention, memory, and sensory processing. These impairments significantly affect the Student's ability to access and make progress in the general education curriculum without specialized instruction and related services.

On April 19, 2024, the Student's IEP Team convened to review and revise the Student's IEP, placing [REDACTED] in the in a general education setting for at least 80% of the school day, with the following services: 120 minutes per week of inclusion support for Mathematics and English Language Arts (ELA) within the general education classroom; 90 minutes per week of special education instruction in the resource setting, consisting of 45-minute sessions in ELA and Mathematics each three times per week; speech-language therapy for 30 minutes three times per month in a special education setting; and occupational therapy on a consultative basis, consisting of 15-minute sessions four times per year. The IEP also provided accommodations, including text-to-speech, modified tests, extended time, small-group testing, and the use of a calculator. The Student's final report card for the 2023-2024 school year reflected passing grades in both Mathematics (C) and ELA (C).

At the start of the 2024-2025 school year, the Student began attending a new school within the District on August 5, 2024. The Parent alleges that the District unilaterally changed the Student's placement without an IEP meeting or prior written notice, removing the inclusion services and instead implementing a "clinic model," which involved the provision of special education instruction for ELA and Mathematics in a resource setting rather than in the general education classroom as required by the April 2024 IEP.

The Parent requested an IEP meeting, which was held on September 4, 2024. According to the Parent, District staff informed her that the inclusion model was no longer an option and that the school had adopted a clinic model, which delivered services in a pull-out setting rather than through co-teaching within the general education classroom. The Parent objected to the change, asserting that the removal of inclusion services was inconsistent with the Student's IEP and that the District had violated the requirement to educate the Student in the least restrictive environment (LRE). The Parent filed a due process complaint on September 27, 2024, challenging the placement change. Service logs from August 2024 indicate that the term "clinic" was used to describe certain instructional sessions. Whereas, by November 2024, the phrases "ELA Inclusion Notes," "ELA inclusion setting," began appearing in a limited number of instructional entries.

On October 25, 2024, the parties entered into a mediation settlement agreement, in which the District agreed to reinstate the Student's inclusion services for 120 minutes daily, provide compensatory tutoring for lost instructional time, and notify the Parent before making any future changes to the IEP or placement. However, at the November 11, 2024, facilitated IEP meeting, the IEP Team formally revised the Student's

placement to increase the time spent in the resource setting, citing the Student's below-grade-level performance during the school year as justification for the change. Under the November 2024 IEP, the Student was placed in the general education setting for 40-79% of the school day, receiving 145 minutes per day in a resource setting (100 minutes for ELA and 45 minutes for Mathematics), and 45 minutes per day in a general education setting for Mathematics. The Parent, although agreeing to the placement, asserted that the Student's academic regression was a direct result of the District's failure to implement the April 2024 IEP, and that the Student's declining grades demonstrated the denial of FAPE. The Student's anxiety reportedly increased and report card reflected failing grades in Mathematics (F) and a decline in ELA (C/D).

The Parent contacted the District in November and December 2024 to request confirmation that the Student was receiving inclusion services and express concerns regarding what she viewed as a pattern of conduct marks.

A review of the District's service provider logs from August 7, 2024, to January 15, 2025, reveals inconsistencies in the documentation and provision of special education services. On September 4, 2024, a single 30-minute session (7:00 AM – 7:30 AM) was recorded as covering both Math and ELA, rather than separate instructional periods. Similarly, entries on November 21, 2024, and December 5, 2024, also document a single 30-minute block in which the Student allegedly received instruction for both subjects simultaneously. Other entries on September 25, 2024; October 23, 2024; November 20, 2024; and December 4, 2024, document separate service logs for Math and ELA occurring at the same time (e.g., 2:30 PM - 3:00 PM) and provided by the same service provider.

The District's response to the complaint does not substantively dispute the Parent's allegations. Instead, the District relies on the mediation settlement agreement as a defense, asserting that the agreement addressed the complaint allegation.

The Parent withdrew the Student from the District school on January 15, 2025, and the Department received a formal complaint of this decision on January 17, 2025.

III. Conclusions of Law

Upon consideration of the relevant facts and applicable law, the undersigned finds that the District violated the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, and/or the Department's implementing regulations as set forth in Louisiana Bulletin 1706 law by: 1) failing to provide the Parent with an opportunity to participate in decisions concerning the Student's educational placement; and, 2) failing to provide the Student with a placement in the least restrictive environment by refusing the Parent's requests to place the Student in an inclusion setting pursuant to the Student's IEP.

Pursuant to Bulletin 1706, § 114(A)(2)(b), students with disabilities must be educated in the least restrictive environment (LRE) to the maximum extent appropriate. Special classes or removal from the general education environment may only occur if the nature or severity of the disability is such that education in regular classes cannot be satisfactorily achieved with the use of supplementary aids and services. The April 2024 IEP placed the Student in an inclusion setting for Math and ELA with co-teaching and push-in support. However, at the beginning of the 2024-2025 school year, the District removed the inclusion setting and placed the Student in a more restrictive clinic/resource model without an IEP meeting or parental input. This

unilateral placement change violated Bulletin 1706, § 114. The Parent's objection to the placement change was documented in the September 4, 2024 IEP meeting, yet the Student continued to be served in the resource setting without inclusion services. Although the parties entered into a mediation settlement agreement on October 25, 2024, requiring the District to reinstate inclusion services, service logs after this date do not conclusively establish that the inclusion services were consistently implemented. The logs contain continued discrepancies and irregular record-keeping patterns, further supporting the Parent's assertion that special education services were not provided in accordance with the IEP. Additionally, at the November 11, 2024, IEP meeting, the IEP Team formally changed the Student's placement to reflect increased time in the special education/resource setting, citing the Student's below-grade-level performance as justification for the change. This decision was based, in part, on academic struggles that occurred while the District was not fully implementing the Student's April 2024 IEP. The District's failure to properly implement the IEP and its reliance on the Student's resulting below-grade-level performance as a basis for a more restrictive placement in the special education setting further exacerbates the LRE violation.

Pursuant to Bulletin 1706, § 101(A)(1) a free appropriate public education (FAPE) must be made available to all eligible students with disabilities in accordance with their IEPs. The failure to fully implement an IEP constitutes a denial of FAPE. A review of the District's service provider logs from August 7, 2024, to January 15, 2025, reveals inconsistencies in the documentation and provision of special education instructional services. The entries demonstrate overlapping service times, potentially duplicative log records, and irregular recordation of special education minutes. The logs provided by the District do not demonstrate that the Student consistently received the instructional minutes required under either the April 2024 or November 2024 IEPs. The Parent's concerns regarding IEP implementation, raised both before and after the mediation settlement agreement, are supported by these documented inconsistencies in the service logs. As such, the District failed to fully implement the Student's IEP, resulting in a denial of FAPE.

Pursuant to Bulletin 1706, § 504(A), the District was required to provide Prior Written Notice (PWN) within a reasonable amount of time and, in any event, no later than 15 days before making any changes to the Student's placement or the provision of services. The Parent asserts—and the record supports—that the District did not provide PWN before modifying the Student's instructional setting at the beginning of the school year. PWN must include a description of the proposed action, the rationale for the action, the data used as a basis to support the decision, and a statement regarding the parent's procedural safeguards. The absence of PWN prior to the implementation of the clinic/resource model in August 2024 constitutes a procedural violation that significantly impeded the Parent's opportunity to participate in decision-making regarding the Student's education.

Finally, the District's reliance on the mediation settlement agreement as a defense to the allegations is unavailing. Participation in alternative dispute resolution does not preclude a Parent from filing a complaint, nor does it absolve the District of its legal responsibility to fully implement an IEP or comply with IDEA's procedural safeguards. Here, the Parent's complaint extends beyond the scope of the mediation settlement agreement, as the allegations encompass issues occurring both before and after mediation, including ongoing failures in IEP implementation. The District's response to the formal complaint did not substantively address or refute the allegations contained therein, further supporting the finding that violations occurred.

Based on the foregoing, the Parent's allegations are substantiated, and the District is found to be in violation of its obligations under IDEA and Louisiana Bulletin 1706.

IV. Corrective Action

To remediate the District's violations of the IDEA and corresponding state regulations, the District shall:

1. Convene an IEP Team meeting and develop a compensatory services plan in collaboration with the Parent, within thirty (30) business days of this decision, to address any instructional minutes not provided in Math and ELA between August 2024 and January 2025. The plan must:
 - a. Allow the Parent to meaningfully participate in determining when and where compensatory services will be provided.
 - b. Include specific details regarding the amount, frequency, and duration of compensatory instruction, ensuring that services are equivalent to the time the Student was deprived of FAPE.
2. As soon as possible and no later than May 31, 2025, the District shall submit the compensatory services plan to the Department for review and approval.

All noncompliance identified above shall be corrected as soon as possible and not later than one year from the date of this decision.

Sincerely,

Domonique Dickerson

Re: Findings-Decision in State Special Education Formal Complaint No. **45-C-47** on behalf of [REDACTED]

On **January 17, 2025**, [REDACTED] (hereinafter referred to as the “Parent”) filed a Request for Special Education Formal Complaint Investigation concerning Caddo Parish Public Schools (“the District”) with the Louisiana Department of Education (“the Department”) pursuant to Louisiana Bulletin 1706 §§ 151 through 153.

I. Statement of the Case

In the complaint, filed on behalf of the Parent’s minor child [REDACTED] (“the Student”), the Parent alleged that the District violated the Individuals with Disabilities Education Act (“the IDEA”), the Louisiana Children with Exceptionalities Act, or the Department’s implementing regulations published in Louisiana Bulletin 1706 by failing to provide Parent with prior written notice of actions proposed and/or refused at the November 21, 2024, Individualized Education Program (“IEP”) team meeting for the Student.

The Parent provided a complaint form, a written narrative, and three exhibits. The District provided a narrative response and 11 exhibits. As the Department’s assigned investigator, I reviewed the complaint and all documents submitted by the parties.

The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions. Louisiana Bulletin 1706 § 152(C) states that a formal complaint “shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The Department received the complaint on January 17, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between January 18, 2023, and January 17, 2025.

II. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and was eligible for special education and related services as a student with a disability. On November 12, 2024, the Parent requested a meeting of the Student’s IEP Team to address some areas of parental concern. The District coordinated a meeting on November 21, 2024; however, the meeting was not held due to the unavailability of the Parent. Over the next several weeks, the Parent and the District engaged in several unsuccessful attempts to schedule an IEP Team meeting at a mutually available time.

On December 9, 2024, the Parent filed a Bullying Report Form with the District alleging bullying of the Student. On December 10, 2024, the Parent submitted a formal request for the District to install cameras

in the Student's classroom.

On December 19, 2024, an IEP Team meeting was held concerning the Student. The Parent participated in the meeting, which included discussion of parental concerns about classroom accommodations and quantity of services. The meeting also addressed the outcomes of the Parent-requested bullying investigation and camera installation.

Following the meeting, the District provided the Parent with a *Notice of Proposed or Refused Action by the Local Educational Agency*. The notice provided information about each of the areas of concerns that were discussed at the meeting, and indicated that the District added an accommodation – modified assignments – to the Student's IEP. The notice also addressed the resolution of the Parent's bullying complaint and camera request. Also on December 19, 2024, the District sent the Parent a *Form F-2A Denial of Request for SPED Camera Installation* providing additional information about the District refusal to install a camera in the Student's resource classroom.

On January 17, 2025, the Parent filed the complaint that forms the basis of the current complaint.

III. Conclusions of Law

Upon review of the information provided, the undersigned finds that the District did not fail to comply with the IDEA, the Louisiana Children with Exceptionalities Act, and the Department's implementing regulations published in Louisiana Bulletin 1706 by failing to provide Parent with prior written notice of actions proposed and/or refused at the November 21, 2024, IEP team meeting for the Student. Louisiana Bulletin 1706 §504 requires that written notice be provided to the parents of students with disabilities within ten days before the public agency proposes or refuses to initiate or change the identification, evaluation, or educational placement of the student.

In this case, the Parent claims that the required notice was not sent in connection with an IEP Team meeting which occurred on November 21, 2024; however, no such meeting occurred due to the Parent's unavailability. The Student's IEP eventually met to address the Parent's concerns on December 19, 2024. Following that meeting, the District provided the Parent with a notice of proposed or refused action which addressed each of the issues discussed in the meeting and with a separate notice concerning the Parent's request for the installation of cameras in the classroom.

On the basis of these findings, the Department concludes that the Parent's allegation – that the District failed to comply with applicable law by failing to provide Parent with prior written notice of actions proposed and/or refused at the November 21, 2024, IEP team meeting for the Student – is unsubstantiated.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IV. Corrective Action Plan

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,
