

2025-26 Louisiana Special Education Formal State Complaint Decisions

This document contains a copy of the decisions of each Louisiana special education formal state complaint filed on or between July 1, 2025, and June 30, 2026. Each case filed during the relevant timeframe is included in the informational table below. If a decision has been issued, the decision will appear below. This document is updated at least monthly on the last business day of the month.

If you have any questions or concerns, please contact the Department at DisputeResolution.DOE@la.gov.

LDOE Case Number	Public Agency	Decision	Date of Decision
56-C-01	Tangipahoa Parish	Noncompliance	September 8, 2025

Re: Findings-Decision in State Special Education Formal Complaint No. **56-C-01** on behalf of [REDACTED]

I. Introduction

On July 9, 2025, the complainant ("Parent") submitted a formal written request for a filed a Request for special education complaint investigation to the Louisiana Department of Education ("the Department") on behalf of [REDACTED] child ("Student"), who is enrolled in a school under the jurisdiction of the Tangipahoa Parish School System ("District"). The parent requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153.

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the parent alleges the District:

1. Failed to convene an IEP Team meeting and apply the required eligibility criteria in determining the Student's need for Extended School Year (ESY) services, resulting in a unilateral denial communicated outside the IEP process and without affording the Parent an opportunity for meaningful participation; and
2. Failed to provide prior written notice in connection with the District's determination that the Student was ineligible for ESY, including failure to ensure that any written communication reflected an individualized analysis of the Student's needs, the data considered, and the rationale for the decision.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on July 9, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between July 10, 2023, and July 9, 2025.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and receiving special education under the classification of Other Health Impairments. The Student's IEP provided for thirty minutes of occupational therapy per week in the special education setting and ninety minutes per week of special education instruction in the regular education setting. Progress towards annual goals was to be measured by completion of targeted activities with at least 85% accuracy with cues, prompts and assistance in 6 out of 8 trials each grading period throughout the IEP year.

By email dated January 14, 2025, the Parent contacted the District expressing concerns regarding the Student's recent behavior at school which had been documented by the school and communicated to the Parent. The Parent stated that the behaviors reflected regression in social, behavioral, emotional, and communication functioning. In the same email, the Parent requested: (a) copies of any data that would be used to determine eligibility for Extended School Year (ESY) services; (b) renewal of [REDACTED] prior request for an Independent Educational Evaluation (IEE); and (c) the participation of a Board Certified Behavior Analyst (BCBA) at the next IEP Team meeting.

By email dated January 27, 2025, the District provided an initial notice of the Student's annual IEP meeting scheduled for February 6, 2025 at 2:00 p.m. to be held at Kids Haven. In a reply email, the Parent communicated that [REDACTED] would be unable to attend at the selected time and the District agreed to change the meeting time to 2:30. In an email dated January 30, 2025, the District notified the parent of a change in the meeting location and attached a second notice reflecting the new time and location. Additionally, by email dated February 4, 2025, the District provided a draft IEP to the parent. As scheduled, the meeting convened with the Parent in attendance. The Student's IEP was reviewed and revised to include specific social and emotional objectives to address the Student's behavior as well as incorporate additional accommodations and modifications. At the February 6, 2025 meeting, the IEP Team also reviewed the criteria for ESY, noting that the Student would be considered under Critical Point of Instruction (CPI) 1 and CPI 2. The IEP notes reflect that the Parent attended the meeting, but left before signing the IEP. The District noted in the IEP that the NPRA and a copy of the IEP was sent home to the parent in the student's communication folder. Additionally, a copy of the IEP and NPRA were provided during an in-person meeting on February 21, 2025.

On March 24, 2025, the District conducted screenings to determine if the Student met the eligibility criteria for ESYs under CPI1 and CPI2¹ and determined the Student was ineligible for services. By letter dated April 28, 2025—sent home from the school with the Student in their communication folder on April 30, 2025—the District notified the Parent of the Student's ineligibility for ESYs. The letter included a copy of the ESYs criteria documentation form and informed the Parent of their right to request an IEP Team meeting if they disagreed with the District's determination.

On July 9, 2025, the Parent filed the complaint that formed the basis of the Department's investigation.

IV. Conclusions of Law

Allegation 1

The Parent alleges the District made a unilateral decision to deny the Student's ESYs eligibility outside of the IEP process and without providing the Parent meaningful participation in the ineligibility determination.

¹ However, the record does not reflect that CPI2 criterion were applied. In the District's copy of the ESYs criteria documentation form provided to the parent selections were applied only for CPI1 and none for CPI2.

Pursuant to Bulletin 1706 §106(A)(2), ESY services must be provided only if the IEP Team determines, on an individual basis, that such services are necessary to ensure FAPE. In making this determination, the IEP Team must review all pertinent ESY criteria and relevant performance data, consistent with Bulletin 1530 §703(B). Eligibility decisions must be based on one or more of the following criteria: (1) Regression–Recoupment, (2) Critical Point of Instruction (CPI), or (3) Special Circumstances, as set forth in Bulletin 1530 §705. An IEP Team may defer the ESY eligibility decision until additional performance data is available, but the decision must be finalized prior to the onset of ESY services, pursuant to Bulletin 1530 §707(B)(4). When a student is determined ineligible for ESY services based on performance data, the district must provide written notification to the parent and inform them of their due process rights, as mandated by Bulletin 1530 §707(E). Additionally, school districts must ensure that parents are afforded the opportunity to participate in IEP Team meetings under Bulletin 1706 §322 and must issue Prior Written Notice of any proposals or refusals regarding FAPE in accordance with Bulletin 1706 §504.

In this case, the District notified the parent of the time and location of the IEP meeting 10 days prior to the scheduled meeting and then ensured the Parent was notified of the updated change of location and time approximately 7 days prior. The Parent received these notices—including a draft IEP sent via email February 4, 2025—and attended the February 6, 2026 IEP Team meeting. The District satisfied its obligation under Bulletin 1530 when the IEP Team reviewed the ESY criterion during the meeting—concluding criteria for CPI1 and CPI2 would be applied to the Student—prior to its determination of eligibility. The record is absent any evidence the Parent requested an IEP meeting to submit for review any new performance data prior to the screening and eligibility determination. As permitted by Bulletin 1530 §707(B)(4), the District analyzed the Student’s performance data on March 24, 2025 and determined that—based on CPI1—the Student did not meet eligibility criteria for ESY. Its subsequent April 28, 2025 notification letter to the Parent satisfied its obligation under §707(E) to inform the Parent of (1) the student’s ineligibility for ESY and (2) the Parent’s right to request an IEP meeting if they disagreed with the determination.

The Parent did not request an IEP meeting following the receipt of the ineligibility letter. Absent such request, the District was under no obligation to conduct an additional IEP meeting to review the results of the screening or reconsider the student’s eligibility. While it is within the Parent’s prerogative to leave an IEP Team meeting prior to its conclusion, their absence from the completion of an IEP review and any consequential lack of continued involvement in the meeting does not amount to a denial of meaningful participation, but rather a choice to simply no longer participate in the IEP Team meeting.

Thus, with respect to allegation 1, the Department finds the District did not act unilaterally to determine the student’s ESY ineligibility and the Parent was provided an opportunity to meaningfully participate in the determination. As such, the Department finds this portion of the allegation unsubstantiated.

Allegation 2

The Parent alleges the District failed to provide prior written notice in connection with the District’s determination that the Student was ineligible for ESY, including failure to ensure that any written communication reflected an individualized analysis of the Student’s needs, the data considered, and the rationale for the decision.

As outlined in Allegation 1, Bulletin 1530 §707(E) mandates that when a student is determined ineligible for ESY services based on performance data, Districts must provide written notification to the parent and inform them of their due process rights. Additionally, school districts must issue Prior Written Notice of any proposals or refusals regarding FAPE in accordance with Bulletin 1706 §504.

Here, the District was only mandated to issue a written notification of ineligibility to the parent. The April 28, 2025 ineligibility letter satisfied this obligation. The District was under no further obligation to provide an additional prior written notice because it was not refusing to provide ESY services to the student, but rather notifying the parent of the student's ineligibility for those services. As such, the Department finds this portion of allegation 2 is unsubstantiated.

However, at the February 6th meeting, the IEP Team concluded that the criteria for CPI1 and CPI2 would be applied to the Student. Yet, the record reflects that the Student was only screened under CPI1. Moreover, the ESY Criteria Documentation Form as well as the notification of ineligibility letter indicates the District only screened the Student's data under CPI1. Because special education and related services must be provided in accordance with the student's IEP, the failure to apply both CPI1 and CPI2 as directed constitutes a deviation from the IEP Team's decision.

Therefore, while the District provided notice compliant with Bulletin 1530§707(E), it failed to screen the Student for eligibility for ESY services under CPI2 as required in the Student's IEP. For this reason, the Department finds this portion of allegation 2 substantiated.

V. Corrective Action Plan

Corrective Action for Allegation 2 in part: Violation of the IDEA and Bulletin 1706

1. Within 60 calendar days of the date of this decision, the District shall screen the student's performance data that was available at the time of the screening using the CPI2 criterion as indicated on the student's February 6, 2025 IEP.
 - a. The Team shall determine eligibility based on the results of the screening;
 - b. If the screening reveals the student's ineligibility for ESY, the District shall notify the parent in writing in accordance with Bulletin 1530;
 - c. If the screening results reveal the student was eligible for ESY, the District shall provide compensatory services to the student in the amount the student would have received had the student been determined eligible at the time of the determination.
2. In conjunction with the above, the District shall review and revise and local policies, procedures or practices that may contribute to the failure in implementing a student's IEP in its entirety. A written narrative summarizing changes and compliance measures shall be submitted to the Department within 60 calendar days.

Sincerely,

Re: Findings-Decisions in Special Education Formal Complaint No. **56-C-06** on behalf of [REDACTED]

I. Introduction

On August 8, 2025, the Louisiana Department of Education (“Department”) received a formal complaint from the complainant (“Parent”), on behalf of a minor child (“Student”) enrolled in a school (“School”) under the jurisdiction of the Pointe Coupee Parish School System (“District”). The Parent requested that the Department initiate an investigation pursuant to Louisiana Bulletin 1706 §§ 151–153.

II. Statement of the Case

In the complaint, the Parent allege that the District violated the Individuals with Disabilities Education Act (“IDEA”), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department’s implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Parent alleges that the District:

1. Failed to implement the student’s IEP and behavioral intervention plan, on or about November 6, 2024, and on subsequent occasions through August 2025, including failing to provide required services, supports, and supervision specified in the IEP and failing to ensure that all personnel responsible for the student’s services were informed of their responsibilities; and
2. Failure to follow procedural safeguards in connection with disciplinary removals and IEP team meetings, on or about November 6–12, 2024, and on subsequent occasions through August 2025, including removing the student without a timely manifestation determination review, predetermining placement decisions without full team deliberation, and failing to provide prior written notice when proposing or refusing to initiate or change the student’s identification, evaluation, placement, or provision of FAPE.

As the Department’s assigned investigator, I have reviewed the complaint, the District’s written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are

based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 §152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The Department received the complaint on August 8, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between August 9, 2023, and August 8, 2025.

III. Findings of Fact

The Student is eligible for special education and related services under the category of Intellectual Disability – Mild, with additional impairments in adaptive behavior, academic, and cognitive functioning, as determined by an initial evaluation completed on December 20, 2021. The evaluation included administration of the Wechsler Intelligence Scale for Children, which yielded a composite score 2.27 standard deviations below the mean, and the Vineland Adaptive Behavior Scales, on which the Student’s adaptive functioning was reported between two and three standard deviations below the norm based on both Parent and teacher reports.

During the 2023–2024 and 2024–2025 school years, the Student participated in Louisiana’s LEAP Connect alternate assessment, aligned with alternate achievement standards for students with significant cognitive disabilities.

The Student attended a District high school during the 2024–2025 school year, initially receiving services under an Individualized Education Program (IEP) dated November 14, 2023, and later under a subsequent IEP developed on November 12, 2024, following a Manifestation Determination Review (MDR) related to a disciplinary incident that occurred on November 6, 2024.

November 14, 2023 IEP and Behavior Intervention Plan

The November 14, 2023 IEP identified significant academic deficits, with the Student functioning at approximately a kindergarten level in mathematics and overall reading, demonstrating phonics and comprehension delays at a kindergarten level and vocabulary and high-frequency word recognition at a first- to second-grade level. The IEP specified that the Student required academic and behavioral supports in all campus setting and that an “extra adult is needed to assist with behavior management in all general education classes.”

Under Special Factors, the IEP documented seven major discipline referrals from the prior school year, including incidents of fighting, disrespect, and elopement. Among the accommodations, the IEP directed staff to “provide assistance/cues for transition between classes, lockers, and home,” and included extended time, modified assignments, and small-group instruction.

The Student’s placement was inside the regular education classroom for less than 40% of the school day, with Physical Education instruction in the general education setting. The IEP provided special education instruction of 305 minutes twice weekly and 395 minutes twice weekly, corresponding to the alternating A/B block schedule, and counseling services for 30 minutes twice monthly.

The Behavior Intervention Plan (BIP) developed on August 24, 2023, and last revised on November 13, 2023, identified aggression as the primary target behavior, including hitting others, verbal aggression, and refusal to follow directions. The function of the behavior was identified as gaining or avoiding attention, escaping non-preferred tasks, and obtaining tangibles. The behavior occurred several times daily, typically of moderate intensity, during transitions, unstructured periods, and peer interactions.

To address aggression, the BIP emphasized clear expectations, offering choices, consistent and calm communication, and positive reinforcement. A key proactive strategy, “Alternate difficult tasks/demands with preferred activities in the daily schedule,” required embedding non-preferred tasks between preferred activities

using a “first/then” approach to promote compliance. The plan required consistent implementation and neutral staff responses.

The November 6, 2024 Incident

On November 6, 2024, at approximately 1:31 p.m., during the transition between classes, the Student was involved in a physical altercation with four peers near the school’s F Building. The District’s narrative summary of surveillance footage described that “the junior high students were transitioning to their 4th block classes” when the incident occurred. The narrative indicated that one student struck first, followed by others, and that the Student was struck multiple times while on the ground before staff intervened.

Statements from students indicated that a verbal exchange occurred earlier during Physical Education and that the altercation took place during the transition period that followed. The Student sustained injuries to the ear requiring medical treatment at a local hospital. The incident occurred during an unstructured transition period when the Student was not accompanied by a paraprofessional.

Manifestation Determination Review and November 12, 2024 IEP and BIP

Following the incident, the Student was suspended out of school from November 7–8, 2024. The principal submitted a Request for Alternative Placement citing code violations, including “instigates or participates in fights while under school supervision,” “treats authority with disrespect,” and “exhibits conduct injurious to associates.”

On November 7, 2024, the District issued Prior Written Notice to the Parent scheduling a Manifestation Determination Review (MDR) for November 12, 2024. The MDR meeting convened on that date and included the Student, Parent, regular and special education teachers, administrative staff, and District representatives.

The MDR form contained the two required determinations:

1. “Was the conduct caused by, or did it have a direct and substantial relationship to, the student’s disability?” – **No**; and
2. “Was the conduct the direct result of the District’s failure to implement the IEP?” – initially **No**, later amended to **Yes** following discussion.

A handwritten notation states, “Due to results of further discussion, it has been determined to be a failure on the part of the local educational agency.” Additional notations reflect that school staff met with the paraprofessional to review the Student’s IEP, BIP, and transition assistance. The Student was returned to ■■■ prior placement following the two-day suspension.

The District’s response to the complaint stated that the MDR “determined there was a failure to implement the student’s IEP and Behavior Improvement Plan by a staff member.” In its supplemental response, the District clarified that a substitute paraprofessional was not present during the Student’s transition from the gym to class when the incident occurred.

Following the MDR, the IEP team reconvened the same day to review and revise the Student’s program. The revised November 12, 2024 IEP continued the accommodation to “provide assistance/cues for transition between classes, lockers, and home,” and maintained the Student’s placement inside the regular education classroom less than 40% of the school day.

The corresponding November 12, 2024 BIP restated that the Student’s aggressive behaviors occurred primarily during transitions, unstructured times, and peer interactions. Proactive strategies included providing frequent choice, “first/then” statements, and positive reinforcement for appropriate decisions.

On November 15, 2024, staff members—including two physical education teachers, the paraprofessional, the bus driver, the special education teacher, and the junior high principal—signed documentation acknowledging receipt of and responsibility for implementing the Student’s IEP and BIP.

February–April 2025

On February 21, 2025, text messages between the Student’s special education teacher and the Parent indicated that the Student assisted with a cooking activity organized by staff for junior high students. The record contains no indication that the event was documented in the Student’s IEP or BIP as an instructional or transition activity.

On March 20, 2025, the Student participated in an off-campus trip to a local restaurant. The District provided a general permission slip signed by the Parent in September 2024 authorizing participation in school-sponsored trips. Text messages show that the teacher informed the Parent in advance and that the Parent responded positively.

Later the same day, an on-campus incident occurred that resulted in law enforcement involvement. A report provided by the Parent identifies the date as March 20, 2025, and describes an altercation involving multiple students beginning in the gym and continuing during transition to class in or near the F Building. The Department makes no findings as to the substance or accuracy of the report but notes that the event, as described, occurred during a transition period.

Attendance records indicate that the Student was present through April 28, 2025, and was marked absent beginning April 30, 2025, through mid-May 2025. The Parent attributed the absences to safety concerns; the reasons for nonattendance are not otherwise established in the record.

August 2025 IEP Meetings

The record documents three IEP meetings held on August 4, August 19, and August 22, 2025, convened to review the Student’s IEP, discuss placement for the 2025–2026 school year, and address changes to Bulletin 1530 alternate assessment criteria. Each meeting is documented by a Prior Written Notice (PWN) and post-meeting notice describing discussion topics and the Parent’s responses.

The PWNs for August 4 and 19, 2025, identify the purpose as “develop, review, or amend an IEP and determine placement,” with reevaluation not indicated. The post-meeting notices show that the team discussed the revised alternate assessment criteria and that the District proposed additional testing to determine whether the Student continued to meet eligibility requirements. The Parent declined consent at both meetings, requesting additional time to review the information. The District’s record lists the Student’s special education teacher as an attendee at both meetings—by phone on August 4 and by videoconference on August 19.

The August 22, 2025 meeting PWN indicates both “IEP review” and “reevaluate your child’s need for special education services.” The Parent consented to the proposed reevaluation. The team also discussed safety concerns and agreed to safeguards for the Student’s return, including:

- Core academic instruction in a special education setting;
- Three elective classes with paraprofessional support;
- Supervised participation with nondisabled peers during lunch and recess; and
- Supervised restroom breaks scheduled outside the general school schedule.

The IEP developed on August 22, 2025, added a reading fluency goal and a home–school communication plan.

The District’s complaint response confirmed that the August meetings addressed Bulletin 1530 criteria, placement, and parental safety concerns. The District’s supplemental response clarified that reevaluation was

discussed in earlier meetings but formally proposed and consented to on August 22, 2025. The record does not include a completed reevaluation, as the Student had not yet been made available for testing as of the District's latest submission.

On August 8, 2025, the Parents filed the state complaint underlying this decision.

IV. Conclusions of Law

The Department's conclusions are based on a review of the complaint, the District's response and supplemental submissions, relevant student records, and applicable law and regulation. Each allegation was analyzed in relation to the governing standards under Bulletin 1706 and applicable federal guidance to determine whether the District complied with its obligations to implement the Student's IEP, follow required procedural safeguards, and ensure the continued provision of a free appropriate public education.

Allegation 1 - Failure to Implement the Student's IEP and Behavioral Intervention Plan

The Individuals with Disabilities Education Act (IDEA) guarantees that all eligible students with disabilities are entitled to a free appropriate public education (FAPE). FAPE consists of special education and related services that are provided at public expense, under public supervision and direction, without charge, meet the standards of the State educational agency, and are provided in conformity with the student's individualized education program. 20 U.S.C. § 1401(9)(D); 34 C.F.R. § 300.17(d). Louisiana mirrors this requirement, defining FAPE as special education and related services that "are provided in conformity with an Individualized Education Program (IEP) that meets the requirements of §§ 320 through 324." Bulletin 1706 §905.

Once an IEP is developed, the local educational agency (LEA) must ensure that it is implemented as written. Each teacher, related service provider, and other staff member responsible for the student's education must be informed of their specific responsibilities for implementing the IEP and the accommodations, modifications, and supports it requires. Bulletin 1706 §323(D). A district's failure to implement an IEP constitutes a procedural violation; however, not every deviation results in a denial of FAPE. The Fifth Circuit has held that the IDEA "does not require perfect adherence" but a good-faith effort to assist the student in achieving the IEP's objectives. *Houston Independent School District v. Bobby R.*, 200 F.3d 341, 349 (5th Cir. 2000). A violation becomes substantive—and therefore a denial of FAPE—when the failure to implement the IEP is material, meaning that the services actually provided differ in more than a minor or technical way from those required by the IEP, resulting in a loss of educational opportunity or a deprivation of meaningful educational benefit.

Issue 1: Implementation of the IEP and BIP – November 6, 2024 Incident

The Student's IEP in effect on November 6, 2024, required the provision of assistance and cues during transitions between classes, lockers, and home. It also stated that the Student required behavioral supports in all campus settings and that "an extra adult is needed to assist with behavior management in all general education classes."

The record establishes that the incident leading to the Student's suspension occurred during an unstructured transition between classes when the Student was not accompanied by a paraprofessional or other assigned staff member. The District acknowledged that a substitute paraprofessional was not present at that time. This omission represented a failure to implement a required IEP support—transition assistance.

The IEP Team met shortly thereafter to address the implementation concern, reaffirming the requirement for paraprofessional support during transitions and obtaining written acknowledgment from staff confirming receipt and understanding of their IEP responsibilities. These corrective actions ensured that all personnel responsible for implementing the Student's services were properly informed going forward.

Based on this record, the Department finds that the District did not fully implement the Student's IEP on November 6, 2024, when the Student was unsupervised during transition, contrary to the IEP's provisions. This constituted a procedural violation of Bulletin 1706 §323(D). However, because the District promptly corrected the failure and there is no evidence of ongoing noncompliance or loss of educational benefit, the violation did not result in a denial of FAPE. Accordingly, Allegation 1 is substantiated in part as it relates to the November 6, 2024 incident.

Issue 2: Implementation of the IEP and BIP – Subsequent Period (February–April 2025)

The Parent alleged that subsequent events between February and April 2025—including the Student's participation in a cooking activity, an off-campus trip, and a law enforcement incident—demonstrated continued failures to implement the Student's IEP and BIP.

The record indicates that on February 21, 2025, the Student participated in an on-campus cooking activity under teacher supervision, and on March 20, 2025, in a class trip to a local restaurant. Although neither activity was explicitly described in the IEP or BIP as an instructional or transition activity, both were consistent with classroom-based vocational and life-skills instruction typical of the Student's program. The Department finds no evidence that these activities represented a failure to implement the IEP or deprived the Student of required supports.

A law enforcement report dated March 20, 2025, described an altercation that began in the gym and continued during transition to class. The Department makes no findings regarding the underlying conduct but notes that the setting was similar to those previously identified in the IEP and BIP as high-risk for behavioral escalation. The record contains no evidence, however, that IEP services or supports were omitted at that time or that the event reflected a continuing failure of implementation.

Based on the available evidence, the Department finds insufficient grounds to conclude that the District materially failed to implement the Student's IEP or BIP after November 2024 or that the Student was denied FAPE as a result. Accordingly, Allegation 1 is unsubstantiated for the period of February–April 2025.

Allegation 2 - Failure to Follow Procedural Safeguards in Connection with Disciplinary Removals and IEP Team Meetings

Issue 1: Disciplinary Removals and Manifestation Determinations

Within ten school days of any decision to change the placement of a student with a disability due to disciplinary conduct, the LEA, the parent, and relevant members of the IEP Team must determine: (1) whether the conduct in question was caused by, or had a direct and substantial relationship to, the student's disability; or (2) whether the conduct was the direct result of the LEA's failure to implement the IEP. Bulletin 1706 §530(E). If the team determines that the conduct was the direct result of a failure to implement the IEP, the LEA must take immediate steps to remedy the deficiency and return the student to the placement from which they were removed. Bulletin 1706 §530(E)(3).

For short-term removals of ten consecutive school days or fewer, school personnel may remove a student with a disability who violates the student code of conduct. Bulletin 1706 §530(B). During such removals, educational services are not required unless the removal constitutes a change of placement or the student has been removed for more than ten cumulative school days during the school year. Bulletin 1706 §530(D)(3). When the manifestation determination team concludes that a student's conduct was directly related to a failure to implement the IEP, the appropriate remedy is immediate correction of the implementation failure and the student's return to the prior placement. The IEP Team must then review and, if necessary, revise the IEP and BIP to ensure that the required supports and services are properly provided going forward.

Following the November 6, 2024 disciplinary incident, the Student was suspended for two days (November 7–8, 2024). The District issued Prior Written Notice on November 7, 2024, scheduling a Manifestation Determination Review (MDR) for November 12, 2024. Documentation confirms that the meeting occurred as scheduled, within the ten-school-day requirement of Bulletin 1706 §530(E).

The MDR team determined that the behavior was the direct result of the District’s failure to implement the IEP, specifically noting, “it has been determined to be a failure on the part of the local educational agency.” Consistent with Bulletin 1706 §530(E)(3), the team returned the Student to ■ prior placement, and the District took immediate steps to address the implementation deficiency. The IEP and BIP were revised the same day to reinforce the need for adult assistance during transitions and to ensure all staff were informed of their responsibilities. Staff signatures dated November 15, 2024, confirm receipt of and accountability for implementing the updated plans.

The two-day suspension did not exceed the ten-day threshold that triggers the provision of educational services under Bulletin 1706 §530(D)(3), and the record does not indicate any additional removals constituting a change in placement.

Accordingly, the District complied with the procedural safeguards governing disciplinary removals and manifestation determinations. The MDR was timely, included appropriate participants, addressed the required determinations, and resulted in immediate corrective action. No procedural or substantive violation was identified. Allegation 2 is therefore unsubstantiated with respect to disciplinary safeguards and manifestation determination procedures.

Issue 2: August 2025 IEP Meetings, Parental Participation, and Prior Written Notice

Parents must be afforded the opportunity to participate in meetings concerning the identification, evaluation, educational placement, and provision of services for their child. Bulletin 1706 §322(A). The LEA must take affirmative steps to ensure that parents are present at each IEP meeting or have the opportunity to participate, including providing timely notice and scheduling meetings at a mutually agreed-upon time and place. Parents may participate in person, by telephone, or through other alternative means. Bulletin 1706 §328.

Public agencies must also issue prior written notice within a reasonable time, and not less than ten days, before proposing or refusing to initiate or change a student’s identification, evaluation, educational placement, or provision of FAPE. Bulletin 1706 §504(A). Each notice must describe the proposed or refused action, explain the reasons for the decision, identify the data or reports relied upon, outline any alternatives considered and reasons for their rejection, and inform parents of their procedural safeguards and available resources. Bulletin 1706 §504(B).

The Parent alleged that ■ was not provided adequate prior written notice and was denied meaningful participation during the August 2025 IEP process.

The record reflects that the District convened IEP meetings on August 4, 19, and 22, 2025, to discuss the Student’s academic placement for the 2025–2026 school year and the impact of revisions to the Bulletin 1530 alternate assessment criteria. Each meeting was preceded by a PWN and followed by a post-meeting notice documenting the discussion, the Parent’s input, and the District’s decisions or deferred actions.

The August 4 and 19, 2025 PWNs identified the meeting purpose as “develop, review, or amend an IEP and determine placement.” Although the reevaluation option was not checked, the post-meeting documentation shows that the team discussed the state’s updated alternate assessment criteria and the District’s proposal to conduct additional cognitive testing to determine continued eligibility. The Parent declined consent for testing

at both meetings, requesting additional time to review the information and consider placement options. The team agreed to reconvene on August 22, 2025.

The August 22, 2025 meeting PWN listed both IEP review and reevaluation as purposes. At that meeting, the Parent consented to the proposed reevaluation. The team also discussed safety concerns and agreed upon safeguards for the Student's return, including specialized instruction in a self-contained setting for core academics, paraprofessional assistance in electives and during transitions, and a structured supervision plan for lunch and restroom breaks.

The Parent later asserted that the Student's special education teacher was not present during the August 4 and 19 meetings. District documentation lists the teacher as participating by telephone on August 4 and by videoconference on August 19. Participation through such alternative means is permissible under Bulletin 1706 §328, provided the parent can meaningfully engage—which the record indicates occurred here.

Each PWN and post-meeting notice satisfied the requirements of Bulletin 1706 §504(B) by identifying the proposed and refused actions, the rationale for each decision, the options considered, and the supporting information. The documentation further reflects a collaborative discussion of multiple placement options, including on-campus, hybrid, and virtual learning models, and shows that the Parent's preferences and concerns were incorporated into the final IEP.

Accordingly, the District complied with the procedural safeguards governing parental participation, prior written notice, and reevaluation procedures. Allegation 2 is unsubstantiated as it pertains to the August 2025 IEP meetings and related procedural safeguards

V. Corrective Action

To ensure future compliance, the District is directed to take the following corrective actions:

1. Within 120 calendar days of the issuance of this decision, the District shall provide documentation to the Department demonstrating that staff responsible for implementing IEPs—including paraprofessionals, substitutes, and classroom teachers—have received training or written guidance on their obligations under Bulletin 1706 §323(D) to be informed of, and carry out, the specific services, accommodations, and supports contained in each student's IEP.

Re: Findings-Decisions in Special Education Formal Complaint No. **56-C-07** on behalf of [REDACTED]

I. Introduction

On August 14, 2025, the Louisiana Department of Education (“Department”) received a formal complaint from the complainant (“Parent”), on behalf of a minor child (“Student”) enrolled in a school under the jurisdiction of St. Landry Parish Schools System (“District”). The Parent requested that the Department initiate an investigation pursuant to Louisiana Bulletin 1706 §§ 151–153.

II. Statement of the Case

In the complaint, the Parents allege that the District violated the Individuals with Disabilities Education Act (“IDEA”), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department’s implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Parent alleges that the District:

1. Improper attempt to change the student’s placement without convening an IEP team meeting and ensuring meaningful parental participation.
2. Improper determination of placement based on program capacity and/or administrative convenience rather than the individual needs of the student.
3. Failure to consider or provide 1:1 paraprofessional support following multiple parental requests and documented behavioral concerns.

As the Department’s assigned investigator, I have reviewed the complaint, the District’s written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 §152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The

Department received the complaint on August 14, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between August 15, 2023, and August 14, 2025.

III. Findings of Fact

The Student is a [REDACTED] child identified as a student with a disability under the eligibility category of Intellectual Disability–Moderate, with an additional [REDACTED]

During the 2024–2025 school year, the Student received special education and related services as a [REDACTED] student in accordance with an individualized education program (IEP) developed on October 11, 2024. Under that IEP, the Student received specialized instruction, speech therapy, occupational therapy, and adaptive physical education. The Student also participated in regular education classes for Social Studies, Science, and Physical Education with paraprofessional assistance. The IEP reflected placement inside the regular education classroom for less than forty percent of the school day, based on the Student’s need for individualized and small-group instruction with support from both the special education teacher and paraprofessional. The October 2024 IEP remained in effect at the beginning of the 2025–2026 school year.

For the 2025–2026 school year, the Student [REDACTED]. The Student’s assigned classroom included a special education teacher and two paraprofessionals. According to the District’s program structure, the elementary Exceptional Student Services (ESS) teacher serves grades one through four, while the middle school ESS teacher serves grades five through eight. According to the Parent, the Student had been instructed by the same teacher since kindergarten.

District documentation shows that on July 8, 2025, the Pupil Appraisal Center distributed finalized class rosters and paraprofessional assignments to school administrators for the upcoming school year. [REDACTED]

According to the Parent, she visited the school on August 7, 2025, to speak with the Student’s previous teacher about preparations for the new school year. During this visit, she learned that the Student had been assigned to a different teacher’s classroom [REDACTED]. The following morning, August 8, 2025, the Parent and her husband accompanied the Student to school. The Parent reports that the Student became distressed and refused to enter [REDACTED] new classroom, stating [REDACTED] wanted to remain with [REDACTED] previous teacher.

According to a school administrator, the Parent, the Student, and the Student’s father went to the previous teacher’s classroom without signing in at the front office. The administrator reported that she entered the room to escort the Student to [REDACTED] class and explained that the previous teacher did not teach [REDACTED]

District records show that Prior Notice was sent to the Parent on August 18, 2025, proposing to convene an IEP Team meeting to review the Student’s annual IEP and discuss placement for the 2025–2026 school year. After the Parent requested clarification and a revised notice, a second Prior Written Notice dated August 21, 2025, was issued, identifying the meeting’s purpose as developing, reviewing, or amending the IEP and determining placement, as well as discussing possible eligibility for Louisiana’s alternate assessment, LEAP Connect/LAA 1. The notice advised that the Parent would be an equal participant in the IEP process and confirmed her receipt of the Louisiana Educational Rights of Children with Disabilities. The Parent signed and returned the notice on August 26, 2025, indicating her intent to attend the meeting with an advocate and consenting to the excusal of two related service providers.

The IEP Team meeting was convened on August 28, 2025, as scheduled. Participants included the officially designated representative, regular and special education teachers, the pupil appraisal representative, the assistant principal, related service providers, and the Parent. The IEP indicated that the Team agreed to utilize a

daily communication plan to keep the Parent informed. The IEP also documented the Parent's concerns regarding the Student's safety and new special education teacher. The Student's placement remained inside the regular education classroom for less than forty percent of the school day. In addition, the Student continued to participate with grade-level peers in regular education classes for Social Studies, Science, and Physical Education with paraprofessional assistance.

IV. Conclusions of Law

Allegations 1 and 2 – Placement and Parental Participation

Under Bulletin 1706 §116(A)(1), a student's educational placement must be determined by a group that includes the parent and individuals knowledgeable about the student, evaluation data, and available placement options. The placement decision must be based on the student's IEP, reviewed at least annually, and made in conformity with the least restrictive environment (LRE) requirements. Educational placement refers to the type of educational program and the extent of participation with nondisabled peers. Pursuant to §114(A)(2), students with disabilities must be educated with nondisabled peers to the maximum extent appropriate, and removal from the regular education environment may occur only when education in regular classes with supplementary aids and services cannot be achieved satisfactorily. Bulletin 1706 §§322(A)–(B) further require that parents be afforded meaningful opportunity to participate in IEP Team meetings through timely notice identifying the purpose, time, location, and expected participants. Before proposing or refusing to initiate or change a student's identification, evaluation, placement, or provision of FAPE, a district must issue prior written notice consistent with §504.

The Parent alleges that the District improperly attempted to change the Student's educational placement without convening an IEP Team meeting or ensuring meaningful parental participation, and that the placement determination was made for administrative convenience rather than based on the Student's individual needs. The Parent further contends that the Student should have remained with her previous special education teacher, with whom she had developed a long-standing and positive relationship.

The record establishes that at the start of the 2025–2026 school year, the Student [REDACTED]

[REDACTED] The elementary ESS teacher serves grades one through four, while the middle school ESS teacher provides instruction for the upper grades with two paraprofessionals supporting both enrolled students. This configuration complies with Bulletin 1530 §127, which prohibits an age span greater than three years within a special education class unless specifically approved by BESE. The assignment did not alter the Student's type or level of special education instruction, related services, or least restrictive environment. Rather, it reflected the Student's normal grade progression and alignment with the District's established program configuration. The Student continued to receive services in conformity with her existing IEP, and there is no evidence that administrative convenience, rather than educational need, motivated the decision.

Regarding the Parent's preference that the Student remain with her previous teacher, Bulletin 1706 does not grant parents the right to select or dictate specific teacher assignments. Parental participation extends to determining the student's educational placement—the type of program and the extent of participation with nondisabled peers—but not to the selection of particular staff members. Teacher assignments fall within the District's administrative discretion, provided the Student's IEP is implemented by appropriately certified and trained personnel. Therefore, the District's actions did not constitute a change in educational placement under Bulletin 1706 §116, nor were they based on administrative convenience.

The record further shows that the District issued a prior written notice dated August 21, 2025, proposing to convene an IEP meeting to develop, review, or amend the IEP and determine placement based on the Student's

needs. The notice identified the meeting's date, time, location, and purpose, listed expected participants, and informed the Parent of her right to participate and bring an advocate. The Parent attended the meeting, shared concerns regarding the Student's new special education teacher, and participated in decisions regarding the Student's educational program. These actions demonstrate compliance with Bulletin 1706 §§322 and 504 and confirm that the Parent was afforded meaningful opportunity for participation. The record also does not establish denial of meaningful parental participation.

Accordingly, Allegations 1 and 2 are unsubstantiated.

Allegation 3 – Paraprofessional Support

Under Bulletin 1706 §320(A)(4), each student's IEP must specify the special education, related services, and supplementary aids and services necessary to enable the student to advance appropriately toward annual goals, be involved in and make progress in the general education curriculum, and be educated with nondisabled peers to the maximum extent appropriate. In developing the IEP, the IEP Team must consider the student's strengths, the parents' concerns, and the academic, developmental, and functional needs of the student consistent with Bulletin 1706 §324(A)(1). When a student requires assistance to implement IEP goals, the provision of paraprofessional or other adult support constitutes a supplementary aid or service.

The Parent further alleges that the District failed to consider or provide one-to-one paraprofessional support despite multiple parental requests and behavioral concerns.

The record reflects that the Student's IEP includes paraprofessional assistance as part of her specialized instruction and general education supports. Two paraprofessionals are assigned to the classroom in which the Student receives specialized instruction, providing assistance under the supervision of the Student's special education teacher. In addition, the Student also receive paraprofessional assistance in the general education environment with peers in Science, Social Studies, and Physical Education. Accordingly, the record does not support a finding that the District failed to consider or provide appropriate paraprofessional support or that the IEP Team disregarded the Parent's requests. Allegation 3 is unsubstantiated.

V. Corrective Action

The Department determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required.

Re: Findings-Decision in State Special Education Formal Complaint No. **56-C-08** on behalf of [REDACTED]

I. Introduction

On August 19, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") on behalf of [REDACTED] child ("Student"), who is enrolled in a school under the jurisdiction of the NOLA Charter Schools ("District"). The parent requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153.

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the parent alleges the District:

1. Failed to convene an IEP Team meeting upon the Student's transfer into the District and,
2. Failed to implement the Student's IEP.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on August 19, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between August 20, 2023, and August 19, 2025.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and receiving special education under the classification of Developmental Delay. Previous to the Student's enrollment into a Type 3 District charter school, the Student attended preschool within the NOLA Public School district. The Student's IEP provided for thirty minutes of speech/language therapy per week in the special education setting. Due to the Student's particular medical diagnosis, the Student's IEP also provided for School Health and School Nurse services—upon entry into the public-school setting—specifically to assist the Student with diapering and toileting needs.

On April 29, 2025 the District began a reevaluation of the Student. The Student was subsequently registered with the Type 3 Charter school within the NOLA Public School District on May 16, 2025. After the Student's registration, but before the dissemination of the reevaluation report, an IEP meeting was held on June 10, 2025. On July 21, 2025, the reevaluation report was disseminated.

By email dated August 5, 2025, the Parent contacted the District regarding the Student's special needs and requested a meeting to discuss implementation of the Student's special education services. The Parent stated that the Student required a child specific staff member to assist with toileting needs, nursing services during the school day, and specific dietary restrictions. In a reply email dated August 8, 2025, the District attempted to arrange a phone call to obtain information about the Student's daily needs in their previous educational setting. The District advised such a conversation would allow it to better determine which parties would need to be involved in an IEP meeting that would be scheduled.

By email dated August 8, 2025, the Parent responded to the District emphasizing the previous request for an IEP team meeting and further requested email communication only regarding the Student's needs. In a reply email dated August 11, 2025, the District explained an IEP meeting would be scheduled and explained relevant IEP team members and service providers were being given time to review the evaluation report. Moreover, the District advised that in the meantime the Student's current IEP would be "honored."

The first day of school commenced on August 11, 2025. However, the Student was not present the first week of school—August 11, 2025 through August 15, 2025. By email dated August 13, 2025, the District requested the Parent provide current medical documentation and signed physician's orders before implementing a medical or toileting plan at the school. Additionally, the District provided dates to choose from in which to conduct the Student's IEP meeting. Those choices included August 25, August 26 or August 27, 2025.

The Student attended their first day of school on August 18, 2025. On that day, the District's school nurse informed the Parent, via email, that due to safety concerns related to the Student's diagnosis—in absence of medical orders from the Student's physician—the Student would need to be picked up from the school. In a reply email, the Parent disagreed and provided supporting authority. In a separate email, the Parent requested information regarding the Student's first day and the identity of the Student's teachers. The District replied in two separate, same day responses. In one email, the District provided a summary of the Student's first day and identified the Student's general and special education teachers. In the other response, the District recapitulated that the Student was not excluded from the school day and detailed the IEP required speech therapy services as well nursing services for toileting and diapering that the Student received.

On August 19, 2025, the Parent filed the complaint that formed the basis of the Department's investigation.

IV. Conclusions of Law

Allegations 1

The Parent alleges the District failed to convene an IEP Team meeting upon the Student's transfer into the District.

Under Bulletin 1706 101(A), each eligible student with a disability is entitled to a Free Appropriate Public Education (FAPE), which must include specially designed instruction and related services provided in conformity with an Individualized Education Program (IEP). Pursuant to Bulletin 1706 §323(A) each public agency shall have an IEP in effect for each student with a disability within its jurisdiction at the beginning of each school year. For students in which an initial evaluation has been conducted, Bulletin 1706 § 323 clearly defines a fixed 30 day timeline in which an IEP meeting must be conducted for a student that has been determined eligible. With respect to reevaluations of students with an existing IEP, §324(b)(1) mandates an IEP meeting is conducted to review results of any reevaluation (conducted under §304) without unreasonable delay.

The Student's previously attended preschool was located within Orleans Parish and under the jurisdiction of the NOLA Public School District. On May 16, 2025, the Student was registered with a Type 3 Charter School, located in Orleans Parish, authorized by the Orleans Parish School Board and also under the jurisdiction of NOLA Public School District. Since both the preschool and the charter school are within the District, the NOLA Public School District maintained jurisdiction over the Student at all times relevant to this complaint. The Student never transferred out of or back into the NOLA Public School District. Therefore, the District was not obligated to convene an IEP Team meeting before the beginning of the school year because (1) the Student did not "transfer" into the District and (2) the Student had an IEP in effect at the beginning of the school year.

However, the reevaluation that was conducted beginning April 29, 2025 obligated the District to conduct an IEP Team meeting to review the reevaluation report. Thus, the Department finds it necessary to determine whether the District convened an IEP meeting to review the reevaluation without unreasonable delay.

The reevaluation report was disseminated on July 21, 2025 during the District's summer break. The District's school year commenced on August 11, 2025. Shortly thereafter, the District issued prior written notice (PWN) to the Parent on August 13, 2025—within a week of the Parent's August 5th meeting request—and subsequently held the IEP meeting on August 26, 2025. The Department finds that the District convened an IEP meeting to review the reevaluation report within a reasonable amount of time. As such, allegation 1 is unsubstantiated.

Allegation 2

In the Parent's second allegation, the Parent asserts the District failed to implement the Student's IEP.

Pursuant to Bulletin 1706 §§320-324, public agencies must implement each student's IEP as written, ensuring the timely and consistent delivery of special education services, related services, accommodations, assistive technology, and supplementary aids and services necessary to ensure FAPE.

As previously established, the Student's current IEP was in effect when the Student enrolled in the District's Type 3 charter school. The Student's IEP included the Student's medical diagnosis and required the Student receive Health Services and Nurse Services to address dietary restrictions and aid in diapering and toileting upon entering traditional public school setting. The IEP did not contain a plan detailing how the diapering and toileting services were to be implemented; however, it was noted that a diapering and toileting plan

would be created at the time of the public school entrance. The District requested medical records and physician's orders from the Parent to begin creating an Individual Health Plan (IHP) that would address the Student's needs. The Parent did not provide the requested records in response to those requests in response to the requests. Instead, during the August 26th IEP meeting, the Parent executed a medical release form that would permit the District to retrieve these records directly from the physician.

While the District's request for the Parent to pick the Student on August 18, 2025 was inappropriate, the Department cannot issue a finding of a violation on this action because the Student ultimately remained at the school. Based on the submitted service logs, on that day the Student received 30 minutes of pull-out speech therapy services and was also provided assistance for ■■■■■ diapering and toileting needs as required by the IEP. The District communicated to the Parent that, in the absence of a formal IHP, the general protocol for toileting and diapering was followed.

Therefore, the Department finds the District implemented the Student's IEP and allegation 2 is unsubstantiated.

V. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations as set forth in the Louisiana Bulletin 1706 with respect to the allegations presented in this matter. Therefore, this investigation is hereby closed and no additional action is required.

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. **56-C-09**

Dear Parties:

On September 4, 2025, the Louisiana Department of Education received notification that indicated that parties to this formal complaint reached a mutually agreeable resolution and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint **56-C-09**. No further action is required by either party.

Re: Findings-Decision in State Special Education Formal Complaint No. **56-C-11** on behalf [REDACTED]

I. Introduction

On August 28, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") on behalf of [REDACTED] child ("Student"), who is enrolled in a school under the jurisdiction of the Rapides Parish Public School ("District"). The parent requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153.

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Whether the District failed to implement the student's Individualized Education Program in regards to special education transportation and
2. Whether the District failed to conduct an evaluation of the student upon the parent's request

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on August 28, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between August 29, 2023, and August 28, 2025.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and receiving special education and related services under the classification of Developmental Delay. The Student began the 2025-26 school year in a District school with an existing IEP dated March 1, 2024, which required the delivery of speech and occupational therapy in a special education setting as well special transportation due to the Student's disability.

By email dated August 12, 2025, the Parent reached out to the District with concerns related to the Student's enrollment and IEP status including an upcoming IEP meeting. In a series of reply emails dated August 13, 2025, the District communicated with Parent identifying possible dates for an IEP meeting. A parental notification letter dated August 18, 2025 was issued to the Parent.

On August 20, 2025, the District convened an IEP meeting. At this meeting the Parent expressed concerns regarding the Student's history of elopement, frequent behavioral episodes and the inability to follow verbal directions. In the course of the meeting, the Student's transportation safety was discussed. The District advised the Parent that the Student continued to qualify for special transportation services and assured the Parent that special transportation services would be coordinated for the bus to pick the Student up from their home and drop the Student off at home each school day. During the course of the discussion, the IEP Team discussed the use of a 5-point harness on the special transportation bus that could be made available to the Student. Ultimately, the IEP Team agreed to not make any changes to the transportation plan to give the Student time to see how the Student behaved.

The District then reviewed the Notice of Proposed Refusal of Action (NPRA) with the Parent explaining the Parent's options to (1) take 10 days to review the IEP prior to signing the NPRA or (2) waive the 10-day period by providing their signature to allow the Student to begin attending school and receive the services as written in the IEP. The Parent confirmed they wanted the Student to immediately receive services and subsequently signed the NPRA. A copy of the NPRA and the IEP was then provided to the Parent.

By email dated August 22, 2025, the Parent advised they were concerned that the Student was struggling and requested a "full reevaluation" of the Student to see how the Student was doing currently in "all areas". The District forwarded the Parent's request to the evaluator that same day and subsequently forwarded the Parent's contact information by email on August 27, 2025. Within the next week, the District reached out to the Parent to schedule a meeting to obtain consent for the reevaluation. Parent signed consent for reevaluation on September 8, 2025.

Meanwhile, on the morning of August 26, 2025, the Student boarded the special transportation bus. A short time thereafter, the bus driver placed a telephone call to the Parent to report that the Student had not stayed seated on the bus, had fallen and entered into a behavioral episode. Out of concern, the Parent picked the Student up from the school and—having observed fresh bruises on the Student—sought a medical evaluation. Following this incident that same day, the District installed a 5-point harness on to the bus. On August 27, 2025, the District provided training on the use of the harness to the Student's assigned paraprofessional as well as the bus driver. That afternoon the District contacted the Parent by telephone to notify the Parent that a harness was installed and ready for use. Two additional communications dated August 28th, 2025 were issued to the Parent confirming the harness was installed, training had been provided and the bus transportation with a 5-point harness was available to the Student. In a same day reply email, the Parent provided the District with an audio recording of the August 20th IEP meeting directing the District's attention to the IEP Team's discussion regarding the Parent's concerns with respect to elopement and behavior as well as the availability of a harness on the special transportation bus. Parent maintained that the District stated that the Student would be put in a harness.

On August 28, 2025, the Parent filed the complaint that formed the basis of the Department's investigation.

IV. Conclusions of Law

Allegations 1

The Parent alleges the District failed to implement the Student's Individualized Education Program in regards to special education transportation.

Under the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1412(a)(1), and Louisiana's implementing state regulations at Bulletin 1706 §§101 and 320–324, each public agency must provide a free appropriate public

education (“FAPE”) to eligible students with disabilities in conformity with an appropriately developed individualized education program (“IEP”). Each public agency shall have an IEP in effect for each student with a disability within its jurisdiction at the beginning of each school year. Additionally, Districts are required to ensure that all special education and related services—including special transportation—are delivered as specified in the effective IEP.

Following the Parent’s August 12, 2025 email concerning the Student’s enrollment and IEP status, the District immediately communicated possible dates for a review IEP meeting, issued the August 18th notice letter and subsequently convened an IEP meeting on August 20, 2025.

An audio recording of the meeting supports the Parent’s argument that their concerns related to the Student’s dietary challenges, behavioral and elopement issues as well as the Student’s necessary special transportation needs were explicitly conveyed. Specifically with respect to the special transportation services, the recording reflects that the District remarked that a paraprofessional would be present on the bus and the bus could be equipped with a harness. However, although the availability of a harness was discussed, the IEP Team only maintained the implementation of the paraprofessional and did not include the requirement of a 5-point harness. The Parent waived the 10 day waiting period at the meeting’s conclusion when they signed the NPRA, and thus, the IEP—as written—became effective that day. The record is absent of any evidence that the Parent objected to the transportation plan prior to the August 26, 2025 incident.

The August 2025 IEP was in effect the day of the incident on the bus—August 26, 2025. The record reflects the Student’s paraprofessional was present on the bus as the IEP required. It should be noted that while the District immediately installed a 5-point harness and subsequently trained the bus driver and paraprofessional in its use, it was under no present obligation to do so because the IEP did not currently require its use. Before the District can implement the use of the 5-point harness, the Student’s IEP must be amended to reflect the scope of special transportation services to add the harness to the transportation plan.

Therefore, the Department finds the District implemented the Student’s IEP and allegation 1 is unsubstantiated.

Allegation 2

At the time of the filing of this formal complaint, the Parent alleged that the District had not responded to their request for a reevaluation of the Student and therefore, failed to conduct an evaluation of the student upon the Parent’s request.

Reevaluations of students with a disability must be conducted in accordance with Bulletin 1706 §§ 305-308 if (1) the public agency determines that the educational or related services needs of the student warrant a reevaluation or (2) the Student’s parent or teacher requests a reevaluation. 1706 § 301(c) mandates that parental consent is obtained prior to conducting any reevaluation of a student with a disability. Further, 1706 § 504 requires prior written notice (PWN) given to the parents of the student within a reasonable amount of time, and no less than 10 days, before the public agency proposes or refuses to initiate or change in the student’s identification, evaluation or educational placement.

The record reflects the District immediately communicated the Parent’s August 22, 2025 request to the evaluator the same day it was received and forwarded contact information to the evaluator within a week of the request. On September 8, 2025, within 10 business days, the evaluator met with the Parent and obtained consent to commence the evaluation. The PWN issued at the September meeting reflected that a reevaluation would begin and a meeting to review the reevaluation report was scheduled for October 20, 2025.

Based on the record, the Department finds the District responded to the request, initiated a reevaluation and issued PWN to the Parent within 10 business days. As such, allegation 2 is unsubstantiated.

V. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department’s implementing regulations as set forth in the Louisiana Bulletin

1706 with respect to the allegations presented in this matter. Therefore, this investigation is hereby closed and no additional action is required.

Sincerely,

A handwritten signature in blue ink, appearing to read "L. Dupree".

RE: Reconsideration of Special Education Formal Complaint No. 56-C-11

Dear Parties:

On October 27, 2025, the Louisiana Department of Education (“the Department”) issued a Findings–Decision Letter resolving the Special Education Formal Complaint Investigation Request filed on August 26, 2025, by [REDACTED] (“the Parent”) against the Rapides Parish School Board (“the District”) on behalf of [REDACTED] minor child (“the Student”). The Parent’s complaint alleged that the District (1) failed to implement the Student’s Individualized Education Program (IEP) with respect to special education transportation and (2) failed to conduct an evaluation upon the Parent’s request. Following its investigation, and pursuant to Bulletin 1706 §153(E), the Department determined that each allegation was unsubstantiated.

On November 6, 2025, the Parent submitted a timely request for reconsideration pursuant to Bulletin 1706 §153(I), asserting that the complaint investigator erred in the findings of fact and conclusions of law. Specifically, the Parent asserted that the investigator failed to properly weigh discussions regarding harness use at the August 20, 2025 IEP meeting, improperly conflated a general bus attendant with a student-specific paraprofessional, omitted findings regarding alleged ongoing transportation safety risks and access to bus video, and failed to address compensatory speech therapy.

Scope of Reconsideration

Per Bulletin 1706 §153(I), reconsideration is limited to a review of whether the complaint investigator committed an error of fact or clearly misapplied the law, based only on information submitted during the original complaint investigation. Matters not alleged in the original complaint fall outside the permissible scope of reconsideration and are not subject to review.

Issues Beyond the Scope of Reconsideration

The reconsideration request asserts that the Department failed to address an alleged denial of access to bus video as an education record and failed to make additional findings regarding transportation safety. However, a review of the original complaint reflects that the Parent requested access to bus video and additional safety measures as proposed remedies following the transportation incident, not as alleged violations of procedural safeguards. As such, the Department did not investigate or make findings regarding a records-access violation in its original decision, and these issues are not subject to reconsideration.

The Parent also raises claims related to speech-language therapy shortages and compensatory services. The original complaint did not allege a failure to provide speech-language services or entitlement to compensatory education. As new allegations, they are not eligible for reconsideration review under Bulletin 1706 §153(I).

Issues Subject to Reconsideration

The reconsideration panel limits its review to the Parent's claims that the Department erred in finding no violation regarding the implementation of special education transportation services, particularly with respect to harness use and paraprofessional support on the bus.

In its original decision, the Department found that the District convened an IEP meeting on August 20, 2025 at which the Student's transportation safety was discussed. The District advised the Parent that the Student continued to qualify for special transportation services, which would be coordinated for daily home-to-school transportation. During the meeting, the IEP Team discussed the availability of a five-point harness on the special transportation bus; however, the IEP Team agreed to maintain the existing transportation plan and not to require use of a harness in order to allow time to observe the Student's behavior.

In resolving Allegation 1, the Department determined that an audio recording of the August 20, 2025 IEP meeting confirmed that the Parent's transportation-related concerns were conveyed and that the District stated a paraprofessional would be present on the bus and that a harness could be available. The Department further found that the Parent waived the ten-day waiting period by signing the Notice of Proposal or Refusal for Action, that the IEP became effective on August 20, 2025, and that the Student's paraprofessional was present on the bus as required by the IEP. Although the District later installed a five-point harness and trained staff in its use, the Department concluded that the District was not obligated to do so absent an amendment to the IEP and therefore determined that Allegation 1 was unsubstantiated.

On reconsideration, the panel reviewed the audio recording of the August 20, 2025 IEP meeting and the written IEP, both part of the original investigative record, to determine whether the Department committed a factual or legal error. The panel finds no such error. The record reflects general discussions by District personnel regarding standard transportation practices, including the availability of a five-point harness and presence of paraprofessionals. However, these discussions did not result in an IEP Team decision to require either a harness or a student-specific paraprofessional. Pursuant to Bulletin 1706 §§320–324, special education and related services must be explicitly documented in the IEP to be enforceable. The August 20, 2025 IEP requires special transportation with a paraprofessional but does not include a harness requirement or designate a one-to-one paraprofessional.

Accordingly, the Department correctly concluded that the District implemented the Student's IEP as written. There is no evidence that the IEP Team agreed to amend the transportation supports or that the District failed to deliver services as specified.

Conclusion

The reconsideration panel affirms the October 27, 2025 decision in its entirety. This determination is final.

Re: Findings-Decisions in Special Education Formal Complaint No. **56-C-13** on behalf of [REDACTED]

I. Introduction

On September 4, 2025, the Louisiana Department of Education (“Department”) received a formal complaint from the [REDACTED] (“Complainant”), on behalf of a minor child (“Student”) enrolled in a school under the jurisdiction of the Iberia Parish School District (“District”).

II. Statement of the Case

The Complainant alleges that the District violated confidentiality provisions of the Individuals with Disabilities Education Act (IDEA) and/or the Louisiana Children with Exceptionalities Act and its regulations published in Louisiana Bulletin 1706 by disclosing personally identifiable information (PII)—specifically the foster parents’ home address—to allegedly unauthorized individuals, namely the student’s biological parents, during IEP meetings held on or about May 21, 2024, and April 9, 2025.

Although the complaint cites other statutory and regulatory frameworks—including the general application of the Family Educational Rights and Privacy Act (FERPA), child welfare laws, and Department of Children and Family Services (DCFS) policies—and seeks remedies such as disciplinary action, damages-related settlement negotiations, and policy reform, this investigation is limited strictly to the IDEA and its state implementation in Bulletin 1706. While certain provisions of FERPA have been incorporated into the IDEA regulations by reference, the Department has no authority to enforce the general provisions of FERPA or to grant relief for alleged violations of FERPA that fall outside of its implementation within IDEA, nor to investigate or grant relief under child welfare statutes or tort law.

Pursuant to Bulletin 1706 §§ 151 through 153, the Department’s state complaint procedures are expressly limited to alleged violations of Part B of the IDEA and its state implementing provisions. These include procedural and substantive violations involving the identification, evaluation, placement, or provision of a free appropriate

public education (FAPE) to students with disabilities. The state complaint system does not extend to issues arising under other legal regimes—including foster care confidentiality statutes, FERPA (except as incorporated into IDEA), tort law, or DCFS policy. The complaint process is a limited administrative mechanism designed to safeguard the educational rights of children with disabilities. It is not a general-purpose enforcement vehicle for all laws tangentially related to students or education.

Nothing in this decision should be construed to validate the broader factual assertions, legal interpretations, or requested remedies of the Complainant beyond the narrow issue addressed herein: whether the District violated IDEA's confidentiality provisions in its disclosure of the student's educational records.

The findings of fact and conclusions of law contained herein are based upon a review of the materials submitted during the course of the investigation. Louisiana Bulletin 1706 § 152(C) states a complaint "shall allege a violation that occurred not more than two years prior to the date that the complaint is received in accordance with §§ 151 through 153." Therefore, the investigation was limited to alleged violations that occurred between September 3, 2023, and September 4, 2025.

III. Findings of Fact

The student at issue is a child with a disability eligible to receive special education and related services under the Individuals with Disabilities Education Act. At all times relevant to the complaint, the student was in the custody of the Louisiana Department of Children and Family Services (DCFS) and placed in the care of foster parents.

Two Individualized Education Program (IEP) team meetings occurred during the relevant time period: the first on May 21, 2024, for the purpose of developing an initial IEP following an evaluation conducted pursuant to Bulletin 1508, and the second on April 9, 2025, for the purpose of IEP review and revision.

On May 6, 2024, the District issued a Prior Written Notice of Proposed Action to DCFS and the foster parents. This notice included the home address of the foster parents. Prior to the May 21, 2024, IEP meeting, DCFS informed the District that the parents might be in attendance. The District sought clarification, and DCFS confirmed that the biological parents would attend. The meeting was attended by District staff, the DCFS caseworker, the student's foster parents, and the student's biological parents. According to statements from District personnel, the student's evaluation report, which included the home address of the foster parents, was shared with meeting participants, including the biological parents.

On April 9, 2025, the student's IEP Team convened again to conduct a review and revision of the IEP. Present at this meeting were District staff, the DCFS caseworker, the student's foster parents, and the student's biological parents. In connection with the April 2025 IEP meeting, the District provided a Prior Written Notice of Proposed Action to DCFS and the foster parents. This notice included the foster parents' home address. According to District personnel, only the DCFS caseworker and the foster parents were provided copies of the revised IEP. District personnel reported that the IEP itself did not contain the foster parents' address.

The complaint that forms the basis of this decision was filed on September 4, 2025. It alleges that the District improperly disclosed the foster parents' address in the student's education record to the student's biological parents in violation of IDEA, FERPA, Louisiana child welfare confidentiality laws, and DCFS policy. The complaint further alleges that these disclosures caused emotional distress and safety concerns, referencing a protective order issued in August 2025 listing DCFS as petitioner on behalf of the student. The protective order referenced in the complaint was not in effect at the time of either the May 21, 2024, or April 9, 2025, IEP meetings. No evidence was provided to establish that, prior to or during the relevant meetings, any legal limitation existed on the biological parents' access to educational records or participation in IEP meetings.

IV. Conclusions of Law

Under IDEA and its implementing regulations at 34 C.F.R. §§ 300.610–300.626, and corresponding state provisions in Bulletin 1706 §§ 123 and 611 through 626, public agencies must ensure the confidentiality of personally identifiable information (PII) collected, used, or maintained in the provision of special education. Specifically, 34 C.F.R. § 300.623(a) and Bulletin 1706 § 623(A) mandate that participating agencies protect PII at the stages of collection, storage, disclosure, and destruction.

Personally identifiable information is defined under 34 C.F.R. § 300.32 and Bulletin 1706 to include a student’s name, address, and other data that would make the student's identity easily traceable. The disclosure of such data to unauthorized individuals may constitute a breach of IDEA confidentiality protections.

The IDEA defines “parent” at 34 C.F.R. § 300.30 and Bulletin 1706 § 905 to include a biological or adoptive parent, a foster parent, a legal guardian, an individual acting in the place of a parent with whom the child resides, or a surrogate parent. While foster parents are explicitly included in the definition of “parent,” both federal and state regulations impose a presumption that a biological or adoptive parent is the parent under IDEA unless that individual does not have legal authority to make educational decisions. This presumption may be overcome if a judicial decree or order designates another individual to act as the parent or to make educational decisions on behalf of the student. In that event, the decree controls. See 34 C.F.R. § 300.30(b)(2); Bulletin 1706 § 905.

In this case, DCFS expressly notified the District of the parents’ attendance for at least one of the meetings, and DCFS participated in both meetings with the biological parents. No documentation was provided during the course of this investigation to indicate that the educational rights of the student’s biological parents had been terminated or limited at the time of either the May 21, 2024, or April 9, 2025, IEP meetings. Accordingly, the biological parents were legally recognized as “parents” under IDEA and entitled to access the student’s educational records and participate in special education decision-making. Because the biological parents were not barred from accessing educational records or participating in IEP proceedings and were entitled under IDEA to receive information concerning their child's identification, evaluation, and placement, their receipt of educational records containing the student’s information does not, in and of itself, constitute a violation of IDEA’s confidentiality protections.

Based upon the available information, the undersigned finds that the District did not violate the Individuals with Disabilities Education Act and/or the Louisiana Children with Exceptionalities Act and its regulations published in Louisiana Bulletin 1706 in its handling of education records related to the student. Allegation 1 is unsubstantiated.

V. Conclusion

This decision resolves the sole allegation properly before the Louisiana Department of Education under the IDEA state complaint process—whether the District violated IDEA’s confidentiality provisions by disclosing personally identifiable information. Based on the information available, the student’s biological parents were legal “parents” under IDEA at the time of both IEP meetings and were therefore entitled to access the student’s education records. Accordingly, no violation of IDEA or Bulletin 1706 has been substantiated, and no corrective action is required. The complaint is closed.

To the extent the complainants seek relief under FERPA (beyond its incorporation into IDEA), Louisiana confidentiality statutes, DCFS policy, or any form of personal or injunctive remedy, those matters fall outside the jurisdiction of this process. The Louisiana Department of Education’s authority under 34 C.F.R. § 300.153 and Bulletin 1706 §§ 151–153 is limited to resolving violations of IDEA and its implementing state regulations.

Re: Findings-Decision in State Special Education Formal Complaint No. **56-C-14** on behalf of [REDACTED]

I. Introduction

On September 10, 2025, the complainant ("Parent 1") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") on behalf of [REDACTED] child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the West Baton Rouge Parish Public School ("District"). The parent requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153.

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Whether the District failed to provide the parent a reasonable opportunity to participate in educational decisions;
2. Whether the District failed to have the appropriate team members present at the August 2024 IEP team meeting; and,
3. Whether the District failed to provide Prior Written Notice (PWN) prior to proposing or refusing any changes to the student's educational program.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on September 10, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between September 11, 2023, and September 10, 2025.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and receiving special education and related services including speech and occupational therapy under the classification of Developmental Delay. During the timeframe relevant to this complaint, the Student physically resided with the parent of record (Parent 2), who enrolled the Student into a District school for the 2024-2025 school year on August 6, 2024. Parent 2 completed a registration form providing Parent 1's name only and indicating custody did not apply, but did place a check mark on the form indicating 'sole custody'. By letter dated October 2, 2024, the District issued to Parent 2 a notification regarding the Student's annual IEP meeting scheduled for October 14, 2024. Parent 2 signed and returned the letter indicating they would be attending the meeting. Subsequently, the meeting was held on October 14, 2024 with Parent 2 in attendance. Thereafter, the District sent home a hardcopy of the IEP to Parent 2 via the Student on October 28, 2024.

On September 10, 2025, Parent 1 filed the complaint that formed the basis of the Department's investigation.

IV. Conclusions of Law

Allegations 1, 2 & 3

1. Parental Participation

Parent 1 alleges the District failed to provide them with a reasonable opportunity to participate in educational decisions by conducting the October 2024 meeting without providing a notice of the meeting.

Bulletin 1706 § 322(A)-(B) require that parents are afforded meaningful opportunity to participate in IEP Team meetings through timely notice identifying the purpose, time, location and expected participants. 1706 § 905 defines the term 'parent', which includes the biological mother or father and any individual who has legal authority to make educational decisions for the student. As it relates to District's communications with parents and pursuant to 1706 § 905, Districts are required to follow any judicial orders regarding custody and educational authority; however, it is the responsibility of the parents of the student to provide such documentation to the District. In the absence of such judgment or order, each parent retains their right to participate in the educational decisions for the student and Districts may otherwise presume a parent has legal authority to make educational decisions for the student. Moreover, Districts are not obligated to perform a general collection of custody judgments nor are they obligated to follow any informal custody agreements or arrangements provided by the parents.

In this case, the District received a registration form from Parent 2 indicating they are a parent of the Student. Based on the record, the District was never presented with any court ordered custody agreement in affect at the time the Student was enrolled nor when the IEP meeting was held¹. Thus, the Department finds the District reasonably presumed Parent 2 was an appropriate parent to coordinate with in the District's efforts to provide a free appropriate public education to the Student.

The record demonstrates the District then satisfied the mandate to provide a meaningful opportunity to participate

¹ The records submitted to the Department related to custody of the Student only reflected legal proceedings in August of 2025 and were not relevant to the timeframe at issue in this complaint.

in the IEP meeting to the Student's parents when it notified Parent 2 in writing 12 days prior to the meeting. As it relates to whom the notification was issued to and received by, the District appropriately identified and notified Parent 2 of the IEP Team meeting because (1) it was only provided Parent 2's information and no contact information had been provided for Parent 1 and (2) it reasonably relied on information within the registration form that indicated custody did not apply. In the absence of a custody judgment, the District was under no further duty to determine the whereabouts of Parent 1 in its effort to provide notification and hold the meeting. The record demonstrates that Parent 2 participated in the IEP meeting, provided comment and included their signature at the conclusion of the meeting.

Thus, the Department finds allegation 1 is unsubstantiated.

2. IEP Team Composition

Parent 1 alleges the District failed to have the appropriate members of the IEP team present at the October 2024 IEP Team meeting because Parent 1 was not present. Louisiana Bulletin 1706 § 321(A) states that an IEP Team shall consist of one or both parents of the student, at least one regular education teacher of the student, at least one special education teacher or service provider of the student, an official representative of the local educational agency, an individual who can interpret evaluation results, others who are invited at the discretion of the parent or local educational agency, and the student when appropriate.

Although permitted, the IDEA does not mandate the attendance of both parents to an IEP meeting, but only the presence of at least one. The Department finds the record clearly demonstrates that the District complied with the requirements of 1706 § 321(A). Specifically, a regular education teacher, a special education teacher, speech pathologist, an official district representative and one of the Student's parents as well as the Student participated in the in-person meeting.

Therefore, the Department concludes appropriate team members were present at the Student's October 14, 2024 IEP, team meeting and allegation 2 is unsubstantiated.

3. Prior Written Notice

Parent 1 asserts that the District did not provide PWN following the October 2024 IEP. Pursuant to Bulletin 1706 § 504(A), a public agency must provide written notice to the parents of a student with a disability within a reasonable time, and no less than 10 days, before proposing or refusing to initiate or change a student's identification, evaluation, placement or provision of FAPE. The purpose of this notice is to safeguard parent's right to be informed and meaningful participation in special-education decision making.

The record reflects that while the District provided a hardcopy of the IEP to Parent 2 on October 28, 2024, it did not issue the required PWN following the IEP meeting and thus, failed to provide notice prior to the initiation of or refusal of changes to the Student's IEP. If the District had issued the PWN, such notification would have been provided to the parent of record, or Parent 2 in this case.

Ultimately, the Department finds the District failed to provide PWN as required by 1706 § 504(A) and as a result, allegation 3 is substantiated.

V. Corrective Action Plan

Corrective Action for Allegation 3: Violation of the IDEA and Bulletin 1706 § 504(A). The Department determined that the District failed to comply with applicable law concerning the procedures for issuing prior written notice. In order to address this noncompliance, the District shall implement the following corrective actions:

1. Within 60 calendar days of the date of this decision, the District shall:
 - a. review and revise its policies, procedures or practices concerning PWN(s) to ensure that such notices are issued and timely provided;
 - b. provide training—to all staff responsible for ensuring PWN is issued—concerning the requirements of law and applicable District policies and procedures;
 - c. provide a narrative summarizing compliance measures taken to correct the violation and any documentation, including any revised policies or procedures, training sign-in sheets, and training materials, demonstrating that the corrective actions have been employed.

If any of the required corrections actions have already been completed, the District shall submit documentation evidencing completion to the Department within 10 business days of this decision for review and verification.

Sincerely,

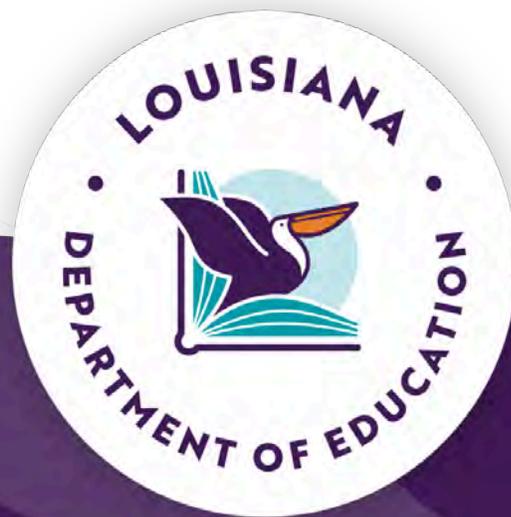

Lindsey P. Dupree, Attorney

Re: Findings-Decision in State Special Education Formal Complaint No. 56-C-15 on behalf [REDACTED]

I. Introduction

On September 11, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") on behalf of their child ("Student"), who is enrolled in a school under the jurisdiction of the Rapides Parish Public School ("District"). The parent requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153.

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

Allegations relative to IDEA:

1. Whether the District failed to provide the parent a reasonable opportunity to participate in educational decisions;
2. Whether the District failed to provide Prior Written Notice (PWN) prior to proposing or refusing any changes to the student's educational program.
3. Whether the District Failed to provide the student with access to supplementary aids and services necessary

to allow the student to be educated in the least restrictive environment.

Allegations relative to Behavioral Health Services

4. Whether the District failed to comply with the requirements of R.S. 17:173 concerning the provision of private behavioral health services during the school day;

Please note the allegations as ordered in the Department's receipt letter have been modified. Allegation 3, as labeled above, was inadvertently included under allegations relative to Behavioral Health Services and has been included in the allegations relative to the IDEA, where it was originally intended.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on September 11, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between September 12, 2023, and September 11, 2025.

Louisiana Bulletin 135 § 705(C) states a complaint "shall allege a violation that occurred not more than one year prior to the date that the complaint is received." Therefore, only alleged violations of R.S. 17:173 or Louisiana Bulletin 135 §§ 701-705 occurring during the time period from September 12, 2024 through September 11, 2025, are legally actionable. The findings of fact and conclusions of law contained herein are based on a review of the materials submitted and the relevant legal provisions.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and receiving special education and related services under the exceptionality of Autism. The Student received instruction in the regular education setting with support from the special education teacher as well as a paraprofessional and nurse during transitions and in the bathroom.

Under the Student's previous IEP, dated May 10, 2024, the Team constructed an Individual Health Plan as well as a behavior plan utilizing Tier II strategies to address the area of peer relations and supports in the form of Social Skills Instruction and a social/emotional IEP goal. The social and emotional goals included that the Student would reach 80% frequency- by the end of the school year-- as measured by observation and logs completed by the teacher. Progress reports issued under the May 2024 IEP indicated the Student improved from a reported 13 behavior incidents from February 2024 to May 10, 2024 and that no behavior incidents occurred from October 2024 through March 2025.

The District scheduled an IEP Team meeting for March 20, 2025, of which the Parent was notified by letter dated December 19, 2024. Parent signed by electronic signature on January 18, 2025 and returned this notice indicating they would attend the meeting and provided consent for the Student's triennial reevaluation. Subsequently, the IEP meeting was held by telephone with the Parent in attendance. The results of the reevaluation were disseminated

and the IEP team agreed that speech therapy, school health services and current behavior plan would continue, while the Student was dismissed from occupational therapy.

According to the March 2025 IEP, the Student had shown improvement over the 2024-2025 school year. Progress reports were centered on the Student's independence in toileting, academic progress, and improvement in communication and social/emotional behavior. As it relates to the Student's social/emotional behavior goals for the March 2025 IEP, the Student would demonstrate appropriate and productive school behaviors with 100% accuracy as measured by teacher observations and documentation logs. At that time, the Student's Functional Behavior Assessments indicated that the Student had not demonstrated any behaviors of concern during the school year however, it was noted the Student continued to work on daily behaviors in the classroom.

On July 29, 2025 the Student's a private behavioral health provider (BHP) submitted to the District a letter on behalf of the Student requesting approval to conduct a school-based assessment by observation to be conducted by a behavior analyst or behavior support team. The District received the informal request and subsequently convened a School Building Level Committee (SBLC) meeting on August 26, 2025 to address the Parent's concerns that prompted the BHP's request. At the SBLC meeting the Parent expressed concerns regarding the Student's at-home behavior. Here, the IEP team did not report any concerns that the Student's behavior was impacting their educational progress however, it was agreed to collect data over a 9 week period to evaluate the Student's needs. In the meantime, check-in/check-out mentoring services would be implemented immediately.

By email dated September 4, 2025, the Parent acknowledged the outcome of the SBLC meeting, but renewed her request for "implementation of Act 745 (R.S. 17:173) into [the Student's] IEP" and "without further delay". In a series of reply emails, the District acknowledged the Parent's inquiry and advised the Student's BHP may be granted permission to provide services following an approval from the District's Assistant Superintendent. The District assured the Parent outside behavioral health services are permitted on its campus during the school day, but provided *advanced notice* to the Parent that the BHP would not be allowed in the classroom with other students.

By email dated September 5, 2025, the Parent requested the District reconsider the prohibition of the Student's BHP in the classroom. In a reply email dated September 6, 2025, the District clarified that BHPs have access to students during the instructional day when requested by parents after the required documentation has been received and approved. The Parent then requested the District confirm that once required documentation was submitted by the Student's BHP and approved, then the Student's medically necessary outside behavioral health services would be provided to the Student during the instructional day, but included the phrase "directly in [the] classroom... as outlined in Act 745". The District responded by articulating its position that (1) the BHP would need to sign an agreement and provide required documents and (2) the provider would be allowed access to the Student during school hours. However, the District again reiterated the advance notice that outside behavioral health services would not be provided in the classroom with other students and asked that the Parent have the BHP reach out to the District for the required documentation. In reply, the Parent restated their position on the law and again requested written confirmation that the Student's BHP would be granted full access to deliver services within the classroom.

In a same day email, the Parent notified a State Representative of the arising situation alleging the District was in violation of the law because the Student's BHP was not allowed to work with the Student inside the classroom. The

Parent then emailed the District restating their understanding and position of the law and again renewed their request for written confirmation that the Student's BHP be permitted to provide services directly in the classroom during instructional hours adding the phrase "consistent with [the Student's] treatment plan and the requirements of these laws."

By email dated September 9, 2025, the District provided to the Student's BHP by attachment (1) a copy of the District's policy regarding outside behavioral health services titled "Outside behavior health providers services during the school day Procedures" and (2) a copy of the services agreement for Behavior Health Services. The District did not receive a response or any further submissions from the Student's provider nor from the Parent following the September 9, 2025 email.

By email dated September 10, 2025, the Parent filed the complaint that formed the basis of the Department's investigation.

IV. **Conclusions of Law**

Allegations relative to Behavioral Health Services

The Parent alleges that the District denied the Student the right to receive on-campus, outside behavioral health services during instructional time and more specifically, within the Student's classroom amongst the Student's peers and has therefore, failed to comply with the requirements of R.S. 17:173 concerning the provision of outside behavioral health services during the school day.

La. R.S. 17:173, as originally enacted by Act No. 696 (2018), granted public school governing authority's discretion in determining when outside behavioral health services could be delivered during instructional time. The statute permitted such services "during instructional time in English, reading, mathematics and science if the public school governing authority and the behavioral health provider agree it is in the best interest of the student." This conditional phrasing introduced ambiguity and led to inconsistent implementation across districts.

In response, the Legislature amended and reenacted R.S. 17:173 through Act No. 745 (2024) to remove the discretionary language and impose a mandatory obligation upon public school governing authorities to permit medically necessary outside behavioral health services during the school day, including during instructional periods, once all statutory prerequisites have been satisfied.

La. R.S. 17:173(A)(2)(e) provides:

A public school governing authority **shall not prohibit** a behavioral health evaluation, assessment, or authorized treatment plan from being performed on school property in order to establish medical necessity or deliver medically necessary services. Behavioral health services **may be provided during any part of the school day**, including any and all instructional **time** in English, reading, mathematics, and science. [Emphasis added]

The statute further establishes procedures for the coordination and delivery of those outside behavioral health

services in the educational setting. To implement this legislative mandate, BESE promulgated Bulletin 135, Chapter 7 in January 2025. Bulletin 135 § 703(B)(5) reiterates the statutory requirement that outside behavioral health services must be accessible during any and all instructional periods, subject to procedural compliance. Further, while the present language addresses the “time” in which services must be permitted, it does not dictate to the governing authority that it must permit services specifically within a student’s classroom amongst its peers. Under Bulletin 135 § 705(5) such matters are to be determined between the district and the service provider.

As articulated by the District in its response to the complaint, the District has established policy and procedure for the implementation of R.S. 17:173 as required by law. This policy, albeit difficult to find, has been posted publically (as required by law) and exists within the District’s policies on its website. The policy requires that parents choosing to exercise the right to request outside behavioral health services for their student to be delivered at the school must submit an application to the school board and provide required documentation, including the parent’s signature and consent, to be reviewed and approved by the District’s Superintendent.

In light of that policy, the July 29, 2025 emailed letter authored by the Student’s BHP requesting permission to deliver services, was insufficient to commence a formal request for outside behavioral health services in accordance with the District’s policy and procedures. Following the August SBLC meeting and the Parent’s subsequent demand for the services, the District communicated extensively with the Parent that requests for outside behavioral health services must be submitted in accordance with the District’s policy along with required documentation that would then be reviewed and approved preceding the BHP’s access.

Evidenced within the September 6, 2025 email chain, the Parent understood that the District required formal documentation to initiate their request, but maintained their opposition of the District’s refusal to permit outside behavioral health services inside the classroom. The BHP was subsequently emailed a copy of the policy and a copy of the service agreement on September 9, 2025, but as the Parent has admitted, a formal request was never submitted. As of the closing of this investigation, the Parent has not yet initiated the District’s formal process for requesting approval for the Student’s outside behavioral health services, as required by the District.

As a general matter, the approval or denial of a request necessitates a submission of a request by the requestor. In the absence of a formal request and any other required documentation, the District has issued neither an approval nor a denial of medically necessary outside behavioral health services to the Student. Based on the evidence within the record, the Department finds that the Parent’s complaint is premature and rooted in anticipation that the District would deny in-class outside behavioral health services, and not in the existence of an actual and present formal denial for outside behavioral health services because a request was never properly submitted. Moreover, The District was not required to grant the Parent’s premature demand to permit services to the Student in the educational setting that had not yet been formally requested under 17:173 and in accordance with the District’s policy.

Therefore, the Departments finds that allegation 4 is unsubstantiated.

Allegations 1, 2 and 3: Parental Participation, Prior Written Notice (PWN) and least restrictive environment (LRE)

The Parent alleges (1) the District failed to provide them a reasonable opportunity to participate in the educational decisions for the Student, specifically by unilaterally restricting the Student's BHP from providing outside behavior health services inside the classroom without the Parent's participation in its decision; (2) the District failed to provide PWN upon each denial of the outside behavioral health services requested by the Parent; and, (3) the District failed to provide the student with access to supplementary aids and services necessary to allow the student to be educated in the least restrictive environment because the District refused to allow the Student's outside behavioral health services in the classroom.

Based on the Parent's remaining allegations, it appears they have assumed parity between the provisions of the IDEA and La. R.S. 17:173, mistakenly interpreting that LA. R.S. 17:173 provides the same parental participation protections, PWN and LRE requirements as the IDEA. However, no such requirements exists under 17:173 or Bulletin 135 Chapter 7.

To very briefly state the distinctions, the IDEA ensures that students with disabilities receive a Free Appropriate Public Education (FAPE) through an IEP, while the Louisiana state law, R.S. 17:173, outlines procedures for public school governing authorities in coordinating outside behavioral health services to not only students with exceptionalities, but also general education students as well. Thus, La. R.S. 17:173 is limited to the **coordination of outside behavioral health services** and is not applicable in decisions regarding a student's educational programming or placement. The behavioral health services permitted under LA R.S. 17:173 are not services that have been determined by a student's IEP Team as necessary for a student to have access to FAPE. As a result, districts are under no obligation to extend parental participation rights or consider parental preferences nor is it required to issue PWN in its efforts to coordinate outside behavioral health services to students.

As it relates to the Student's LRE, districts are not compelled under La. R.S. 17:173 to grant outside behavioral health services in the Student's LRE. In the context of where the provision of outside behavioral health services take place, 17:173 primarily ensures accessibility of those services on school property during school hours subject to procedural requirements and regardless of placement. A student's LRE is an educational placement decision under the IDEA and falls outside the scope of 17:173. Likewise, supplementary aids and services also fall under the IDEA, and are not required under 17:173. Under the IDEA, supplementary aids and services must be determined by the IEP team to be necessary for the provision of FAPE and subsequently incorporated into the student's IEP. It is only then that districts may be obliged under 17:173 to coordinate with the Student's BHP for the delivery of those services, but does not require delivery of the services in the student's LRE.

While the point is moot in this case, the Student's IEP team did not determine the Student required outside behavior health services necessary for FAPE at the March 2025 IEP meeting and so those services were not incorporated as a related service in the Student's current IEP. Thus, the District would not be required to coordinate the Student's outside behavioral health services within the Student's LRE.

Ultimately, the Department finds the District did not fail to provide parental participation and PWN to the Parent nor has it failed to provide supplementary services in the Student's LRE because, under 17:173, the District is simply not

obligated to do so. As such, the Department finds Allegations 1, 2 and 3 are unsubstantiated.

V. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, La. R.S. 17:173 or the Department's implementing regulations as set forth in the Louisiana Bulletin 1706 and/or Bulletin 135 with respect to the allegations presented in this matter.

Therefore, this investigation is hereby closed and no additional action is required.

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-19** on behalf of [REDACTED]

I. **Introduction**

On September 29, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") on behalf of their child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Calcasieu Parish Public School ("District"). The parent then amended this complaint on October 1, 2025 and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153.

II. **Statement of the Case**

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Whether the District failed to provide parent with sufficient prior written notice of the District's refusal to use the expanded fluid reasoning index (EFI) in determining points earned in the cognitive domain of the gifted matrix as requested by the Parent;
2. Whether the District failed to complete a comprehensive evaluation that is nondiscriminatory and standardized, as required by and in violation of Bulletin 1508, in the District's assessment of the Student for Gifted placement; and,
3. Whether the District failed to provide the parent the opportunity to meaningfully participate in educational decisions by denying the Parent access to the Special Education Advisory Council member's direct contact information.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the amended complaint on October 1, 2025. Therefore, the investigation was limited to alleged violations of law that occurred

between October 1, 2023, and October 1, 2025.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school and under evaluation for receiving special education and related services under the classification of Gifted. In March of 2025, the parties were engaged in communications related to the ongoing negotiation of a Due Process Hearing agreement. In an email dated March 24, 2025, the Parent expressed concerns that the Student may be Dyslexic. In a reply email, the District requested confirmation that the Parent believed the Student has a disabling condition that significantly impacts their educational performance and required either special education or 504 supports. The District also provided advance notice that this would necessitate a School Building Level Committee (SBLC) meeting to respond to the Parent's request for these perceived disability supports. The Parent confirmed adding that the Student may have ADHD and requested a comprehensive evaluation of the Student.

On April 28, 2025, the Parties executed the Due Process Hearing agreement to dismiss the hearing request and agreeing to conduct a comprehensive cognitive assessment of the Student for consideration for the classification of Gifted under Louisiana regulations. The Parties agreed that should the Student not meet eligibility, the District would conduct a screening no later than September 19, 2025. It was further agreed that, provided the Student be found eligible and following the Parent's consent, the District would conduct an expedited evaluation to be disseminated within 30 days. On September 9, 2025 the Parent executed a consent form for a gifted evaluation of the Student. The Gifted evaluation was completed on September 16, 2025; however, the Student was found not eligible.

By email dated September 22, 2025, the Parent submitted a request to the District to reconsider the Student's evaluation asking the District to substitute the Student's Full Scale IQ score for the Student's Fluid Reasoning Index (FRI) or, in the alternative, the Expanded Fluid Reasoning Index (EFI) score and admit the Student to the gifted program. As support for their request, the Parent referenced the National Association for Gifted Children's (NAGC) 2018 position statement regarding the use of Wechsler Intelligence Scale for Children-Fifth Edition (WISC-V)—a cognitive assessment tool used by the District during the evaluation of the Student. In this email, the Parent believed the Student's Full Scale IQ Score had been applied in the evaluation and argued that the score should not prevent the Student from gifted eligibility.

In a reply email dated September 23, 2025, the District informed the Parent the District had applied the Student's Global Ability Index (GAI) score and not the Full Scale IQ Score. The District offered to meet with the Parent to provide face-to-face interpretation of the results of the evaluation; however, the Parent ultimately declined. As it related to the Parent's outstanding perceived concerns regarding Dyslexia and ADHD, the District also clarified that the Parent's request for a Dyslexia evaluation and the request to amend the gifted evaluation scores—are separate issues. As the District explained further, an SBLC would need to be convened to consider the request for the Dyslexia evaluation. The Parent replied by requesting confirmation that the District was denying their request related to the gifted evaluation.

By email dated September 24, 2025, the District attached a Prior Written Notice (PWN) refusing to amend the evaluation or reopen an evaluation in order to grant the Parent's request. The PWN included an explanation for the denial, further details regarding the score options the District had considered and a statement that the Student does not qualify for the gifted program.

In a separate email chain on September 24, 2025, the District presented the Parent with a consent form for the requested Dyslexia screening. The Parent requested identification of the assessment tool that would be used in the screening and shared information regarding the Student's academic performance. The Parent advised the District of their belief that the Student should be evaluated as a twice exceptional student and declined to return the consent form until the Parent received clarity from the District regarding when the screening could occur.

On September 25, 2025, the Parent also requested a written response to a request for the District's policy on ancillary score substitutions and an explanation as to why the EFI was being "excluded". A response to this particular request

was not provided within the record; however, on that same day the District responded to the Parent's email related to the Dyslexia screening providing clarification regarding the differences between a screening and an evaluation and attached a PWN denying the Parent's request. The PWN contained an explanation for the denial and that the Student is not suspected of having a disabling condition. In a same day reply, the Parent reminded the District that they were awaiting the PWN from their previous EFI score substitution request. The District responded by forwarding the PWN previously issued on September 24, 2025 noting in quick summary the District's refusal.

By email dated September 29, 2025, the Parent requested the District's policy regarding interpretation of assessment results. The District responded that no policy exists that directs evaluation staff on interpretation of assessment results adding that the certified staff members interpret results based on their scope of practice according to Bulletin 1508 requirements. The Parent then requested the District's policy on scoring the WISC-V and what ancillary scoring options the District uses for awarding points on the Matrix. The District responded that it does not have a policy that directs staff on the manner specific assessments must be scored and advised test scoring is standardized by the test developer adding that evaluations are required to be compliant with Bulletin 1508.

Following this exchange, the Parent revived their request for a score substitution specifically seeking a PWN in response to the request for the Student's EFI score to be used in place of the GAI. The Parent further directed the District to provide reasons for its refusal specifically addressing the District's choice to "not follow Pearson (publisher of the WISC-V) and NAGC best practice guidelines and current research endorsed." To which, the District replied by referring again to the September 24, 2025 PWN.

On September 29, 2025, the Parent filed a complaint and amended that complaint on October 1, 2025, which formed the basis of the Department's investigation.

IV. Conclusions of Law

Allegation 1

The Parent alleges the District failed to provide sufficient PWN of the District's refusal to use the expanded fluid reasoning index (EFI) in determining points earned in the cognitive domain of the gifted matrix as requested by the Parent.

At issue here is the PWN issued in response to the Parent's request for scoring index substitutions—a request that **required** the District's evaluation team to (1) apply the Parent's preferred index score to change the points earned on the matrix and (2) find the Student eligible. It is the Parent's position that while the District provided PWN to their request for substitution of the FRI in place of the Full Scale IQ Score, it failed to provide PWN for the substitution of the Student's EFI in place of the GAI.

Pursuant to Bulletin 1706 § 504(A), a public agency must provide written notice to the parents of a student with a disability within a reasonable time, and no less than 10 days, before proposing or refusing to initiate or change a student's identification, evaluation, placement or provision of FAPE. The purpose of this notice is to safeguard parent's right to be informed and meaningful participation in special-education decision making. 1706 § 504(B) lists the required contents of the PWN to include—in relevant part—(1) a description of the action refused; (2) an explanation as to why the District refuses to take such action; (3) a description of each evaluation procedure, assessment, record or report the agency used as a basis for the refusal; and (4) the options considered by the District.

In order to address the sufficiency of the notice, context regarding the initial request must be discussed.

The Department finds that the Parent initially expressed their preference for the District to substitute the Student's FRI or the EFI in place of the GAI, but the record does not reflect that the Parent made two separate and distinct request that would warrant two separate PWNs. Rather, the Parent made one request on September 22, 2025 for a score substitution of the Student's FRI arguing that the Student's FRI fell within the 'confidence interval of 134-148'—an index score that the NAGC recommends to be used in place of the Full Scale IQ Score in order to grant access to

students who would otherwise be ineligible. Included in that request, the Parent stated the Student's "EFI is within the confidence interval for the score needed for gifted acceptance."

The District timely issued its PWN on September 24, 2025. Additionally, the record demonstrates that the PWN satisfied all the requirements outlined in 504 (B), such that it (1) notified the Parent of the District's refusal to amend the evaluation or to reopen an evaluation by substituting the Student's FRI score *for other approved measures of general intellectual ability* and find the Student eligible for gifted as the Parent had requested; (2) explained the District did not use the Student's Full Scale IQ score as the Parent had assumed and instead applied the Student's GAI score--an equally acceptable ancillary scoring option according to the NAGC. The District advised the GAI was chosen specifically to eliminate reliance on the processing speed and working memory--where the Student performed the lowest. A decision that would benefit the Student by maximizing points on the cognitive portion of the Matrix, ultimately yielding 2 points for the Student rather than 1 on the District's scoring matrix; (3) indicated the basis for its refusal was standardized assessment evidenced by its use of the WISC-V; and, (4) discussed the District's consideration of the Parent's particular concerns for the Student's low performance in memory and processing speed as its basis for finding the GAI score was an appropriate measure to eliminate the impact of those two subtests.

It is not until the Parent's September 25, 2025 email is it made clearer that the Parent did not perceive the September 24th PWN as responsive to their EFI-GAI substitution request and expected the District to issue PWN specifically refusing that particular substitution. Appropriately, the District referred the Parent back to its September 24th PWN, which included all elements as required by Bulletin 1706 and sufficiently addressed the EFI substitution by clearly stating that it would not substitute the score for 'any approved measure'--meaning any scoring options approved for scoring the WISC-V and inclusive of the Student's EFI.

With regard to the Parent's demand related to Pearson and NAGC guidelines, the District was under no obligation to provide additional justifications as the Parent had dictated.

As such, allegation 1 is unsubstantiated.

Allegation 2

The Parent alleges that the District failed to complete a comprehensive evaluation by failing to follow nondiscriminatory, standardized procedures, as required by and in violation of Bulletin 1508, for gifted identification in the Student's evaluation because it (1) lacks a standardized policy directing its evaluators on scoring assessments and (2) calculated the Student's index using an incomplete and outdated score sheet.

The Parent submitted sources related to industry standards used in assessing students for gifted programs to the Department in support of their position, which included the NAGC 2018 position statement as well as recent Pearson Technical reports. The NAGC position statement provides a list of scoring options that the NAGC identifies as acceptable for use in the selection of students for gifted programs. Relevant to this complaint, the NAGC recommendations included, amongst others, the EFI and GAI as well as the Full Scale IQ score. These materials were considered in its investigation and while the Department appreciates the Parent's desire for the District to use their preferred scoring option recommended by the NAGC and to consider using recommended scoring options endorsed by Pearson, the Department respectfully disagrees with the Parent in its belief that the District is not already doing so. Most significantly, these sources are not the legal standard by which the District must adhere. Bulletin 1508: Pupil Appraisal Handbook, Chapter 9 serves as the legal standard in evaluating students referred for gifted assessments and as such, the Department must apply only this standard to this case in determining whether the District is in violation of the law.

Bulletin 1508 § 901(B)(2) governs Gifted and Talented screenings and directs Districts to develop and implement procedures for **screening** students suspected of being gifted as well as screening criteria that does not exceed the criteria for eligibility. Once a student has passed screening and an evaluation is underway, Bulletin 1508 § 901(C) lays out the criteria for gifted eligibility in which student scores are input into a standard matrix, as laid out in

Bulletin 1508 § 901(E). Additionally, Bulletin 1508 § 901(D) requires all tests and other procedures used to evaluate students referred for gifted assessments shall be standardized, non-discriminatory, and appropriate for the cultural background of the students being evaluated.

As it relates to whether the District performed a nondiscriminatory and standardized evaluation of the Student, the record does not support the Parent's allegation. The District's licensed evaluator utilized the standardized assessment widely known as the WISC-V and—based on the record—administered, scored and interpreted the Student's performance on the WISC-V in a manner consistent with the WISC-V scoring manual and calculated the points earned on the matrix in accordance with Bulletin 1508.

Moreover, the record is void of any evidence that the District acted discriminately in administering and scoring the Student's evaluation. While the Parent included comment in their narrative that they believed the District refused to admit the Student into its gifted program in an act of retaliation related to past negative interactions, the Department found no evidence of such action. To the contrary, the record reflects that the District's evaluator reviewed the Student's overall performance and determined the Student's GAI would be the most beneficial composite score because it eliminated the lowest scores—the exact areas of concern expressed by the Parent: memory and processing. This selection allowed for a more accurate interpretation of the Student's overall reasoning abilities. Despite the District's effort to maximize the Student's score, the Student still fell short of the required 6 points on the Matrix. Having failed to obtain 6 points on the Matrix, the District appropriately determined the Student is not gifted.

Initially, the Parent wanted the District to use the Student's FRI; however, the FRI is a single index score that is not used in isolation in evaluating students for admission into gifted programs and cannot be used independently to admit students to gifted programs. The Parent's request to use the Student's FRI alone to qualify the Student would have required the District to inappropriately apply the FRI and violate Bulletin 1706's requirement for a comprehensive evaluation. As such, the District's denial to substitute the FRI was proper.

As for the request for the EFI in place of the GAI, the NAGCs 2018 position statement clearly included the GAI alongside the EFI within its list of recommended scoring tools to be used in identifying gifted students. Moreover, the 2019 Pearson Technical report advised of expanded options beyond the GAI, but does not indicate that the GAI is no longer an appropriate or acceptable scoring option in identifying gifted students. None of the source materials indicated that the use of the GAI was inappropriate or outdated and it appears to remain an acceptable and appropriate scoring option used to eliminate the reliance of processing and memory utilized at the evaluator's discretion.

Lastly, the Parent alleged that the District calculated the Student's scores using an incomplete and outdated score sheet; however, the 2014 WISC-V score sheet utilized by the District is the most current version available and therefore, appropriately utilized by the District.

Allegation 2 is unsubstantiated.

Allegation 3

The Parent alleges the District failed to provide the parent the opportunity to meaningfully participate in educational decisions by denying the Parent access to the Special Education Advisory Council member's direct contact information.

Bulletin 1706 § 322(A)-(B) requires that parents are afforded a meaningful opportunity to participate in IEP Team meetings through timely notice identifying the purpose, time, location and expected participants.

The rights afforded to parents under the IDEA and Bulletin 1706 are specifically limited to the participation of parents in educational decision-making processes, such as IEP meetings, evaluations, and placement, that directly affect their child and does not extend a right to the parent for access to a district's advisory board contact information. Neither the IDEA nor Bulletin 1706 create an obligation on the District to provide such information. The District's SEAC is not involved in the decision-making processes regarding any individual student and therefore, the procedural safeguards

Of the IDEA and Bulletin 1706 do not apply in the interactions between the Parent and the SEAC. The District provided information to the Parent regarding the public method in which the Parent may submit comment.

Thus, the Department finds the District is under no obligation to provide email information under the IDEA or Bulletin 1706 and therefore, allegation 3 is unsubstantiated.

V. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations as set forth in the Louisiana Bulletin 1706 with respect to the allegations presented in this matter. Therefore, this investigation is hereby closed and no additional action is required.

Re: Reconsideration Decision in Special Education Formal Complaint No. 56-C-19 [REDACTED]

I. Introduction

On September 29, 2025, [REDACTED] ("Parent") filed a formal written request for a special education complaint investigation, which was amended on October 1, 2025. On December 1, 2025, the Louisiana Department of Education ("Department" or "LDOE") issued a decision in Complaint No. 56-C-19 concerning evaluation procedures, prior written notice, and parent participation in connection with a gifted eligibility determination. The December 1, 2025 decision specifically addressed the following three allegations:

1. Whether the District failed to provide sufficient prior written notice of its refusal to use the Expanded Fluid Reasoning Index (EFI) in determining points earned in the cognitive domain of the gifted matrix;
2. Whether the District failed to complete a comprehensive evaluation that was standardized and nondiscriminatory as required by Bulletin 1508 in assessing the Student for gifted placement; and
3. Whether the District denied the Parent the opportunity to meaningfully participate in educational decision-making by refusing to provide direct contact information for a Special Education Advisory Council member.

The original complaint investigator concluded that each allegation raised by the Parent was unsubstantiated. The Parent thereafter submitted a reconsideration request asserting, among other things, that the:

1. LDOE incorrectly concluded that one prior written notice addressed both the FRI and EFI substitution requests;
2. LDOE did not properly evaluate whether the District's scoring practices were standardized or nondiscriminatory;
3. LDOE failed to analyze whether the District met its Child Find obligations regarding dyslexia and ADHD; and

4. District submitted inaccurate information and that the investigative findings relied on a “false factual record.”

II. Scope of Reconsideration

Reconsideration in this matter is governed by Bulletin 1706 §1153(I), which permits review where a party alleges error in findings of fact and/or law and demonstrates how such alleged error impacts the conclusions reached. Pursuant to Bulletin 1706 §1153(I)(4), reconsideration is limited to documentation originally submitted regarding the allegations investigated and may not expand the scope of the original complaint. Accordingly, the panel’s review is confined to the existing administrative record and to the specific allegations addressed in the December 1, 2025 decision.

The December 1, 2025 decision cited certain provisions of Bulletin 1706 Subpart 1. Because this matter concerns gifted and talented eligibility, the applicable regulatory framework is set forth in Bulletin 1706 Subpart 2. Formal written complaint procedures for gifted and talented students are governed by Bulletin 1706 §§1151–1153, and under §1152(C), a complaint must allege a violation occurring not more than one year prior to the date the complaint is received. Prior written notice requirements are governed by Bulletin 1706 §1503, which requires written notice describing the action proposed or refused, the reasons for that action, the evaluation procedures and information relied upon, and notice of procedural safeguards. Parent participation requirements arise under Bulletin 1706 §§1322 and 1502, which require that parents be afforded the opportunity to participate in meetings concerning identification, evaluation, educational placement, and the provision of a free appropriate public education. The panel applies these Subpart 2 provisions in addressing the Parent’s reconsideration assertions.

III. Determination

Allegation 1

In the December 1, 2025 decision, the complaint investigator concluded that the District’s September 24, 2025 Prior Written Notice sufficiently addressed the Parent’s request to substitute alternative index scores and satisfied the content requirements of Bulletin 1706 §504. The investigator found that the Parent’s September 22, 2025 communication constituted a single request seeking substitution of the Fluid Reasoning Index (FRI), or in the alternative the Expanded Fluid Reasoning Index (EFI), in order to alter the cognitive matrix score and obtain gifted eligibility. The investigator further determined that the District’s PWN described the action refused, explained the basis for refusal, identified the evaluation procedures relied upon, and addressed alternative scoring considerations. Based on those findings, Allegation 1 was determined to be unsubstantiated.

In the request for reconsideration, the Parent asserts that the LDOE incorrectly determined that one PWN covered both FRI and EFI requests. Upon reconsideration, the panel notes that the investigator analyzed the PWN under Bulletin 1706 §504, a Subpart 1 provision applicable to students with disabilities. The correct governing authority for gifted matters is Bulletin 1706 §1503. The citation is therefore corrected.

However, Bulletin 1706 §1503 requires that written notice describe the action refused, explain the reasons for the refusal, identify the evaluation procedures and information used as a basis for the decision, and inform parents of procedural safeguards. The investigator’s findings reflect that the September 24, 2025 PWN refused amendment or reopening of the evaluation and explained the District’s reliance on the Global Ability Index (GAI). The notice further identified the WISC-V and matrix scoring under Bulletin 1508 as the basis for the decision and addressed the Parent’s request for substitution of alternative index scores. The language refusing substitution for “other approved measures of general intellectual ability” reasonably encompasses both FRI and EFI as presented in the Parent’s single substitution request.

It is not until the Parent’s September 25, 2025 email that it becomes clearer that the Parent did not perceive the September 24 PWN as responsive to the EFI-GAI substitution request and expected the District to issue

a separate PWN specifically refusing that substitution. Appropriately, the District referred the Parent back to its September 24 PWN, which included all elements required by Bulletin 1706 and sufficiently addressed the EFI substitution by clearly stating that it would not substitute the score for “any approved measure”— meaning any scoring option approved for scoring the WISC-V and inclusive of the Student’s EFI. The record further reflects that after the Parent renewed the request specifically seeking use of the EFI, the District resent the September 24, 2025 PWN and reaffirmed that the notice reflected its refusal to amend or reopen the evaluation, thereby confirming that its intent encompassed the EFI substitution request.

Accordingly, although the complaint investigator cited §504 rather than §1503, the analysis applied aligns with the requirements of §1503. The correction of the citation does not alter the conclusion that Allegation 1 is unsubstantiated.

Allegation 2

In the December 1, 2025 decision, the complaint investigator concluded that the District administered and interpreted the Student’s evaluation in compliance with Bulletin 1508 and that the record did not support a finding that the evaluation was nonstandardized or discriminatory. The investigator found that the WISC-V was administered by a licensed evaluator, that scoring was conducted consistent with the test developer’s manual, and that matrix calculations were performed pursuant to Bulletin 1508 §901. The investigator further determined that the District’s use of the Global Ability Index, rather than the EFI preferred by the Parent, did not constitute a violation of law. Allegation 2 was therefore determined to be unsubstantiated.

In the reconsideration request, the Parent asserts that the LDOE did not evaluate whether the District’s scoring practices were standardized or nondiscriminatory. The record does not support that assertion. The investigative findings expressly addressed Bulletin 1508 §901(D), which requires that tests and procedures be standardized, nondiscriminatory, and appropriate. The investigator concluded that the WISC-V is a standardized instrument, that scoring is governed by the test developer, and that no evidence demonstrated discriminatory application.

Bulletin 1508 does not mandate selection of one ancillary composite score over another where both are recognized scoring options. Disagreement with the evaluator’s methodological judgment does not establish that the procedures were nonstandardized or discriminatory under §901(D).

Accordingly, correction of the citation framework does not impact the investigator’s findings in Allegation 2, and the conclusion that Allegation 2 is unsubstantiated remains unchanged.

Child Find Assertion

In the reconsideration request, the Parent asserts that the LDOE failed to analyze whether the District met its Child Find obligation regarding dyslexia or ADHD. The December 1, 2025 complaint identified three specific allegations: prior written notice, standardized evaluation procedures, and meaningful parent participation. Pursuant to Bulletin 1706 §1153(l)(4), reconsideration may not expand the scope of the original complaint. Because a Child Find allegation was not raised in the original complaint, it is outside the permissible scope of reconsideration under Bulletin 1706 §1153(l)(4) and is not properly before the panel.

Material Inconsistency Assertion

The Parent’s reconsideration request also asserts that the District submitted inaccurate information and that the investigative findings relied on a “false factual record.” Pursuant to Bulletin 1706 §1153(l)(2)–(3), reconsideration requires demonstration, through documentation previously submitted, that a specific finding of fact is contradicted by the record and that correction of that finding would materially affect the conclusion. Upon review, the panel finds that the reconsideration request primarily reflects disagreement with the interpretation of evaluation data, characterization of communications, and weight afforded to certain documentation. Reconsideration is not a mechanism for re-arguing evidentiary disputes or advancing

alternative interpretations of the same record that were previously considered. Accordingly, the panel confined its review to the legal errors identified and to whether any material factual error impacting the outcome has been established.

IV. Conclusion

The December 1, 2025 decision cited certain provisions of Bulletin 1706 Subpart 1 rather than the governing Subpart 2 authority applicable to gifted and talented matters. The applicable Subpart 2 provisions are applied herein. Application of the proper regulatory framework does not alter the substantive findings or conclusions reached in the original determination.

For the foregoing reasons, the panel determines that the complaint investigator's findings of fact and conclusions of law were reasonably supported by the record and consistent with the governing regulatory authority. The December 1, 2025 decision is therefore affirmed.

RE: Final Decision Formal Complaint No. 56-C-24

Dear Parties:

On October 1, 2025, the Louisiana Department of Education (“Department”) received a complaint from Kristoffer McCoy of Aspire Behavioral Health Center (“Complainant” or “Provider”), a private provider of applied behavior analysis (ABA) services, alleging that the Lafayette Parish School System’s (“District”) policy regarding remote or telehealth services violates R.S. 17:173. Specifically, the Complainant asserts that the District’s policy either directly prohibits or effectively prevents the remote supervision of registered behavior technicians.

Pursuant to R.S. 17:173 and its implementing regulations in Bulletin 135 § 705, the Department is authorized to receive, investigate, and issue determinations regarding complaints alleging noncompliance with behavioral health service requirements. For a complaint to be actionable, it must allege that a public school governing authority denied a student access to medically necessary behavioral health services during the school day.

In this case, the complaint does not allege that a student has been denied access to medically necessary behavioral health services during any part of the school day. Rather, the Complainant describes operational challenges associated with providing in-person supervision staff, including travel burdens and limits on staff capacity. For example, the complaint states that “a typical Behavior Analyst with 10-15 clients would need to travel in person to multiple schools (and in some cases school districts as we provide services in all of Acadiana as an example).”¹ These concerns relate to the Provider’s business model rather than to any allegation that a student has been denied access to services. While such concerns may be relevant to the Provider’s service-delivery structure, they do not fall within the scope of the Department’s complaint resolution procedures.

¹ Aspire Behavioral Health Center, Formal Complaint, Exhibit 1.

La. R.S. 17:173 protects the right of students to receive medically necessary behavioral health services at school when such services are requested by a parent or legal guardian and authorized by an independent third-party payor. It does not create an obligation for public school governing authorities to accommodate a provider's operational or management preferences. In fact, both R.S. 17:173(A)(2)(e) and Bulletin 135 § 703(B)(5) require that the delivery of behavioral health services be implemented in a manner that accounts for school operations.

Because the complaint does not allege a denial of student access to medically necessary behavioral health services and instead reflects a provider's disagreement with the District's policy based on business considerations, it does not state a claim subject to investigation or enforcement under R.S. 17:173 or Bulletin 135. The complaint is therefore dismissed.

This determination is the final decision.

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-25 

I. Introduction

On November 4, 2025, the Louisiana Department of Education (“Department” or “LDOE”) received a formal complaint from  on behalf of a minor child (“Student”), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Rapides Parish School Board (“District”).

The Complainant requested that the Department initiate an investigation pursuant to Louisiana Bulletin 1706 §§151–153.

II. Statement of the Case

In the complaint, the Complainant alleged that the District violated the Individuals with Disabilities Education Act (“IDEA”), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department’s implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Complainant alleged that the District: (1) failed to ensure that the IEP team was properly constituted; (2) failed to provide timely and sufficient notice regarding an IEP meeting scheduled on or about October 24, 2025; and (3) significantly impeded the parent’s opportunity to meaningfully participate in the decision-making process regarding the provision of a free appropriate public education (FAPE) to the student.

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between November 3, 2023, and November 4, 2025.

Based on a review of the record and the applicable legal standards, the following findings of fact and conclusions of law are made.

III. Findings of Fact

The Student is a child with a disability entitled to a free appropriate public education pursuant to the Individuals with Disabilities Education Act. The Parent is the Student's parent, and the Complainant is an advocate invited by the Parent to participate in meetings concerning the Student's special education services.

On October 9, 2025, the Louisiana Department of Education's Special Education Ombudsperson issued a written Notice of Facilitated IEP Meeting to the Parent and the District, referencing Log Number 56-F-12. The notice stated that a facilitated IEP Team meeting was scheduled for October 24, 2025, at 8:00 a.m. at [REDACTED] and identified a LDOE-designated contractor as the assigned facilitator.

On October 9, 2025, the District issued a document titled Parental Notification Letter-Prior Written Notice regarding the October 24, 2025 IEP Team meeting. The notice identified the purpose of the meeting as the development, review, or amendment of the Student's Individualized Education Program and determination of placement. The notice identified the school principal, [REDACTED] as the Officially Designated Representative (ODR). The notice also listed additional school system personnel, including a general education teacher, special education teacher, and evaluation staff, among other invited participants. [REDACTED] was listed as "Pupil Appraisal Manager/Other." The Parent signed the notice on October 9, 2025, indicating an intent to attend the meeting and acknowledging receipt of procedural safeguards.

On October 20, 2025, the District issued an updated Parental Notification Letter reflecting that the Director of Exceptional Student Services, who was listed as an invited participant on the October 9, 2025 Parental Notification Letter, would not attend the October 24, 2025 IEP Team meeting.

According to the complaint, the Parent, the advocate, the LDOE-designated facilitator, and multiple District personnel were present at the scheduled meeting time. The Complainant reports that the meeting did not proceed and was verbally rescheduled after approximately an hour of delay, which the Complainant attributes to the absence of an ODR.

According to the District, the principal identified as the Officially Designated Representative was not on campus on October 24, 2025 because she was attending another meeting. The District reports that this absence was not immediately known and that staff present attempted to secure another qualified individual to serve as ODR. The District further reports that the assistant principal was also unavailable and that District staff contacted the Director of Exceptional Student Services and [REDACTED]

The District reports that [REDACTED] who was listed on the October 9, 2025 notice as an invited participant, was qualified and willing to serve as ODR and was en route to the school. The District further reports that [REDACTED] communicated her travel status to a member of the IEP Team and confirmed she would serve as ODR upon arrival.

The District reports that the facilitator declined to proceed with the meeting and required that it be rescheduled, based on the facilitator's understanding regarding the requirements for an ODR. The District reports that the meeting was rescheduled before [REDACTED] arrived on campus and that [REDACTED] received a text message indicating the meeting had been rescheduled after she arrived in the school parking lot.

On November 3, 2025, the Parent received a Parental Notification Letter from the District confirming that the facilitated IEP Team meeting had been rescheduled for November 21, 2025.

On November 14, 2025, the District Superintendent issued a written communication to school principals referencing an allegation submitted to the LDOE concerning an IEP meeting that was rescheduled due to the absence of an ODR. The communication stated that it is the District's responsibility to ensure that an Officially Designated Representative is present at all IEP meetings and directed principals to communicate with the Exceptional Student Services Director if extenuating circumstances arise so that alternative arrangements can be made.

IV. Conclusions of Law

Allegation 1

The Individuals with Disabilities Education Act (IDEA), requires that each child with a disability have an Individualized Education Program (IEP) that is developed, reviewed, and revised by a properly constituted IEP Team. Under 34 C.F.R. 300.321(a), the IEP Team must include the child's parents, at least one regular education teacher (when applicable), at least one special education teacher, and a representative of the local educational agency who is qualified to provide or supervise specially designed instruction, is knowledgeable about the general education curriculum, and is knowledgeable about the availability of public agency resources. The public agency representative—commonly referred to in Louisiana as the Officially Designated Representative—is a required member of the IEP Team. A public agency may designate a qualified individual to serve as the agency representative, provided that the individual meets the criteria established in 34 C.F.R. 300.321(a)(4) and (d). The obligation rests with the public agency to ensure that the IEP Team includes all required members or that any absence of a required member complies with the excusal provisions.

With respect to attendance, 34 C.F.R. 300.321(e) sets forth limited circumstances under which a required IEP Team member may be absent, in whole or in part. If the member's area of the curriculum or related services is not being discussed, the parent and the public agency may agree in writing that the member's attendance is not necessary. If the meeting does involve the member's area, the member may be excused only if the parent and the public agency consent in writing and the member provides written input before the meeting.

Louisiana has adopted and implemented these federal requirements through Bulletin 1706. Bulletin 1706 §321(A)(4) requires that the IEP Team include an ODR who is qualified to provide or supervise specially designed instruction, is knowledgeable about the general education curriculum, and is knowledgeable about the availability of public agency resources. Under Bulletin 1706 §321(D), a public agency may designate another qualified IEP Team member to also serve as the agency representative, provided the individual satisfies the criteria in §321(A)(4). Bulletin 1706 §321(E) governs IEP Team attendance and excusal and permits the absence of a required IEP Team member only when the parent and the public agency provide written agreement or consent, consistent with federal requirements.

In the current case, the issue presented is whether the District ensured that the IEP Team for the October 24, 2025 meeting was properly constituted at the time the meeting was scheduled to convene, or whether the absence of a required team member was addressed through a valid written excusal consistent with 34 C.F.R. 300.321 and Bulletin 1706 §321.

The record establishes that the October 9, 2025 Parental Notification Letter identified the school principal as the ODR and that the ODR was not present at the time of the meeting was scheduled to convene and the participants were prepared to proceed. Under these circumstances, the District was required either

to have a qualified public agency representative present and serving in the ODR role at the time the meeting was scheduled to convene, or to have satisfied the written excusal requirements set forth in Bulletin 1706 §321(E) and 34 C.F.R. 300.321(e).

The District asserts that it attempted to remedy the principal's unavailability by securing another qualified individual to serve as the ODR and that [REDACTED] who was listed on the meeting notice as an invited participant, was qualified, willing, and en route to assume that role. Federal and state regulations permit a public agency to designate a qualified individual to serve as the agency representative, and neither 34 C.F.R. 300.321 nor Bulletin 1706 §321 requires that the representative hold a specific job title.¹ However, the permissibility of substitution does not relieve the District of its obligation to ensure that the IEP Team includes a qualified public agency representative at the time the meeting is scheduled to convene, nor does it authorize proceeding in the absence of that role without written parental agreement or consent. The applicable statutes and regulations do not provide for excusal by implication or anticipated arrival; rather, they require that the role be filled or that the absence be addressed through the written excusal mechanisms established by law.

The District further contends that the meeting was canceled because the LDOE-designated facilitator declined to proceed before [REDACTED] arrived and that the facilitator's understanding of the requirements for an ODR contributed to the rescheduling of the meeting. While the record reflects that the meeting was scheduled to occur in a facilitated context, the use of IEP Facilitation does not alter the legal requirements governing IEP Team composition or attendance. The responsibility to ensure that a properly constituted IEP Team is present at the remains with the local educational agency (LEA). IEP Facilitation is a voluntary process designed to support communication and collaboration; it does not create an exception to the attendance or excusal requirements and does not shift the LEA's compliance obligations to another party.²

Finally, although the District points to the availability of a substitute representative, the evidence establishes that the individual identified as the ODR was not present at the scheduled start of the meeting. While the District reports that [REDACTED] was qualified and en route to assume that role, the record does not establish that a qualified public agency representative was in attendance to serve as the ODR when the meeting was scheduled to convene or during the period in which participants waited for such a representative to arrive.

Under these circumstances, the record supports a determination that the District did not ensure the IEP Team was properly constituted, as required by 34 C.F.R. 300.321 and Bulletin 1706 §321. Allegation 1 is **substantiated**.

Allegation 2

¹ See Bulletin 1530 §107(A)(1) which further explains that a local educational agency may designate a variety of qualified personnel to serve as the Officially Designated Representative, provided the individual is qualified to provide or supervise specially designed instruction, is knowledgeable about the general education curriculum, and is knowledgeable about the availability of agency resources.

² See Bulletin 1706 §905 which defines Individual Education Plan Facilitation as a voluntary alternative dispute resolution process available by mutual agreement of the parent and the public agency, in which a neutral facilitator assists the parties in communicating and drafting an IEP. The definition specifies that the facilitator's role is to support discussion and collaboration during the IEP meeting and does not assign decision-making authority or compliance responsibility to the facilitator.

Under 34 C.F.R. 300.322(a)–(b), a public agency must take steps to ensure that one or both of a student’s parents are afforded the opportunity to participate in IEP Team meetings. This includes providing notice early enough to allow parent attendance and scheduling the meeting at a mutually agreed upon time and place. The notice must also state the purpose, time, and location of the meeting and who will be in attendance.

Louisiana has adopted these requirements through Bulletin 1706. Pursuant to Bulletin 1706 §322(A), each public agency must take steps to ensure that one or both parents of a student with a disability are present at each IEP Team meeting or are afforded the opportunity to participate. This includes timely notice and mutually agreed scheduling. Under Bulletin 1706 §322(B)(1), the notice must indicate the purpose, time, and location of the meeting, who will be in attendance, and inform the parents of their right to invite individuals with knowledge or special expertise about the student.

Bulletin 1706 §502(B) further provides that parents must be afforded the opportunity to participate in meetings related to the identification, evaluation, educational placement of the student, and the provision of a free appropriate public education (FAPE). Public agencies must provide notice consistent with Bulletin 1706 §322 to ensure that opportunity. Issues concerning the absence, substitution, or excusal of required IEP Team members are governed by the IEP Team composition and attendance provisions set forth in 34 C.F.R. 300.321 and Bulletin 1706 §321.

In the current case, the record reflects that on October 9, 2025, the District issued a Parental Notification Letter regarding an IEP Team meeting scheduled for October 24, 2025, at 8:00 a.m. at [REDACTED]. The notice identified the meeting’s purpose as the development, review, or amendment of the Student’s IEP and a determination of placement. It also identified the anticipated attendees, including an Officially Designated Representative, a general education teacher, a special education teacher, and evaluation and related-services personnel. The Parent signed the notice the same day, acknowledging receipt and intent to attend. The meeting was scheduled approximately two weeks in advance. This notice satisfied the requirements of 34 C.F.R. 300.322(b)(1)(i) and Bulletin 1706 §322(B)(1)(a), which require timely written notice that identifies the meeting’s purpose, time, location, and who will be in attendance.

The Complainant asserts that the District’s notice was deficient because the ODR identified on the October 9, 2025 notice did not ultimately attend the October 24, 2025 meeting and the District did not notify the Parent of that circumstance in advance. However, the applicable notice provisions require that, at the time notice is issued, the notice contain sufficient information to allow the parent to understand the nature of the meeting and to prepare for meaningful participation. To the extent the Complainant alleges that a required IEP Team member was absent when the meeting was scheduled to convene, that concern more appropriately relates to whether the IEP Team was properly constituted. Issues of IEP Team composition and excusal are governed by 34 C.F.R. 300.321 and Bulletin 1706 § 321 and are addressed under Allegation 1.

While the regulations do not prohibit a public agency from informing parents about anticipated changes in team composition, nor discourage such communication as a matter of transparency and collaboration, the failure to do so under the facts presented in this case does not constitute a violation of the notice provisions in 34 C.F.R. 300.322 or Bulletin 1706 §322.

Accordingly, the record does not support a finding that the District failed to provide timely or sufficient notice of the October 24, 2025 IEP Team meeting. Allegation 2 is unsubstantiated.

Allegation 3

Under the IDEA and its Louisiana counterpart, parents have the right to participate in meetings related to the identification, evaluation, educational placement, and provision of a free appropriate public education (FAPE) to their child. Public agencies must take steps to ensure that parents are afforded this opportunity, including providing timely notice of meetings and scheduling meetings at a mutually agreed upon time and place, consistent with 34 C.F.R. 300.322(a) and Bulletin 1706 §§502(B) and 322.

Parental participation requires more than physical presence; it requires that parents have a genuine opportunity to engage in discussion, express concerns, and help shape the IEP before decisions are made. A failure to provide such an opportunity may constitute a procedural violation under the IDEA. However, not every procedural violation related to parental participation rises to the level of a denial of FAPE. A procedural violation results in a denial of FAPE only if it impeded the child's right to FAPE, significantly impeded the parent's opportunity to participate in the decision-making process regarding the provision of FAPE, or caused a deprivation of educational benefit.³

When an IEP meeting does not occur as scheduled or cannot proceed due to the absence of a required IEP Team member, the inquiry turns on whether the circumstances, viewed in context and considering the totality of the circumstances, significantly impeded the parent's opportunity to meaningfully participate in educational decision-making.

In the current case, the parties collectively agreed to participate in a facilitated IEP Team meeting scheduled for October 24, 2025. The record reflects that the Parent appeared at the scheduled time and location, along with the Parent's invited advocate, District personnel, and the LDOE-designated facilitator. The purpose of the meeting was to develop, review, or amend the student's IEP.

As discussed under Allegation 1, the meeting could not proceed as scheduled due to the absence of a qualified ODR at the time the meeting was scheduled to convene. As a result, the meeting was canceled and later rescheduled.

While the District's failure to ensure proper IEP Team composition constituted a procedural violation, the question under this allegation is whether that violation significantly impeded the Parent's opportunity to meaningfully participate in the decision-making process.

The record indicates that the Parent did, in fact, attend the scheduled meeting and was prepared to participate. The Parent was not excluded from the meeting or prevented from expressing concerns. Rather, the meeting was unable to proceed because the IEP Team could not be fully constituted at the scheduled time. The record further reflects that the meeting was rescheduled for November 21, 2025. Although the cancellation of a scheduled meeting after the Parent's arrival reflects a breakdown in meeting logistics, inconvenience or delay alone does not establish a denial of meaningful parental participation. A procedural violation rises to the level of a denial of FAPE only when it significantly impairs the parent's ability to contribute to educational decision-making—not merely when it results in scheduling disruption.

Considering the totality of the circumstances, including the Parent's presence at the scheduled meeting, the absence of substantive decision-making in the Parent's absence, and the rescheduling of the meeting,

³ See 34 C.F.R. 300.513(a)(2); Bulletin 1706 § 513(A)(2) (articulating the standard for determining when a procedural violation results in a denial of FAPE).

the evidence does not support a finding that the Parent's participatory rights were significantly impeded, nor that there was a denial a FAPE.

Allegation 3 is **unsubstantiated**.

V. Corrective Action

The record establishes that the District did not ensure that the IEP Team was properly constituted for the IEP Team meeting scheduled to convene on October 24, 2025, due to the absence of a required Officially Designated Representative. To prevent recurrence of this noncompliance:

- By no later than February 5, 2026, the District shall review and, if necessary, revise its policies and/or procedures to ensure that all required IEP Team members, including an Officially Designated Representative, are present at the time an IEP Team meeting is scheduled to convene, unless the absence of a required member is addressed in accordance with the written agreement or written consent requirements set forth in 34 C.F.R. 300.321(e) and Bulletin 1706 §321(E).
- By no later than February 5, 2026, the District shall submit documentation to the Department demonstrating that the required review has occurred and that relevant District staff responsible for scheduling and convening IEP Team meetings have been informed of any revised or clarified procedures.

RE: Formal Complaint Investigation on behalf [REDACTED]
Dismissal of Special Education Formal Complaint No. 56-C-26

Dear Parties:

On December 5, 2025, the Louisiana Department of Education received notification that indicated that parties to this formal complaint reached a mutually agreeable resolution and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 56-C-26. No further action is required by either party.

Sincerely,

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-30 on behalf of** [REDACTED]

I. Introduction

On October 22, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153 on behalf of their child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Lafayette Parish School System ("District").

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Whether the District failed to initiate an initial evaluation of the student when presented with information that reasonably suspected a disability, including but not limited to a written parent request, prior psychological and/or medical documentation, and persistent behavior concerns and discipline referrals.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on October 22, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between October 23, 2023, and October 22, 2025.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school. The Student was enrolled into the District in July of 2025 having recently moved into the United States from [REDACTED]. Upon the Student's enrollment the District collected a Home Language Questionnaire and other supporting documents and determined the Student should be placed in a Regular Education Program and an English Language Proficiency Screener (ELPS)

would be administered. After the beginning of the school year, the Student exhibited difficulties in completing academic tasks and engaged in inappropriate behaviors at school. In response to a teacher referral regarding academic concerns, the District convened a School Building Level Committee (“SBLC”) meeting on Friday, August 22, 2025. At this meeting the Parent advised the Student knew the alphabet and numbers, but had a hard time retaining information, distinguishing colors, reading and writing. The Parent also advised that the Student had attended a private school in their country of origin and had been diagnosed with a learning disability and received ABA therapy, but the Student was not receiving Special Education services through an Individualized Education Plan (IEP). In the meeting notes, the District noted the Student needed constant redirection and did not know how to complete classwork. With this information and a review of universal screening data, it was agreed to begin academic interventions to collect data and screen the Student for Dyslexia.

On August 26, 2025—the following Tuesday--the SBLC met again in response to the Parent’s request for a special education evaluation based on their concerns regarding the Student’s behavior and academic performance. In addition to the information provided by the Parent in the previous SBLC meeting, it was noted that the Student spoke English mainly, when unable to express themselves would speak [REDACTED]. The Parent provided records to the District, including an outside psychological evaluation of the Student and other relevant information, including the Student’s April 24, 2024 neurological evaluation conducted in the [REDACTED] by [REDACTED] as prepared by [REDACTED] diagnosing the student with “Learning vs. Intellectual Disability”. Results of assessments performed in the 2024 psychological evaluation, revealed the Student’s FISQ was 78—within Borderline Impaired/Delayed or below average category, demonstrated significantly low performance in visual-spacing and working memory and fine motor skills. In summary, the neurologist summarized there was no evidence of an intellectual disorder, recommended testing for ADHD and activities to improve attention and increase motor skills. It is unclear whether the Student was reevaluated within six months as suggested, but the meeting notes indicated the Parent advised [REDACTED] diagnosed the Student on March 22, 2025 with a learning disability. The District shared concerns that the student was not completing work and refused to participate in assessments and computer based interventions. At the time of the meeting, the Student had received no major referrals and it was noted that the Student was benefitting from breaks. The District noted the Student was exhibiting signs of adjustment to the school and transition to its pace. Based on this information, the Pupil appraisal team did not accept the evaluation request, but instead agreed to collect data through the District’s general education interventions Positive Behavior Intervention Support (PBIS) during the data collection period, begin academic interventions previously agreed to at the August 22nd meeting and reconvene the SBLC in 4-6 weeks to review the collected data.

On August 27, 2025 the Student received their first behavioral referral for conduct injurious to associates resulting in detention served on August 29, 2025. On September 4, 2025, the Student received an infraction for disruptive behavior on the bus that prevented the driver from finishing the route and resulting in a one day suspension from the bus to be served on September 5, 2025.

By email dated September 9, 2025, the Parent submitted a second request for a special education evaluation. By letter dated September 10, 2025, the District acknowledged receipt of the Parent’s request notifying the Parent that on September 23, 2025 an SBLC meeting would address the evaluation request. Also on September 10, 2025, a meeting was held to review the Dyslexia related data and interview the District’s Dyslexia teacher, which resulted in a determination that the Student was At Risk and the Student would be screened for Dyslexia and scheduling the September 23, 2025 SBLC meeting to determine next steps. Ultimately, the September 23rd SBLC meeting dually served the committee to (1) review the results of the Dyslexia screener and (2) consider the Parent’s special education evaluation request.

From September 10, 2025 through September 23, 2025 the District conducted vision and hearing screenings and DIBELS. The Student failed the vision screening, passed the hearing and performed below average in DIBELS BOY. On Lexia and iReady, the Student performed 2 or more grades below level.

During this same time frame, the Student incurred additional behavior referrals. On September 15, 2025 the Student earned a third referral for disturbing the class and willfully disobeying the teacher’s requests to stop resulting in In-

School suspension, a conference with the Student and contact with the Parent. On September 19, 2025 the Student received a second major referral from the bus for running down the aisles and punching the bus driver in the arm resulting in a two day suspension from the bus and given an assigned seat. The District noted that the Student's behavior would be addressed at the upcoming September 23, 2025 meeting. However, before this meeting could occur, on September 22, 2025, the Student received a third bus referral for injurious behavior to another student resulting in one day suspension from riding the bus. On September 23, 2025 the Student was referred for disrespecting authority for refusing to comply with requests to cease disruptive behavior resulting in one day In-School suspension.

At the September 23, 2025 SBLC meeting, the District considered the Student's discipline referrals, the Parent's concerns regarding the treatment of the Student by peers on the bus and the ongoing academic and behavioral struggles as well as the teacher's concerns corroborating those struggles. At this meeting, the Parent provided a written statement dated September 22, 2025 from the Student's pediatrician advising the Student has a learning disability and currently under evaluation for ADHD. The Student had received a total of five (5) behavior related referrals ranging in categories described as willful disobedience, disrespect of authority, disturbing the class, immoral or vicious practices culminating to two days of In-School suspension and four days of suspension from riding the bus.

The District completed two separate meeting notes to document the separate issues discussed. With respect to the issue of Dyslexia, the committee reviewed the data and agreed to screen the Student for characteristics of Dyslexia within 60 days. Regarding the special education evaluation, the special education process was explained to the Parent and, after reviewing the Student's performance data from STAR, LEXIA, iReady Math, mClass Math along with their grades, determined more data was needed before the SBLC would agree to evaluate the Student. Thus, the Student would not be evaluated, but would begin receiving Tier 2 academic interventions for reading and undergo observation for 4 weeks. At the conclusion of those 4 weeks, the Student would then move to Tier 3 reading interventions. As it related to the Student's behavior, a Tier 2 behavior intervention plan was crafted to be implemented for a data collection period of 4-6 weeks. Following this meeting, the District issued a Prior Written Notice (PWN) on September 24, 2025 documenting its refusal to evaluate the Student, which was received by the Parent via USPS mail on October 4, 2025

Following the September 23, 2025 SBLC meeting, the Student received three additional behavior related referrals— (1) on September 23, 2025 the Student treated authority with disrespect and habitually disturbing the classroom resulting in In-School Suspension for one day served on September 25, 2025 (2) on September 29, 2025 for willful disobedience by refusing to comply with requests by authority to discontinue behaviors despite redirection resulting in partial In-School Suspension served on October 1, 2025; and, (3) on October 1, 2025 the Student caused damage to a seat on the bus with a paperclip resulting in a recommendation for long term suspension and restitution from the Parent. However, the District rescinded the recommendation on October 7, 2025.

By email dated October 7, 2025, the Parent filed an informal complaint with the District regarding the District's failure to evaluate the Student and included a request for an Independent Education Evaluation (IEE). By email dated October 8, 2025, the District acknowledged receipt of the informal complaint. On October 9, 2025, the District emailed a PWN agreeing to conduct the special education evaluation as the Parent requested and advising an SBLC would be convened to conduct necessary screenings related to the evaluation and Parental consent would be obtained in an effort to initiate the evaluation no later than November 10, 2025.

In the meantime, on October 21, 2025 the Student received a behavioral referral for willful disobedience and treating authority with disrespect and repeatedly refusing redirection as well as throwing objects at a teacher. Despite multiple efforts to by District staff to assist the Student back into the school building, the Parent was called to assist over the phone, and ultimately a sibling of the Student was able to help the Student inside. This infraction resulted in a one day suspension and a return from suspension meeting was to be held on October 23, 2025.

On October 22, 2025 the Parent advocate filed a complaint against the District alleging violations of IDEA and applicable state laws.

Conclusions of Law

Allegation

Whether the district failed to initiate an initial evaluation of the student when presented with information that reasonably suspected a disability, including but not limited to a written parent request, prior psychological and/or medical documentation, and persistent behavior concerns and discipline referrals.

The Parent alleges that the District unnecessarily delayed initiating the Student's special education evaluation using interventions and the Student's English Language Learner (EL) status as a basis for the delay. However, at the time of the filing of this complaint, the Student had not yet been formally identified as an EL. For this reason, the Department will evaluate only whether the District used interventions to the delay the Student's evaluation.

The Individuals with Disabilities Education Act imposes a Child Find obligation on school districts, requiring them to identify, locate, and evaluate all children with disabilities who may need special education services. This duty is reinforced in Louisiana Bulletin 1706, §111(A), which mandates that each Local Educational Agency (LEA) ensure ongoing efforts to identify and evaluate students suspected of having disabilities, regardless of the severity of the disability. Louisiana Bulletin 1706 § 905 defines a "student with a disability" as a student who exhibits the characteristics of one of the categories of disability listed therein and who, by virtue of those characteristics, needs special education and related services. The resolution of this matter relies on the application of the first criteria – that a student, because they are exhibiting characteristics of one of the categories of disability listed in 905, requires special education and related services.

Pursuant to Louisiana Bulletin 1706, §302(B) a parent of a student or the public agency may initiate a request for an initial evaluation to determine if the student is a student with a disability. The District must seek informed parental consent or issue prior written notice (PWN) explaining its refusal as outlined in 1706, §504(A) and (B). In the event insufficient data exists to determine whether a special education evaluation is appropriate, Bulletin 1508 § 305 permits response to intervention activities and screenings in order to gather the data necessary for the District to make a data-driven decision to evaluate the student. Under §302(C)(1) (a), once a school district receives parental consent for an initial evaluation, it must complete the evaluation within 60 business days, unless specific exceptions apply.

August 26, 2025: First Evaluation Request

At the time of the Parent's first evaluation request on August 26, 2025, the District had only become aware of the Student's behavior and academic struggles in August just weeks following enrollment. The record established the Parent provided outside evaluations and medical records indicating the Student was diagnosed with a learning disability, but this data and an awareness of a medical diagnosis alone is not sufficient to put the District on notice that the Student may be a student with a disability in need of a special education under the IDEA and as such, must be evaluated in response to the Parent's request. In this matter particularly, the Student did not enroll with an existing IEP and, although medically diagnosed, was not previously determined a student with a disability eligible to receive special education. Moreover, the April 2024 evaluation provided by the Parent indicated that there was no evidence of an Intellectual Disorder, but indicated a recommendation that the Student undergo screening for Attention/Deficit Hyperactivity Disorder (ADHD) and partake in activities that would improve attention span and increase fine motor skills at both home and school¹.

Pursuant to the IDEA regulations each state must have in effect policies and procedures designed to prevent the inappropriate over-identification or disproportionate representation by race and ethnicity of children as children with disabilities. Therefore, the District is obligated to prevent inappropriately identifying the Student as a student with a disability in need of special education by ruling out the possibility that the Student's behaviors were attributed to the challenges faced by the Student in a new country in an unfamiliar, structured school setting and environment while

¹ A neurological evaluation conducted on March 22, 2025 by ██████████ in ██████████, ██████████ is referenced in the SBLC meeting however, the Department was not submitted to the record for review.

experiencing potential communication barriers.

Given the Student's recent move to the United States, transition to the school along with linguistic factors, and the limited data available to the District, the record supports the District's refusal to evaluate and its decision to instead initiate a four to six week data collection period through its general education PBIS program as a reasonable first step in making a data-driven decision on whether to evaluate the Student. Otherwise, to immediately evaluate without sufficient data, the District ran the risk of inappropriately identifying the Student as a student with a disability. The data from this brief collection period would serve as the basis from which intervention supports and a behavior plan would be created.

Based on the information presented, the Department concludes that the Student's academic performance and behavior did not support a reasonable belief that the Student was a student with a disability as defined in Louisiana Bulletin 1706 § 905. Thus, as it relates to the August 26, 2025 request for evaluation, the Department finds the District appropriately refused to evaluate the Student.

September 9, 2025: Second Evaluation request

The Parent's September 9th evaluation request was received by the District 14 days following the August 26, 2025 meeting and interrupting the previously agreed upon four to six week data collection period in its second week. In the September 24th PWN, the District explained that the basis for the denial of the September 9th evaluation request was rooted in the fact that tiered support interventions had not yet been implemented and a behavior plan had not yet been developed. This is in large part because the District had only collected two weeks of data since the August meeting. In other words, the District found the evaluation request still lacked data that supported that supported a reasonable suspicion the Student had a disability. The record reflects that at the time of this request, the Student had incurred two behavior related incidents—August 27th and September 4th, 2025--handled through redirection. If the District were to initiate the evaluation at that point, with a little over two weeks of data and two behavioral referrals, the District still risked inappropriately identifying the Student as a student with a disability in need of special education by relying on incomplete data to determine special education eligibility.

By the time the parties met for the September 23, 2025 SBLC meeting, the Student was under medical evaluation for ADHD and had incurred a total of five behavioral incidences since the beginning of the school year. In light of those behavior incidences and the new medical information, the District determined the Student—in addition to receiving PBIS—should begin receiving the more intensive Tier 2 Behavior intervention plan for an abbreviated 4 to 6 weeks period² rather than initiating the evaluation to rule out whether more intensive behavioral supports would adequately and sufficiently support the Student's behavioral needs or whether individual supports were indeed necessary such that an evaluation should be conducted.

Based on the information presented, the Department concludes that the Student's academic performance and behavior did not support a reasonable belief that the Student was a student with a disability as defined in Louisiana Bulletin 1706 § 905. Thus, as it relates to the September 9th, 2025 request for evaluation and subsequent SBLC meeting on September 23, 2025, the Department finds the District appropriately refused to evaluate the Student.

October 7, 2025: Informal Complaint

When the Parent submitted their October 7, 2025 informal complaint to the District for failing to evaluate the Student, the Student's Tier 2 academic and behavioral intervention plan had been implemented for two weeks from the date of the September 23rd SBLC meeting. Within those two weeks the Student received two behavioral referrals including a recommendation for long term suspension that the District ultimately rescinded. At this point in the relevant time frame, the District had been able to gather roughly six weeks of data—a very minimal amount of data

² Per the District's *School Building Level Committee 2025-2026 Handbook*, its Behavior RTI Procedures generally require if Tier 1 Interventions have been implemented for 4-6 weeks without adequate progress, the student moves to Tier 2, which is implemented for a "suggested time in Tier 2 is six to twelve weeks or as long as there is a need for the level of intervention and progress monitoring."

December 22, 2025

Special Education Formal Complaint No. 56-C-30

for evaluating any student regardless of classification. Based on that data, the District found reason to suspect a disability affecting the Student's academic performance and behavior and ultimately agreed in its October 9, 2025 PWN to initiate the evaluation under Bulletin 1706, obtain the Parent's consent and convene an SBLC no later than November 10, 2025.

In summary, the record reflects that each of the stakeholders involved in educational decision-making for the Student shared the concern that as the Student began exhibiting difficulty—from the time of the Student's initial SBLC meeting on August 22, 2025 until the filing of this complaint on October 22, 2025—these behaviors were interfering with the Student's ability to make expected progress in the general education curriculum. However, without data—apart from outside evaluations indicating a medical diagnosis for a learning disability and a recommendation that the Student should be screened by ADHD—the District did not immediately share the Parent's suspicions and was reluctant to immediately suspect the Student as disabled and entitled to special education in large part because the Student had not previously been identified as student with a disability eligible for special education services prior to enrolling in the District and did not have an existing IEP. The District was responsive to the Parent's concerns and prudently imposed data collection periods to determine whether the Student was exhibiting observable behaviors that informed the District to reasonably suspect that the Student is a student with a disability requiring special education rather than immediately evaluating the Student without sufficient data. By gathering data through the District's general education PBIS program and—as it began gathering information about the circumstances surrounding the Student's behaviors and academic difficulties—progressing to Tier 2 interventions, the District was better able to discern whether a disability was present or rule out the Student's difficulties to transition were not due to lack of exposure.

Based on the information presented, the Department concludes the allegation that the District used interventions to delay the Student's evaluation and failed to timely identify and evaluate the Student, is unsubstantiated.

IV. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations as set forth in the Louisiana Bulletin 1706 with respect to the allegations presented in this matter. Therefore, this investigation is hereby closed and no additional action is required.

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-32 [REDACTED]

I. Introduction

On October 22, 2025, the Louisiana Department of Education ("Department") received a formal complaint from [REDACTED], on behalf of a minor child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Lafayette Parish School System ("District"). The Complainant requested that the Department initiate an investigation pursuant to Louisiana Bulletin 1706 §§151–153.

II. Statement of the Case

In the complaint, the Complainant alleged that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Complainant alleged that the District failed to conduct an initial evaluation of the Student when presented with information that it should have reasonably suspected a disability, including but not limited to a written parent request, prior psychological and/or medical documentation, and persistent behavior concerns and discipline referral(s).

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between October 23, 2023, and October 22, 2025. The Complainant submitted exhibits labeled PA-GA 1 through PA-GA-12e, and the District submitted exhibits labeled SB-Exhibit-1 through SB-Exhibit-8. The undersigned investigator reviewed the complaint, the District's written response, and all documentation submitted by both parties. Based on a comprehensive review of the record and the applicable legal standards, the following findings of fact and conclusions of law are made.

III. Findings of Fact

The Student entered the United States [REDACTED], after relocating from another country. On July 17, 2025, the School District issued an English Learner (EL) Student Placement letter indicating that the Student's English proficiency would be assessed within 30 days of enrollment. According to the Student's transcript, the Student's official enrollment date was August 7, 2025, which coincided with the first day of the District's 2025–2026 school year.

On August 26, 2025, the District convened a School Building Level Committee (SBLC) meeting attended by the Parent and District staff. The meeting documentation reflects that the SBLC convened due to early teacher concerns regarding reading and social-emotional functioning and contemplated whether the Student should be considered for an initial Section 504 evaluation or a special education referral. The SBLC reviewed available information, including early classroom performance data, universal screening results, teacher observations, and parent input. Teacher information documented that the Student was adjusting to classroom routines and that behavior had improved over a short period of time with redirection and supportive interaction. The record also reflects that the Student was newly identified as an English Learner and was in the early stages of English language acquisition.

The Parent provided medical and developmental documentation originating outside the United States reflecting a private diagnosis of [REDACTED] and reported that the Student had received certain supports in their home country, though the record did not include documentation specifying the nature or extent of those services. The District acknowledged the private diagnosis, considered it during the SBLC process, and proceeded with a Section 504 evaluation. On the same day, the District developed a developed a Section 504 Individual Accommodation Plan identifying [REDACTED] as a qualifying impairment affecting major life activities, including social interaction and executive functioning. The Parent participated in the evaluation and development process.

The record includes an ELPA21 Reporting Form dated September 5, 2025, reflecting domain scores indicating a "Progressing" level of English proficiency. Later correspondence contains differing information regarding the administration of the Student's English language proficiency screener and suggests the Student initially had difficulty completing the screener.

In September 2025, the SBLC reconvened to address math concerns and initiated Tier 2 math interventions. On September 15, 2025, the Student received one discipline referral related to peer interaction during a group activity. Following the close of the first nine-week grading period in early October 2025, the Student's report card reflected academic difficulty across multiple subject areas.

On October 10, 2025, the Parent submitted a written request for a special education evaluation under IDEA. The District responded by indicating the request would be reviewed through the SBLC process and that the SBLC would reconvene to consider current data, interventions, and progress monitoring. On October 22, 2025, the Complainant filed the instant state complaint alleging a violation of Child Find. On October 28, 2025, after the complaint was filed, the District obtained parental consent to initiate a special education evaluation.

IV. Conclusions of Law

a. Applicable Law

Under the Individuals with Disabilities Education Act (IDEA), public agencies must ensure that all children with disabilities residing within their jurisdiction who are in need of special education and related services are identified, located, and evaluated. This obligation—referred to as Child Find—is codified at 20 U.S.C. § 1412(a)(3) and implemented through 34 C.F.R. § 300.111(a). A student is eligible for special education under IDEA if the student has a qualifying disability, and, by reason thereof, needs special education and related services. This two-prong eligibility standard is set forth in 20 U.S.C. § 1401(3)(A) and implemented in 34 C.F.R. § 300.8(a)(1).

Louisiana implements these federal requirements through Bulletin 1706. Under Bulletin 1706 §111(A), each public agency must identify, locate, and evaluate each student with a disability residing within its jurisdiction who is in need of special education and related services, including by documenting ongoing identification activities to identify, locate, and evaluate each student who is suspected of having a disability and in need of special education and related services. Bulletin 1706 §905 defines a “Student with a Disability” as a student who has one of the enumerated disabilities and who, by reason thereof, needs special education and related services. Determinations regarding disability and the nature and extent of special education and related services must be made through evaluation and eligibility procedures conducted in accordance with Bulletin 1706 §§305 through 307. Bulletin 1706 §303 further clarifies that screening conducted for instructional purposes is not an evaluation for special education eligibility.

Bulletin 1508 provides additional guidance regarding the Child Find responsibilities local educational agencies (LEA) and the use of general education problem-solving processes. Bulletin 1508 §103(A) requires each LEA to identify, locate, and evaluate all students with exceptionalities residing in the district who are in need of special education and related services; to do so, LEAs must implement a practical method for identification and maintain documentation of ongoing Child Find activities, including for children not enrolled in school. Bulletin 1508 §§301 and 303 describe the role of Response to Intervention and the School Building Level Committee in reviewing student data and general education interventions to inform decisions regarding whether a referral for evaluation is warranted.

b. Analysis

The issue presented is whether, during the relevant period, the District failed to satisfy its Child Find obligations by not initiating a special education evaluation. Under IDEA and Bulletin 1706 §111(A), a district’s duty to evaluate is triggered when the district has reason to suspect that a student has a disability and, by reason thereof, needs special education and related services.

The Student enrolled in the District after recently arriving in the United States and was identified as an English Learner. The record reflects that the District received private medical documentation indicating a [REDACTED]. While such information is relevant to a district’s consideration of a student’s needs, the existence of a medical diagnosis alone does not establish eligibility under IDEA or require the immediate initiation of a special education evaluation.

The School Building Level Committee meeting held on August 26, 2025, occurred early in the Student’s enrollment, at a time when the District had limited instructional exposure to the Student and minimal performance data. The information reviewed included early classroom observations, limited graded coursework, universal screening information, and parent input. Teacher reports reflected that the Student was adjusting to classroom routines, demonstrating behavioral improvement with supports, and responding to redirection. The Student was also in the early stages of language acquisition following recent arrival to the United States. Based on the information available at that point, the District conducted a Section 504 evaluation, acknowledged the [REDACTED], and implemented accommodations to address identified social-emotional and executive functioning needs. This course of action reflects that the District responded to observed needs and did not disregard the Student’s disability-related information.

Following the August 26, 2025 meeting, the District continued to monitor the Student’s progress and convened additional SBLC meetings as new concerns arose, including academic concerns addressed through general education interventions. As the school year progressed and additional instructional data became available, the Student’s academic performance reflected increasing difficulty. On October 10, 2025, the Parent submitted a

written request for a special education evaluation, and the District responded that same day and proceeded to consider the request.

Based on the totality of the record, the District did not violate its Child Find obligations under IDEA or Bulletin 1706 §111. Child Find determinations must be based on what a district knew or reasonably should have suspected at the time decisions were made. Here, the record reflects that the District responded to emerging concerns by implementing interventions, monitoring the Student's progress, and convening School Building Level Committee meetings. While the Student entered the District with a private [REDACTED] and later exhibited academic difficulties, these occurred in the context of limited instructional exposure, English language acquisition, and evolving performance data. The record does not demonstrate that the District acted unreasonably or failed to fulfill its Child Find obligations during the relevant period. Accordingly, the Department concludes that this allegation is **unsubstantiated**.

V. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations as set forth in the Louisiana Bulletin 1706 with respect to the allegations presented in in the complaint at issue. Therefore, this investigation is hereby closed and no additional action is required.

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-33 [REDACTED]

I. Introduction

On November 4, 2025, the Louisiana Department of Education ("Department" or "LDOE") received a formal complaint from [REDACTED] ("Complainant" or "Parent") on behalf of [REDACTED] minor child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Allen Parish School Board ("District"). The Complainant requested that the Department initiate an investigation pursuant to Louisiana Bulletin 1706 §§151–153.

II. Statement of the Case

In the complaint, the Parent alleged that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Parent alleged that the District failed to provide the Student with a free appropriate public education (FAPE) and committed multiple violations of the IDEA. In [REDACTED] complaint and subsequent submissions, the Parent raised concerns regarding the District's response to an incident described by the Parent as an assault by school personnel, alleged retaliation, attendance matters, communication barriers, IEP development and implementation, reevaluation, placement, and access to education records.

Following receipt of the complaint, the Department issued a complaint notice identifying the allegations subject to investigation. Consistent with Bulletin 1706 §§151–153, the Department limited the investigation to the following IDEA issues raised in the original complaint:

1. Whether the District failed to develop and implement an individualized education program (IEP) reasonably calculated to enable the Student to make progress in light of the Student's circumstances;

2. Whether the District failed to initiate a reevaluation in response to changes in the Student's needs;
3. Whether the District improperly changed the Student's placement or service delivery on or around September 19, 2025; and
4. Whether the District failed to timely provide education records necessary for parental participation.

The Parent and the District submitted extensive documentation during the course of the investigation, including materials addressing events both before and after the complaint filing date. The Department reviewed all submissions for relevance and scope in accordance with applicable law.

III. Scope of Investigation

The Parent filed the present complaint on October 23, 2025. Under Bulletin 1706 §152(C), the Department may investigate only those alleged violations that occurred not more than two years prior to the date the complaint was received. Accordingly, the review period for this investigation is October 24, 2023 through October 23, 2025. Alleged violations or events occurring outside that timeframe are beyond the scope of this investigation.

The Department acknowledges that the Parent's complaint and subsequent submissions describe serious concerns, including allegations characterized by the Parent as "assault" and "abuse" by school personnel. The Department does not make findings regarding those allegations. The Louisiana Department of Education is not a law enforcement agency or judicial body and does not have jurisdiction to investigate or adjudicate allegations of criminal conduct, abuse, or civil rights violations. Such matters may be addressed through other appropriate authorities, including law enforcement agencies, child protection authorities, local school board processes, or the U.S. Department of Education's Office for Civil Rights, as applicable.

During the course of the investigation, both parties submitted documents and written statements addressing events that occurred after the complaint filing date, including IEP meetings and communications in November 2025. While the Department reviewed these submissions for contextual understanding, events occurring after October 23, 2025 were not investigated and were not considered as a basis for findings of noncompliance pursuant to Bulletin 1706 §152(C).

Additionally, the Parent submitted supplemental written responses asserting new allegations not raised in the original complaint, including claims related to notice, retaliation, email access, and additional procedural concerns. Because these assertions were not included in the original complaint and were not identified in the complaint notice issued under Bulletin 1706 §§151–153, they are outside the scope of this investigation and are not addressed in this decision. Nothing in this decision precludes a party from filing a separate complaint regarding new allegations within applicable timelines.

IV. Findings of Fact

The Student was determined eligible for special education and related services under the exceptionality of Developmental Delay based on an initial evaluation completed on May 29, 2024. The Student began receiving special education services in August 2024.

Following the eligibility determination, an initial individualized education program (IEP) was developed, and the Parent provided written consent for the initial provision of special education and related services.

On April 25, 2025, the District convened an IEP Team meeting to review the Student's IEP. The Parent received prior written notice of the meeting, attended the meeting, and signed the IEP. The stated purpose of the meeting was to review the Student's progress and continue special education and related services.

The April 25, 2025 IEP documented the Student's present levels of academic achievement and functional performance based on evaluation data, classroom observations, and progress monitoring tools, including the Developmental Profile-4 and Teaching Strategies GOLD. The IEP identified needs in the areas of communication, pre-academic readiness, social-emotional development, self-help/adaptive skills, and motor development.

The April 25, 2025 IEP described the Student's strengths, including early cognitive and fine motor skills such as counting, letter recognition, puzzle completion, and problem-solving, as well as areas of need that affected participation in preschool activities without supports.

The IEP noted behavioral concerns, including difficulty sharing with peers, running from staff, grabbing objects without permission, and becoming upset when redirected or denied preferred items. The IEP indicated that the Student had no office disciplinary referrals and that behaviors were being monitored through parish-wide PBIS supports.

The April 25, 2025 IEP included measurable annual goals in the areas of communication, pre-academic readiness, social-emotional skills, self-help skills, and motor skills. The IEP also included accommodations such as visual supports, modeling, multisensory instructional strategies, simplified language, and assistance with transitions.

Under the April 25, 2025 IEP, the Student was to receive special education instruction for 30 minutes per session, five days per week, and speech-language pathology services for 30 minutes per session, two days per week. The IEP reflected placement in a preschool setting with participation in general education activities and receipt of special education and related services.

Progress reports for the first nine-week grading period, dated October 9, 2025, reflected varying levels of progress toward the Student's annual goals. The reports documented sufficient progress in self-help skills, including increased ability to indicate the need to use the restroom, and insufficient progress in social-emotional, academic, and motor goal areas, with behavioral factors noted as interfering with consistent data collection.

The October 9, 2025 progress reports further documented emerging skills in letter recognition and communication, including attempts to increase verbalizations, gestures, and nonverbal communication strategies, while noting that consistent progress monitoring was limited by behavioral challenges.

During the fall 2025 semester, the Student's teacher communicated with the Parent regarding the Student's classroom participation and progress. The teacher's communication reflected that academic reporting at the preschool level was based on developmental progress rather than traditional grading.

On September 12, 2025, the District provided the Parent with written notice of an IEP Team meeting scheduled for September 19, 2025, to amend the Student's IEP. The Parent electronically signed the notice, indicated participation by telephone conference, and waived the 15-day prior notice requirement.

On September 19, 2025, the IEP Team convened with the Parent participating by telephone. The IEP Team amended the Student's IEP to increase the amount of special education instruction provided to the

when a student's behavior impedes learning. Progress reports dated October 9, 2025, corresponding to the end of the first nine-week grading period, documented that behavioral challenges interfered with consistent progress monitoring in certain areas. Consistent with Bulletin 1706 §324(B), the District reviewed the Student's progress and revised the IEP in September 2025 by increasing special education service minutes in response to the Student's needs.

Bulletin 1706 does not require that an IEP eliminate behavioral challenges or guarantee progress. The record reflects that the District monitored the Student's progress and revised the IEP as appropriate based on available data.

Based on the record, the Department finds that the District developed and implemented an IEP that was reasonably calculated to enable the Student to make progress in light of ■ circumstances. Accordingly, the record does not support a finding that the District failed to develop or implement an appropriate IEP in violation of Bulletin 1706 §§112, 320, or 324. Allegation 1 is unsubstantiated.

Allegation 2

Bulletin 1706 §304 requires a public agency to conduct a reevaluation if conditions warrant it, or if the child's parent or teacher requests one. A reevaluation may not occur more than once per year unless the parent and public agency agree otherwise and must occur at least once every three years unless both parties agree that it is unnecessary.

In determining whether a reevaluation is warranted, the IEP Team must review existing evaluation data and decide whether additional data are needed to determine the child's educational needs, continued eligibility, or the appropriateness of the special education and related services provided, consistent with Bulletin 1706 §§304–306. A reevaluation is not required if the IEP Team concludes that the existing data are sufficient to address the child's needs through IEP review and revision.

The Student's most recent evaluation was completed on May 29, 2024. At the April 25, 2025 IEP Team meeting, the IEP Team reviewed existing evaluation data, progress monitoring information, and classroom observations and continued the Student's eligibility under the exceptionality of Developmental Delay. The record reflects that the District addressed the Student's behavioral and instructional needs through IEP revisions and an increase in special education service minutes in September 2025, rather than by initiating a reevaluation at that time.

While the Parent later requested a reevaluation, documentation reflecting formal reevaluation discussions and requests occurred after the complaint was filed on October 23, 2025. Pursuant to Bulletin 1706 §152(C), events occurring after the complaint filing date are outside the scope of this investigation and were not considered as a basis for findings of noncompliance.

Based on the record within the applicable review period, the Department finds that the District did not fail to initiate a reevaluation in violation of Bulletin 1706 §§304–306. Allegation 2 is unsubstantiated.

Allegation 3

Bulletin 1706 §116 requires that placement decisions be made by a group of persons, including the parent, and be based on the child's IEP. Bulletin 1706 §§114 and 115 require that placement decisions ensure education in the least restrictive environment and be made from a continuum of alternative placements. Not every change in services constitutes a change in placement; the analysis focuses on whether the

Student in response to instructional and behavioral considerations. The amendment increased special education services to 180 minutes per session, five days per week, while continuing speech-language services.

The District issued prior written notice on September 19, 2025, proposing the IEP amendment and describing the basis for the decision, including the Student's performance, behavior, and need for increased instructional support. The notice reflected that the Parent participated in the meeting by telephone.

The Student's eligibility classification remained unchanged following the September 19, 2025 IEP amendment.

On September 24, 2025, the Parent submitted a written request for student records via email to District personnel, seeking access to educational records and related documents. On September 29, 2025, the District acknowledged receipt of the request and indicated that the request would be forwarded to appropriate departments for processing.

Email correspondence dated October 16 and October 17, 2025 reflects that the District made student records available to the Parent and documented that the Parent picked up flash drives containing records on October 16, 2025. In subsequent written submissions, the Parent asserted that she was unable to access some or all of the files provided on the flash drives.

V. Conclusions of Law

Allegation 1

Under Bulletin 1706 §112, each public agency must ensure that an individualized education program (IEP) is developed, reviewed, and revised in accordance with Bulletin 1706 §§320 through 324. Bulletin 1706 §320 defines the required components of an IEP, including present levels of academic achievement and functional performance, measurable annual goals addressing the student's identified needs, a description of how progress toward those goals will be measured and reported, special education and related services, accommodations, and the projected frequency, location, and duration of services. Bulletin 1706 §324 governs the development, review, and revision of those components, including consideration of the student's strengths, the concerns of the parents for enhancing the education of their child, evaluation results, and the student's academic, developmental, and functional needs. The legal inquiry is whether the IEP is reasonably calculated to enable the child to make progress in light of the child's circumstances, not whether it guarantees particular outcomes.

The record reflects that the District convened an annual IEP Team meeting on April 25, 2025, with the Parent in attendance, and developed an IEP based on evaluation data, classroom observations, and progress monitoring information. Consistent with Bulletin 1706 §320 and §324, the April 25, 2025 IEP documented the Student's present levels of academic achievement and functional performance and reflected the Parent's stated concerns regarding speech and peer interactions. The IEP included measurable annual goals in communication, pre-academic readiness, social-emotional development, self-help/adaptive skills, and motor development, as well as accommodations and special education and related services designed to support the Student's access to the general education curriculum, consistent with Bulletin 1706 §320.

The record further reflects that the IEP Team considered the Student's behavioral needs. Bulletin 1706 §324(A)(2)(a) requires the IEP Team to consider the use of positive behavioral interventions and supports

student's overall educational program and least restrictive environment have been materially altered outside the IEP Team process.

The record reflects that the District provided the Parent with written notice of an IEP Team meeting scheduled for September 19, 2025, and that the Parent indicated she was unable to attend in person but elected to participate by telephone and waived the advance notice period. Bulletin 1706 §322(C) requires a public agency to use other methods to ensure parent participation when a parent cannot attend an IEP Team meeting in person, including participation by conference telephone call. Bulletin 1706 §328 further permits the use of alternative means of participation, such as conference calls, by agreement of the parent and the public agency. The IEP Team convened on September 19, 2025, with the Parent participating by telephone, and amended the Student's IEP through the IEP Team process to increase special education instruction to 180 minutes per session, five days per week, while continuing speech-language services. The Student's eligibility classification and general placement category remained unchanged.

The District issued prior written notice describing the proposed amendment and the basis for the decision, including the Student's behavioral and instructional needs, consistent with Bulletin 1706 §503. The Parent participated in the meeting and signed the IEP documentation. The record does not reflect that the District unilaterally changed the Student's placement or implemented services outside the IEP Team process.

Accordingly, the Department finds that the District did not improperly change the Student's placement or service delivery in violation of Bulletin 1706 §§114–116 and §322(C). Allegation 3 is unsubstantiated.

Allegation 4

Bulletin 1706 §502 guarantees parents the opportunity to examine all education records relating to their child and to participate meaningfully in educational decision-making. Bulletin 1706 §613(A) further requires that a participating agency permit parents to inspect and review education records without unnecessary delay and in no case more than 45 days after the request has been made.

The record reflects that the Parent submitted a written request for student records on September 24, 2025, and that the District acknowledged receipt of the request on September 29, 2025. Email correspondence dated October 16 and October 17, 2025 reflects that the District documented making records available to the Parent prior to the filing of the complaint on October 23, 2025. The Parent later asserted that she was unable to access some or all of the files provided on the flash drives.

Even assuming the accuracy of the Parent's assertion that she experienced difficulty accessing files provided on October 16 or 17, 2025, the evidence does not reflect that the District refused to permit inspection or review of education records or failed to act within the timeline established by Bulletin 1706 §613. The Parent's request was made on September 24, 2025. The 45-day outer limit for compliance under §613(A) had not elapsed at the time the Parent filed the present complaint and raised concerns regarding access.

Bulletin 1706 §613(B) further provides that the right to inspect and review records includes the right to request explanations or interpretations of the records and the right to request copies where failure to provide copies would effectively prevent access. The record does not reflect that the Parent was denied the opportunity to request clarification, alternative access, or additional copies of records within the applicable timeframe. Rather, the record reflects ongoing communication and continued availability of records.

Based on the record, the Department finds that the District did not refuse or unreasonably delay access to education records and did not exceed the 45-day timeframe at the time the complaint was filed as established by Bulletin 1706 §613. Accordingly, the record does not support a finding of noncompliance with respect to access to education records. Allegation 4 is unsubstantiated.

VI. Conclusion

The Department determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed, and no additional action is required.

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-34 on behalf of C.I.**

I. Introduction

On October 24, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153 on behalf of their child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Allen Parish School System ("District").

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Consent

Whether the District failed to obtain informed consent from the Parent prior to conducting an evaluation or reevaluation of the student.

2. Notice

Whether the District failed to provide Prior Written Notice and a copy of the procedural safeguards notice when proposing or refusing actions related to the student's services, placement, or evaluation.

3. Parental Participation Placement

Whether the District failed to provide the Parent a meaningful opportunity to participate in educational decisions regarding the student.

4. FAPE

Whether the district failed to provide the student with a free appropriate public education (FAPE) by not implementing necessary supports and related services, including but not limited to paraprofessional support and occupational therapy.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **October 24, 2025**. Therefore, the investigation was limited to alleged violations of law that occurred between **October 25, 2023**, and **October 24, 2025**.

III. Findings of Fact

At all times relevant to this complaint, the Student was enrolled at a District school. The Student qualifies for special education under the exceptionality of Autism and has been receiving special education services since September 1, 2022, with the Student's most recent evaluation conducted on May 25, 2023. These services address academic, fine motor skills and language deficit needs through special education instruction, speech therapy (ST) and occupational therapy (OT) as well as Adaptive Physical Education (APE) services. The Student also has an individual behavior plan that was implemented in January of 2024 and continued into the 2025-2026 school year with monthly behavioral meetings with the Parent. The Student is nonverbal and interacts orally very little, primarily communicating through non-verbal gestures. The student requires paraprofessional assistance throughout the school day during instructional time, but requires one-to-one paraprofessional assistance during general education push-in, specials, lunch, arrival/dismissal, and transitions to and from class.

The Student attends school three days a week for 370 minutes a day and receives three sessions of 285 minutes of Special Education instruction in the Special Education setting. The Student receives weekly OT, ST and APE in the Special Education setting for 30 minutes of each related service with the exception of ST services occurring twice per week.

The Parent reported that on September 5, 2025 they received a phone call from the District stating the Student would be reevaluated, but did not specify what areas the Student would be assessed. The Parent alleged they did not receive any prior written notice (PWN) from the District and was given no further consent materials, clear explanations in a manner the Parent could understand or any other information regarding any reevaluation. Moreover, the Parent reported they did not sign any documentation granting permission for evaluation and were not provided a copy of the procedural safeguards. They also alleged no written information regarding testing dates, evaluators or targeted areas were communicated to them. According to the Parent, the District did advise the evaluation would be completed before November 17, 2025 and an IEP meeting would be held to review the results.

By email dated September 5, 2025, the District issued a parental notification PWN through DocuSign, an electronic signature platform, seeking the Parent's consent to reevaluate the Student for continued need for special education and related services. The PWN contained a proposed date to convene an IEP meeting for November 17, 2025 that would serve to discuss the results of the reevaluation with the parent's participation to determine continued eligibility and to review and amend the IEP based on those results. As indicated in the PWN, the reevaluation would consist of review of: existing evaluation data and information provided by the parent; the Student's progress toward measurable annual goals; current classroom-based local or state assessments and observations; and, other test and evaluation procedures the IEP team and Pupil Appraisal staff deemed necessary. The PWN contained an embedded link to the procedural safeguard notice booklet, but the District also sent a separate email containing a copy.

That same day, the Parent signed and returned the PWN. On the signature page of the PWN, the Parent checked a box to confirm their attendance to the proposed November 17, 2025 meeting, but did not check the box confirming consent to the testing. Having received the signed PWN, the District initiated the reevaluation. On September 10, 2025 the Parent participated in a parent interview conducted by the District's school social

worker as well as the adaptive behavior assessment with the District's diagnostician. Following these events and during an internal review, the District discovered the Parent had not checked the consent box on the signature page of the PWN. Believing this procedural defect ultimately reflected a lack of valid, written consent, the District then contacted the Parent to remedy this procedural omission, but was ultimately unable to obtain the checked box.

By email dated October 6, 2025, the Parent submitted a written request to the District's Pupil Appraisal team requesting additional support services for the Student, which included the following:

1. A one-to-one paraprofessional to support the Student throughout the school day;
2. OT support for the Student
3. ABA therapy in the school setting to support the Student;
4. Detailed information regarding any evaluation process including the type of evaluation, start and end dates, names and credentials of the evaluators, and areas of testing and assessment instruments used.

Additionally, the Parent expressed their belief these supports would assist the Student in increasing access to the general education curriculum and included their formal request for an IEP meeting to review and implement the supports.

On October 24, 2025 the Parent filed a complaint against the District alleging violations of IDEA and applicable state laws.

Conclusions of Law

Allegation 1, 2(a) & 3: Consent, Notice and Parental Participation related to Student's reevaluation

The Parent alleges that the District (1) failed to obtain informed consent prior to conducting the reevaluation (2) (a) failed to issue a PWN and the required procedural safeguard notice proposing to reevaluate the Student and (b) failed to issue a PWN in response to the Parent's October 6, 2025 IEP request. By virtue of the failure to provide a PWN for the reevaluation, the Parent alleges the District (3) failed to provide the Parent meaningful opportunity to participate in the reevaluation.

In an effort to resolve these matters with clarity, allegations 1, 2(a) and 3 will be discussed together. Allegation 2(b) will be discussed separately.

Louisiana Bulletin 1706 § 304(A) requires that each school district in Louisiana conduct a reevaluation of each student with a disability if the district determines that a reevaluation is necessary to determine appropriate services for the student or if the student's parent requests a reevaluation. In line with IDEA, Bulletin 1706 further requires that the district obtain the parent's informed written consent before conducting an initial evaluation or a reevaluation to determine a student's eligibility or continued need for special education and related services. Bulletin 1706 §504 also requires public agencies to provide prior written notice to parents before the agency proposes or refuses to initiate or change the identification, evaluation, or educational placement of the student, or the provision of a free appropriate public education (FAPE), and to ensure that parents receive a copy of their procedural safeguards at specified points so they are informed of their rights and available dispute-resolution options.

In addition, Louisiana Bulletin 1706 §322 requires public agencies to take steps, including providing written notice of meetings early enough to ensure an opportunity to attend, to ensure that parents have the opportunity to participate in meetings regarding the identification, evaluation, and educational placement of their child and the provision of FAPE. This includes the parent's participation in the reevaluation process itself, as well as in the IEP team meeting at which reevaluation results are reviewed and educational decisions about the student's program and services are made.

The Parent's complaint alleged that the District failed to obtain the required consent because parental notification

PWN and the required procedural safeguard notice were never provided to them. However, the District submitted to the record a DocuSign final audit report evidencing that the Parent received a written parental notification PWN on September 5, 2025. The record also established that following this, the District provided opportunities to the Parent to engage in the reevaluation process, which the Parent accepted evidenced by their participation in a parent interview on September 10, 2025 with a District social worker and contributions to the 211 item questionnaire in the completion of the adaptive behavior assessment.

Thus, as it relates to the allegations 2(a) and 3, the record demonstrates the Parent received notice and participated in the reevaluation process. Thus, the Department finds that allegations 2(a) and 3 are unsubstantiated.

As it relates to the issue of consent, the District appropriately disclosed that, despite the Parent's electronic signature on the September 5th PWN, the Parent did not check the consent box on the signature page. This disclosure requires the Department to clarify how informed written consent was nevertheless obtained.

The Parent's consent was sufficiently informed. The notice clearly communicated the District's intent to reevaluate the Student and its desire to obtain the Parent's consent to do so. It also notified the Parent that the November 17th IEP meeting was scheduled in anticipation of the completion of the reevaluation and convened to review the results so the IEP team could develop the Student's IEP accordingly. On page 1, the District marked the first and second line items on the page. These items related to (1) discuss results of the evaluation and participation in the eligibility determination and (2) the review and amending of the existing IEP. On page 2 of the PWN, the District made only one selection along with the applicable subparts, which included administering additional assessments as deemed necessary (provided below).

- Reevaluate your child's continued need for special education and related services.
Your permission is requested for the reevaluation. The evaluation procedures we plan to use include the following:
- A review of existing evaluation data, including evaluations and information provided by you.
 - A review of your child's progress toward meeting the measureable annual goals.
 - A review of current classroom-based local or state assessments and classroom-based observations.
 - A review of age-appropriate transition assessments related to training, education, employment and where appropriate, independent living skills, vocational and transition needs for an IEP in effect when the child turns 16 years old (or younger, if deemed appropriate by the IEP team).
 - Other tests and evaluation procedures that the IEP team and Pupil Appraisal staff decides are necessary.

While the consent box remained unchecked on the signature page, the Parent provided their e-signature and indicated they planned to attend the IEP meeting to review results of the reevaluation (provided below).

Student's Name: [REDACTED]

Please check the appropriate spaces, sign and return to:
Name: L. Brunet

Pertains to your child:

- I have received a copy of *Louisiana's Educational Rights of Children with Disabilities*.
Note: Parent(s)/guardian(s) of a child with a disability should receive a copy annually at the IEP meeting, as well as (1) the first time the child is referred for evaluation; (2) the first time a complaint is filed; (3) whenever a parent asks for a copy.
- I plan to attend the meeting to discuss the evaluation results at the time and place indicated in the notification letter. I plan to bring _____ additional person(s) with me.
- I am unable to attend the meeting to discuss the evaluation results at the time and place indicated in the notification letter. The best day and time for me are _____.
- I am unable to attend the meeting to discuss the evaluation results scheduled, in person, but I would still like to participate by telephone conference. Please call me at (____)____-____ at the date and time specified.
- I give permission for you to conduct the reevaluation and any additional tests that may be needed.
- I give permission for you to conduct any additional tests that may be needed for an addendum to the IEP in the area(s) of _____.
- I plan to attend the IEP Team meeting at the time and place indicated in the notification letter. I plan to bring _____ additional person(s) with me.
- I am unable to attend the IEP Team meeting at the time and place indicated in the notification letter. The best day and time for me are _____.
- I am unable to attend the IEP Team meeting scheduled, in person, but I would still like to participate by telephone conference. Please call me at (____)____-____ at the date and time specified.
- I give permission for you to invite the adult service agency (ies) listed on page 3 because they may be responsible for providing or paying for transition services.
- I give permission for you to excuse the attendance of the IEP participants as noted on page 3.

If you have any special needs, please indicate them here: _____

Parent(s)/Guardian(s) Signature [REDACTED] Date: Sep 5, 2025

In light of the unchecked box, the District asserted its reliance on the Parent's participation as "tacit" consent to the reevaluation until the form could be corrected. However, the Department finds that it's unnecessary to determine whether the Parent gave 'tacit consent' because the Parent's explicit written consent was secured when the Parent signed the PWN. It was subsequently ratified with participation consistent with consent. Nothing in the record would have put the District on notice that the Parent objected to or withdrew their participation from the reevaluation process they had taken an active role in. The District's reliance on the signed PWN is exactly what the signature requirement is designed to do—document consent in order to move forward. Failure to check the consent box alone cannot be argued to vitiate the Parent's written signature and cannot serve to retroactively invalidate the Parent's participatory actions. At the point the District discovered the unchecked box and took efforts to correct the record, it was a procedural defect that was evidence of an inconsistency with the Parent's actions—not evidence to discard the Parent's consent. The form error presented no substantive issue and did not result in any educational harm.

Based on the record developed in this case, the Department finds the Parent provided their fully informed written consent to conduct the Student's reevaluation. Thus, allegation 1 is unsubstantiated.

Allegation 2(b): Parent's October 6, 2025 IEP meeting request

The record reflects that, at the time of the filing of the complaint, the Parent's October 6, 2025 request had remained unanswered for 18 days. The Parent alleges the District's delay constitutes a failure to provide a timely PWN in response to their request for required supports and an IEP meeting.

In instances where a parent requests an IEP meeting and the District agrees to convene a meeting, Bulletin 1706 requires the District to provide written notice of the meeting early enough to ensure the Parent's participation. If the District refuses to convene a meeting, the written notice must be issued in a *reasonable* timeframe, but does not provide a *specific* timeframe by which the district must respond. Further, Louisiana Bulletin 1706 § 324(B)(1)(b) requires school districts to review and, if necessary, revise the IEP of a student to address parent-provided information about the student. Moreover, Bulletin 1706 § 504 ensures that prior written notice (PWN) is provided to parents before the agency proposes or refuses "to initiate or change the identification, evaluation, or educational placement of the student or the provision of a free appropriate public education to the student.

The Parent's email included requests for supports and services currently required within the Student's IEP and provided no evidence that the services were not being implemented or any information that would otherwise warrant the District to determine an IEP review was necessary. While the District could have provided a PWN before the filing of the complaint, the record lacks sufficient evidence regarding the circumstances of the 18 day delay to enable the Department to conclude that the District violated its obligation to respond within a reasonable timeframe. An IEP meeting was already scheduled for November and the District had been actively engaged with the Parent through the Student's ongoing reevaluation.

As of the date of the filing of this complaint, the evidence does not support a finding that the District failed to provide PWN within a reasonable time. Allegation 2(b) is unsubstantiated as the record lacks evidence of unreasonable delay.

Allegation 4: FAPE

The Parent alleged that the District failed to provide the student with a free appropriate public education (FAPE) by not implementing the requested, necessary supports and related services, including but not limited to one-to-one paraprofessional support and occupational therapy. As mentioned above, no evidence was submitted in contradiction to the record that would support the Parent's claim that these supports—and thus the IEP—were not being implemented such that the Student was denied FAPE.

Based on the records submitted, the District has ensured that the Student receives all currently required supports and related services—namely, paraprofessional and OT services—in the least restrictive environment. The District acknowledged the Parent's desire for the Student to receive one-to-one support; however, the District maintains the position that paraprofessional services are provided to the Student throughout the day as the IEP requires and is sufficiently meeting the Student's needs.

Thus, the record does not support a conclusion that the District failed to provide the Student with FAPE by failing to provide the special education instruction or services to the Student as required by the IEP. As such, the Department finds allegation 4 is unsubstantiated.

I. Conclusion

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-35 on behalf of** [REDACTED].

I. Introduction

On October 24, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153 on behalf of their child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Allen Parish School System ("District").

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. IEP Implementation

Whether the district failed to implement the student's IEP as written by discontinuing documented behavioral interventions—specifically, a Check-In/Check-Out support plan.

2. Notice

Whether the District failed to provide Prior Written Notice when proposing or refusing actions related to the student's services, placement, or evaluation.

3. Parental Participation

Whether the District failed to provide the Parent a meaningful opportunity to participate in educational decisions regarding the student.

4. Discipline

Whether the District failed to comply with requirements regarding disciplinary removals of students with

disabilities.

5. Education Records

Whether the district failed to timely provide education records necessary for parental participation.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on **October 24, 2025**. Therefore, the investigation was limited to alleged violations of law that occurred between **October 25, 2023**, and **October 24, 2025**.

III. Findings of Fact

At all times relevant to this investigation, the Student was enrolled in a District school and receiving special education services under the exceptionality of Speech Impairment-Articulation with a medical diagnosis of ADHD. The Student receives speech therapy services weekly for 30 minutes in the special education setting.

Based on parent/teacher communications in 2024 regarding ongoing academic concerns related to the Student's medical ADHD diagnosis, social behavior and communication concerns, the Student was evaluated to determine whether the Student met criteria for special education services. An initial evaluation was completed on January 6, 2025, which indicated the Student met criteria for the exceptionality of Speech and Language Impairment-Articulation. Following the evaluation, the District issued a parental notification/prior written notice (PWN) to the Parent that same day and conducted a telephone conference to review the results of the evaluation. On January 10, 2025, the District issued a parental notification/PWN proposing a meeting with the Parent on January 27, 2025 to develop the Student's individualized education program (IEP). In creating the Student's initial IEP at this meeting, the IEP team acknowledged that the Student's behavior was currently managed under the District's general education positive behavior intervention services (PBIS)—a tiered, general education behavioral intervention program available to all students. The Student was currently under a Tier II behavior intervention plan receiving Check-In Check-Out services (CICO). The IEP team observed the Student's CICO data and determined that the interventions were adequately addressing the Student's social-emotional developmental needs and effectively decreasing the frequency and intensity of the Student's problem behaviors because the Student had no referrals since the Tier II interventions were put in place.

Since the Student's needs were being met through interventions, the Team agreed the Student's behavior would continue to be managed through the District's PBIS intervention program. The IEP Team then created language and behavioral goals for the Student. In regards to the behavioral goal, the Student would be observed demonstrating improved behavior that would be measured by a decrease in disruptions and outbursts while showing an increase in positive behavior with two objectives. A progress report dated October 10, 2025 showed the Student had no behavior infractions, indicating the Student had 100% meeting one of the objectives to maintain self-control within speech therapy sessions.

By email dated October 16, 2025 the Parent requested "student records" from the District's custodian of records. As of the date of the filing of this complaint on October 24, 2025, the District had not responded to the request.

Allegation #1, 2 and 3: Failure to Implement IEP, Notice and Parental Participation

The Parent alleges that the District (1) failed to implement the Student's IEP by unilaterally discontinuing the provision of CICO services as required by the Student's IEP. In discontinuing the CICO services without notifying the Parent, they further allege the District (2) failed to provide prior written notice prior to the discontinuation of these interventions. By discontinuing the services without providing notice, the parent also alleges the District (3) failed to provide the Parent with a meaningful opportunity to participate in the decision to no longer provide CICO. Upon its investigation, the Department finds the record does not support these allegations.

Louisiana Bulletin 1706 § 324(A)(2) requires that each public agency, "in the case of a student whose behavior impedes his or her learning or that of others, consider the use of positive behavioral interventions and supports, and other strategies, to address that behavior" and develop the IEP considering the academic, developmental, and functional needs of the student. Once an IEP is developed, any changes to the IEP may be made either by the entire IEP Team at an IEP Team meeting, or the parent and district may agree without an IEP Team meeting in accordance with § 324. As provided in 1706 § 322, districts are required to take steps, including the provision of meeting notices, to ensure that parents are reasonably informed of circumstances that impact the education of their child and participate in IEP team meetings. Louisiana Bulletin 1706 §504 requires that written notice be provided to the parents of students with disabilities in a reasonable amount of time, and no less than 10 days, before the public agency proposes or refuses to initiate or change the identification, evaluation, or educational placement of the student.

IEP Implementation

The Parent alleges that CICO services had been discontinued; however, the record developed in this investigation does not support the Parent's conclusion. CICO logs provided by the District documented daily CICO services through the date of the filing of the Complaint. It appears the Parent's assertion that the District failed to implement the Student's IEP arises from their interpretation of the Student's IEP as requiring CICO interventions as the Student's support services because the IEP contains an extensive discussion of the Student's receipt of CICO and an agreement to continue these services.

The January 27, 2025 IEP on page 2 under "Evaluation/Reevaluation Results" provides:

*"Behavior intervention data indicates EN's social-emotional developmental needs are being met through **school-based intervention** (Check-In/Check-Out) at Kinder Elementary School...Check-In/Check-Out appears to be effective in decreasing the frequency and intensity of EN's problem behaviors as he has had no office referrals after these were put in place. It does not appear that EN's academic progress within the general curriculum will be seriously impeded by his social-emotional development."*

And further, the Team noted:

"Behavior concerns are managed through Check-In/Check-Out at school."

Additionally, as noted on page 3 under "Behavior":

"[The Student] follows the parish-wide PBIS Program and is monitored on a continuous basis. EN is receiving behavior support with Tier 2 interventions. A Check-In/Check-Out Behavior Education Program was implemented on 11-11-24, to prevent the development or decrease the frequency and/or intensity

of EN's current problem behaviors that have been documented as unresponsive to Tier I practices and systems."

As written and evidenced by the IEP, the Team decided to continue utilizing the intervention services to address the Student's behavior and did not incorporate an individualized behavior plan into the IEP. Thus, the IEP would not be the mechanism by which the Student would receive the CICO services. The Team then created a behavior goal that would include monitoring the Student's behavior.

The Department finds the record supports the District's assertion that the inclusion of the discussion of the CICO data was not an adoption of the general education CICO intervention services into the IEP as required supports. The Team found the Student's needs were being successfully met through interventions because the student had not received any referrals during the school year thus, the data did not support the need for an individualized behavior plan. Instead, only a standard behavior goal was included as part of the Student's IEP. The District was not obligated to provide CICO services under the IEP because they were not incorporated as specially designed, required supports to be provided through an IEP.

Ultimately, the Student's behavior supports were received through the PBIS program and the data collected through that program would serve to gauge the success of the Student's IEP behavior goal. Progress reports submitted to the record demonstrated the Student met the behavior goal. The record is void of any evidence that the District otherwise failed to implement the Student's IEP. Thus, the Department finds the District did not discontinue required supports and thereby, fail to implement the Student's IEP. Allegation 1 is unsubstantiated.

Notice and Parental Participation

Under Bulletin 1706 § 504 a district must issue PWN when it proposes or refuses an action that materially impacts how the student's special education and related services are designed, delivered or denied in order to provide FAPE.

As earlier established, the District did not discontinue the CICO services through the District's PBIS program and was not required to provide CICO services via the Student's IEP. Based on the record, the Student experienced no change of placement or IEP services. Because the Student's interventions were being provided through general education PBIS, any changes to those services would not constitute a change in the provision of FAPE triggering procedural safeguards such as prior written notice and a meaningful opportunity for parental participation.

The Department concludes that the District made no changes to the Student's provision of services and therefore, no circumstance existed in which the District was required to issue prior written notice and provide an opportunity for parental participation. Therefore, allegations 2 and 3 are unsubstantiated.

Allegation #4: Discipline

The Parent alleges that over the past two school years the Student experienced numerous absences and disciplinary removals directly related to the Student's disability. They further allege that the Student has repeatedly been sent home early or suspended without notification, and instead, only discovered these dismissals through a portal rather than official notice.

Under Bulletin 1706 §530, a district is authorized to remove a student with a disability who violates a code of student conduct from his or her current placement to an appropriate interim alternative educational setting, another setting, or suspension, for not more than 10 consecutive school days (to the extent those alternatives

are applied to students without disabilities), and for additional removals of not more than 10 consecutive school days in that same school year for separate incidents of misconduct (as long as those removals do not constitute a change of placement under §536).

The Department conducted its review of attendance and discipline records that fell within the limitations imposed by Bulletin 1706 152(c) and the filing of this complaint. Only discipline records falling between October

25, 2023 and October 24, 2025 were considered. Based on the attendance and discipline records—which documented any removals—for the 2024-25 school year, the Student incurred five discipline referrals and received one 1-day out of school suspension, with two absences. The records did not reflect any additional suspensions, whether partial or full day, in-school or out-of-school. The Student’s discipline history reflected the one 1-day out of school suspension present on the attendance record. In the 2025-26 school year, the Student received no discipline referrals or suspensions and had incurred one absence, which appeared to be unrelated to discipline.

In support of the Parent’s assertion regarding disciplinary removals, the Parent provided an email log consisting of screenshots that evidenced communications between the Parent and District, but did not provide the content of any of those correspondences. As such, the Department was unable to discern which emails present in the log (if any) pertained to the Student’s discipline or any disciplinary removals. The email records from 2024 preceded the Student’s evaluation and IEP. Those records appeared to serve as the basis in which the District agreed to evaluate the Student. None of these emails evidenced unlawful disciplinary removals in violation of Bulletin 1706 § 530 or removals exceeding 10 cumulative days resulting as a manifestation of the Student’s disability. No removals exceeded 10 cumulative days triggering the manifestation determination review required under §532.

The Department finds the Parent’s allegation that the District failed to comply with requirements regarding disciplinary removals of students with disabilities and therefore, denied the Student a Free and Appropriate Public Education, is unsubstantiated.

Allegation #5: Education Records

The Parent alleges that the District failed to timely provide the Student’s records in response to their October 16, 2025 email request. This allegation is based on the Parent’s understanding that Bulletin 1706 § 613 requires the district to answer the Parent’s request within 10 days of the receipt of the request.

However, the current effective version of Bulletin 1706 § 613 contains no such requirement. 1706 § 613(A) provides that the parent’s right to inspect and review education records that are collected, maintained, or used by a public agency concerning their child. Such records must be made available without unnecessary delay and, in any event, no later than forty-five (45) days after a request is made.

The District had 45 days to provide records responsive to the Parent’s request. At the time of the filing of the complaint, the District had been in receipt of the request for eight days, a timeframe well within the 45 day requirement of § 613(A). Thus, allegation #5 is unsubstantiated.

Conclusion:

The Department has determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed and no additional action is required by the Parent or the District.

Sincerely,

RE: Formal Complaint Investigation on behalf [REDACTED]
Dismissal of Special Education Formal Complaint No. **56-C-36**

Dear Parties:

On October 28, 2025, the Louisiana Department of Education received notification that indicated that parties to this formal complaint reached a mutually agreeable resolution and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint **56-C-36**. No further action is required by either party.

Sincerely,

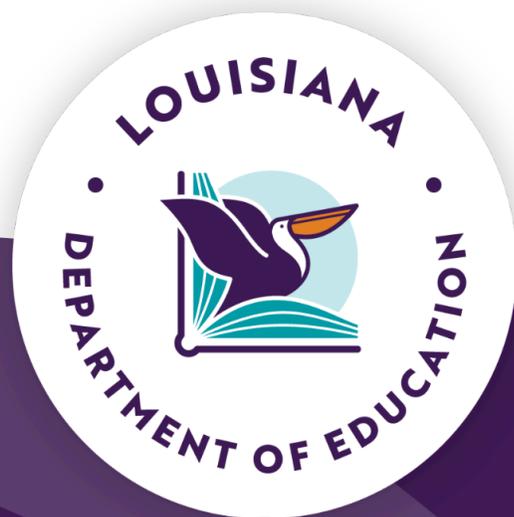

Domonique Dickerson

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-38 [REDACTED]

I. Introduction

On November 4, 2025, the Louisiana Department of Education ("Department" or "LDOE") received a formal complaint from [REDACTED] ("Complainant" or "Parent") on behalf of their child ("Student"), who, at all times relevant to the complaint, was enrolled in a school under the jurisdiction of the East Baton Rouge Parish School System ("District").

II. Statement of the Case

In the complaint, the Parent alleged that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Parent alleged that the District (1) improperly changed the Student's placement or service delivery on or around October 30, 2025; and (2) failed to provide timely and sufficient notice and ensure meaningful parental participation in decisions concerning the Student's identification, evaluation, or provision of a free appropriate public education (FAPE).

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between **November 3, 2023**, and **November 4, 2025**.

III. Findings of Fact

On March 13, 2025, the IEP Team convened and developed an Individualized Education Program for the Student. The meeting was attended by the Parent, a regular education teacher, a special education

teacher, a speech-language pathologist, and the school principal serving as the officially designated representative. The Parent signed the March 13, 2025 IEP.

The March 13, 2025 IEP included two service timeframes. Under Timeframe A, beginning March 13, 2025, the IEP provided occupational therapy services in individual and group settings for thirty minutes, two times monthly, in the special education setting. It also provided special education instruction in individual and group settings for fifteen minutes four times weekly in the regular education setting and for forty-five minutes five times weekly in the special education setting. Speech-language pathology services were provided in individual and group settings for thirty minutes six times monthly.

Under Timeframe B, beginning August 5, 2025, the IEP provided occupational therapy services in individual and group settings for thirty minutes two times monthly in the special education setting. The IEP provided special education instruction in individual and group settings for ninety minutes five times weekly in the regular education setting. The IEP identified the Student's placement as inside the regular class for eighty percent or more of the school day. The March 13, 2025 IEP was in effect at the beginning of the 2025–2026 school year and remained the operative IEP through the date the complaint was filed.

From August 14, 2025 through November 4, 2025, the District maintained service and inclusion logs documenting the provision of special education supports to the Student. These logs identified the instructional setting as regular education inclusion. The logs described instructional activities such as teacher modeling, guided peer discussion, and assisted reading, primarily within English Language Arts. The logs reflect continuity in the setting in which services were delivered during this period.

On August 15, 2025, the Parent sent written correspondence to school and district personnel raising concerns related to a peer interaction that occurred during a class. In that correspondence, the Parent requested that the Student's schedule be changed for second and fourth periods to avoid interaction with a specific peer, that a safety plan be considered and documented, and that an IEP Team meeting be convened to address safety concerns. On the same date, the Student's schedule was adjusted to address the Parent's request regarding class periods. In subsequent written correspondence, the assistant principal explained that the Student's placement was determined based on the March 13, 2025 IEP, which identified placement inside the regular classroom for eighty percent or more of the day. The assistant principal stated that the Student was scheduled inside the regular classroom setting consistent with the IEP.

On September 2, 2025, the District issued a Prior Written Notice in response to parental requests regarding compensatory services and funding of a private placement. The notice proposed the provision of compensatory services for a specified period and declined to fund the private placement, stating that the District was able to provide a free appropriate public education.

On October 22, 2025, a Behavior Support Plan was developed for the Student, and the plan was revised on October 30, 2025. The Behavior Support Plan identified the Student's exceptionality as autism and addressed needs related to communication, emotional regulation, coping skills, and behavioral supports. The plan included proactive strategies, reactive strategies, calming breaks, positive reinforcement, and crisis intervention procedures. The Parent initialed each page of the Behavior Support Plan and signed the plan on October 31, 2025.

On October 30, 2025, the District convened an IEP Team meeting to discuss proposed amendments to the March 13, 2025 IEP. The meeting sign-in sheet was signed by the Parent, regular education teachers,

special education teachers, related service providers, a special education supervisor, and an assistant principal serving as the officially designated representative of the District, among others. A draft IEP was developed proposing changes to services beginning October 30, 2025. The Parent did not sign or consent to the draft IEP.

Following the October 30, 2025 IEP meeting, the Parent submitted written correspondence dated November 3, 2025 expressing disagreement with the draft IEP and raising concerns regarding documentation, placement terminology, and the role of the assistant principal. Subsequently, the District issued multiple Prior Written Notices and response letters dated November 11, 2025 addressing the Parent's correspondence and requests. One notice addressed a parental request to change the Student's math teacher and declined the request, explaining the basis for maintaining the existing assignment. Another notice addressed the Parent's November 3 correspondence and proposed reconvening the IEP Team to continue discussion of unresolved issues from the October 30 meeting. Additional correspondence addressed the Parent's assertion that the assistant principal's role as officially designated representative constituted a conflict of interest and stated that no unilateral placement decision had occurred. The November notices did not state that any placement or service delivery changes had been implemented and did not identify any change to the Student's placement prior to November 4, 2025.

IV. Conclusions of Law

Allegation 1

Under Louisiana Bulletin 1706, educational placement decisions must be made by a properly constituted IEP Team and must be based on the student's individualized needs as reflected in the IEP. Bulletin 1706 §§114–116 establish that placement refers to the student's placement on the continuum of alternative as determined by the IEP Team and documented in the IEP, including the extent to which the student is educated with nondisabled peers.

The record demonstrates that the Student's placement for the 2025–2026 school year was established by the March 13, 2025 IEP, which the Parent signed. Pursuant to Bulletin 1706 §§323 and 324, this IEP constituted the operative placement and service plan unless and until it was revised by the IEP Team. That IEP included two service timeframes and both identified the Student's placement as inside the regular class for eighty percent or more of the school day. Under Timeframe B, beginning August 5, 2025, special education instruction was delivered in the regular education setting. The record demonstrates that from August 14, 2025 through November 4, 2025, service and inclusion logs reflect delivery of special education supports in the regular education setting. The logs do not reflect removal to a separate special education classroom, instruction in a more restrictive environment, or a reduction in the Student's participation in regular education below the level specified in the IEP. Under Bulletin 1706 §115, the provision of supplementary services in conjunction with regular class placement is expressly contemplated as part of the continuum of alternative placements and does not, by itself, constitute a change in placement.

On October 30, 2025, the District convened an IEP Team meeting to discuss proposed amendments to the March 13, 2025 IEP. The Parent attended and participated in that meeting. A draft IEP was developed, but the Parent did not consent to or sign the proposed revisions. The record does not reflect that the District implemented the proposed changes following the October 30 meeting through the date the complaint was filed. Rather, the records reflects that the March 13, 2025 IEP remained operative through the date the complaint was filed.

The Prior Written Notices issued in September 2025 and November 2025 further support the conclusion that no placement change occurred. The September 2025 notice addressed compensatory services and a request for private placement funding and did not propose or refuse a change in placement. The November 2025 notices addressed parental correspondence related to the October 30 meeting and proposed reconvening the IEP Team to continue discussions given the documented parental concerns.

Based on the foregoing, the evidence does not establish that the District changed the Student's placement or service delivery on or around October 30, 2025. Accordingly, allegation 1 is not substantiated.

Allegation 2

Louisiana Bulletin 1706 §§502 and 322 require that Parents be afforded meaningful participation through opportunities to attend meetings, provide input, and engage in the decision-making process regarding their child's identification, evaluation, educational placement, and provision of FAPE. Bulletin 1706 §504 requires districts to provide prior written notice when proposing or refusing to initiate or change the identification, evaluation, educational placement of a child, or the provision of FAPE.

The record demonstrates that the Parent participated in the March 13, 2025 IEP meeting and signed the resulting IEP. The Parent also participated in the October 30, 2025 IEP meeting, expressed disagreement with the proposed draft IEP, and declined to agree to the proposed revisions. The ability to attend meetings, express disagreement, and withhold agreement while continuing to engage in the IEP process reflects meaningful parental participation as contemplated by Bulletin 1706 §§502 and 322.

The District also responded to the Parent's concerns through written correspondence and the issuance of multiple Prior Written Notices. On September 2, 2025, the District issued a Prior Written Notice addressing the Parent's requests for compensatory services and private placement funding, identifying the actions proposed and refused, the basis for the decisions, the information relied upon, and the Parent's procedural safeguards. Following the October 30 meeting and the Parent's November 3 correspondence, the District issued additional Prior Written Notices in November 2025. Those notices addressed specific Parental requests, including a request to change a teacher, concerns raised in the November 3 correspondence, and allegations regarding a conflict of interest. One notice proposed reconvening the IEP Team to continue discussion of unresolved issues from the October 30 meeting.

The issuance of these notices demonstrates that the District provided written notice when proposing or refusing actions and informed the Parent of the basis for its decisions and available procedural safeguards, consistent with Bulletin 1706 §504. Disagreement with the substance of a draft IEP, dissatisfaction with proposed outcomes, or opposition to the District's responses does not, by itself, constitute a denial of meaningful parental participation where the Parent is afforded the opportunity to attend meetings, present concerns, and receive written explanations of the District's decisions. The record reflects that the Parent was afforded such opportunities throughout the relevant period.

Based on the foregoing, the evidence does not establish that the District failed to provide timely and sufficient notice or denied the Parent meaningful participation in decisions concerning the Student's identification, evaluation, placement, or provision of FAPE. Accordingly, allegation 2 is not substantiated.

V. Conclusion

The Department determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed, and no additional action is required.

Respectfully,

Domonique Dickerson

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-41 on behalf of** [REDACTED]

Introduction

On **November 13, 2025**, the complainant (“Parent”) submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education (“the Department”) and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153 on behalf of the child (“Student”), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Jefferson Parish Public Schools (“District”).

Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act (“IDEA”), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department’s implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Evaluation

Whether the District failed to ensure that the Student’s evaluation was sufficiently comprehensive to identify all special education and related service needs, whether or not commonly associated with the Student’s identified disability category.

2. IEP

Whether the District, in developing the Student’s education program, failed to consider the Student’s individual needs as identified through a sufficiently comprehensive evaluation, prior to the removal or reduction of special education and related services.

As the Department’s assigned investigator, I have reviewed the complaint and the supporting documents submitted. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records

and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153.”The Department received the complaint on November 13, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between November 14, 2023, and November 13, 2025.

Findings of Fact

The Student was enrolled in a school within the District by August of 2025. The Parent provided a narrative that the Student has a medical diagnosis of developmental delay, failure to thrive and selective mutism. The Student’s physician recommended weekly occupational therapy to address sensory concerns that limit their ability to eat and grow. The Student is also overseen by Children’s Hospital feeding team. At the time of the filing of the complaint, the Student was undergoing an evaluation for Autism performed by the Children’s Hospital. The Parent expressed a belief that the feeding and sensory issues along with the selective mutism are part of an Autism Spectrum Disorder diagnosis suspected by the Parent. Previously, the Student was enrolled in Early Steps and received weekly speech, occupational and physical therapy along with special education services. Prior to enrollment, an initial evaluation was initiated on March 19, 2025 and the evaluation report disseminated on May 27, 2025. Based on the narrative provided by the complainant, an evaluation was conducted on the Student by the District whereby the District determined the Student did not have “ASD”. According to the Parent, the Student’s Individualized Education Program (IEP) did not include speech therapy services and occupational therapy services were included only yearly.

On November 13, 2025, the Parent filed the complaint that formed the basis of the Department’s investigation.

The District failed to submit a written, narrative response to the allegations in the complaint.

Conclusions of Law

When a formal complaint investigation commences, Louisiana Bulletin §153(A) mandates that the Department issue a written notice to the local educational agency (“LEA”) outlining: (1) the specific information needed by the Department to conduct an independent investigation of the complaint; (2) the reasonable timelines for submitting the requested information; (3) and the LEA’s the opportunity to respond to the complaint, including, at its discretion, the opportunity to propose a resolution.

In this case, on November 17, 2025, the Department provided written notice to the District outlining: (1) the allegation asserted by the Complainant and to be investigated; (2) the timeline for submitting a written, narrative response to the allegation in the complaint; (3) the timeline for submitting proposed corrective action plan to resolve the complaint; and (4) the relevant documentation needed by the Department to conduct its investigation. Finally, the written notice issued by the Department stated that failure to provide a response may result in a negative inference.

On December 19, 2025, the Department provided a written notice memorializing an extension of the decision date as agreed to by the Parties as they were actively engaged in resolution and proposing to convene an IEP Facilitation meeting on January 28, 2026. This notice included an updated submission deadline for the Parties to submit final documentation. Subsequently, the facilitated IEP was held on January 28, 2026. The submission deadline passed and the District neither denied nor disputed the allegations, nor did it timely submit any evidence to verify that the Student received services pursuant to the Student’s IEP as written. Consequently, a negative inference was drawn leading to the acceptance of the Complainant’s allegations as fact.

Information provided to the Department on February 24, 2026, indicated that the Parties reached an agreement as to resolutions of the allegations during the facilitated IEP; however, the Parent chose not to withdraw their complaint. The District agreed to arrange for another District to conduct an Individual Educational Evaluation (IEE). This action

adequately addresses allegation #1 and is substantially equivalent to any corrective action that would have been ordered had the allegation been substantiated.

With respect to allegation #2, the District agreed to increase the Student's OT services from thirty minutes per month to thirty minutes per week and will provide language interventions pending completion of the IEE. Moreover, the District agreed to regularly send the Parent logs for all services provided and voluntarily commenced remedial measures to provide compensatory Adapted Physical Education (APE) services.

Based on the record, the Department finds the District in noncompliance and requires documentation demonstrating implementation of the agreed-upon terms from the facilitated IEP and related services. Although the District has expressed its willingness to undertake corrective measures, formal verification of compliance is required to ensure that all obligations are fully satisfied.

Required Corrective Actions

Based on the remedial measures agreed to within the facilitated IEP and communicated to the Parent, the District shall implement the following corrective actions:

1. The District shall provide training to all District staff that have regular contact with the Student addressing the legal requirements concerning IEP implementation. As soon as possible and no later than **May 22, 2026**, the District shall submit:
 - a. a copy of sign-in sheets and training materials documenting the District's provision of training to relevant staff addressing the legal requirements concerning FAPE and IEP implementation.
2. The District shall provide a copy of the agreed upon IEE to the Department no later than **May 22, 2026**.
3. On or before **March 27, 2026**, the District shall convene a meeting with the Parents and appropriate members of the Student's IEP Team to (1) identify the amount of services that should have been provided to the Student and (2) develop a plan to provide the Student with compensatory services that are reasonably calculated to provide the Student with the educational benefit that was denied as a result of services.
4. If the District and the Parents are able to agree to a compensatory service plan, the District shall provide the Department with a copy of the plan by **April 3, 2026**, and shall implement the plan as soon as possible.
5. If the District and the Parent are unable to agree to a compensatory service plan, the District shall submit a proposed plan to the Department for approval by **April 10, 2026**. The Department will review the proposed plan and determine its sufficiency within two business days of receipt from the District; the Department may amend the plan as necessary to ensure compliance with State and federal law.
6. The District shall implement the compensatory services plan. By **May 22, 2026**, the District shall provide evidence of compliance with the compensatory services plan by:
 - a. Providing service logs verifying
 - i. the Student has received the occupational therapy services and language interventions;
 - ii. the Student has received compensatory services for the APE services.
 - b. Progress monitoring reports provided to the District and the Parent detailing the Student's receipt of compensatory services in accordance with this corrective action plan.

The Department will issue a letter of closure in this complaint upon the District's satisfactory completion of the required actions.

Sincerely,

Lindsey P. Dupree, Attorney

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-4 [REDACTED]

I. Introduction

On December 10, 2025, the Louisiana Department of Education (“Department” or “LDOE”) received a formal state complaint from [REDACTED] (“Complainant” or “Parent”) [REDACTED] (“Student”), a student enrolled in a school under the jurisdiction of St. Tammany Parish Public Schools.

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act (“IDEA”), 20 U.S.C. § 1400 et seq.; its implementing regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and the Department’s implementing regulations set forth in Louisiana Bulletin 1706—Regulations for Implementation of the Children with Exceptionalities Act. Specifically, the Parent asserts that: (1) the District failed to implement the Student’s individualized education program (IEP); (2) the District impeded the Parent’s meaningful participation in decisions regarding the Student’s education program; (3) the District failed to adhere to required disciplinary protections for students with disabilities in connection with the November 14, 2025 incident and any subsequent response or removal from the educational setting; and (4) the District failed to provide the Parent access to education records following a written request submitted on or about November 17, 2025.

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between **November 26, 2023, and November 25, 2025**.

III. Findings of Fact

The Student is eligible for special education and related services under the exceptionality of Specific Learning Disability in the areas of basic reading skills, reading comprehension, reading fluency, mathematics calculation, mathematics problem solving, and written expression.

The Student's IEP Team met on May 9, 2025, to develop the Student's annual IEP. That IEP was subsequently amended on August 29, 2025; September 23, 2025; October 8, 2025; October 17, 2025; November 18, 2025; and December 12, 2025. The Parent attended and participated in each IEP meeting and amendment meeting.

On August 29, 2025, the IEP Team convened to review data and determine the Student's eligibility under the April Dunn Act. The Parent received prior notice of the meeting and participated. The Prior Written Notice issued following that meeting reflects that the Team determined the Student was eligible for consideration under the April Dunn Act based on prior LEAP 2025 scores. During the meeting, the Parent expressed a desire for the Student to utilize available resources and pursue a traditional diploma pathway.

On September 23, 2025, the IEP Team reconvened to discuss modifications to mental health provider (MHP) service minutes, instructional minutes, and review of the Behavior Intervention Plan (BIP). Documentation reflects that adjustments to counseling service minutes were discussed. The meeting concluded before finalizing all agenda items, including completion of the BIP review.

On October 8, 2025, the IEP Team met again to address parental concerns and continue review of the BIP. The Parental Notification of IEP Meeting identified the purpose as developing, reviewing, or amending the IEP and determining placement. The notice listed invited participants, provided information regarding participation options, and referenced procedural safeguards. A Prior Written Notice was issued following the meeting. Documentation reflects that the meeting was paused and reconvened at the Parent's request before all agenda items were finalized. The Team discussed implementation of accommodations, communication regarding grades, daily behavior tracking, and clarification of language within the BIP regarding the Student's ability to "take a walk." Staff expressed concern that the phrase was vague in light of the Student's history of elopement identified in the Functional Behavior Assessment. No final BIP revisions were adopted at that meeting.

A written parental letter dated October 8, 2025, was included in the IEP documentation. In that letter, the Parent expressed concern that disciplinary actions were occurring without sufficient support to address the underlying causes of the Student's behavior and requested more constructive and supportive interventions moving forward.

On October 17, 2025, the IEP Team reconvened. The Parent received prior notice and participated. The IEP was amended to specify that when the Student is overwhelmed and frustrated and requests to take a walk, a trusted adult, identified as a BEC teacher, MHP, or administrative team member, will be called to meet the Student in a designated area. Meeting documentation reflects that the BIP was reviewed and clarified, adopting the IEP comments by reference. A Prior Written Notice was issued following that meeting. A second parental letter dated October 17, 2025, was included in the record, reflecting continued parental concerns regarding behavior supports and implementation.

On November 18, 2025, the IEP Team met to finalize revisions to the Student's Behavior Intervention Plan, including revisions to preventative strategies, teaching strategies, reinforcement strategies, response strategies, and methods of measurement and progress monitoring. The Parent received prior notice and participated in the meeting. A Prior Written Notice was issued reflecting the Team's decisions and implementation timeline.

The IEP includes a behavioral goal requiring that, utilizing the techniques and strategies outlined in the Behavior Intervention Plan, the Student will receive fewer than four disciplinary referrals per nine-week grading period. A BIP was initially implemented on May 9, 2025, in conjunction with the annual IEP. The BIP identifies target behaviors including non-compliance, verbal outbursts or aggression, elopement, and physical aggression.

The BIP outlines preventative, teaching, reinforcement, and response strategies. Preventative strategies include check-in/check-out procedures, transition supports, chunking assignments, leadership role opportunities, and calm redirection and prompting. Teaching strategies include social skills coaching, reflective assignments, and self-calming strategies. The BIP permits the Student to request to see BEC staff, administrative staff, or the mental health provider, if available, to talk or take a break in accordance with the October 17, 2025 amendment. Under response strategies, staff are directed to provide prompts to comply with task demands, hold private conversations as needed, allow time for compliance, and provide praise if compliance occurs. If noncompliance continues, staff may document the behavior and offer an alternative assignment. For outbursts, staff are directed to use calm, non-confrontational redirection, minimize attention, and hold private conversations if necessary.

On December 12, 2025, the IEP Team convened at the request of the Parent to review current progress and address ongoing concerns. The Parent received prior notice and participated in the meeting. Documentation reflects that assistive technology concerns were discussed and that an assistive technology screening was initiated. A Prior Written Notice was issued following the meeting.

On November 14, 2025, the October 17, 2025 version of the IEP and BIP was in effect.

Between August 21, 2025, and December 8, 2025, the Student received twenty-one disciplinary referrals. The referrals included ID violations, leaving school or classroom without permission, failure to serve an assigned consequence, unauthorized use of technology, tardiness, disruption, willful disobedience, and disrespect toward authority. The discipline summary for the relevant period reflects zero days of in-school suspension, zero days of out-of-school suspension, zero days of alternative school placement, and zero days of expulsion.

On November 14, 2025, the Student was attending after-school detention. During detention, the Student refused to complete assigned work and was removed from detention.

The District provided documentation demonstrating that teachers were provided updated IEP and BIP materials at the start of the 2025–2026 school year and after subsequent IEP amendments. The documentation includes communications instructing staff to acknowledge accommodations, utilize behavior tracking forms, and implement updated BIP procedures.

On or about November 17, 2025, the Parent requested access to video footage related to the November 14, 2025 incident. On November 19, 2025, the assistant principal completed a Security and Bus Video Archive Request form identifying multiple camera angles and time frames between approximately 3:10 p.m. and 3:34 p.m. on November 14, 2025. The request form indicates that the Parent requested to view the video and that the footage required redaction prior to viewing.

On December 10, 2025, a district production engineer notified the assistant principal by email that the requested footage had been redacted and that a disk would be sent via courier for review with the Parents. On the same day, the assistant principal emailed the Parent indicating that the video was available for viewing and requested dates and times for the Parent to come view the footage. On December 11, 2025, the Parent responded by email stating that she believed the video would be delivered directly from the central office and that, due to the delay and the manner in which the request had been handled, she would not be viewing the video at that time.

IV. Conclusions of Law

Allegation 1

Under the Individuals with Disabilities Education Act, a public agency must make a free appropriate public education (FAPE) available to each eligible child with a disability. Louisiana implements this mandate

through Bulletin 1706 §101, which requires that a free appropriate public education be made available to all eligible students residing in the state between the ages of three and twenty-one. Bulletin 1706 §905 further defines FAPE as special education and related services that are provided in conformity with an individualized education program that meets the requirements of §§320 through 324. Accordingly, a district's obligation to provide FAPE encompasses both the development of an IEP that complies with regulatory requirements and the faithful implementation of that IEP in practice.

Bulletin 1706 §320 defines an individualized education program as a written statement that includes, among other required components, a statement of the special education, related services, and supplementary aids and services to be provided to the student, as well as the projected beginning date, frequency, location, and duration of those services. An IEP must therefore articulate the services, accommodations, and supports that the student is entitled to receive.

Bulletin 1706 §323(A) requires that, at the beginning of each school year, each public agency have in effect an IEP for each student with a disability within its jurisdiction. Bulletin 1706 §323(D) further requires that the student's IEP be accessible to each regular education teacher, special education teacher, related services provider, and any other service provider responsible for its implementation, and that each such individual be informed of his or her specific responsibilities and the accommodations, modifications, and supports to be provided in accordance with the IEP. These provisions collectively impose an affirmative duty on the District to ensure that the services and supports described in the IEP are actually delivered in practice.

Where a student's behavior impedes the student's learning or that of others, the IEP Team must consider and, when appropriate, implement positive behavioral interventions, supports, and other strategies to address that behavior, as required by Bulletin 1706 §324(A)(2)(a). When a behavior intervention plan is incorporated into or developed in conjunction with the IEP, the District's obligation to implement the IEP in effect extends to the behavioral strategies and supports described in the BIP.

A public agencies failure to implement an IEP constitutes a denial of FAPE when the deviation from the IEP is material—that is, when the services or supports required by the IEP were not delivered or were delivered in a manner inconsistent with the written plan. Minor or technical deviations that do not affect the provision of special education or related services do not rise to the level of a denial of FAPE.

The record establishes that, on November 14, 2025, the October 17, 2025 amended IEP and BIP were in effect. That BIP identified non-compliance and elopement among target behaviors and included preventative, teaching, reinforcement, and response strategies. It further specified that when the Student is overwhelmed and requests to take a walk, a trusted adult, identified as a BEC teacher, mental health provider, or administrative team member, would be called to meet the Student in a designated area. The record further reflects that the Student was removed from detention on November 14, 2025 after refusing to complete assigned work. The Student was not suspended, not removed from his educational placement, and did not lose instructional time that day. The disciplinary summary reflects zero days of in-school suspension, out-of-school suspension, alternative placement, or expulsion during the relevant period.

The Parent alleges that the District failed to implement the Student's behavioral supports during the November 14 incident. However, the complaint record does not establish that the Student requested a break, that staff refused such a request, or that staff failed to utilize the BIP's prescribed response strategies. Nor does the record establish that the Student was deprived of special education instruction, related services, or supplementary aids and services required under the IEP. The documentation demonstrates that the District disseminated updated IEP and BIP materials to teachers at the beginning of the school year and following amendments, and that staff were directed to implement

accommodations and behavior tracking procedures consistent with the IEP. The record does not demonstrate a material deviation from the IEP or BIP requirements on November 14, 2025.

The Parent further asserts that she instructed the principal not to send the Student outside until a parent arrived and that the administrator declined to follow that directive. While the Department acknowledges the Parent's concern, Bulletin 1706 does not require parental approval for routine disciplinary or behavioral management decisions that do not constitute a change of placement. The Student's IEP and BIP do not require parental consent prior to implementation of behavioral response strategies, nor do they condition staff authority to address noncompliance on parent arrival. Parent participation rights under Bulletin 1706 §§322 and 502 apply to meetings regarding identification, evaluation, placement, and the provision of FAPE; they do not extend to real-time administrative decisions during the school day. Because the November 14, 2025 incident did not result in a removal from the Student's educational placement and did not implicate a placement decision under Bulletin 1706, the administrator's decision not to follow the Parent's real-time directive does not establish a failure to implement the IEP or a violation of IDEA procedural safeguards.

Based upon the record in the complaint, the Department concludes that the District did not fail to implement the Student's IEP in violation of Bulletin 1706 §§101, 320, 323, or 324. Accordingly, Allegation 1 is not substantiated.

Allegation 2

Bulletin 1706 affords parents procedural protections to ensure meaningful participation in decisions regarding the identification, evaluation, educational placement, and provision of a free appropriate public education to their child. Under Bulletin 1706 §322, each public agency must take steps to ensure that one or both parents are present at each IEP Team meeting or are afforded the opportunity to participate, including providing timely notice and scheduling meetings at a mutually agreed upon time and place. Bulletin 1706 §502 further requires that parents be afforded an opportunity to participate in meetings concerning identification, evaluation, placement, and the provision of FAPE. When a public agency proposes or refuses to initiate or change identification, evaluation, placement, or the provision of FAPE, it must provide prior written notice meeting the requirements of Bulletin 1706 §504.

A procedural violation results in a denial of FAPE only if the violation significantly impeded the parent's opportunity to participate in decision-making regarding the provision of FAPE, caused a deprivation of educational benefit, or resulted in a deprivation of educational services.

The record establishes that the Parent attended and participated in each IEP Team meeting and amendment meeting held on May 9, August 29, September 23, October 8, October 17, November 18, and December 12, 2025. Documentation reflects that the Parent received prior notice of each meeting consistent with Bulletin 1706 §322 and that Prior Written Notices were issued following each meeting in accordance with §504. The record further reflects that meetings were paused and reconvened to allow continued discussion of concerns; that parental letters were incorporated into the IEP documentation; and that parental concerns were discussed during IEP Team deliberations. This documentation demonstrates that the Parent was afforded repeated and substantive opportunities to present concerns and engage in collaborative discussion regarding the Student's program.

The Parent asserts that the District failed to respond to inquiries and delayed access to information, thereby impeding her ability to participate in decisions. The Parent also alleges that staff behavior during meetings was dismissive and that meetings were rushed. The Department acknowledges these concerns. However, the complaint record does not establish that the Parent was excluded from any IEP Team meeting, denied notice of any meeting, prevented from presenting concerns, or denied the opportunity to request amendments. Nor does the record establish that meetings were concluded without allowing

the Parent to raise concerns or that decisions were made outside of the IEP Team process. To the contrary, the record demonstrates active and ongoing parental involvement, including multiple reconvened meetings and formal amendments addressing behavioral supports and service minutes. The Parent's concerns were documented in writing and considered by the IEP Team. While the Parent may have experienced frustration with the tone or pace of discussions, the record does not establish that her participation rights under §§322 or 502 were curtailed or rendered ineffective.

To the extent the Parent contends that the District's handling of the November 14, 2025 detention incident impeded her participation, the record does not establish that any meeting regarding identification, placement, or FAPE occurred without her participation or without appropriate notice. The Student was not subjected to a change of placement or disciplinary removal triggering additional procedural safeguards under Bulletin 1706 §530. Disagreement with an administrator's real-time disciplinary decision, or dissatisfaction with staff communication, does not, standing alone, establish a violation of the parent participation requirements of §§322 or 502 absent evidence that the Parent was denied participation in a required decision-making process.

Based upon the record in the complaint, the Department concludes that the District did not impede the Parent's meaningful participation in decisions regarding the Student's education program in violation of Bulletin 1706 §§322, 502, or 504. The record reflects that the Parent was afforded notice, opportunity to attend, and meaningful input in all IEP-related decision-making processes during the relevant period. Accordingly, Allegation 2 is not substantiated.

Allegation 3

Bulletin 1706 §530 governs the authority of school personnel to remove a student with a disability for disciplinary reasons and establishes procedural safeguards when removals constitute a change of placement. Under §530(B)(1), school personnel may remove a student with a disability who violates a code of student conduct for not more than ten consecutive school days to the extent those alternatives are applied to students without disabilities. A change of placement occurs only when a removal is for more than ten consecutive school days or when a series of removals constitutes a pattern because the removals total more than ten school days in a school year and are substantially similar in nature as outlined in Bulletin 1706 §536(A).

When a change of placement occurs, the public agency must conduct a manifestation determination within ten school days of the decision to change placement and must review all relevant information to determine whether the conduct in question was caused by, or had a direct and substantial relationship to, the student's disability, or was the direct result of the public agency's failure to implement the IEP in accordance with §530(E). If no change of placement occurs, those additional procedural protections are not triggered.

The record establishes that between August 21, 2025 and December 8, 2025, the Student received twenty-one disciplinary referrals; however, the discipline summary reflects zero days of in-school suspension, zero days of out-of-school suspension, zero days of alternative school placement, and zero days of expulsion. The Student was not removed from his educational placement for any school day during that period. With respect to November 14, 2025, the record reflects that the Student was attending after-school detention, refused to complete assigned work, and was removed from detention.

Removal from after-school detention does not constitute a removal from the Student's educational placement under Bulletin 1706 §530. The record does not establish that the Student was subjected to a disciplinary measure exceeding ten cumulative school days or that a pattern of removals totaling more than ten school days occurred so as to constitute a change of placement under §536(A). Because no

removal rising to the level of a change of placement occurred, the District was not required to conduct a manifestation determination or implement the additional procedural safeguards outlined in §530(E).

The Parent asserts that the District mishandled discipline and failed to follow required procedural safeguards during the November 14 incident. However, IDEA's disciplinary protections are triggered by removals from the educational placement, not by routine behavioral management decisions. In the absence of a suspension, expulsion, alternative placement, or cumulative removals constituting a pattern, the procedural protections specific to disciplinary changes of placement were not implicated.

Based upon the record in the complaint, the Department concludes that the District adhered to the disciplinary protections required under Bulletin 1706 §§530 and 536. The November 14, 2025 incident did not result in a disciplinary removal or change of placement requiring additional procedural safeguards under IDEA. Accordingly, Allegation 3 not substantiated

Allegation 4

Bulletin 1706 §502 provides that parents of a student with a disability must be afforded the opportunity to inspect and review all education records relating to the identification, evaluation, educational placement of the student, and the provision of a free appropriate public education. Bulletin 1706 §613(A) further requires that each participating agency permit parents to inspect and review education records without unnecessary delay, before any meeting regarding an IEP or any hearing pursuant to §§530 through 532, and in no case more than 45 days after the request has been made. The right to inspect and review includes the right to reasonable explanations and interpretations of the records and, where failure to provide copies would effectively prevent the parent from exercising the right to inspect and review, the right to obtain copies. Bulletin 1706 §613(B). When education records contain information relating to more than one student, the parent is entitled to inspect only the information relating to his or her child. Bulletin 1706 §615.

The record establishes that on or about November 17, 2025, the Parent requested access to video footage related to the November 14, 2025 incident. On November 19, 2025, the assistant principal submitted a Security and Bus Video Archive Request identifying specific camera angles and time frames. The request form reflects that the footage required redaction prior to viewing. On December 10, 2025, the district production engineer notified the assistant principal that the footage had been redacted and that a disk would be sent for review with the Parent. On that same date, the assistant principal emailed the Parent indicating that the video was available for viewing and requesting dates and times for the Parent to come review the footage. On December 11, 2025, the Parent responded that she believed the video would be delivered directly from the central office and, due to the delay and the manner in which the request had been handled, she would not be viewing the video at that time.

The timeline reflects that the District responded to the Parent's request and made the video available for viewing twenty-three days after the initial request, well within the 45-day maximum established by Bulletin 1706 §613(A). The record does not establish that any IEP meeting, manifestation determination, disciplinary hearing, or other proceeding occurred between November 17 and December 10, 2025 for which access to the video was required in advance. Accordingly, the evidence does not demonstrate that the District failed to provide access before a required meeting or hearing.

The Parent asserts that the delay and the District's process for viewing the video effectively denied access. However, the record reflects that the video required redaction to protect the personally identifiable information of other students, a step consistent with Bulletin 1706 §615. Once redacted, the District notified the Parent that the footage was available for review and requested dates for viewing. IDEA does not require a district to automatically provide copies of video recordings in every instance; rather, copies must be provided if failure to provide them would effectively prevent the parent from exercising the right

to inspect and review. The record does not establish that the District refused access, imposed impermissible fees, or otherwise prevented the Parent from inspecting the footage. Instead, the Parent declined to view the video after being informed that it was available.

While the Parent expressed dissatisfaction with the manner and timing of the District's response, the evidence does not establish that the District failed to comply with the procedural requirements of Bulletin 1706 §§502 or 613. The District responded to the request, processed the footage for redaction, and made it available within the required timeframe. The Parent's subsequent decision not to view the footage does not convert the District's compliance into a denial of access.

Based upon the record in the complaint, the Department concludes that the District did not fail to provide the Parent access to education records in violation of Bulletin 1706 §§502, 613, or 615.

Accordingly, Allegation 4 is not substantiated.

V. Corrective Action

The Department determined that the allegations in the complaint are not substantiated by the record. Accordingly, this investigation is closed, and no additional action is required.

Respectfully,

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-46 on behalf of** [REDACTED].

I. Introduction

On November 25, 2025, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153 on behalf of their child ("Student"), who, at the time relevant to the complaint, attended Academy of Collaborative Education (ACE) Charter school ("District").

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Evaluation

Whether the School failed to conduct the student's evaluation in accordance with required procedures, including whether the evaluation documentation accurately reflected the conditions under which the evaluation occurred.

2. IEP

Whether the School failed to develop the student's IEP in accordance with required timelines following the completion of an evaluation or a determination that the student needed special education and related services.

3. Parental Participation

Whether the School failed to provide the Parent with a meaningful opportunity to participate in the IEP development process.

4. FAPE

Whether the School failed to provide the student with a free appropriate public education (FAPE).

5. Records

Whether the School failed to provide the Parent with access to the student's education records upon request.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153." The Department received the complaint on November 25, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between November 26, 2025, and November 25, 2025.

III. Findings of Fact

On June 11, 2025, the Parent executed and returned to the District a written consent form permitting the District to conduct a full educational evaluation on the Student to determine eligibility for special education and related services. On this form the District indicated the evaluation would---at minimum---include vision and hearing screening, a review of all screening data, interviews with the student, family and teachers; observations of the student during daily activities; medical and motor assessments; and, other assessments needed during the course of the evaluation. By email dated August 13, 2025, the Parent requested the District provide a copy of the Student's IEP. In response, the District advised the evaluation process was still in process therefore, an IEP had not yet been developed. The District explained the Parent could expect an evaluation report and meeting following the evaluations completion.

By email dated September 8, 2025, the Parent requested a meeting to discuss the Student and subsequently met with the District on September 10, 2025. By email dated September 11, 2025, the Parent requested copies of the evaluations that had been completed through that date and requested no further evaluation conducted without their knowledge or consent. On September 16, 2025, the District notified the Parent the comprehensive evaluation report had been completed and advised a copy of the report along with a draft copy of the IEP would be sent home the following day with the individual that would pick the Student up for therapy. They were further advised a meeting would be held to review and discuss the IEP. In reply, the Parent requested immediate production of the evaluation and expressed their objections to evaluating the Student without their knowledge or consent. That same day, the District provided a list of the assessments that were completed and offered to provide a copy of the signed June 11, 2025 form consenting to the evaluation.

On September 17, 2025, the District provided the Parent---via the individual that picked the Student up from school---the copy of the evaluation report and draft copies of the individualized health care plan (IHP) and individualized educational plan (IEP). By email dated September 19, 2025, the District confirmed with the Parent an IEP meeting to be held September 23, 2025.

On September 23, 2025, the initial IEP meeting was held to review the results of the evaluation, develop the Student's initial IEP and address the Parent's concerns. In attendance was the school principal/official designated representative, the Special Education Coordinator, the Student's classroom teacher, occupational therapist, Speech Language Pathologist, nurse and the Student's parents. Based on the full evaluation disseminated on September 16, 2025, the Student met the guidelines for the exceptionality of multiple disabilities under Louisiana Bulletin 1508. Ultimately, the IEP Team was unable to come to agreement and the meeting concluded with the Parent declining to sign the Student's initial IEP.

Following the IEP meeting, the District emailed the Parent on October 3, 2025 seeking to reconvene the IEP meeting reminding the Parent of the District's inability to begin providing special education services to the Student without the Parent's signed consent to the initial IEP. Beginning with that email and over the next several weeks, the Parent and the District engaged in several unsuccessful attempts to reconvene an IEP Team meeting at a mutually available time.

In separate email threads beginning October 7, 2025 and continuing through November 14, 2025, the Parent sent emails to the Student's classroom teacher seeking explanations for the Student's "F" grades as well as a request to update to the "F" grades to "C" grades on the Student's progress report. The District provided responses on October 10, 2025; October 27, 2025; October 28, 2025, October 29, 2025 and November 14, 2025 and offered to meet to discuss the Student's grading process as it related to the incomplete IEP.

By email dated October 10, 2025, the District explained it had been using Response to Intervention (RTI) services and tracking the Student's performance to determine effective ways to engage the Student. The Student had achieved "C" grades as a reflection of their performance with RTI services however, without an active IEP, the District was limited in modifications that could be provided to support the Student and there was a decrease in the Student's performance without those supports. It was also expressed that the District wanted to move forward with completing the IEP process so the Student could receive special education services to support their performance.

In a same day reply, the Parent requested to know when the grades would be "updated to "Cs." On October 21, 2025, the District sent a reply email explaining the grades would not be changed. The Parent would repeat their email seeking additional explanation by sending multiple follow-up emails from October 21st to October 27th, 2025 directly to the Student's classroom teacher. These follow-up emails contained no new request and served to notify the teacher that a reply email had been received by the Parent blank. The District responded on October 27th, 2025 explaining that until the Student has an IEP, the grades are determined using the general education grading process and further explained grades cannot be adjusted unless a grading error has occurred. The District again extended an invitation to meet to discuss as well as to finalize the IEP to address the Student's performance as it related to grades. On October 28, 2025, the Parent renewed their request and again received a same day response from the District. The Parent continued to email the teacher with the same request on October 31, 2025; November 3, 2025 (twice); November 10, 2025; November 12, 2025; and November 14, 2025. By email dated November 14, 2025, the District again offered to meet in person or by ZOOM and received no response from the Parent. However, on that day, the Parent directed another communication to the Student's teacher.

On November 25, 2025, the Parent emailed the Department the complaint that serves as the basis for this formal complaint.

Conclusions of Law

Allegation

1. Evaluation

Pursuant to Louisiana Bulletin 1706 as outlined in §504(A) and (B) following a request for an initial evaluation to determine if the student is a student with a disability, the district must seek informed parental consent or issue prior written notice (PWN) explaining its refusal. Bulletin 1706 §§305(A) and 305(C)(6) provide that evaluations must be sufficiently comprehensive to identify all of the child's special education and related service needs. Thus, the district must administer the necessary assessments and ensure that all evaluation components are completed.

The Parent's complaint indicated their significant concern for the accuracy of the Speech Therapy evaluation alleging the evaluator included false information that the Student's caregivers were present during the testing when they were not. Based on the Parent's report, the evaluator identified themselves as the 'caretaker' for purposes of the evaluation. Without additional context provided to the Department, the issue appears to be rooted in a difference between the Parent's application and the District's application of the term 'caretaker'. The record is absent sufficient

evidence for the Department to determine whether the inclusion of the term “caretaker” was erroneous under the circumstances. The criteria for eligibility for Speech-Language pathology services outlined in Bulletin 1508 §1515 do not include whether a caretaker was present during evaluation and it is not a factor considered by the IEP Team in determining the Student’s eligibility. Even if the Department determined this was an error—without additional evidence to demonstrate how it materially or substantively affected the evaluation resulting in a deprivation of an educational benefit—it did not serve to render the evaluation wholly unreliable. Results from the evaluation indicated the Student, who is non-verbal, experiences a severe language disorder/delay that impacts their ability to communicate and access the curriculum. Based on that evaluation, the draft IEP proposed that a communication plan be updated by the Student’s speech therapist along with the provision of twice weekly, 30 minute speech therapy sessions and a communication goal.

As a general matter, districts should take every measure to ensure the accurate reporting of the conditions in which an evaluation is administered—including who is present during the evaluations—and correct documentation errors whenever necessary. In this case, however, the record does not support a finding that the inclusion of the information into the evaluation substantively affected the evaluation.

Based on the email communications submitted to the record by the Parent, the Parent made it evident to the District that they believed the assessments that were being conducted as part of the evaluation were without their knowledge or consent. To refute this claim, the District provided a copy of the June 11, 2025 signed consent form, evidencing the Parent consented to the evaluation. Identified within the consent form signed by the Parent was a list of the assessments expected to be conducted during the evaluation. The District’s September 16, 2025 email reminded the Parent of the signed consent form and provided a list of the assessments that were conducted as required under Bulletin 1508 as part of a comprehensive evaluation. It does not appear the Parent notified the District to withdraw that consent prior to the completion of the evaluation. The record establishes that the Parent consented to the evaluation.

The Department finds allegation #1 is unsubstantiated.

2. IEP

Bulletin 1706 § 323(C) requires districts to meet to develop an IEP for a student within 30 days of a determination that the student needs special education and related services. Under 1706 § 301(B) districts must obtain informed parental consent and make reasonable efforts to obtain that consent before the initial provision of special education and related services to the student. Under 301(B)(3)(b), If the parent of a student fails to respond to a request, or refuses to consent to the initial provision of special education and related services, the district will not be in violation of the requirement to provide FAPE to the student because the parent refuses to or fails to provide consent.

Within one week of the dissemination of the evaluation report on September 16, 2025, the Student’s initial IEP meeting was conducted. The District provided the Parent (via the person that picked the Student up from school) copies of the draft IEP and draft IHP the next day, along with a copy of the evaluation (as requested) prior to the IEP Team meeting. The IEP Team met to develop the Student’s IEP with the Parent’s participation, but ultimately the Parent declined to sign the IEP.

Parents are free to refuse to sign a Student’s IEP. However, the refusal or failure to sign to consent to the initial provision of special education and related services is an insurmountable barrier to a district’s ability to implement an IEP. In this case, because the Parent refused to sign the initial IEP, their choice to withhold consent prevented the District from providing the special education and related services the Parent continued to request.

The District made multiple attempts to reconvene the meeting—either in person or by ZOOM—which the Parent did not answer after October 21, 2025. The District’s invitations from October 24, 2025, October 27, 2025, October 28, 2025, October 29, 2025 and November 14, 2025 went unanswered. Despite the reasonable efforts to obtain consent and conducting a timely IEP meeting, the District was unable to complete the Student’s IEP within 30 days because the Parent never authorized it to do so. As such, allegation #2 unsubstantiated.

3. Parental Participation

Bulletin 1706 § 322 requires public agencies to take steps to ensure that parents participate in IEP team meetings. Pursuant to Bulletin 1706 § 502(B)(1), parents must be afforded an opportunity to participate in meetings regarding their child's evaluation, placement, and educational programming.

As it relates to the initial IEP meeting, the Parent was notified of the September 23, 2025 meeting by email dated September 19, 2025. While the Parent did not sign in as an attendee at the initial IEP meeting, the record demonstrates the Parent confirmed they would attend the meeting via email and was in attendance. In their complaint, the Parent asserted they were not provided meaningful opportunity to participate because their requested corrections and modifications to the draft IEP remained unaddressed by the "deadline." The record does not identify the deadline the Parent is referencing therefore, it is unclear to the Department what deadline was pending.

No records were submitted to the Department evidencing requests for modifications that went unanswered. The Parent did, however, submit emails sent to the District expressing their frustration for the lack of an IEP and lack of immediate accommodations for the Student while awaiting the evaluation report. These requests were made prior to the development of the draft IEP and before the Student's IEP meeting. The remainder of the records submitted to the investigation were additional emails arranging for reconvening of the IEP meeting and other requests seeking explanation of the Student's grades. None of these emails evidence that the Parent seeking corrections or modifications to the draft IEP or referencing requests made during the IEP meeting.

Ultimately, the Parent refused to sign the IEP before the conclusion of the meeting. The District then made multiple attempts to reconvene the IEP meeting in order to include the Parent's participation and obtain their consent to its completion. A subsequent IEP meeting would have been the exact opportunity for the Parent to address any requested modifications and clarifications with the entire IEP Team.

The regulatory requirement is for the District to provide a reasonable opportunity for participation, which was satisfied through these efforts. The Parent's unwillingness to accept alternative meeting options does not render the District noncompliant with §322 and §502. Accordingly, the District committed no violation and allegation #3 is unsubstantiated.

4. FAPE

Pursuant to Bulletin 1706, § 101(A)(1) a free appropriate public education (FAPE) must be made available to all eligible students with disabilities in accordance with their IEPs. The failure to fully implement an IEP constitutes a denial of FAPE.

Having determined the Parent withheld consent to initiate the Student's IEP, the Department has finds the District was prevented from implementing special education and related services to the Student. Thus, the District did not fail to provide the Student with FAPE because it had not been authorized to do so. As such, allegation #4 is unsubstantiated.

5. Records

Louisiana Bulletin 1706 § 613(A) establishes a parent's right to inspect and review education records that are collected, maintained, or used by a public agency concerning their child. Such records must be made available without unnecessary delay and, in any event, no later than forty-five (45) days after a request is made. Additionally, § 613(B) extends the parent's rights to request explanations or interpretations of education records, obtain copies of records when failure to provide them would prevent meaningful access, and authorize a representative to inspect and review the records on their behalf.

The Parent made multiple requests for explanations of the Student's "F" grades beginning October 7, 2025 and again on October 10, 2025; October 21, 2025; October 23, 2025; October 27, 2025 (twice); October 28, 2025; October 29,

2025; October 31, 2025; and November 3, 2025 (twice); November 10, 2025; November 12, 2025; and November 14, 2025. In their complaint, the Parent alleges their request for explanation went unanswered. However, the record reflects the District responded and provided explanation five separate times—October 10, 27, 28, 29 and November 14—each well within the 45 day requirement.

The District responded within 3 days of the October 7th request in a reply email dated October 10, 2025 with an explanation to the Parent’s request concerning the Student’s grades. Dissatisfied with the answer, the Parent’s October 10th email requested when the grades would be “updated to “Cs” grades. On October 21, 2025---within eleven (11) days of the request---the District replied explaining the grades would not be changed. Replies containing explanations to the Parent’s multiple follow-up emails from October 21st to October 27th, 2025 were sent by the District on October 27th, 2025, October 28, 2025, October 29, 2025 and finally November 14, 2025. Many of the responses were sent on the same day of the request and all responses were sent well within the 45 day requirement.

Upon inspection of the record, the nature of the Parent’s allegation appears not that the District failed to respond to their requests, but instead rooted in their desire for the response to come specifically from the Student’s classroom teacher. The Parent’s October 28, 2025 email articulated their expectation to receive a detailed response from the teacher despite having received two responses from the teacher in two separate reply emails. This was further evidenced by the Parent’s dismissal of multiple detailed explanations from the District’s SPED Director. In a same day response to the Parent’s email on November 14, 2025, the District again offered to meet in person or by ZOOM to discuss the Student’s grading process (and IEP) and received no response from the Parent. Instead, the Parent directed yet another communication to the Student’s teacher.

The record established the District complied with the relevant provisions Louisiana Bulletin 1706 in its responses to parental request for explanation of the Student’s grades. Allegation #5 is unsubstantiated.

IV. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department’s implementing regulations as set forth in the Louisiana Bulletin 1706 with respect to the allegations presented in this matter. Therefore, this investigation is hereby closed and no additional action is required.

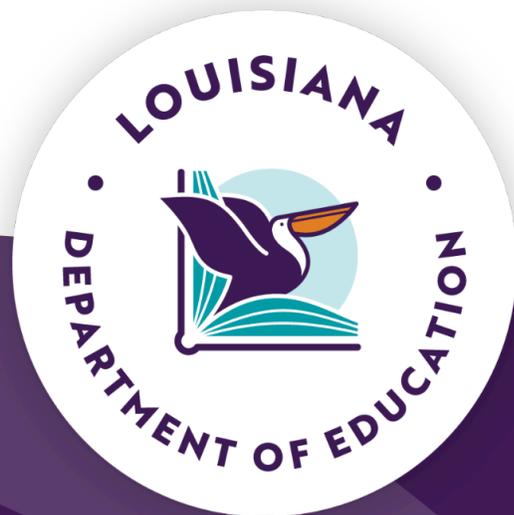

Sincerely,

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-47 [REDACTED]

I. Introduction

On December 1, 2025, the Louisiana Department of Education (“Department” or “LDOE”) received a formal state complaint from [REDACTED] (“Complainant” or “Parent”) [REDACTED] (“Student”), a student enrolled in a school under the jurisdiction of the Lafourche Parish School District (“District”).

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act (“IDEA”), 20 U.S.C. § 1400 et seq.; its implementing regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and the Department’s implementing regulations set forth in Louisiana Bulletin 1706—Regulations for Implementation of the Children with Exceptionalities Act. Specifically, the Parent asserts that the District: (1) failed to ensure that a fully developed and implemented individual education program (IEP) was in place by the student’s third birthday; (2) failed to develop an IEP based on the student’s individual needs; specifically, that the District reduced the Student’s related services—specifically speech therapy—without consideration of evaluative data and documented medical and developmental needs; (3) District failed to provide the parent a meaningful opportunity to participate in the development of the student’s IEP; specifically, that the District failed to provide a draft IEP in advance of the IEP meeting and failed to respond to the parent’s communication attempts in a timely manner; and (4) District failed to comply with procedural requirements following a request to amend the Student’s IEP.

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between December 2, 2023, and December 1, 2025. Events occurring after December 1, 2025 are outside the scope for determining whether a violation occurred within the two-

year limitation period. However, the Department may reference post-filing actions as contextual background. Findings of violation are limited to conduct occurring within the applicable time period.

III. Findings of Fact

The Student was [REDACTED]. On September 5, 2025, the Student's Parent provided written consent for an initial multidisciplinary evaluation. The evaluation was completed and disseminated on October 29, 2025. The evaluation team determined that the Student met eligibility criteria for special education and related services under the exceptionality of Multiple Disabilities, with concomitant impairments qualifying under Autism, Other Health Impairment, and Visual Impairment.

The multidisciplinary evaluation included a psychological assessment, including administration of the ADOS-2; a speech-language assessment, including the REEL-4; an occupational therapy assessment utilizing the DAYC-2 and Sensory Profile 2; an adapted physical education assessment utilizing the Louisiana Motor Assessment for Preschoolers (LaMAP); a Teacher of the Visually Impaired assessment; an audiological review; a medical review; and review of the Student's Part C Individualized Family Service Plan (IFSP) and service history. The evaluation identified severe receptive and expressive language deficits, severe sensory processing deficits, moderate fine motor delays, moderate gross motor delays, cognitive delays, [REDACTED] and visual impairment. The evaluation recommended Speech-Language Pathology services, Occupational Therapy services, Adapted Physical Education services, and Teacher of the Visually Impaired services in order for the Student to benefit from an educational program.

On October 31, 2025, the District issued meeting notice to the parents scheduling an IEP Team meeting for November 18, 2025, for the purpose of developing the Student's initial IEP. The meeting notice identified the date, time, and location of the meeting, indicated that the Team would develop, review, or amend an IEP to determine services and supports, and advised the parents of their procedural safeguards. The November 18, 2025 [REDACTED]

The Student's father attended the meeting as a parent member of the IEP Team. The Parent did not attend due to work obligations. Participating District personnel included a special education teacher, regular education teacher, speech-language pathologist, occupational therapist, adapted physical education teacher, school psychologist (via telephone), and an officially designated representative (via telephone).

During the November 18, 2025 meeting, the IEP Team reviewed the October 29, 2025 evaluation report and developed the Student's initial IEP. The IEP included present levels of academic achievement and functional performance consistent with the evaluation findings, annual goals addressing communication, gross motor skills, social/emotional functioning, and approaches to learning, and a completed Communication Plan documenting the Student's limited verbal communication skills and the need for speech-language intervention and visual supports. The IEP reflected consideration of assistive technology and included visual supports as part of the communication framework.

The November 18, 2025 IEP provided for Speech-Language Pathology services beginning November 21, 2025, at a frequency of six 20-minute sessions per month delivered in a group special education setting. The IEP also provided for Occupational Therapy at 30 minutes monthly, Adapted Physical Education at 30 minutes weekly, and Special Education Instruction at 20 minutes weekly for two sessions. The services begin date for the IEP was November 21, 2025.

On November 18, 2025, the Student's father signed the IEP consenting to the provision of initial services. On the same date, he signed a Formal Request for Early Initiation of Special Education Action, acknowledging receipt of prior written notice and waiving the ten (10) business-day waiting period for

implementation. The finalized IEP was emailed to the Parent on November 18, 2025. The record contains no contemporaneous written objection from the Student's father regarding the services determined at the November 18 meeting.

On November 18 and 19, 2025, after reviewing the IEP, the Parent expressed disagreement with the speech-language service minutes, stating that she believed the services were reduced compared to Early Steps. District staff responded that the Student would receive six 20-minute speech sessions per month and that data would be collected to determine whether service adjustments were warranted. On November 19, 2025, the Parent stated that she did not agree with the IEP and requested an amendment meeting. The District inquired whether the amendment should be scheduled before or after Thanksgiving break and began coordinating the availability of required IEP Team members.

The District was closed from November 24 through November 28, 2025, for Thanksgiving break. On December 2, 2025, the District emailed the Parent scheduling an amendment meeting for December 9, 2025, and attached written notice indicating that the purpose of the meeting was to amend the Student's IEP. After the Parent requested a Wednesday or Thursday date consistent with her previously provided availability, the District rescheduled the meeting for Wednesday, December 10, 2025.

The amendment meeting was held on December 10, 2025. Both parents attended, along with the special education teacher, regular education teacher, speech-language pathologist, speech assistant, occupational therapist, adapted physical education teacher, related services and compliance coordinator, officially designated representative, and an evaluation representative who participated via Zoom. During the December 10, 2025 meeting, the Parent reiterated her concern that services should not be reduced from those provided through Early Steps and expressed her belief that the Student had regressed. The IEP Team reviewed evaluation data, student performance information, parental concerns, medical information, and input from related service providers. The Team revised the IEP to increase Speech-Language Pathology services to four 30-minute sessions per month, effective November 21, 2025, and increased Special Education Instruction from 20 minutes weekly (two sessions) to 30 minutes weekly (two sessions). The amendment also added behavioral objectives addressing biting, hitting, headbanging, and eloping, and added a weekly communication log to facilitate more frequent parent communication regarding services and progress.

Following the December 10, 2025 meeting, the District issued a Notice of Intent dated December 10, 2025, documenting the IEP Team's proposal to amend the Student's special education and related services and to revise behavioral objectives. The notice described the proposed changes, identified the evaluation data, parental concerns, medical information, and provider input considered by the IEP Team, documented options discussed and the reasons for their rejection, and informed the parents of their procedural safeguards. On December 10, 2025, the Parent signed a Formal Request for Early Initiation of Special Education Action, thereby waiving the ten (10) business-day waiting period for implementation of the amended IEP.

IV. Conclusions of Law

Allegation 1

Under the Individuals with Disabilities Education Act, a free appropriate public education (FAPE) must be made available to each eligible child with a disability beginning no later than the child's third birthday. Louisiana Bulletin 1706 §101(B) likewise provides that the state's obligation to make FAPE available begins no later than the child's third birthday and that an IEP must be in effect by that date in accordance with Bulletin 1706 §323(B). Bulletin 1706 §124(A)(2) further provides that, by the third birthday, an IEP has been developed and is being implemented consistent with §101(B). For a child transitioning from Part C services, the IEP Team must consider the child's IFSP pursuant to Bulletin 1706 §323(B)(1).

The Student's third birthday [REDACTED]. The District completed and disseminated the Student's multidisciplinary evaluation on October 29, 2025, determined eligibility, and issued meeting notice on October 31, 2025 scheduling an IEP Team meeting for November 18, 2025. [REDACTED]

[REDACTED] At that meeting, the IEP Team reviewed the evaluation information, developed the Student's initial IEP, and established a service begin date of November 21, 2025. The Student's father executed a written early initiation waiver permitting implementation without the ten-business-day waiting period.

Because the District developed the Student's initial IEP [REDACTED] and established a begin date preceding the Student's third birthday, the record demonstrates that an IEP was in effect by the Student's third birthday in compliance with Bulletin 1706 §§101(B), 124(A)(2), and 323(B). Accordingly, Allegation 1 is not substantiated.

Allegation 2

Bulletin 1706 §903 defines FAPE as special education and related services that meet state standards and are provided in conformity with an IEP developed in accordance with §§320 through 324. Under §320(A), an IEP must include present levels of performance, measurable annual goals, and a statement of special education and related services, including projected start date and anticipated frequency, location, and duration. In developing the IEP, the IEP Team must consider the results of the most recent evaluation, the student's developmental and functional needs, and the parents' concerns consistent with Bulletin 1706 §324(A)(1). For a child previously served under Part C, the Team must also consider the IFSP.

The record reflects that the multidisciplinary evaluation incorporated review of the Student's IFSP and service history, medical information, and multiple discipline-specific assessments. The evaluation documented significant communication, sensory, motor, cognitive, and medical needs and recommended speech-language and other related services. At the November 18, 2025 IEP Team meeting, the Team reviewed the evaluation and developed an IEP that included present levels aligned with the evaluation findings, annual goals addressing identified needs, a Communication Plan, and specified related services with defined frequency, duration, and setting consistent with §320(A)(7).

The Parent contends that speech-language therapy was reduced in comparison to Part C services. However, the IDEA does not require a public agency to replicate the intensity or frequency of services provided under Part C. Rather, the public agency must develop an IEP based on the child's individual evaluated needs and the considerations required under §324(A). The record demonstrates that the November 18 IEP was grounded in evaluation data and reflected the Student's documented needs at the time of development.

The record further reflects that on November 18 and 19, 2025, the Parent expressed disagreement with the speech-language minutes and requested an amendment meeting. The District responded and began coordinating availability of required IEP Team members to address the Parent's concerns. The amendment meeting occurred on December 10, 2025, at which time the Team reviewed evaluation data, parental concerns, and provider input and revised the IEP to increase speech-language services and special education instructional minutes effective November 21, 2025.

While the amendment meeting occurred after the filing date of the complaint, the conduct within the applicable time period demonstrates that the initial IEP was developed based on evaluative data and required considerations under Bulletin 1706 §§320 and 324, and that the District did not disregard the Parent's expressed concerns.

Accordingly, Allegation 2 is not substantiated.

Allegation 3

Bulletin 1706 §502(B)(1) requires that parents be afforded an opportunity to participate in meetings concerning identification, evaluation, placement, and provision of FAPE. Under §322(A), the public agency must provide timely meeting notice and schedule meetings at a mutually agreed upon time and place. Bulletin 1706 §321(A)(1) requires that the IEP Team include one or both parents. Additionally, pursuant to §322(F), a draft IEP must be provided at least three business days prior to a meeting upon parent request.

The District issued written meeting notice on October 31, 2025 scheduling the November 18, 2025 IEP Team meeting. The Student's father attended and participated as a parent member of the IEP Team. Although the Parent did not attend due to work obligations, the District satisfied its obligation under §322(A) by providing timely notice and affording the opportunity to participate, and the requirement under §321(A)(1) was met by the participation of one parent.

With respect to the allegation that a draft IEP was not provided in advance, §322(F) imposes that obligation upon parent request. The complaint record does not establish that either parent requested a draft IEP at least three business days prior to the November 18 meeting. The evidence further reflects that the District emailed the finalized IEP to the Parent on November 18, 2025 and responded to her concerns on November 18 and 19, 2025.

Although the Parent disagreed with the services determined, disagreement does not establish denial of meaningful participation. The record does not demonstrate that the District impeded the Parent's participation, predetermined services, or failed to consider her concerns as required by §324(A)(1)(b).

Accordingly, Allegation 3 is not substantiated.

Allegation 4

Bulletin 1706 §324(B)(1)(b) requires the IEP Team to review and revise an IEP, as appropriate, to address information provided by parents and other matters affecting the student's anticipated needs. Under §322(A)(2), meetings must be scheduled at a mutually agreed upon time and place while ensuring participation of required IEP Team members. When a public agency proposes or refuses to change the provision of FAPE, it must provide written notice consistent with §504.

The record establishes that on November 18 and 19, 2025, the Parent expressed disagreement with the speech-language minutes and requested that the IEP be amended. The District responded by inquiring about preferred scheduling before or after Thanksgiving break and began coordinating availability of required personnel. The District was closed November 24–28, 2025. On December 2, 2025, the District issued written meeting notice scheduling the amendment meeting, and upon the Parent's request for a Wednesday or Thursday date, the meeting was rescheduled for December 10, 2025.

Although the amendment meeting occurred after the complaint filing date, the record demonstrates that within the applicable time period the District initiated efforts to reconvene the IEP Team and did not refuse to amend the IEP. At the December 10 meeting, the Team reviewed evaluation data, parental concerns, and provider input and amended the IEP to increase services effective November 21, 2025. The District issued a Notice of Intent documenting the proposed changes and the data relied upon in accordance with §504, and the Parent executed a written early initiation waiver pursuant to §504(F), permitting immediate implementation.

While the Parent preferred that the amendment occur within the same week as the initial meeting, Bulletin 1706 does not require an IEP Team to reconvene immediately upon request. The evidence does

not demonstrate that the District refused to amend the IEP or failed to act within a reasonable timeframe consistent with §§322 and 324.

Accordingly, Allegation 4 is not substantiated.

V. Conclusion

Based on the complaint record and the applicable time period, the Department determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or Louisiana Bulletin 1706. Therefore, this investigation is hereby closed, and no corrective action is required.

RE: Formal Complaint Investigation on behalf [REDACTED]
Dismissal of Special Education Formal Complaint No. **56-C-48**

Dear Parties:

On December 12, 2025, the Louisiana Department of Education received notification that indicated that parties to this formal complaint reached a mutually agreeable resolution and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint **56-C-48**. No further action is required by either party.

Sincerely,

A handwritten signature in blue ink, appearing to read "L. Dupree".

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-50 [REDACTED]

I. Introduction

On December 8, 2025, the Louisiana Department of Education ("Department" or "LDOE") received a formal complaint from [REDACTED] ("Complainant" or "Parent") on behalf of their child ("Student"), who, at all times relevant to the complaint, was enrolled in a school under the jurisdiction of St. John The Baptist Parish Public Schools ("District").

II. Statement of the Case

In the complaint, the Parent alleged that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Parent alleged that the District (1) failed to implement the student's IEP by allegedly imposing punitive disciplinary measures contrary to the IEP; (2) failed to follow the procedural safeguards and disciplinary protections required for students with disabilities; and (3) failed to develop and implement behavioral interventions and supports appropriate to the student's disability-related behavioral needs.

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between **December 9, 2023, and December 8, 2025.**

III. Findings of Fact

At all relevant times, the Student was enrolled in the District and was eligible for special education and related services under the disability classification of Autism.

An individualized education program (IEP) was developed for the Student at an IEP Team meeting held on December 4, 2024. The December 4, 2024 IEP identified academic needs in reading comprehension, written expression, and math problem solving, as well as functional needs in social interaction, sensory processing, motor skills, adaptive skills, and language.

The December 4, 2024 IEP included a section addressing the Student's behavioral needs. That section documented that the Student required adult supervision throughout the school day due to safety concerns, including a tendency to wander if not monitored. The IEP further stated that the Student's behaviors "should be addressed in a non-punitive way" and identified behavioral strategies including sensory breaks, social stories, immediate feedback, and verbal redirection.

The IEP included academic and functional goals, including goals related to problem solving and self-monitoring. Those goals described disability-related behaviors that occurred in response to academic demands and challenges with self-regulation.

With respect to problem solving, the IEP documented difficulty with multi-step word problems and interpreting remainders in applied contexts. According to the IEP, when the Student encountered these difficulties, ■ became frustrated and exhibited behaviors including hitting ■ becoming angry with others, and shouting expletives.

With respect to self-monitoring, the IEP reflected that the Student was able to remain seated and engaged in instructional tasks for approximately ten to fifteen minutes. After that period, the Student experienced difficulty maintaining seated behavior and would leave ■ seat until redirected. The IEP provided for the use of sensory breaks to support sustained engagement and task completion.

The December 4, 2024 IEP reflected that the Student spent between 40 and 79 percent of the instructional day in the regular education environment and noted that the Student's behavioral and safety needs were best addressed in smaller instructional settings.

During the fall of the 2025–2026 school year, the December 4, 2024 IEP remained in effect.

In September 2025, the Student received a write-up for a uniform violation. Following the write-up, the Parent contacted the school and expressed concern that the action was inconsistent with the behavioral provisions of the Student's IEP.

On November 14, 2025, the Parent provided written consent for the District to conduct a functional behavioral assessment.

On November 19, 2025, during a classroom activity, the Student became frustrated after answering a question incorrectly. During the incident, the Student struck a teacher across the face.

As a result of the incident, the District completed a school behavior report describing the conduct as "immoral or vicious practices and conduct or habits injurious to his/her associates" and imposed an out-of-school suspension of two school days. No other out-of-school suspensions were documented for Student during the period from August 12, 2025 through December 3, 2025.

IV. Conclusions of Law

Allegation 1

Bulletin 1706 requires that an individualized education program be developed in accordance with §§320 through 324 and that the IEP be in effect for the student, with the special education, related services, accommodations, and supports identified in the IEP made available and carried out by the personnel responsible for their provision.

The Student's December 4, 2024 IEP included behavioral provisions addressing the Student's needs related to self-regulation and transitions. The IEP stated that the Student's behaviors "should be addressed in a non-punitive way" and identified strategies such as sensory breaks, social stories, immediate feedback, and verbal redirection as supports to be used when behavioral concerns arose.

On November 19, 2025, during an academic activity, the Student became frustrated and struck a teacher. Following the incident, the District imposed a two-day out-of-school suspension.

The behavioral language in the Student's IEP was framed using discretionary wording. The use of the term "should" reflects an expectation that staff employ positive behavioral strategies when addressing behavior, but it does not establish a mandatory directive governing every response to student conduct or prescribe a specific course of action in all circumstances.

Based on the language of the IEP, the record does not establish that the District failed to carry out a required service, accommodation, or support identified in the IEP as a result of the disciplinary action. While the Parent disagreed with the District's interpretation and application of the IEP's behavioral provisions, a disagreement over interpretation does not, by itself, constitute non-implementation under Bulletin 1706.

With respect to the uniform violation resulting in a write-up earlier in the school year, the record does not contain sufficient evidence to determine whether that incident constituted a behavioral incident contemplated by the IEP's behavioral supports. Accordingly, no determination is made regarding that incident.

Based on the record, the evidence does not establish that the District failed to implement the Student's IEP. Allegation 1 is not substantiated.

Allegation 2

Bulletin 1706 §530 governs the authority of school personnel to impose disciplinary removals for students with disabilities. Under §530(B), school personnel may remove a student with a disability from his or her current placement for up to ten school days for violations of a code of student conduct, provided that such removals do not constitute a change of placement. Additional procedural safeguards, including a manifestation determination review, are required only when a disciplinary removal results in a change of placement, generally after more than ten cumulative school days of removal in the same school year, as provided in Bulletin 1706 §§530(E) and 536.

The record reflects that Student received a two-day out-of-school suspension during the relevant period. The attendance records confirm that this was the only suspension imposed between August 12, 2025 and December 3, 2025. The two-day suspension did not exceed ten cumulative school days of disciplinary removal and did not constitute a change of placement.

Because the disciplinary removal did not result in a change of placement, the District was not required under Bulletin 1706 §530(E) to conduct a manifestation determination review or provide the additional procedural safeguards associated with longer-term removals. The applicable disciplinary procedures for short-term removals were therefore satisfied.

Accordingly, the record does not establish that the District failed to follow the procedural safeguards and disciplinary protections required under Bulletin 1706. Allegation 2 is not substantiated.

Allegation 3

Under Bulletin 1706 §324, an IEP Team is required to consider positive behavioral interventions and supports when a student's behavior impedes learning. This provision imposes a consideration obligation,

not a mandate to conduct a functional behavioral assessment or to implement a formal behavior intervention plan in every instance of behavioral difficulty.

In this case, the Parent alleges that the Student's two-day suspension resulted from the District's failure to conduct a functional behavioral assessment.

The Student's IEP identified behavioral needs and incorporated proactive supports such as sensory breaks, visual schedules, and continuous adult supervision to address those needs. Although the IEP did not include a formal behavior intervention plan, Bulletin 1706 §324 does not require an IEP Team to escalate to an FBA or BIP absent a determination that such measures are necessary. The record does not reflect that the IEP Team concluded the existing strategies were ineffective or that a formal behavior plan was required at the time the IEP was developed.

The disciplinary provisions of Bulletin 1706 §530 establish the circumstances under which an FBA becomes mandatory. Specifically, an FBA and behavioral intervention services are required when a disciplinary removal constitutes a change of placement. In this case, the Student's removal consisted of a two-day out-of-school suspension, which did not exceed ten school days and therefore did not constitute a change of placement under Bulletin 1706 §536. As a result, the District was not obligated under §530 to have conducted an FBA prior to or as a result of the disciplinary action.

Because neither Bulletin 1706 §324 nor §530 required the District to complete a functional behavioral assessment prior to imposing a two-day suspension, the evidence does not support the allegation that the disciplinary action resulted from a failure to conduct an FBA. The Parent's disagreement with the District's disciplinary response does not convert a discretionary behavioral assessment tool into a procedural requirement.

Accordingly, the records does not establish that the District failed to comply with Bulletin 1706. Allegation 3 is not substantiated.

V. Conclusion

The Department determined that the District did not violate the IDEA, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations published in Louisiana Bulletin 1706. Therefore, this investigation is hereby closed, and no additional action is required.

Respectfully,

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. 56-C-51

Dear Parties:

On January 9, 2026, the Louisiana Department of Education received notification that indicated that parties to this formal complaint reached a mutually agreeable resolution and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 56-C-51. No further action is required by either party.

Sincerely,

Lindsey P. Dupree

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-53 on behalf of** [REDACTED]

I. Introduction

On **December 9, 2025**, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153 on behalf of the child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the Lafayette Parish School System ("District").

II. Statement of the Case

In the complaint, the Parent Advocate alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Whether the District failed to conduct an appropriate evaluation by failing to assess the student in its native language;
2. Whether the District failed to deliver or provide appropriate behavior supports and interventions by failing to consider the student's linguistic factors in the development of the student's Behavior Intervention Plan (BIP);
3. Whether the District failed to deliver or provide appropriate behavior supports and interventions by failing to consider the student's unique linguistic needs in the development of the IEP;
4. Whether the District failed to provide the student with a free appropriate public education (FAPE) by failing to provide special education and related services, such as appropriate behavioral supports, in conformity with the student's IEP.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based

on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The Department received the complaint on December 9, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between December 10, 2023, and December 9, 2025.

III. Findings of Fact

The Student enrolled in the District as a new student from the Philippines, without any prior IDEA eligibility determination or previous behavior data available to the District. An English Language Proficiency Screening (ELPS) was conducted and placed the Student as an English Learner (EL) in the general education program. Shortly thereafter, the Student was referred to the School Building Level Committee (SBLC) for academic and behavior concerns followed by the Parent requesting a special education evaluation. Medical records were provided evidencing the Student was being considered for ADHD and diagnosed with a learning vs intellectual disability. While the Student had begun to incur referrals, the District did not yet suspect the Student of a disability entitling the Student to special education and denied the request. The District then began managing the Student’s academic performance and behavior through its general education positive behavior tiered intervention program (PBIS). Shortly thereafter, the District received and denied a second evaluation request based on a lack of intervention data to support a reasonable suspicion of a disability requiring special education. The Student continued to incur referrals both in school and on the bus. In an ongoing effort to determine whether the Student’s struggles were rooted in a disability requiring special education or the result of significant language barriers and cultural adjustments causing the Student to be unable to access the curriculum, the District moved the Student to a Tier 2 academic and a Tier 2 BIP. This began an additional data gathering period---agreed to by the Parent---and provided more intensive academic, language and behavior supports. The Parent then filed an informal complaint with the District on October 7, 2025. On October 9, 2025, the District emailed a Notice of Proposed Action agreeing to conduct a special education evaluation as the Parent requested and advising an SBLC would be convened to conduct necessary screenings related to the evaluation. The District also noted that Parental consent would be obtained in an effort to initiate the evaluation no later than November 10, 2025.

On October 22, 2025, a Parent advocate filed formal complaint 56-C-30 against the District alleging the District violated Child Find obligations. The Department’s decision for formal complaint 56-C-30 found the District had not failed its child find obligations because the District (1) did not yet suspect the Student of a disability requiring special education and related services and, (2) appropriately implemented tiered interventions to gather necessary data on the newly enrolled EL Student to determine suspicion of a disability under IDEA and avoid over identification.

Meanwhile, on October 27, 2025, the District conducted the Student’s English Language Proficiency Test (ELPT) and determined the Student’s proficiency level was Progressing. On October 28, 2025, the Parties met for an Early Resolution Meeting regarding 56-C-30 and the Parent signed a consent form to initiate the Student’s evaluation. During the month of October, the Student would receive 3 additional referrals.

On November 4, 2025, the District implemented an Interim IEP while the evaluation was underway to provide some special education supports. This included providing the Student 30 minutes of special education daily and providing special transportation and moving the Student to a Tier 3 BIP while the evaluation was being conducted. On this date, the Parent also signed consent for the District to conduct a Functional Behavior Assessment.

On December 9, 2025, the Parent advocate filed this formal complaint against the District alleging violation of IDEA and applicable state laws.

Conclusions of Law

Allegation #1

The Complainant alleges the District failed to conduct an appropriate evaluation by failing to assess the Student in its

native language.

Bulletin 1706 § 302 states that initial evaluations shall be conducted within 60 business days of receiving parental consent for the evaluation. The District suspected the Student had a disability that required special education and related services beginning October 9, 2025, when it issued PWN proposing to evaluate the Student and subsequently initiated the evaluation on October 28, 2025 upon consent. At the time of the filing of the complaint, the District---well within the required 60 business days of the October 28, 2025---had not yet completed the evaluation. Thus, the Department is unable to find that the District has failed to conduct an appropriate evaluation when it had not yet been concluded.

Turning to the allegation that the District failed to evaluate the Student in its native language, Bulletin 1508 requires that assessments and other evaluation materials be selected and administered so as not to be discriminatory on a racial, cultural, or linguistic basis. Bulletin 1706 § 305 echoes this requiring districts to ensure evaluations are provided and administered in the student's native language or other mode of communication in the form most likely to yield accurate information regarding what the student knows and can do academically, developmentally, and functionally, unless it is clearly not feasible to do so. Neither require native-language testing when English testing is valid.

In this case, as it relates to the Student's level of English comprehension, the Student's ELPS placed the Student in the regular education program based on a Home Language Questionnaire and supporting documentation. The Student's ELPT results showed the Student demonstrated a proficiency status determination of 'Progressing'¹. Results of the ELPT showed the Student's reading and writing performed at the beginner level 1, speaking performed at 'early intermediate' level 2 and listening at an 'intermediate' level 3. Thus, while the Student would require ongoing language support, the English language skills were developing. Based on this level of proficiency, the District's evaluation team determined it was appropriate to conduct the Student's assessments in English, and reasonably calculated to yield accurate and valid information regarding the presence of a suspected disability. As such, the Department finds allegation #1 is unsubstantiated.

Allegations 2 & 3

The Complainant alleges that the District failed to incorporate into the Student's BIP and IEP the necessary English language supports, language accommodations, language appropriate instruction, access to interpreters, translation of materials, culturally responsive interventions/instruction and communication supports in alignment with the child's linguistic needs and cultural differences. They further emphasize the Student cannot access or comprehend English instruction.

Bulletin 1706 § 307 requires that eligibility for special education and related service decisions be based on the results of an evaluation and determined by a group of qualified individuals, including the parent, following review and discussion of the data. However, under circumstances outline in Bulletin 1508 § 307, districts may approve enrollment in special education after reviewing existing student information and obtaining formal written consent for a multidisciplinary evaluation to be conducted. Bulletin 1530 § 307 further provides that when an Interim IEP has been offered and during the time the evaluation is in process, all regulations shall apply. Districts are required to inform parents that the evaluation results must classify a student as exceptional for the student *to remain* in the special education program. All IEPs, interim or otherwise, must meet the substantive requirements of the IDEA.² Thus, when a student is under evaluation and an Interim IEP is developed, the district must provide the Student with FAPE until it is determined the Student is not eligible. As such, the Interim IEP must be reasonably calculated to provide an educational benefit based on the data available to the district in the absence of the full evaluation results. In developing an IEP, Bulletin 1706 §324 requires districts to consider the student's strengths, concerns of the parents, results of an initial evaluation or most recent evaluation and the academic, development, and functional needs. In the case of a student whose behavior impedes his or her learning or that of others, consider the use of positive

¹ EL students exhibiting 'Progressing' proficiency in English have demonstrated, with support, they are approaching a level of English language skill necessary to produce, interpret, and collaborate on grade-level academic tasks in English.

² *Briere v. Fair Haven Grade Sch. Dist.*, 25 IDELR 55 (D. Vt. 1996)

behavioral interventions and supports, and other strategies, to address that behavior. Bulletin 1706 §324(b) further states that, in the case of a student with limited English proficiency, consider the language needs of the Student as those needs relate to the Student's IEP.

Here, the District proposed to evaluate the Student on October 9, 2025 and obtained consent to evaluate on October 28, 2025. An Interim IEP was subsequently created on November 4, 2025. For this reason, the Department will first review the progression of the Student's academic and behavioral interventions prior to November 4, 2025 and will then examine the District's actions regarding the Student's behavioral supports, including consideration of linguistic factors, following the implementation of the Interim IEP.

The Student's BIP and November 4, 2025 Interim IEP

Pursuant to the IDEA regulations each state must have in effect policies and procedures designed to prevent the inappropriate over-identification or disproportionate representation by race and ethnicity of children as children with disabilities. Therefore, the District is obligated to prevent inappropriately identifying the Student as a student with a disability in need of special education by ruling out the possibility that the Student's behaviors were attributed to the challenges faced by the Student in a new country in an unfamiliar, structured school setting and environment while experiencing potential communication barriers. In the event insufficient data exists to determine whether a special education evaluation is appropriate, Bulletin 1508 § 305 permits response to intervention activities and screenings in order to gather the data necessary for the District to make a data-driven decision to evaluate the student.

The Student arrived in the United States and soon after enrolled into the District in July 2025 and was determined an English Learner (EL) without any previous special education eligibility or behavior data available. Therefore, in this case, the circumstances contemplated by Bulletin 1508 § 305 were compounded by no previous special education eligibility and the lack of data to support a suspicion of a disability requiring special education. Thus, the District reasonably began to manage the Student's behavior and academic deficits through the SBLC tiered intervention program to gather data to determine if the District suspected the Student had a disability. A second evaluation request was received 10 school days after the first evaluation request and was denied because lack of interventions. While Bulletin 1508 § 301 (B) states special education and related services referrals and evaluations should not be delayed or denied based solely on the required movement through tiered interventions prior to referrals, the record demonstrates the District appropriately denied the request and required further interventions because it had not yet gathered any meaningful intervention data sufficient to open an evaluation—particularly for this EL Student—with only 10 school days of Tier 1 interventions. The Department finds that this is evidence of exercising structured discretion, rather than delay.

The record reflects that from August 27, 2025 to September 23, 2025, the Student's behavior supports progressed from Tier 1 to Tier 2 (more detailed discussion below). The Student's ELPS report classified the Student as an EL in the regular education program based on the Home Language Questionnaire and supporting documentation, indicating the Student could comprehend English with support. Also beginning September 23, 2025, the Student received Tier 2 interventions in Reading and Math in addition to Lexia, an adaptive blended learning program that supports Emergent Bilingual students' English language acquisition through academic conversations. The Lexia program integrates speaking, listening, and grammar in the subjects of math, science, social studies, general knowledge, and biographies.

For reasons not clarified to the Department, the District created the Interim IEP enabling the Student access to services while the District determined eligibility and the full scope of the Student's needs. In review of the Interim IEP submitted to the record, access to services included special education instruction for 30 minutes a day and special transportation.

Within the Interim IEP, a summary of data gathered through the Tier 2 academic interventions were reflected in the Student's general student information section detailing the Student's iReady Math score, results of the mClass Numeracy screener scores and the Student's DIBELS overall composite score. ELA and Math goals were also created. The Student's intervention history summary indicates the Student was continuing to receive these academic supports

through the evaluation time frame and the Interim IEP indicated that the student's academic, developmental, and functional needs would continue to be assessed during the evaluation.

As an EL in the general education program on a Tier 2 BIP, the Student's replacement behaviors for all activities and areas on campus were reinforced by positive supports such as praise/recognition, structured routine, ignoring problem behaviors when appropriate, and sitting by the teacher when appropriate. The de-escalation plan included the following actions in order of implementation: (1) verbal redirection, (2) assist/modify tasks (3) time-out within class (4) call in support staff; and, (5) major office referral. The Student also shared 20 minute sessions with the school guidance counselor five days per week. In terms of linguistic supports, the District provided a language accommodation of Repeated Directions. In De-escalation steps 1 and 2, opportunity is provided to verbally redirect the Student and make modifications and/or provide assistance. These steps consider the Student's progressing proficiency in English and appropriately offered linguistic supports.

The Student's behavioral intervention history record demonstrated the general education Tier 2 BIP were maintained while the evaluation was underway. The record shows the District did not make any additional modifications to the BIP until the creation of the Interim IEP.

Evidence in the record documented two relevant developments leading up to the creation of the Interim IEP, which include: (1) The Student continued to incur additional referrals despite the Tier 2 BIP supports and (2) The results of the Student's ELPT showed the Student's EL status was 'Progressing'. This indicates that while the Student needs ongoing language supports, providing those supports in English are appropriate.

At the point the Interim IEP was in place, the District was obligated to implement appropriate academic and behavioral supports using the data gathered prior to its creation. The record reflects that while the Tier 2 BIP was in place---from September 23, 2025 to November 3, 2025--the Student accumulated 13 behavioral referrals (in addition to the 5 earned on Tier 1) before the District moved the Student to Tier 3 supports. In response to this ongoing accumulation of referrals, the District asserts that it consistently monitored and revised the Student's behavioral supports pointing to the Student's Tier 1 to Tier 2 progression supported with behavior tracking records. The Student's behavior summary report from August 2025 through December 2025 demonstrated progress towards goals set out in the tiered interventions that included following adult directives within 2 prompts with roughly 64% compliance and keeps hands feet and objects to themselves with 70% compliance. These records demonstrated that although the Student's behavior persisted and arguably escalated in frequency and intensity, the data indicated the Student was making progress with the Tier 2 BIP. Thus, while the BIP did not prevent the behaviors entirely, there was evidence that with the supports in place, the Student was making progress.

The record reflects the tension between the District's ability to utilize general education interventions for necessary data-driven decisions, but avoiding unnecessarily delaying evaluation while simultaneously being constrained to gather the data necessary to validate conducting an FBA. The Department examined--with particular attention--whether the District could have more quickly initiated an FBA once it suspected a disability. The District opened the evaluation having gathered only 6 weeks of academic and behavioral data---inclusive of Tier 1 and Tier 2 data--on an EL Student not previously eligible for special education and having only been suspected of a disability since October 9, 2025. It appears the District was accelerating the student through interventions in light of the Parent's concerns, the behaviors and the Student's EL status. This resulted in abbreviated durations of intervention data collection periods obtaining minimal data sufficient enough to suspect a disability, but risking over identifying the Student without ruling out other factors. Because of this acceleration, when the District determined it suspected the Student of a disability, it did not yet have sufficient data to support moving the Student to Tier 3 or conduct an FBA at that time. Adding to the complexity of the matter---also due to the rapid progression in the short time frame ---the District did not immediately conduct an FBA because the Student was still on the Tier 2 at the time consent to evaluate was obtained. However, no substantive delay resulted because the District created the Interim IEP, moved the Student to Tier 3 and initiated the FBA within a week.

Thus, in review of the totality of the record, the Department finds the District did not utilize RTI inappropriately to

delay and dismiss the Student's behavior. As the Student's behaviors were continuing and escalating, records show RTI tiered interventions were initiated and the District expedited the Student through the tiers to collect the data it did not initially possess. The Student's Progress Summary Report reflected progress towards the BIP goals were being made in spite of the Student's absences. The record demonstrates data was actively being collected to determine whether the District suspected a disability or whether other causes of the behavior, including limited language proficiency or other factors of the Student's transition. To that point, some transitional difficulties remained present through the evaluation. This was evidenced by the December 3, 2025 threat assessment interview, where the Student indicated anger and sadness related to separation from a parent. As the Student continued to incur referrals during the evaluation process, the District appeared to find the data sufficient to create an Interim IEP and move the Student to Tier 3 so additional supports could be received while a FBA was underway.

Finally, the Department turns to the appropriateness of the Tier 3 BIP provided within the Interim IEP. The District confirmed that a Tier 3 BIP is the continuation of the Tier 2 BIP supports under the management of a Social Worker. According to the District's 2025-2026 SBLC Handbook, the Social Worker acts as a case manager to provide the Tier 3 interventions for behavioral/social emotional students, assists with FBAs, and facilitates the development of BIPs for students receiving Tier 3 interventions. The Interim IEP notes the Student is on a BIP through the SBLC tiered interventions to address off-task behavior and being seen by a social worker to address behavior. While it did not include any descriptive behavioral data such as the specific interventions and performance, the record demonstrates the behaviors were actively being addressed and the Student was being supported.

As such, the Department has determined allegations #2 and #3 are unsubstantiated.

Allegation #4

With respect to the Complainant's allegations that the District failed to provide the supports within the Student's IEP, the Department reviewed the records for implementation of the Interim IEP and found no evidence that the District did not provide the IEP required services.

Bulletin 1706 § 101 requires the provision of a free and appropriate public education (FAPE) for students with disabilities residing in a school district and receiving special education and related services. As discussed above, when a student is under evaluation and an Interim IEP is developed, the district must provide the Student with FAPE until it is determined the Student is not eligible. As such, failure to fully implement an Interim IEP constitutes a denial of FAPE.

As discussed above, the District triggered its obligation to provide FAPE when it created the Interim IEP for the Student while the evaluation was underway. With respect to the special education and related services within the IEP, the Interim IEP is somewhat skeletal in what appears to be a lack of sufficient data available at the time it was created, but notes anticipation of the outlining services at the conclusion of the evaluation throughout. The instructional plan within the Interim IEP included data regarding the Student's academic assessment scores and an ELA and Math goal using who, what, where, why and how questions to demonstrate the Student's understanding of key details in a text with 70% accuracy on 4 out of 5 trials. With respect to math, it was noted the Student's Ready Math score placed the Student at a Kindergarten level. A goal was set for the Student to use addition and subtraction within 100 to solve one and two step word problems by using drawings and equations with symbols for unknown numbers. The Student would do this with 70% accuracy on 4 out of 5 trials.

As it related to Behavior within the IEP, it was noted the Student 'previously had a BIP through SBLC tiered interventions' and while no behavior goals were present, the District had initiated the FBA and moved the Student to Tier 3 to include support from the Social Worker. With the FBA conducted and a draft provided for review, the record indicates developing a formal BIP for the Student was the next step.

The record does not support a finding that interventions and academic supports as identified in the IEP have not been provided to the Student during the evaluation and the Department finds the District has not denied the Student FAPE. Thus, allegation #4 is unsubstantiated.

IV. Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations as set forth in the Louisiana Bulletin 1706 with respect to the allegations presented in this matter. Therefore, this investigation is hereby closed and no additional action is required.

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-55 [REDACTED]

I. Introduction

On December 10, 2025, the Louisiana Department of Education ("the Department") received a formal complaint from [REDACTED] ("the Parent") on behalf of A.G. ("the Student"), who, at all times relevant to the complaint, [REDACTED] ("the School"). The School is a Type 3 public charter school operated by InspireNOLA Charter Schools and authorized by the Orleans Parish School Board, which operates as NOLA Public Schools ("the District").

II. Statement of the Case

In the complaint, the Parent alleged that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically, the Parent alleged that the District (1) failed to develop an individualized education program (IEP) that included all required components, specifically with respect to allegations that the IEP omitted sections or information mandated by law; and (2) failed to implement the Student's IEP and comply with procedural safeguards, including by failing to provide required special education or related services, failing to maintain documentation necessary to verify service delivery, and failing to issue written notices; (3) failed to consider and implement positive behavioral interventions, supports, and other strategies to address behaviors that impede the Student's learning.

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between **December 11, 2023**, and **December 10, 2025**.

III. Findings of Fact

The Student [REDACTED] with a primary exceptionality of Autism who has been eligible for special education and related services since early childhood. During the relevant period, the Student attended [REDACTED] and was served under individualized education programs developed by the District.

The District issued a meeting notice titled “Full and Effective Notice of Proposed Action” on November 18, 2024, for an IEP meeting scheduled for December 3, 2024. The notice identified the date, time, location, and purpose of the meeting, stating that the purpose was to develop, review, or amend the Student’s IEP and determine placement. The notice explained that a draft IEP would be reviewed and that the Parent would be an equal participant in the meeting. The notice reflects that the Parent planned to attend and was signed and dated on November 20, 2024.

On December 3, 2024, the IEP Team convened to review and revise the Student’s IEP. The meeting was attended by both parents, regular education teachers, a special education teacher, a speech-language pathologist, and an officially designated representative of the District. The December 3, 2024 IEP identified the Student’s exceptionality, parental concerns related to speech and mathematics, recent evaluation results, present levels of academic achievement and functional performance, measurable annual goals, special education and related services, accommodations, and placement in the general education setting with supplemental supports. The IEP required the provision of speech-language pathology services for 30 minutes once per week beginning December 3, 2024. The Parent signed the IEP on the same date.

At the time of the December 3, 2024 IEP meeting, the IEP documented that the Student had not displayed behavior concerns that impeded learning.

During the 2024–2025 school year, the District experienced staffing changes affecting speech-language pathology services. In December 2025, the District’s Senior Manager of Speech-Language Pathologists informed the Parent in writing that, based on a review of provider documentation and attendance records, the Student was owed four 30-minute compensatory speech-language therapy sessions due to missed services in the 2024-2025 school year. The District identified specific dates on which speech services were missed, canceled, or rescheduled.

The District issued a meeting notice titled “Full and Effective Notice of Proposed Action” on October 24, 2025, for an IEP meeting scheduled for November 4, 2025. The notice identified the date, time, location, and purpose of the meeting, stating that the purpose was to develop, review, or amend the Student’s IEP and determine placement. The notice indicated that the Parent’s signature was obtained via phone and is dated December 1, 2025. On November 4, 2025, the IEP Team convened to review the Student’s IEP. The Parent raised concerns regarding multiple aspects of the draft IEP presented at that meeting and did not agree to finalize the document. As a result, the meeting was continued to December 2, 2025.

On November 10, 2025, the Student was involved in a behavioral incident at school.

On November 11, 2025, the Parent submitted a written request that the District conduct a functional behavioral assessment and develop a behavior intervention plan.

The District issued a meeting notice titled “Full and Effective Notice of Proposed Action” on November 18, 2025, identifying the date, time, location, and purpose of the December 2, 2025 meeting. The notice stated that the purpose of the meeting was to develop, review, or amend the Student’s IEP and determine

placement. Email correspondence confirms that the notice was transmitted to the Parent on November 18, 2025 and again on December 1, 2025, and that the Parent confirmed attendance for herself and the Student's father.

Following the November 4 and December 2, 2025 IEP meetings, the District and the parents engaged in written correspondence regarding the development of the Student's IEP and related documents. Between December 4, 2025 and December 18, 2025, the District provided multiple draft versions of the IEP. The parents reviewed the drafts, provided written comments and proposed revisions, requested clarifications, and sought additional documentation. The District acknowledged the parents' input and continued to revise the documents accordingly.

The District completed a functional behavioral assessment on December 10, 2025. The assessment included observations, interviews, and data collection and identified off-task behavior, attention difficulties, and task avoidance related to academic demands and communication challenges. Based on the functional behavioral assessment, the District developed a behavior intervention plan, which was implemented on December 11, 2025. The District also developed a communication plan addressing the Student's receptive and expressive language needs and their relationship to behavioral concerns.

The November 4, 2025 IEP, finalized after multiple revisions, included present levels of performance, measurable annual goals in behavior, mathematics, English language arts, and communication, special education and related services, accommodations, placement in the general education setting for 80 percent or more of the school day, and references to the functional behavioral assessment, behavior intervention plan, and communication plan. The IEP acknowledged that compensatory speech-language pathology services were owed from the prior school year, specifically four 30-minute sessions of compensatory speech-language therapy from the 2024–2025 school year. On December 18, 2025, after reviewing the revised documents, the Parent confirmed signed the IEP.

IV. Conclusions of Law

Allegation 1

Under Bulletin 1706 §320(A), an individualized education program is a written statement developed, reviewed, and revised in a meeting in accordance with Bulletin 1706 §§320 through 324 and must include, among other components, the student's present levels of academic achievement and functional performance, measurable annual goals, a description of how progress will be measured, a statement of special education and related services and supplementary aids and services, assessment accommodations as applicable, and the projected dates for initiation of services and the anticipated frequency, location, and duration of those services. Bulletin 1706 §324(A) further requires the IEP Team, in developing the IEP, to consider the student's strengths, parental concerns, evaluation results, and academic, developmental, and functional needs. Bulletin 1706 §322 requires that the District take steps to ensure the parents are present at each IEP Team meeting and that parents are notified early enough to ensure an opportunity to attend.

The record demonstrates that the December 3, 2024 IEP was developed at an IEP Team meeting attended by both parents and required team members and was signed on the date of the meeting. The December 3, 2024 IEP included the Student's present levels of performance, measurable annual goals, services, accommodations, and placement, and it specified service initiation and frequency for speech-language pathology.

With respect to the IEP process beginning on November 4, 2025 and continued on December 2, 2025, the record reflects that the IEP was not finalized at the November 4, 2025 meeting due to parental concerns and was continued for additional discussion and revision. Between December 4 and December 18, 2025, the District and parents exchanged draft documents, the parents provided written feedback and requests for clarification, and the District made revisions based upon parental input. The District did not refuse to include required components, nor did it finalize the IEP over parental objection. Instead, the parties engaged in sustained collaboration to develop an IEP that included the Student's present levels of performance, measurable annual goals, services, accommodations, and placement, and it also specified service initiation and frequency for speech-language pathology. The Parent ultimately signed the finalized IEP on December 18, 2025.

Based on the totality of the record, the Department does not find that the District failed to develop an IEP that included the components mandated by Bulletin 1706. Accordingly, this allegation is not substantiated.

Allegation 2

Under Bulletin 1706, once an IEP is in effect, a public agency is responsible for ensuring that the special education and related services identified in the IEP are provided as written. Bulletin 1706 §323(A) requires that, at the beginning of each school year, each public agency have in effect an IEP for each student with a disability within its jurisdiction. An IEP must specify, as required by Bulletin 1706 §320(A)(7), the projected date for the beginning of services and the anticipated frequency, location, and duration of those services. Bulletin 1706 §323(D) further requires that a student's IEP be accessible to each regular education teacher, special education teacher, related services provider, and any other service provider responsible for its implementation, and that each such provider be informed of his or her specific responsibilities and the accommodations, modifications, and supports to be provided in accordance with the IEP. Read together, these provisions require a public agency not only to have an IEP in effect, but to ensure that the services described in the IEP are implemented as written by informed personnel and supported by documentation sufficient to verify delivery.

In addition, Bulletin 1706 §502 requires that parents be afforded an opportunity to participate in meetings concerning the identification, evaluation, educational placement of the student, and the provision of a free appropriate public education, and that parents be afforded access to education records related to the provision of services. Bulletin 1706 §322 requires that parents receive timely notice of IEP meetings sufficient to ensure an opportunity to attend. Separately, Bulletin 1706 §504 requires prior written notice, meeting specified content requirements, when a public agency proposes or refuses to initiate or change the identification, evaluation, educational placement, or provision of FAPE.

The December 3, 2024 IEP required the District to provide speech-language pathology services for 30 minutes once per week beginning December 3, 2024. During the 2024–2025 school year, the District experienced staffing changes affecting speech-language pathology services. In correspondence dated December 8, 2025, the District's Senior Manager of Speech-Language Pathologists informed the Parent that, following a review of available provider documentation and attendance records, the District determined that the Student was owed four 30-minute compensatory speech-language therapy sessions due to missed services in the 2024–2025 school year. The finalized November 4, 2025 IEP expressly acknowledged that compensatory speech-language pathology services were owed from the prior school year and specified four 30-minute compensatory sessions.

As part of this investigation, the Department reviewed the service logs relied upon by the District in making its compensatory services determination. The available documentation largely supported the District's accounting of missed and provided sessions. However, for one session, which the District identified as a session provided, a corresponding service log was not available. Based on the totality of the record, the Department finds that speech-language pathology services were not fully implemented during a portion of the 2024–2025 school year and that documentation was not sufficient in all instances to verify service delivery.

With respect to procedural safeguards, the record does not establish noncompliance. The District issued "Full and Effective Notice of Proposed Action" documents for meetings held on December 3, 2024, November 4, 2025, and December 2, 2025, each identifying the date, time, location, and purpose of the meeting. The parents attended and meaningfully participated in the meetings. Although the notice for the November 4, 2025 meeting reflects a parent signature dated after the meeting, the record establishes that the parents received notice, attended the meeting, participated in discussion, and requested continuation of the meeting for further consideration of concerns. Accordingly, the Department does not find that parental participation was impeded under Bulletin 1706 §502 or that the evidence establishes a violation related to meeting notice under Bulletin 1706 §322. The record likewise does not establish a violation of prior written notice requirements under Bulletin 1706 §504.

Accordingly, this allegation is substantiated in part with respect to the implementation and documentation of speech-language pathology services, but not substantiated with respect to meeting notice, prior written notice, or parental participation.

Allegation 3

Bulletin 1706 §324(A)(2)(a) requires the IEP Team, in the case of a student whose behavior impedes the student's learning or that of others, to consider the use of positive behavioral interventions and supports and other strategies to address that behavior.

At the time of the December 3, 2024 IEP, the IEP documented that the Student had not displayed behavior concerns that impeded learning. On November 10, 2025, the Student was involved in a behavioral incident at school, and on November 11, 2025, the Parent submitted a written request for a functional behavioral assessment and behavior intervention plan. Following this request, the District initiated a functional behavioral assessment, which was completed on December 10, 2025. The assessment included observations, interviews, and data analysis and identified behaviors that interfered with the Student's ability to access instruction. Based on the assessment, the District developed and implemented a behavior intervention plan on December 11, 2025 and also developed a communication plan addressing the Student's language needs and their relationship to behavior. The finalized IEP signed on December 18, 2025 incorporated behavioral goals and referenced the functional behavioral assessment, behavior intervention plan, and communication plan.

Based on the totality of the record, once behavior was identified as impeding learning, the District considered and implemented behavioral supports consistent with Bulletin 1706 §324(A)(2)(a). Accordingly, this allegation is not substantiated.

V. Corrective Action

The record establishes that the District did not fully implement the Student's IEP with respect to the provision of speech-language pathology services during a portion of the 2024–2025 school year. To remedy the noncompliance identified herein, the District shall:

- The District shall implement the compensatory speech-language pathology services as documented in the Student's finalized IEP dated November 4, 2025 and signed on December 18, 2025. This includes the provision of four (4) 30-minute sessions of compensatory speech-language therapy identified as owed from the 2024–2025 school year. No additional compensatory services are required beyond those specified in the IEP.
- Within thirty (30) calendar days of completion of the compensatory speech-language pathology services, and no later than June 1, 2026, the District shall submit to the Department documentation sufficient to verify delivery of those services. The documentation shall include, at a minimum, the date of each session, the duration of each session, the name and role of the service provider, and the service location.

Respectfully,

Domonique Dickerson

Re: Findings-Decision in Special Education Formal Complaint No. 56-C-57 [REDACTED]

I. Introduction

On December 10, 2025, the Louisiana Department of Education ("Department" or "LDOE") received a formal state complaint from [REDACTED] ("Complainant" or "Parent") on behalf of their child, [REDACTED] ("Student"), a student formerly enrolled in a school under the jurisdiction of the East Baton Rouge Parish Public School System ("District").

II. Statement of the Case

In the complaint, the Parent alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; its implementing regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, La. R.S. 17:1941 et seq.; and the Department's implementing regulations set forth in Louisiana Bulletin 1706—Regulations for Implementation of the Children with Exceptionalities Act.

The Student remained enrolled in the District until August 7, 2025. The complaint raises allegations concerning both the Student's public school enrollment and subsequent parentally placed private school enrollment. Specifically, the Parent asserts that the District: (1) failed to develop an individualized education program (IEP) that considered the Student's communication needs, including the Student's language and communication mode; (2) failed to implement the IEP, including the provision of related services and supplementary aids and services necessary to support communication and educational needs; (3) failed to conduct an evaluation in the Student's language or mode of communication most likely to yield accurate information; and (4) failed to offer or provide equitable services consistent with its responsibilities to parentally placed private school students under the IDEA's proportionate share provisions.

Pursuant to Bulletin 1706 §152(C), a complaint must allege a violation occurring not more than two years prior to the date the complaint is received. Accordingly, the scope of this investigation was limited to alleged violations occurring between **December 11, 2023**, and **December 10, 2025**.

The Department further notes that a due process decision was issued on May 16, 2025, adjudicating issues for the period January 23, 2023, through January 23, 2024. Under Bulletin 1706 §153(G), issues decided in that proceeding are binding on the parties. Preclusion applies to those specific issues and factual theories previously adjudicated within the relevant timeframe.

III. Findings of Fact

The Student has been identified as a child with a disability eligible for special education and related services under the IDEA.

The Student remained enrolled in a District-operated public school until August 7, 2025. Attendance during the 2024–2025 school year was limited.

IEPs dated February 21, 2024, and May 23, 2025, identify communication as an area of need and provide for speech-language pathology services. The IEPs describe the Student as nonverbal or minimally verbal and reflect implementation of a total communication approach, including gestures, limited sign use, picture exchange, verbalizations, visual supports, and augmentative and alternative communication (AAC) devices. Each IEP includes communication-related present levels of performance and measurable annual goals.

The IEP documentation reflects parental concerns regarding communication access, including references to American Sign Language (“ASL”). The Louisiana School for the Deaf, at the request of the District, administered the Kendall Conversational Proficiency Levels Assessment to determine the Student’s ASL proficiency. The Student was assessed at P-Level 0+, corresponding to ASL proficiency comparable to approximately a one-year-old developmental level.

In April 2025, the Parent obtained a private neurodevelopmental evaluation from Compass Neurodevelopment Center, which identified limited cognitive and adaptive functioning.

The District disseminated a triennial Reevaluation Data Review (“RDR”) in July 2025. The RDR reflects that the Student’s initial evaluation was disseminated on February 22, 2017, with eligibility established under Autism. The RDR further reflects reevaluations conducted on February 18, 2020; March 19, 2021; and July 28, 2022, after which the Student continued to qualify under Autism, with Other Health Impairment identified as a secondary exceptionality.

The RDR documents the Student’s historical receipt of speech-language pathology services, occupational therapy, school health services, adapted physical education, and assistive technology. It further reflects that the District reviewed the Parent’s April 2025 private medical evaluation as part of the reevaluation process. While the District determined that the private evaluation did not meet criteria for eligibility determination under Bulletin 1508, it identified additional concerns to be addressed through further evaluation.

The RDR summarizes the Student’s historical progress and previously provided supports but notes that progress during the 2024–2025 school year could not be determined due to lack of attendance.

The record also contains documentation describing the District’s general procedures for consultation and the provision of equitable services. The complaint identifies the Student’s current placement as a parentally placed private school.

IV. Conclusions of Law

Allegation 1 and 2

Under Bulletin 1706 §320, an IEP must include present levels of performance, measurable annual goals, and a description of special education and related services, including frequency, location, and duration. In developing the IEP, the team must consider the student's strengths, parental concerns, evaluation results, and academic, developmental, and functional needs, including communication needs, as required by Bulletin 1706 §324. Bulletin 1706 §323 further requires that an IEP be in effect and implemented during enrollment.

The record establishes that communication was consistently identified as a core area of need. The February 21, 2024, and May 23, 2025 IEPs document limited verbal output, use of multiple communication modalities, and reliance on assistive technology. Each includes present levels and measurable goals addressing receptive and expressive communication. Parental concerns, including requests related to ASL and communication access, were documented and discussed.

Although the Parent contends that ASL should have been designated as the Student's primary or exclusive language of instruction, Bulletin 1706 §324 requires consideration of communication needs and parental concerns; it does not mandate adoption of a particular methodology preferred by a parent. The record reflects that the District considered evaluation data, including ASL proficiency, documented parental input, and incorporated communication goals and services into the IEPs.

With respect to implementation, the Student's limited attendance during the 2024–2025 school year is relevant to service delivery. While attendance does not relieve the District of its obligations, the record does not establish that the District refused or withheld required services during periods when the Student was enrolled and available to receive them.

Based on the record within the review period, the Department concludes that the District developed and implemented the Student's IEPs in accordance with Bulletin 1706 §§320-324. Allegations 1 and 2 are not substantiated.

Allegation 3

Bulletin 1706 §305 requires that evaluation procedures be sufficiently comprehensive to identify all of a student's special education and related service needs, utilize a variety of assessment tools and strategies, and be administered in the child's native language or mode of communication unless clearly not feasible, so as to yield accurate information regarding what the child knows and can do.

The July 2025 Reevaluation Data Review reflects the Student's prior evaluative history, including assessments addressing cognitive, adaptive, and communication functioning. The RDR documents the Student's initial evaluation and subsequent reevaluations and summarizes the data considered in determining continued eligibility. The record further reflects that the Student's ASL proficiency was assessed through the Kendall Conversational Proficiency Levels Assessment, with results indicating P-Level 0+ proficiency, corresponding to ASL proficiency comparable to approximately a one-year-old. That information was incorporated into subsequent IEP documentation, which reflects the Student's use of multiple communication modalities within the educational setting.

Pursuant to Bulletin 1706 §306, a reevaluation may be conducted through review of existing evaluation data and input from parents and providers to determine whether additional data are necessary. The RDR reflects such a review and notes that the Student's limited attendance during the 2024–2025 school year restricted the availability of current school-based observational or in-person assessment data.

Although the Parent contends that evaluations should have been conducted in ASL, Bulletin 1706 §305 requires assessments to be administered in a manner likely to yield accurate and meaningful information;

it does not mandate exclusive use of a single communication modality identified by a parent. The record reflects that the District considered the Student's communication profile, including ASL proficiency, in both the evaluative and IEP development processes.

Accordingly, based on the record within the applicable review period, Allegation 3 is not substantiated.

Allegation 4

Bulletin 1706 §§130–138 requires a public agency to engage in timely and meaningful consultation regarding parentally placed private school students and to expend a proportionate share of federal funds for equitable services. However, such students do not have an individual entitlement to the same services they would receive if enrolled in public school; services, if provided, are delivered through a services plan rather than an IEP.

The record reflects that the Student's last day of enrollment in a District school was August 7, 2025, and that the Parent subsequently placed the Student in a private school. The record does not contain evidence that the Student was denied participation in equitable services, nor does it establish that the District failed to engage in required consultation or otherwise failed to fulfill its obligations under Bulletin 1706 §§130–138 during the period between withdrawal and the filing of the complaint.

On the record presented, Allegation 4 is not substantiated.

V. Corrective Action

The Department determined that the allegations in the complaint are not substantiated by the record. Accordingly, this investigation is closed, and no additional action is required.

RE: Findings-Decision in State Special Education Formal Complaint No. **56-C-61 on behalf of** [REDACTED]

I. Introduction

On **December 16, 2025**, the complainant ("Parent") submitted a formal written request for a special education complaint investigation to the Louisiana Department of Education ("the Department") and requested that the Department initiate an investigation pursuant to the state complaint procedures set forth in Louisiana Bulletin 1706 §§ 151 through 153 on behalf of the child ("Student"), who, at the time relevant to the complaint, was enrolled in a school under the jurisdiction of the East Baton Rouge Parish Public Schools ("District").

II. Statement of the Case

In the complaint, the Parent Advocate alleges that the District violated the Individuals with Disabilities Education Act ("IDEA"), 20 U.S.C. § 1400 et seq.; the implementing federal regulations at 34 C.F.R. Part 300; the Louisiana Children with Exceptionalities Act, R.S. 17:1941 et seq.; and/or the Department's implementing regulations promulgated in Louisiana Bulletin 1706. Specifically the Department must determine:

1. Evaluation

Whether the District failed to ensure that the Student's evaluation was sufficiently comprehensive to identify all special education and related service specifically by failing to assess the student in all areas of suspected disability when it failed to conduct a Cortical Visual Impairment screening.

2. FAPE

Whether the District's alleged actions of, allowing unqualified/noncertified individuals to conduct evaluations and screenings, has resulted in denial of the students' right to FAPE.

As the Department's assigned investigator, I have reviewed the complaint, the District's written response and all supporting documents submitted by both parties. The findings of fact and conclusions of law that follow are based on a comprehensive review of the submitted records and the applicable legal provisions. Pursuant to Louisiana

Bulletin 1706 § 152(C), a formal complaint may only address alleged violations that occurred within the two years prior to the date that the complaint is received in accordance with §§ 151 through 153.” The Department received the complaint on December 16, 2025. Therefore, the investigation was limited to alleged violations of law that occurred between December 17, 2023, and December 16, 2025.

Findings of Fact

The Student’s initial evaluation was disseminated on February 22, 2017 and qualified for special education and related services under the primary exceptionality of Autism and received speech-language pathology and occupational therapy. Reevaluations occurred on February 18, 2020; March 19, 2021 and July 28, 2022. When the Student was reevaluated in July of 2022 the Student continued eligibility under the exceptionality of Autism with a secondary exceptionality of Other Health Impairment. In addition to the speech and OT services, the Student’s related services expanded to include school health services, adapted physical education and assistive technology services. The Student’s most recent reevaluation was the Student’s triennial, which was initiated on May 2, 2025 and disseminated on July 28, 2025.

The Student received a private medical evaluation ordered by the Student’s physician and conducted by Compass Neurodevelopmental Center on April 1, 2025 for a targeted evaluation of the Student’s cognitive and adaptive functioning.

On December 16, 2025, the Parent filed the complaint that formed the basis of the Department’s investigation.

Conclusions of Law

Allegation #1 & 2

The Parent alleges the District did not evaluate all areas of suspected disability because it failed to conduct the required screening and evaluation for Cortical Visual Impairment (CVI) when indicators are present during the most recent reevaluation. Further, the Parent suggested the evaluation may not have been conducted by qualified, appropriately trained personnel. In support of this allegation, the Parent points to the Student’s neurological risk factors, visual processing difficulties and difficulty with visually guided tasks as well as the concerns of therapists and teachers.

Under Bulletin 1508 § 507, evaluations must be sufficiently comprehensive to identify all of a student’s special education and related services needs in all areas related to suspected disability. Further required, evaluations must involve appropriately qualified personnel. Bulletin 1508 and 1706 also provides that the evaluation should include data from existing educational and medical records and any additional assessments deemed necessary. With respect to reevaluations 1706 § 306, district must conduct the reevaluations to determine whether a student continues to have a disability and what services are needed. A review of existing data may suffice if the data are adequate to determine whether the student continues to have an exceptionality and what services are needed. Additional assessment is required only if new concerns arise or existing data are insufficient.

In regards to visual screenings, districts must ensure these are conducted as part of the pupil appraisal process; however, CVI screenings are not automatically required as part of an evaluation and are included only when there is indication of neurological impairment in the student’s history or data. There must be evidence that the district suspected the disability in the area of concern.

The Parent reports that the Student presented clear indicators of CVI based on their neurological risk factors; however, the record does not reflect that these factors had been linked to any historical or active concern for the Student’s functional vision, including at the time of the July 2025 reevaluation. Under 1706 and 1508, the District is obligated to review the data from the July 2022 evaluation as well as other educational/ medical information. With respect to the April 1, 2025 private medical evaluation, the District reported that it reviewed

the medical report during the reevaluation and noted there were no documented concerns regarding vision.

The Department examined the Student's prior evaluations and medical records and found that these records do not reflect any diagnosed visual impairments or raised suspicion of a visual processing disorder. The 2017 initial evaluation noted the Student's visual acuity appeared appropriate and noted the Parent did not express concerns regarding vision. No concerns regarding the Student's vision were raised in the 2020 reevaluation. The July 2022 reevaluation included new concerns regarding dyslexia, dysgraphia and dyscalculia, but did not include any previous or new visual processing impairment concerns. The vision screener conducted as part of the reevaluation indicated the Student's vision was 'normal'. A functional vision screening was conducted as part of that evaluation and notes within concluded the Student's vision 'is adequate for navigating within his classroom setting, seeing printed materials, and seeing images on the classroom white board.'

Upon review of the July 2025 medical evaluation, it was noted the Physician referred the Student for a "targeted evaluation of cognitive and adaptive functioning." According to this evaluation, the student has limited cognitive functioning and limited adapted behavior skills. Although, the physician note commented that the vision and hearing were adequate for the purpose of the evaluation, there is no neurological vision impairment concerns noted or observed. The record reflects no new data was introduced prior to or during the July 2025 reevaluation that would cause the District to suspect visual processing concerns that would warrant a CVI screening. As such, the District reasonably relied on the current reevaluation data as well as the physician's note confirming that no visual concerns were present at the time of the evaluation. The District completed the reevaluation data review and found the existing data sufficient to determine continued eligibility for the Student.

Lastly, the Parent does not identify reasons to suspect the evaluation or screening may have been conducted by unqualified or non-certified individuals. The record is void of evidence that the Student's evaluation was not conducted by qualified personnel as required by Bulletin 1508 nor does the Parent provide evidence to support a concern that any District evaluator lacked the credentials required.

In conclusion, the Department finds the record does not support the Parent's allegations.

As such, the Department finds allegation #1 and #2 is unsubstantiated.

Conclusion

The Department finds that the District did not violate the Individuals with Disabilities Education Act, the Louisiana Children with Exceptionalities Act, or the Department's implementing regulations as set forth in the Louisiana Bulletin 1706 with respect to the allegations presented in this matter. Therefore, this investigation is hereby closed and no additional action is required.

Sincerely,

A handwritten signature in blue ink, appearing to read "L. Dupree".

RE: Formal Complaint Investigation on behalf of [REDACTED]
Dismissal of Special Education Formal Complaint No. 56-C-62

Dear Parties:

On January 15, 2026, the Louisiana Department of Education received notification that indicated that parties to this formal complaint reached a mutually agreeable resolution and that the complainant wished to withdraw the formal complaint investigation request.

Therefore, the LDOE is officially dismissing special education formal complaint 56-C-62. No further action is required by either party.

Sincerely,

Domonique Dickerson
