

Computer Science Implementation Regional Tour

Implementation Support

The Louisiana Department of Education is excited to announce the Computer Science Implementation Regional Tour. School and system leaders should register to learn about the initiatives and resources available to support systematic implementation of the [Louisiana K-12 Computer Science Education Plan](#) and the [K-12 Louisiana Student Standards for Computer Science](#). This session includes a condensed version of the three-part [Menu of Services](#) System Support series. System and school leaders are encouraged to participate as this preparation is needed to implement upcoming changes for the 2026-2027 school year. Limited spaces are available, so register today to secure a seat within one of the regional sessions.

Participants will

- Explore the K-12 Louisiana Student Standards for Computer Science and the Louisiana K-12 Computer Science Education Plan;
- Analyze statewide and local data to determine relevant action steps; and
- Compare implementation models and best practices to create a system-level implementation plan.
