

National Assessment Tutoring Vendor Guide

Tutoring Service Provider Guide

The National Assessment Tutoring Initiative is designed to support Louisiana high school students in preparing for national college and career readiness assessments, including the ACT, SAT, Classic Learning Test (CLT), WorkKeys, and ASVAB (AFQT). Through this initiative, approved tutoring providers deliver targeted, high-quality tutoring that helps students strengthen academic skills, improve test performance, and expand post-secondary opportunities.

Tutoring providers for this initiative must meet all the following criteria:

- Provide individualized or small-group tutoring for public high school students.
- Deliver tutoring services in person or virtually during the school day.
- Focus instruction on national assessment content areas including English, reading, and math.
- Use diagnostic assessments to identify student needs and guide targeted instruction.
- Emphasize content mastery, test-taking strategies, pacing, and overall test readiness.
- Use high-quality instructional materials aligned to assessment expectations and designed for supplemental instruction.
- Provide instruction that supports improved student performance on the ACT, SAT, CLT, WorkKeys, and/or ASVAB (AFQT).
- Employ high-quality tutors with appropriate training and ongoing oversight.
- Ensure tutoring is delivered by a consistent tutor or limited, consistent group of tutors whenever possible.
- Maintain program quality and implementation requirements annually to remain on the LDOE-approved provider list.
- Partner directly with Louisiana schools or school systems through locally executed contracts aligned to applicable federal, state, and local procurement requirements.
- Support students in developing the knowledge, skills, and strategies necessary for college and career readiness.

* Indicates the approved provider intends to use AI. The tutoring provider has been approved, but reports the use of artificial intelligence (AI) tools within its program. Prior to entering into any agreement, school systems are strongly advised to consult with their legal counsel and conduct an internal review of the provider's AI practices to ensure compliance with all applicable legal, privacy, and data security requirements.
