

In an effort to accommodate potential distanced learning scenarios in the 2020-2021 school year LDOE will modify the K-3 Assessment file layout for SIS to include additional exemption codes and a virtual setting flag. The exemption codes are to be used when a student did not take the assessment. The virtual setting flag is required and should be set to Y when the student was assessed virtually and should be set to N when the student was assessed in person. A Y in the virtual setting field will be disallowed for literacy screener test type = 3 (STEP) as this particular screener is not allowed to be given virtually. See the record layout section of this document for the new K-3 assessment layout. This change will also impact the EdLink 360 K-3 layout. We will also modify the assessment name associated with Literacy Screener Test type 1. It will be labeled Acadience Reading (formerly DIBELS Next) due to a name change from the assessment vendor. This information should only be utilized by data managers and SIS managers.
