Under Construction

Publishers may offer to amend instructional materials to better align with the IMR criteria for quality when reviewed materials do not receive a Tier 1 rating. Materials may be placed under construction when publishers commit to making program updates to better align their materials with the IMR criteria for quality, but the revisions require up to 90 days for completion. In order to be placed under construction, the publisher must provide the Department with a targeted completion date (within the 90-day period) and provide periodic progress updates. The Department will publish the targeted completion date in the IMR Under Construction report and can also provide informal feedback during the process.
