About Istation

For more than 25 years, educators have turned to Istation as an all-in-one solution for online assessment, instruction, and personalized learning for students in grades preK-8. Our innovative reading, math, and Spanish literacy programs immerse students in an engaging and interactive environment and inspire them to learn. Istation's educational technology and teaching tools offer flexible resources, game-like activities, actionable data, and computer-adaptive assessments that support academic growth and proficiency.

Formative Assessments

Istation's Indicators of Progress (ISIP™) assessment measures student growth by providing monthly formative assessments. An entire class can be assessed in approximately 30 minutes. ISIP's computer-adaptive assessments with animated, game-like interfaces engage students so effectively that they don't even realize they're being evaluated.

Adaptive Curriculum

Results from ISIP place each student on a personalized learning path with responsive instruction that supports increased complexity with explicit and direct lessons.

Personalized Data Profiles

Reports offer immediate, real-time feedback on student progress and paint an accurate picture of district, campus, class, and student growth. Reports are generated automatically — no manual data input is necessary. Teachers can use these easy-to-read and customizable reports to align curriculum, form small groups, and provide interventions. Reports automatically link to appropriate resources that help to differentiate instruction.

Teacher Resources

In addition to computer-adaptive teaching and a scholar-approved curriculum, Istation provides educators with 24-7 access to thousands of teacher resources.

School-to-Home Connection

Istation offers a blended learning solution with assessments and individualized curriculum that can be successfully delivered in both in-person and virtual environments. Parents and guardians can use the Parent Portal to monitor performance and support instruction with additional lessons and activities designed for home use.

Professional Development

Offering customized guidance and insight into proven educational approaches, best practices, and more, specialists with real-world instructional experience help schools drive adoption, boost implementation, optimize usage, and foster a growth mindset.

Research and Proven Results

Istation's reading curriculum and assessments are based on data from scientific and independent research studies that have proven Istation's effectiveness in improving reading fluency and the product's applicability to the classroom. Studies are available at <https://www.istation.com/Studies>.
