

LOUISIANA COASTAL FELLOWSHIP PROGRAM

All of Louisiana's students deserve the opportunity to learn about and connect with nature in positive ways, building capacity to act as informed and responsible stewards of our environment. The Louisiana Coastal Fellowship Program is structured to engage participating educators, known as fellows, in rich professional learning as a cohort of like minded educators who are committed to championing environmental literacy for the students of our state.

Fellows, selected through a competitive process, have access to the following supports as they engage in this professional learning community:

- **exclusive training opportunities** to learn from local and national experts in STEM and environmental education
- **authentic coaching** through one-on-one and small group sessions that are designed to reinforce the training content and allow for the co-design of educational resources featuring environmental phenomena and outdoor learning experiences
- **a community of peers:** fellows will have regular opportunities to collaborate with and learn from each other.

The Department is pleased to announce the selection of 33 dynamic educators from across Louisiana as the [Louisiana Coastal Fellows](#) for the 2021-2022 school year. These dynamic fellows represent 17 school systems and serve students in grades Pre-K-12 in a variety of subject areas.
