

## Introduction

The Louisiana Department of Education (LDOE) provided oversight to sub-grantees offering after school services to students during the 2014-15 school year through the federally funded 21st Century grant. Fifty-eight entities provided services to 189 schools and 22,190 students. This report provides a description of the number of programs, level of attendance, and academic performance indicators using the Louisiana Afterschool Framework.

## Evaluation Design

The evaluation was based on a cross-sectional design, using descriptive program and participant data provided by the LDOE. These data, collected during the 2014-15 school year, were utilized to assess program impact along with the Louisiana Afterschool Framework to evaluate after-school programs.

## LDOE Framework

The Framework used for the 2014-15 school year was to assess provider performance. Letter grades were to be assigned based on the total number of points accumulated in all three areas. Additionally, during the 2014-2015 SY, LDOE developed and piloted the Stakeholder Satisfaction Survey. Data was not available for all participants, thus no letter grades were assigned and only results in a data report. The 2015-2016 school year report will yield results in all focus areas from all participants.

## Evaluation Components

Using LDOE's Framework for evaluating after-school programs, the evaluation focused on three components to assess provider performance: 1) academic performance, 2) program attendance, and 3) stakeholder satisfaction.

## Methods

### Data Sources

The LDOE analytics team provided the final academic performance points for English Language Arts and math using two data sources: 1) the statewide Student Information System (SIS) (academic performance data for English Language Arts (ELA) and math), and 2) the Youth Services database (information on attendance, type of program activities, and content areas). In 2014-15 LDOE created three new Stakeholder Satisfaction Surveys for providers, staff, and parents that were administered by a small sample of programs as a pilot test. As a result, the value of the weight of the survey was modified for use in the 2014-15 Framework because data for all programs were not available. The new Stakeholder Satisfaction Surveys will be administered to all sites during the 2015-16 school year.

## Measures

### Academic Achievement

LDOE measures the academic performance of Louisiana's 21st CCLC programs by the percent of students within each program who exceed their growth target on the state assessment. The academic performance calculation involves multiple iterative phases integrating a comprehensive database housing descriptive program and participant data. The LDOE analytics team provided the academic performance calculation to establish the average percent of students exceeding their growth target for ELA and math. Points were calculated using the algorithm created by LDOE.

### Attendance

LDOE provided data obtained from the Youth Services database to determine the number and percent of regular after-school attendees. Attendance was calculated by using the number of regular attendees and dividing by the projected attendance at the beginning of the year for each program. Points were assigned from 0 to 35 for eight ranges of the percent of projected attendance. For example: less than 15% of projected attendance is assigned zero points and 90% or more of projected attendance is assigned 35 points.

### Stakeholder Satisfaction

LDOE developed and piloted the provider, staff, and parent Stakeholder Satisfaction Survey instruments in the 2014-15 school year. Thus, during the 2014-15 school year survey points were not applied because it was a pilot year for the survey instruments. Survey data will be available for the 2015-16 school year and beyond. The survey completion rates from the provider, staff, and parent surveys will be used to calculate the Stakeholder Satisfaction points.

## Recommendations

The results suggest that the majority of programs are providing services that keep students engaged and attending the after-school programs. Recommendations for program improvement are as follow:

- Continue to emphasize the importance of addressing academic performance.
  - Provide professional development to staff on standards-driven approaches
  - Provide learning opportunities that address multiple learning modalities
- Work with programs to ensure Stakeholder Satisfaction Surveys are distributed and completed by all three groups of stakeholders.
- Continue to review and implement “best practices” for successful after-school programs. For example:
  - Provide opportunities for staff development and make efforts to ensure all staff are involved
  - Share information to promote parent involvement
  - Connect with the community
  - Build relationships with students; offer opportunities for meaningful participation at school; ensure teachers and program staff convey high expectations for all students.

## Louisiana's Evaluation Framework for After-School Programs

The Louisiana Department of Education (LDOE) annually collects and examines data to determine the effectiveness of after-school programs funded by Title IV, Part B, 21st Century Community Learning Centers.

### Using the Louisiana After-School Framework, the LDOE assesses program effectiveness across three weighted indicators:

- ✓ Academic Performance: 100 points
- ✓ Program Attendance: 35 points
- ✓ Stakeholder Satisfaction: NA – Pilot Year (All)

During the 14-15 SY, LDOE developed and piloted the Stakeholder Satisfaction survey. Data was not available for all participants, thus this only serves as a data report. The 15-16 report card will be inclusive of all indicators and will provide programs with a letter grade.
