LOUISIANA'S TRAUMA RECOVERY PROGRAM

Improving student well-being,
behavior, school safety, and
academic performance by
supporting trauma-specific
therapy sessions.

WHAT IS TRAUMA?

Traumatic incidents may happen inside or outside of school. Some examples include bullying, harassment, experiencing violence (e.g., school shootings, abuse in the home, community violence), the death of a close family member, family mental illness, homelessness, natural disasters, parent deployed, parent in jail, parents divorced, and serious injury to self.

WHICH STUDENTS ARE ELIGIBLE?

Students must meet the following characteristics:

- ✓ Enrolled in a Louisiana PreK-12 public, private or charter school
- ✓ Identified as low-income
- ✓ Suspected trauma that is negatively impacting the student's learning
- ✓ Payment for services is a barrier for receiving services (student is uninsured, co-pays are too expensive, and/or student is underinsured)
 - › Students enrolled with Medicaid will be reviewed on a case-by-case basis.

WHO PROVIDES SERVICES?

The Trauma Grant pays for trauma-specific therapy sessions provided by an enrolled state licensed mental health professional. Each participating provider has been checked to ensure they have training in trauma-focused mental health services.

FAMILY CHOICE

Students and parents are encouraged to select a mental health provider that best fits their needs. If the licensed mental health provider you select is not participating in this grant program, they will be helped in completing the enrollment process before services begin.

If you or your student is experiencing a mental health emergency, please call 911 or go to your local emergency room.
