LOUISIANA DEPARTMENT OF EDUCATION

J. Kelly Nix, Superintendent

The Louisiana Department of Education wishes to thank Louisiana World Exposition, Inc. for permission to use the official design of the 1984 Louisiana World Exposition on the cover of this document.

This public document was published at a cost of \$15,907.07. 1,000 copies of this first printing were published at a cost of \$7,010.07. The total cost of all printings of this document, including reprints, is \$15,907.07. This document was published by Baton Rouge Printing Co., Inc., P. O. Box 97, Baton Rouge, La. as part of the program to provide information and technical assistance to local school boards and the public under authority to R.S. 17:16. This material was printed in accordance with the standards for printing by state agencies established pursuant to R.S. 43:31. Printing of this material was purchased in accordance with the provisions of Title 43 of the Louisiana Revised Statutes.

THE HONORABLE DAVID C. TREEN
GOVERNOR OF LOUISIANA
MEMBERS OF THE LOUISIANA LEGISLATURE
MEMBERS OF THE STATE BOARD OF ELEMENTARY
AND SECONDARY EDUCATION

In accordance with the provisions of Louisiana Revised Statutes 17:22(6) I respectfully submit to you this One Hundred Thirty-Fourth Annual and Statistical Report. *financial*

We are confident that progress made in many areas of education will be reflected in these statistical data submitted by local systems and various sections of the Department of Education to the Bureau of Research, Office of Research and Development. This publication, we trust, will help to document this improvement.

Sincerely,

J. KELLY NIX

PREFACE

A prime function of the Office of Research and Development in the Department of Education is to compile and disseminate data and information relative to all aspects of elementary/secondary public education in Louisiana. The One Hundred Thirty-fourth Annual Report is a report for the 1982-83 school year.

The report will be distributed to approximately 1,000 individuals, groups, institutions, and organizations. Since public education expenditures total \$2.1 billion, it is an expectation that numerous individuals will do their homework by reading the report, thereby becoming better informed at least about their own parish school system. The parish/city district profiles enable one to gain essential information from a three-page format.

The Bureau of Research, which produced the report, is appreciative of the excellent cooperation received from contact persons in each school district and in the Department of Education. It is hoped that readers will find the report timely, useful, and relevant.

I. LOUISIANA POPULATION AND STUDENT ENROLLMENT

A. Population Characteristics

Louisiana experienced a continuous population growth during the decade of the 70s. Because of various factors such as good weather conditions, favorable labor supply, etc., more people have moved to Louisiana recently than have left the State. Too, Louisiana has traditionally had a higher birth rate than the rest of the nation.

While this population growth is both good for our State economy and for the future of education, it is not without its problems. A recent publication¹ indicated that the State's population increased from 3,644,637 in 1970 to 4,203,972 in 1980, an increase of 15.3%. Figure 1 illustrates the greatest population growth areas in the State during the decade. Table 1 details the population growth of each parish in the State from April 1970 to April 1980. It is interesting to note that 12 parishes grew in population more than 25% over the 1970 population figure. This has major implications for these school districts in terms of future planning.

Figure 1.

Parishes along the banks of the Mississippi River from Pointe Coupee to Jefferson experienced large population increases. The growth appears to be attributed to two factors: increased industrialization and spillover from metropolitan into rural parishes. Livingston Parish claimed the largest increase among these parishes, with a 60.7 percent gain.

Table I.2 provides information on the percent of families in poverty in Louisiana in 1979 as compared with the percent in 1969. The average percent of families in poverty for Louisiana in 1979 was 15.5%, compared with 21.5% in 1969. Louisiana, therefore, experienced a 6.4% decrease in poverty level families. The State average, however, remained above that of the U.S. average (although this difference has decreased from 10.8% in 1969 to 5.5% in 1979). All parishes, except one experienced some decrease in poverty families during this 10-year period; Orleans parish is shown to have had only a slight increase. Further information is provided in the table.

By comparing Louisiana and national educational statistics, one can determine the relative strengths and weaknesses of the State's educational system. Louisiana has a unique set of population characteristics, as can be seen in Tables I.3, I.4, and I.5. Louisiana's birth rate has traditionally been among the highest in the nation. From 1960-74 the national birth rate dropped dramatically, and Louisiana's birth rate fell from the fifth highest to the ninth highest in the nation. Since 1975, however, the national rate has increased, somewhat and Louisiana's rate has also increased (Table I.3). The birth rates for 1982 show a continued high rate--19.5 births per 1,000 population--for Louisiana.

Louisiana ranks fourth in the nation in percent of the population who are of school age (Table I.4), while ranking forty-sixth in percent of the population aged 21 and over.² As a result of this demographic dispersion, Louisiana has 34.3 school aged children per 100 adults aged 21 and over, the sixth highest ratio in the nation in 1982 (Table I.5). This large number of school aged children per adult places a heavy educational support burden on the adult population.

Traditionally, Louisiana has had a high rate of illiteracy. Based on Bureau of the Census estimates, Louisiana had a higher illiteracy rate than any other state in 1950, 1960, and 1970. In 1976, 8.7% of the Louisiana adult population was functionally illiterate or lacking a fifth grade education. However, also in 1976, Louisiana ranked slightly better in median school years completed by persons 18 years and over, percent of persons 18 years and over who have had four years of high school or less, and percent of the population who are college graduates; however, the State still ranks in the lower quarter of the nation in these categories (Table I.5).

The final statistics of the 1980 census showed 7.8% of the State's adults were classified as functionally illiterate or lacking a fifth grade education. The State ranked fiftieth in the nation with the U.S. average of 3.4% functionally illiterate adults in 1980.

B. Student Enrollment: Trends and Current Statistics

Student registration trends are presented in Table I.6. If kindergarten and special education children were removed from these numbers, a small decline in public enrollment would occur each year from 1972-73 to 1982-83. The nonpublic school population has been stable during this period, with a range of 15.21% to 16.29% of the school aged children of our State. Eighty-seven percent of the students in nonpublic schools in 1973-74 were white, while 83% in 1982-83 were white. The public schools had approximately 60% white enrollment in 1973-74 and 56% white enrollment 1982-83.

School year 1980-81 was the first year that accurate data on the number of Hispanic, Asian, and Indian Americans in Louisiana schools were gathered. In the 1982-83 school year, there were 18,459 students from these other ethnic groups in the public school system and 2,336 in the nonpublic school system.

Student registration from 1973 to 1983 in regular and special education categories is presented in Table I.7 (The Table below gives the percent change in the last 10 years for student registration).

Table A.

Percent Change in Student Registration, 1972 to 1982	
<u>CATEGORY</u>	<u>Percent Change In Student Registration, 1972 to 1982</u>
Elementary	-13.2
Secondary	-13.0
Kindergarten	52.6
Special Elementary	22.5
Special Secondary	138.2
Total	-8.6

As noted in Table I.7, there is a decrease in student registration each year during this period when the students in special education and kindergarten are removed from the population. The overall decrease of 13% in regular elementary and secondary education was composed of two similar trends during the period: elementary enrollment dropped considerably, 13.2%, while secondary enrollment dropped 13%. See Table I.8 for complete information on registration per grade level in 1982-83.

During the past decade, the drop in elementary enrollment was a function of the decrease in birth rates during the 1960s and early 1970s, while the stability in secondary enrollment reflected the higher birth rates of the 1950s and early 1960s. It should be noted that enrollment in secondary education peaked in school year 1976-77 and should show the steady decline in the 1980s that elementary schools showed in the 1970s. Conversely, elementary enrollment figures should begin increasing in the 1980s as a function of the increased birth rates of the late 1970s (1981-82 figures do show a slight increase in elementary enrollment); however, the elementary enrollment for 1982-83 decreased. Table I.8 presents student enrollment projections through 1986-87.

There was a large increase in kindergarten and special education enrollment during the past decade. Kindergarten enrollment expanded by 52.6% from school year 1973-74 through school year 1982-83. Kindergarten enrollment for 1982-83 was approximately 8% of the overall student population.

Enrollment in special education classes, both elementary and secondary, increased dramatically over the past decade. The increase in elementary special enrollment was 22.5% during this period, while secondary special enrollment increased approximately 138.2%. Students in special education constituted 3.7% of the total student population in 1982-83, compared with only 2.4% of the total in 1973-74.

The Louisiana Board of Regents predicts that after the overall decrease in total enrollment during the late seventies and through school year 1982-83, a reverse trend will begin with modest increases occurring in 1983-84 through 1986-87. See Table I.8 for enrollment projections by grade level through 1986-87.

Table I.9 details trends in average daily membership and average daily attendance. From 1973 to 1983 average daily membership fell 9.3% corresponding to the average daily attendance decrease of 7.7%. These two percentages should fluctuate at about the same rate; however, the 1.6% disparity is accounted for in the 1.6% increase in percent attendance of membership for the same period.

More than \$100 million was invested in the expansion of Louisiana's vocational-technical system to 53 schools during

the past 10 years. Enrollments for vocational education programs from 1973-74 through 1982-83 are found in Table I.10. The majority of the secondary students counted in Table I.10 are in city/parish school systems. Total enrollment in vocational education programs in 1982-83 equalled 212,859 students³.

Vocational Education Amendments of 1976 (Public Law 94-482) mandated new vocational activities including a displaced homemakers' program, the establishment of a sex equity coordinator position, and special vocational education programs for handicapped persons. The displaced homemakers' program now has seven centers in operation.⁴ Vocational programs for students with limited English speaking skills were also initiated in Louisiana during the decade.

¹ Does not include correspondence schools or State correctional facilities.

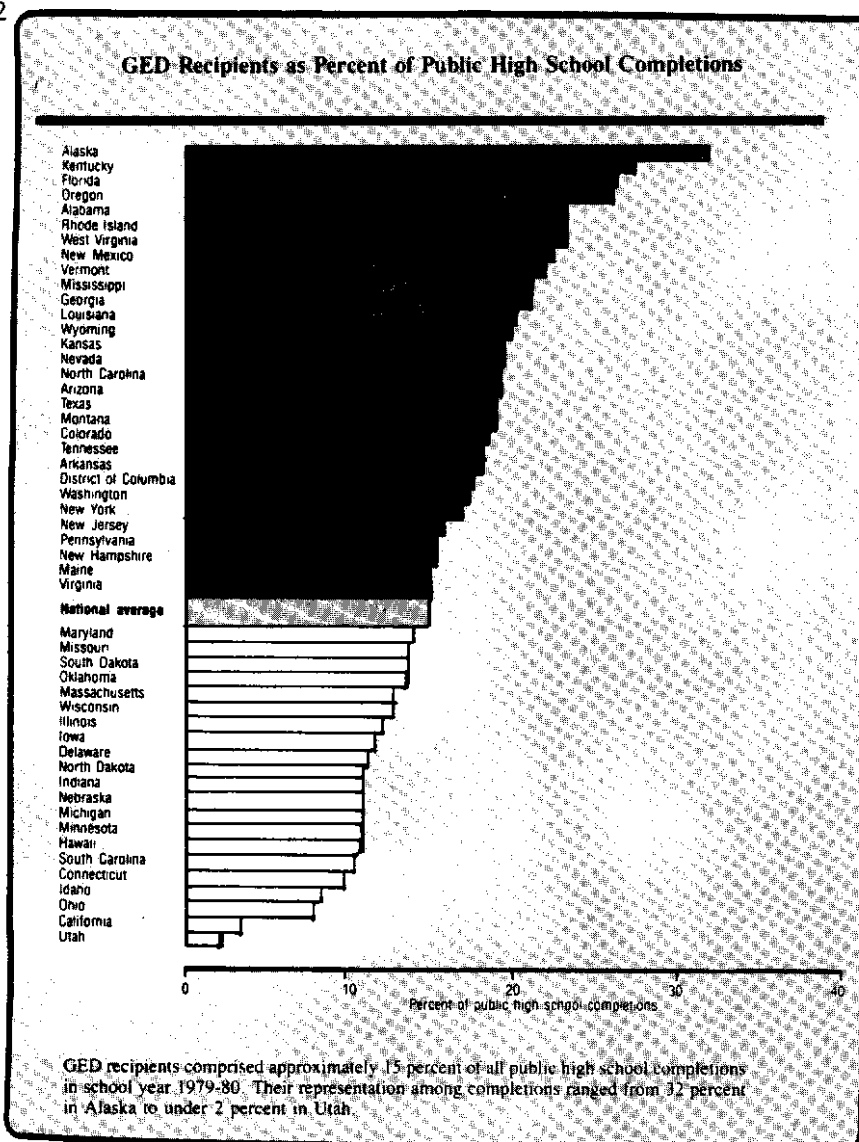

NOTE: Includes all providers, whether or not they are covered under State VEA plans. VEA programs are those receiving Federal assistance administered by the States under the provisions of the Vocational Education Act, as amended. Virtually all public secondary schools received assistance, and while private secondary schools were not included, their students may have been enrolled through the public school system. About two-thirds of all postsecondary schools were covered under VEA, most of which were 2-year institutions of higher education or public noncollegiate postsecondary schools. None of the private noncollegiate postsecondary schools and only about 5 percent of the 4-year institutions of higher education were included in VEA provisions.

Vocational education has begun an effort to meet the priority needs of energy education. The lignite coal deposit in northwest Louisiana has become a focal point in increased job opportunities in this section of our State. In response to this energy source, the Office of Vocational Education has funded a Research and Training Project to provide flexibility in skills training to meet the needs of lignite coal related industry.

Adult education continued to play an important role in Louisiana education during the last four years; 11,211 students received the general equivalency diploma in 1980, 12,230 in 1981, 11,842 in 1982, and 10,867 students in 1983.⁵ Enrollment in Louisiana Adult Basic Education and Act 43 Adult Education programs has increased 51.8% since 1974-75, with 48,196 participants actually enrolled in 1982-83. See Table I.11 for further summary information on enrollment, achievement, and termination of students in adult education from 1974-83.

Figure 2

The past decade was characterized by a large increase in the student population of special education. There was an increase of 41.2% (from 24,192 in 1973-74 to 35,166 in 1982-83) in the population in special education classes in public schools. This increase tells only part of the story, however, since that population includes only those students in self-contained classrooms. According to figures gathered for the minimum foundation program's equalization distribution,⁶ there were 89,039 students enrolled in all types of special education classes at the end of the first reporting period in 1982-83. In addition to those students in self-contained classrooms, this figure includes 31,161 students enrolled only in speech therapy and 35,205 enrolled in resource special education classrooms. The total number of students in special education in 1981-82 was 80,916 according to the same source. (See the State Profile for a breakdown of the special education students by type of class in 1982-83).

The passing of Public Law 94-142 (Education for All Handicapped Children Act) by Congress in 1975 was, to a large degree, the impetus behind the expansion of special education in the State. The law calls for individualized schooling for all physically, mentally, and emotionally handicapped students. Revised Statute 17:1941 et seq., beginning with Act 754 of the 1977 Regular Session of the Louisiana Legislature, encompasses Louisiana's State regulations in compliance with P. L. 94-142; the Act was implemented in the local school systems in September, 1978.

One immediate effect of this emphasis on special education was a dramatic increase in the number of evaluations carried out each year. According to a report on special education by PAR published in 1973,⁷ there were 8,863 evaluations of children for special education purposes in school year 1972-73. In 1982-83 the Office of Special Education did 26,116 initial evaluations and 20,377 re-evaluations.⁸ Additionally, 12,500 students received pupil appraisal support services in this year.

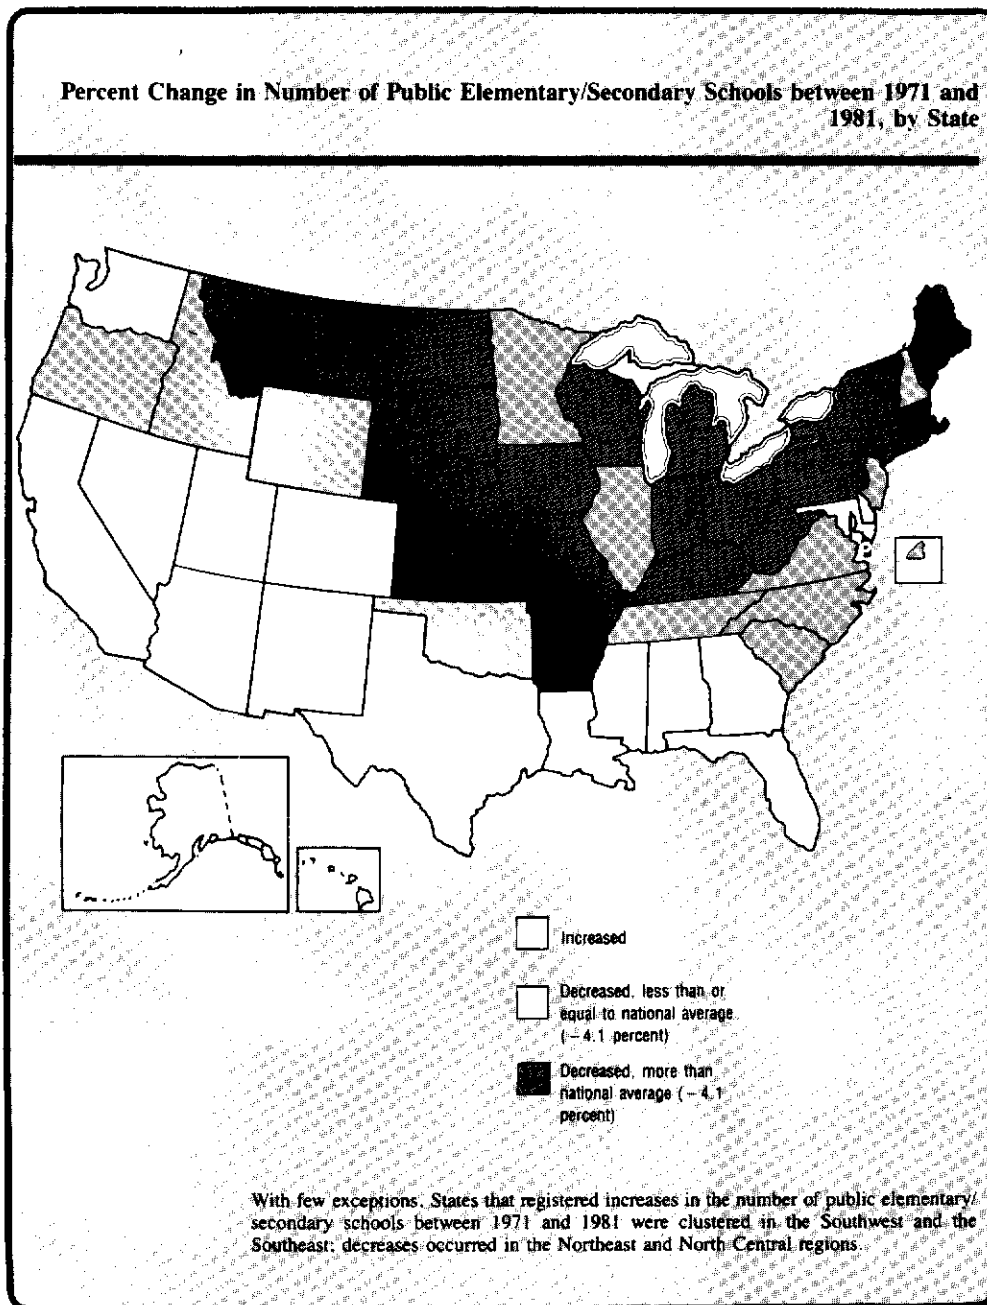

The number of children in the gifted and talented category increased from 698 in 1975-76 to 11,417 in 1982-83 according to estimates from the Office of Special Educational Services. Other significant developments in special education in the past decade included: (1) the establishment of statewide standards for the evaluation of each child (contained in the Pupil Appraisal Handbook, Bulletin 1508) in October 1978; and (2) the introduction of a nondiscriminatory intellectual achievement testing program [the System of Multicultural Pluralistic Assessment (SOMPA)] for placement in special education.

Nationally, the absolute number of pupils in school peaked in 1970 and declined after that because of the lowered birthrate in the 1960s and early 1970s. Louisiana has followed this national trend: there has been a decrease in the absolute

number of pupils in elementary and secondary schools (excluding kindergarten and special education) each year from 1970-71 through 1982-83.

Louisiana's recent enrollment figures are compared with national figures in Table I.12. The State's public school enrollment was the eighteenth largest in the nation in 1982, and the State ranked fifth in percentage of students in nonpublic schools, behind only Pennsylvania, Hawaii, Delaware, and the District of Columbia. The State ranks low, however, in average daily attendance as a percent of either enrollment (42nd) or average daily membership (36th). The State had

Figure 3.

three of the nation's 60 largest public school systems according to a recent report:⁹ (a) Orleans parish ranked 25, (b) East Baton Rouge Parish ranked 40, and (c) Jefferson Parish ranked 44.

A comparison of declines in public school enrollment in Louisiana and the nation between fall 1971 and fall 1976 compiled by the Public Affairs Research Council¹⁰ yielded the following results: (1) the Louisiana change in elementary school enrollment (grades 1-8) was -11.6% compared with the national decline of -11.2%; (2) the Louisiana percent change in high school enrollment (grades 9-12) was +4.1%; and (3) the total change in fall public enrollments (grades 1-12 excluding kindergarten and special education) for Louisiana was -6.1% compared with the national average of -6.4%. Louisiana's slight relative loss in elementary enrollment was offset by a relative gain in high school enrollment.

The National Center for Education Statistics¹¹ presented similar results when comparing public school average daily attendance for the school years ending 1970 and 1977: Louisiana had an overall percent change of +0.8% during this period, while the national percent change was -2.6%. Thus, Louisiana's losses in public school enrollment and attendance during this period of national decline were equal to or slightly less than the national average. (Different procedures were used by NCES and the Louisiana Department of Education to calculate the average daily attendance figures presented here and in Table I.9).

The 1983 edition of the Annual Report is formatted somewhat differently from reports of previous years. Whereas previous reports presented the narrative in one complete section followed by a section of State Summary Tables, this year's edition presents each chapter of narrative followed by its pertinent State Summary Tables. We hope this revised format enhances the readability of the material.

* The Bureau of Research depends on the voluntary reporting of nonpublic student registration by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic students.

** Four districts (Allen, Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1982-83 school year. Ouachita Parish did not receive accurate data on the number of nonpublic students from its nonpublic schools for 1982-83. Therefore, no nonpublic students from these districts are included in the compilation of the totals for this year.

*** 1979-80 was the first year that districts were asked to report the number of Hispanic, American Indian and Asian students who were registered in their schools. Some districts noted difficulty in reporting this information, so there is probably an undercount of students from these ethnic groups for this year.

Table I.7
Public and Nonpublic Student Registration in Elementary, Secondary
Kindergarten and Special Education, 1973-83

Year	Elementary	Secondary	Total Elementary and Secondary	Kindergarten	Special Elementary	Special Secondary	Total All Categories

* The Bureau of Research depends on the voluntary reporting of nonpublic student registration by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic students. The actual registration data for 1982-83 for both public and nonpublic schools do not include kindergarten or special education students.

** These totals do not include students in kindergarten or special education. The total figures for the projections for grades 2-12 do not equal the combined projections for public and nonpublic schools. The reason for this is that each phase of the model--public, nonpublic, total--uses numbers relative to that phase only. The projections for 1983-87 were made by Mr. Larry Goux of the Louisiana Board of Regents. His projections exclude kindergarten and special education students.

Average daily attendance as percent of average daily membership, 1982-83	92.86	94.36	36

* These rates and ranks were taken from the National Education Association's Rankings of the States, 1983.

II. PUPIL CHARACTERISTICS

A. Retention Rates and Dropout Statistics

Table II.1 presents a comparison of Louisiana and national pupil retention rates from the fifth grade through high school graduation. Over the last five selected years, Louisiana retained only 63.8% of its students in public and nonpublic schools as compared with a national retention rate of 74.4%. This low retention rate explains why Louisiana ranked below the national average in percent increase in number of public high school graduates from 1976-82 even though the State was ranked high in percent of the population who were school-aged during that period.

Trends in Louisiana school dropouts are presented in Tables II.2, II.3 and II.4.

Excluding the 1982-83 school year, the percentage of students who drop out of public schools did not change significantly over the decade, with the range being from 1.87% in 1981-82 to 2.27% in 1973-74 (Table II.2). In 1982-83 the total number of dropouts decreased by 32.2% from the previous year. Some of the decrease may be attributed to a possible undercount as use of a new reporting system implemented this year may have resulted in some errors. The State supervisors of Child Welfare and Attendance supposes the decrease is due to State support of Child Welfare and Attendance personnel, sound educational programs over the past seven years, child adjustment and case study services, State assistance with child advocacy, and other reasons. Although there were fewer

Table C.

Selected Dropout Statistics, 1973-83			
SCHOOL YEAR:	73-74	78-79	82-83
Total Number of Dropouts	19,779	18,662	10,341
% of Total Registration	2.27	2.20	1.30
% of Dropouts Who are White	54.4	56.6	59.7
% of Dropouts Who are Non-white	45.6	43.4	40.3

black students than white enrolled in our public schools during the past decade, they accounted for a significantly higher dropout percentage. However, this disparity decreased over the years (Table II.2) and in fact, in 1980-81 and 1981-82 the percent of black and white dropouts was proportionate to the percent of black and white enrollment. In the 1982-83 school year, the percent of dropouts who are nonwhite was actually somewhat less than the percent of registration who are nonwhite.

Table C gives selected statistics on dropouts at five-year intervals from 1972 to 1982.

More detailed information on dropouts from 1982-83 is found in Tables II.3 and II.4. A larger percent of whites than nonwhites drop out between the ages of 15 and 17, while a larger percent of nonwhites than whites drop out below the age of 15 and above the age of 17. A higher percentage of blacks (42.8%) drop out of school before the tenth grade than do whites (36.9%). A considerably higher percentage of the parents of nonwhite dropouts (71.7%) do not have a high school education compared with the parents of white dropouts (52.7%).

White dropouts are slightly more active in extracurricular activities than nonwhites, but neither group is very active. The reasons that schools gave for the students' dropping out is similar for both races, with educational problems and personality and adjustment problems accounting for 69.7% of the dropouts. Educational problems as a major reason for dropping out is reflected in the fact that approximately 76% of the dropouts were given a low scholastic rating by their schools.

B. Suspension and Expulsion Statistics

Tables II.5, II.6 and II.7 depict suspension and expulsion data for black and white students. Approximately 44% of students in Louisiana public schools are nonwhite; however, 58.6% of suspended students are nonwhite, and 65.4% of expelled students are nonwhite. Nonwhite students are suspended for an average of 2.8 days per suspension while white students are suspended for 2.4 days. Thus, it appears that nonwhites are suspended more frequently than whites and for a slightly longer period of time (Table II.5).

Tables II.6 and II.7 compare the most frequent reasons for suspension or expulsion for nonwhite and white students. During the 1982-83 school year, nonwhites were most often suspended or expelled for fighting with students and/or faculty and for disrespect for authority (37.5%) while only 28.1% of white students were suspended or expelled for these reasons. Cutting classes, excessive tardiness, and disturbing classes are other major reasons for suspension or expulsion of both nonwhite and white students.

C. Graduates, National ACT and SAT Data

While total student registration showed a steady decline from school year 1973-74 through school year 1981-82, the absolute number of high school graduates per year increased over that period. However, the 1982-83 figures reflect a marked decrease in the total number of high school graduates. Part of this decrease may be attributed to lower secondary registration figures and a possible undercount in nonpublic graduate data. Public school graduates constituted a steady 84%-85% of the total number of graduates over the past 10 years. Black students constituted 30.9% of the total graduates in 1973-74 and 33.4% of the total graduates in 1982-83. See Table II.8 for more details about the number of high school graduates in Louisiana during this period. Information on the number of students receiving general equivalency diplomas from 1980 through 1983 was presented earlier in the narrative (see Chapter I., Adult Education).

As shown in Table II.9, data supplied by the American College Testing (ACT) program indicate that there was a decline in ACT scores both nationwide and in Louisiana from 1972 to 1982. This decline occurred primarily from 1971-76, and the scores have remained relatively constant since that time nationally and in Louisiana; however, 1982-83 scores decreased somewhat from the previous year.

A 1980 report by the Louisiana State Board of Regents¹² compared the ACT scores and high school gradepoint averages of first-time college freshmen in Louisiana with national scores. Although declining ACT scores have been accompanied nationwide by increased high school gradepoint averages, the Board of Regents found grade inflation in Louisiana to be below the national average for the period reviewed. High school averages in Louisiana for first-time freshmen went up 10% between 1969 and 1978, compared with a national increase of 16%. The mean high school average of Louisiana first-time freshmen who took the ACT in 1978 was 2.81 (on a four-point scale), compared with the national average of 2.99.

Not only do the ACT data reveal information concerning student performance in verbal and computational skills, but they also present information on student satisfaction with various aspects of high school education. Table II.10 compares Louisiana student satisfaction with national student satisfaction with regard to specific aspects of high school programs. Among the areas receiving the highest ratings by Louisiana students were classroom instruction, guidance services, library or learning centers, and grading practices and policies. The highest percentages of dissatisfaction were found in the number and variety of courses, school rules, regulations, and policies, laboratory facilities, and emphasis on career education and planning. Louisiana students were more satisfied than the national sample in nine of the 11 areas.¹³

Comparative figures on the SAT (Scholastic Aptitude Test) present a different trend. As indicated in Table II.11, Louisiana students scored well above the national average on the SAT from school year 1973-74 to school year 1982-83. The mean composite score for Louisiana students in 1982-83 was 971 compared to the national score of 893.

The contradiction in ACT and SAT national comparisons may be explained by differences in the student populations taking the two tests in Louisiana. Louisiana has one of the most liberal policies for admission to college in the nation, and the State requires that all freshmen take the ACT. Consequently, more students with marginal chances of success in college take the ACT in Louisiana than do nationwide. On the other hand, only those students going to out-of-state universities and in-state private universities take the SAT, while all freshmen take the test in certain areas of the country.

* The dropout data reported here were collected by the Bureau of Student Services in the Louisiana State Department of Education. Enrollment data from which percentages were calculated were taken from Annual Reports of the Louisiana State Department of Education. The percentages were calculated by the Louisiana State Department of Education.

** Dropout data for 1980-81 were not available for Natchitoches Parish. Registration data from Natchitoches Parish were not included in calculation of the percent of total registration who drop out.

*** From 1973-80, dropout and registration data were reported by white and black categories only. From 1980-82, dropout data were reported by white and black categories, while registration data were reported for five different ethnic groups. The sum of the percent of registration for these two years does not equal 100 percent in this table, because some of the registered students were classified as other race. Starting with 1982-83, both dropout and registration data were reported for five different ethnic groups, and the data reported here were divided into white and nonwhite categories.

**** A new computerized system for reporting dropout data was implemented in school year 1982-83. This new system will result in more consistent and complete data on dropouts in the state. Some districts experienced difficulty in converting from the old manual system to the new automated one. This may have resulted in an undercount of dropouts in some districts for school year 1982-83. For example, Winn and Caldwell parishes reported no dropouts for 1982-83.

Table II.3
Comparison of White and Non-white
Dropouts by Age and Grade Level, 1982-83*

Item	Percent White	Percent Non-white	Percent Total
Percent of total aged 5-14	3.5	4.8	4.0
Percent of total aged 15 ^a	13.9	10.5	12.5
Percent of total aged 16 ^a	38.6	27.5	34.1
Percent of total aged 17 ^a	30.2	29.3	29.8
Percent of total aged 18 and over ^a	13.8	27.9	19.6
Percent of total who dropped out in grades 1-6 ^b	1.3	1.6	1.5
Percent of total who dropped out in grades 7-9 ^b	35.6	41.2	37.7
Percent of total who dropped out in grades 10-12 ^b	63.1	57.2	60.8

* The dropout data reported here were gathered from the Bureau of Student Services in the Louisiana State Department of Education. The percentages were calculated by the Louisiana State Department of Education.

^a These figures exclude those dropouts for whom age information was not available.

^b These figures exclude dropouts from special education, kindergarten, and ungraded categories plus those dropouts for whom grade information was not available.

Table II.4
Comparison of White and Non-white Dropouts
on Selected Dimensions, 1982-83*

Item	Percent White	Percent Non-white	Percent Total
I. Parent's Education ^a			
A. Mother's Education			
1. Mother does not have high school education	52.7	71.7	58.8
2. Mother does have high school education	47.3	28.3	41.2

* The Bureau of Research depends on the voluntary reporting of nonpublic graduates by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic graduates. For example, four districts (Allen, Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1982-83 school year. Ouachita Parish did not receive accurate data on the number of nonpublic students from its nonpublic schools for 1982-83. Therefore, the number of graduates for these five districts (Allen, Franklin, Ouachita, Tensas, and Washington) is reported as not available for 1982-83. Also, discrepancies exist between the number of nonpublic twelfth grade students and the number of nonpublic graduates for five parish (Avoyelles, East Baton Rouge, Pointe Coupee, Rapides, and St. Tammany) in 1982-83. These districts were unable to resolve the discrepancies due to lack of information from the nonpublic schools.

** Includes graduates from summer and midterm.

*** 1979-80 was the first year that the districts were asked to report the number of Hispanic, American Indian and Asian high school graduates. Some districts noted difficulty in reporting this information, so there is probably an undercount of graduates from these ethnic groups for this year.

Table II.9
 Comparison of Louisiana and
 National ACT Scores for Freshmen, 1973-83*

Year	Louisiana	National
1972-73	17.8	19.2

* These figures were taken from publications of the College Entrance Examination Board of Princeton, New Jersey.

III. STAFF CHARACTERISTICS

A. Professional and Nonprofessional Personnel

There was an overall increase in both the professional and nonprofessional staffs of the public schools from 1974-75 to 1982-83, as indicated in Table III.1. The professional staff increased by 8.42% during this period, while the nonprofessional staff increased by 11.8%. The percentage of professional staff within public schools ranged between 58.6% and 59.8% during this period.

A more detailed breakdown of professional and nonprofessional personnel in the public school system is presented in Table III.2. Slightly under 50% of all the staff in the public school system are full-time classroom teachers. Louisiana has traditionally had one of the highest percentages of nonprofessional staff personnel in the nation (Table III.9), and this trend has continued through 1982-83. Approximately 41% of the public staff in 1982-83 were nonprofessional, with service workers (19.4%) and office/clerical workers (12.6%) constituting the largest categories.

Trends in professional and nonprofessional personnel in the nonpublic school system from 1971-80 can be found in the 131st Annual Report of the Louisiana Department of Education. Starting with school year 1980-81, a new format for reporting nonpublic school personnel was initiated. Data for the 1982-83 school year were not reported as the information was incomplete.

B. Instructional Staff

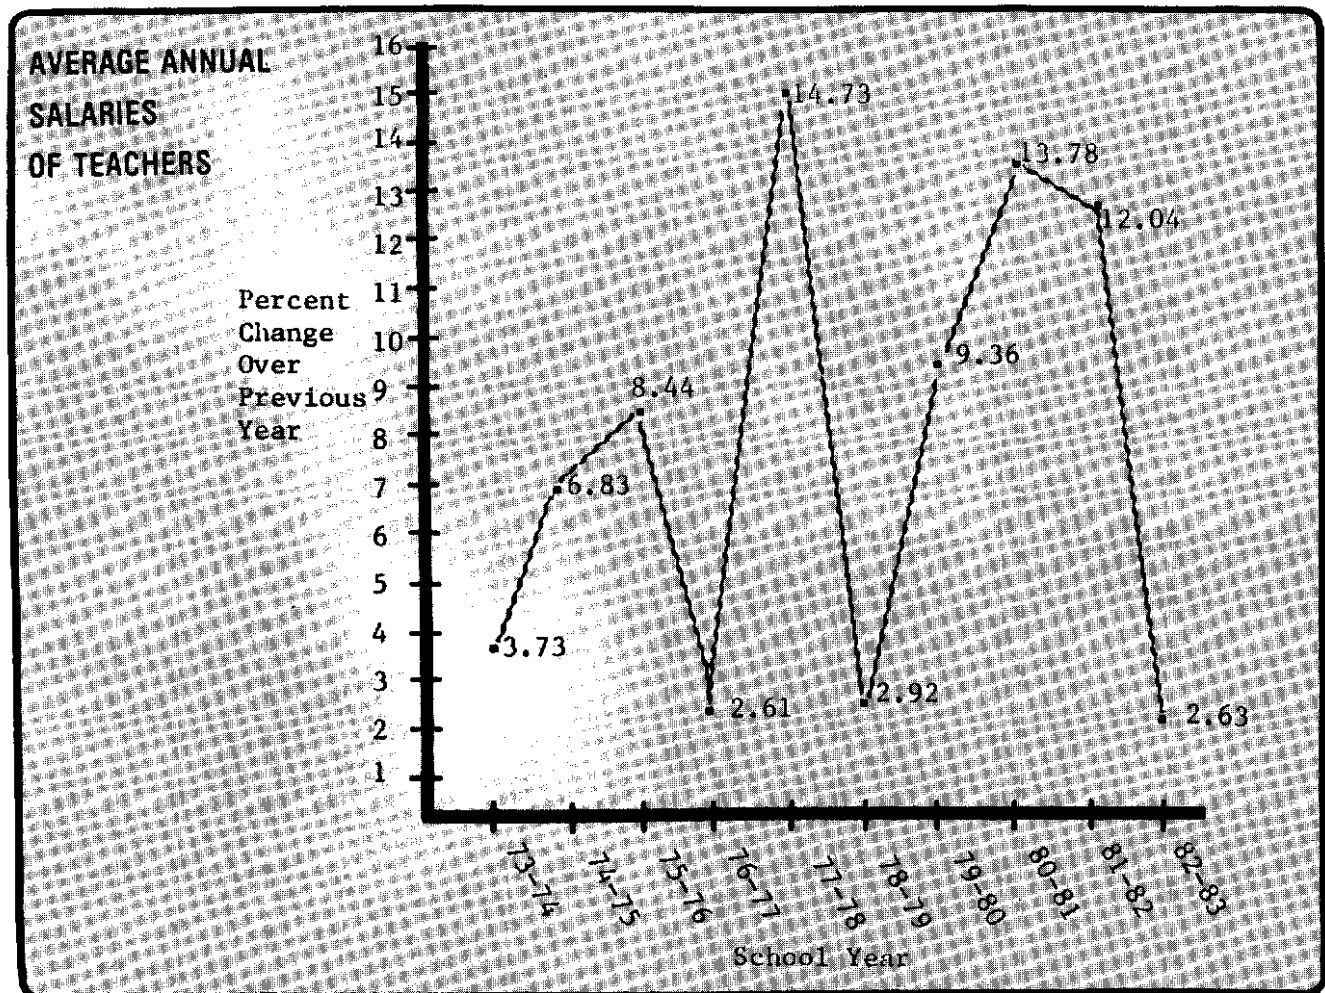

From school year 1974-75 to school year 1982-83 there were changes in the sex and race ratios of principals and classroom teachers in the public school system, as indicated in Table III.3. The 7.1% decline in percentage of white male principals over this period was accounted for by a 0.8% increase in black male principals, a 1.1% increase in black female principals and a 4.9% increase in white female principals. The percentage of male principals in 1974-75 was 85.4% as compared with 79.0% in 1982-83. In 1974-75, 74.9% of the classroom teachers were female. This figure had increased to 79.9% by school year 1982-83. Thus, the inverse relationship between percentage of male principals and percentage of male classroom teachers continued unabated during this period. The black-white ratio of classroom teachers stayed approximately the same during the past decade.

The professional training of the public school instructional staff changed considerably during the period from 1974-83 as indicated in Table III.4. The number of teachers and principals with less than a college education decreased from 1.37% of the total to only .52% while the number with a bachelor's degree decreased from approximately 64% to 55%.

Conversely, the number with more than four years of college increased dramatically from 34.6% of the total in 1974-75 to 44.8% in 1982-83.

Table III.5 presents the total experience of teachers and principals in the public school system from 1973 to 1983. The number of teachers with fewer than five years of experience decreased from 29.4% of the total in 1973-74 to 20.3% in 1982-83. On the other hand, the number of teachers with five to nine years of experience increased slightly from 24.4% of the total to 25.9%, and the number of teachers with 10 to 14 years of experience increased from 15.0% to 21.3%. Thus, teachers with five to 14 years of experience increased from 39.4% in 1973-74 to 47.2% in 1982-83. It would appear that attrition is likely to occur within the first five years of teaching. If teachers remain in the profession after this time, they are apt to stay until 20 or more years of service have been completed.

Figure 4.

The annual salaries of principals and teachers in the public school system increased each year from 1973-83. This trend is presented in Table III.6. The average teacher's salary increased approximately 101% during this period (from \$9,166 in 1973-74 to \$18,416 in 1982-83), compared with an approximate 104% increase for principals (from \$14,460 in 1973-74 to \$29,569 in 1982-83). Salaries for black teachers were slightly higher over this period than those for white teachers. This is probably a function of the longer average experience of black teachers in the public school system. Figure 4 (previous page) illustrates the percent change over the previous year in the average teacher salary, 1973-83.

Teacher salaries, as compared with industrial salaries, continue to be significantly less. According to a February 14, 1982, story in the Baton Rouge Sunday Advocate, area industry pays a nonsupervisory employee in the range of \$24,000 a year plus fringe benefits, including paid vacation, and employees in many plants are able to boost their income by means of overtime pay. By contrast, this same news story stated that an average Baton Rouge teacher with 10 years of experience earns about \$16,000 for nine months of work, with no paid vacations. The issue of teacher shortage is clearly related to salary. Opportunities, particularly in the areas of industrial arts, math, and science, exist in industry.

Table E.

Student-Teacher Ratio, 1972-82	
<u>CATEGORY</u>	<u>STUDENT-TEACHER RATIO</u>
I. Public Schools	
A. Kindergarten-8th Grade	25.17
B. 9th-12th Grades	15.00
C. Special Education	4.98
D. Total	18.65

The student-teacher ratios for public and nonpublic schools for 1982-83 are presented in Table III.7. Trends in student-teacher ratios for the period 1971-80 can be found in the 131st Annual Report of the Louisiana Department of Education.

In 1982-83, there were 18.7 students for every full-time classroom teacher in Louisiana public schools. Tables IV.4, IV.5, and IV.6 present mean class size by class type of data, which are a more meaningful measure of the relationship between the numbers of teachers and students in the Louisiana school system. Table E gives 1982-83 ratios by school level.

In 1978 the Public Affairs Research Council published a bulletin entitled Impact of Declining School Enrollments: Past, Present and Future. In this bulletin it was demonstrated that a decrease in students and an increase in teachers occurred in grades 1-12 (excluding kindergarten and special education) of the Louisiana public school system between school year 1969-70 and school year 1977-78. A similar analysis by the Bureau of Research¹⁴ on data from 1970-71 to 1979-80 demonstrated a 9.7% decrease in students and a 2.7% increase in teachers during this period. These trends resulted in a decrease in the pupil-teacher ratio during the 1970s.

This trend in Louisiana followed a national tendency toward decreased pupil-teacher ratios in the 1970s that has continued into school year 1982-83. The National Education Association provides data that compare the trend for both the U.S. and Louisiana. These data can be found in Table III.8. Louisiana ranked thirteenth in the nation in 1972 in teacher-pupil ratio and thirtieth in the nation in 1982. However, the actual pupil-teacher ratio in Louisiana decreased from 20.2 to 18.7 during that period. (Some differences exist in the figures produced by the NEA and PAR analyses because of different techniques for computation of the ratios.)

Louisiana ranked nineteenth in the nation for total number of full-time instructional staff in local public schools in 1981-82. However, the State ranked even higher (fourteenth) in the number of noninstructional full-time staff in public schools as indicated in Table III.9.

While the State has maintained a pupil-teacher ratio comparable with the national ratio, the estimated average salary of public school teachers has been consistently below the national average. However, in the 1982-83 school year, the difference narrowed considerably. According to National Education Association estimates,¹⁵ Louisiana paid its public school teachers 81.4% of the national average in 1969-70, 82.1% of that average in 1974-75, and 93.51% of the national average in 1982-83. The estimated average salary of public school teachers nationally was \$20,603 in 1982-83, compared with the Louisiana average of \$19,265. According to NEA then, Louisiana ranked twenty-eighth nationally in estimated average teacher salaries in 1982-83.

It should be noted that data collected at the Louisiana Department of Education indicate that classroom teachers in the State made \$18,794 in 1982-83, or 91.2% of the estimated

national average. This figure is more accurate than the NEA estimate of Louisiana teachers' salaries, since it is based on direct financial reports from the parishes.

The State ranks low in percent of male teachers in public elementary and secondary schools. In 1982-83, NEA estimated that approximately 20% of the teachers in Louisiana were male, compared with the national average of approximately 32%.

* Experience of principals and teachers was reported by the districts in 1979-80 in the following categories: 0 years, 1-2 years, 3-5 years, 6-9 years, 10-12 years, 13-14 years and 15 or more years. This categorization is different from that reported for the years 1972-78. In order to obtain comparable data across the decade, an extrapolation was performed on the 1979-80 data. Category 0-4 years experience for 1979-80 includes categories 0, 1-2 years and 2/3 of the number reported for category 3-5 years. Category 5-9 years experience for 1979-80 includes 1/3 of the number reported for category 3-5 years plus all those in category 6-9 years.

** This figure does not include 38 principals from Ouachita Parish for whom experience data were unavailable.

Estimated average salaries of public school teachers as a percent of national average, 1982-83	93.51	100.00	28

* These rates and ranks were taken from the National Education Association's Rankings of the States, 1983.

IV. LOUISIANA SCHOOLS: CHARACTERISTICS

The total number of public and nonpublic schools increased by approximately 3.0% from 1973 to 1983. Thus, while the total number of students decreased, the number of schools increased. There was a net increase of 58 schools during this same 10-year period, consisting of an increase of 62 schools in the public school system and a decrease of 24 schools in the nonpublic system. However, in comparing the 1981-82 school year with the previous year, the number of public schools increased by seven while the number of nonpublic schools decreased by 25. See Table IV.1 for more details.

As indicated in Table IV.2, there was a net decrease in the number of buildings and in the number of sites of public school property from 1973-83. Overall, the total cost of buildings, sites, and equipment more than doubled during this period, with the largest increases occurring during the inflationary 1976-81 period.

The number of libraries, librarians, and books all increased from 1972-82, as noted in Table IV.3. Current payments for salaries, books, and supplies more than doubled during this period.

The Bureau of Research collected data on classroom size by classroom type for the first time in Louisiana during the 1980-81 school year. These data contain more valuable information than pupil-teacher ratios, which mask large differences in classroom sizes that exist between regular, special, and compensatory classes.

The distributions of classroom size by classroom type for elementary and secondary schools for school year 1982-83 are found in Tables IV.4 and IV.5 respectively. Table IV.6 presents mean class size by class type. As Tables IV.4 and IV.5 indicate, the highest percentage of regular classes is found in the medium class size range (20-24, 25-29). This applies to both elementary and secondary schools. Ungraded (continuous progress) classes in the elementary schools are also concentrated in this range.

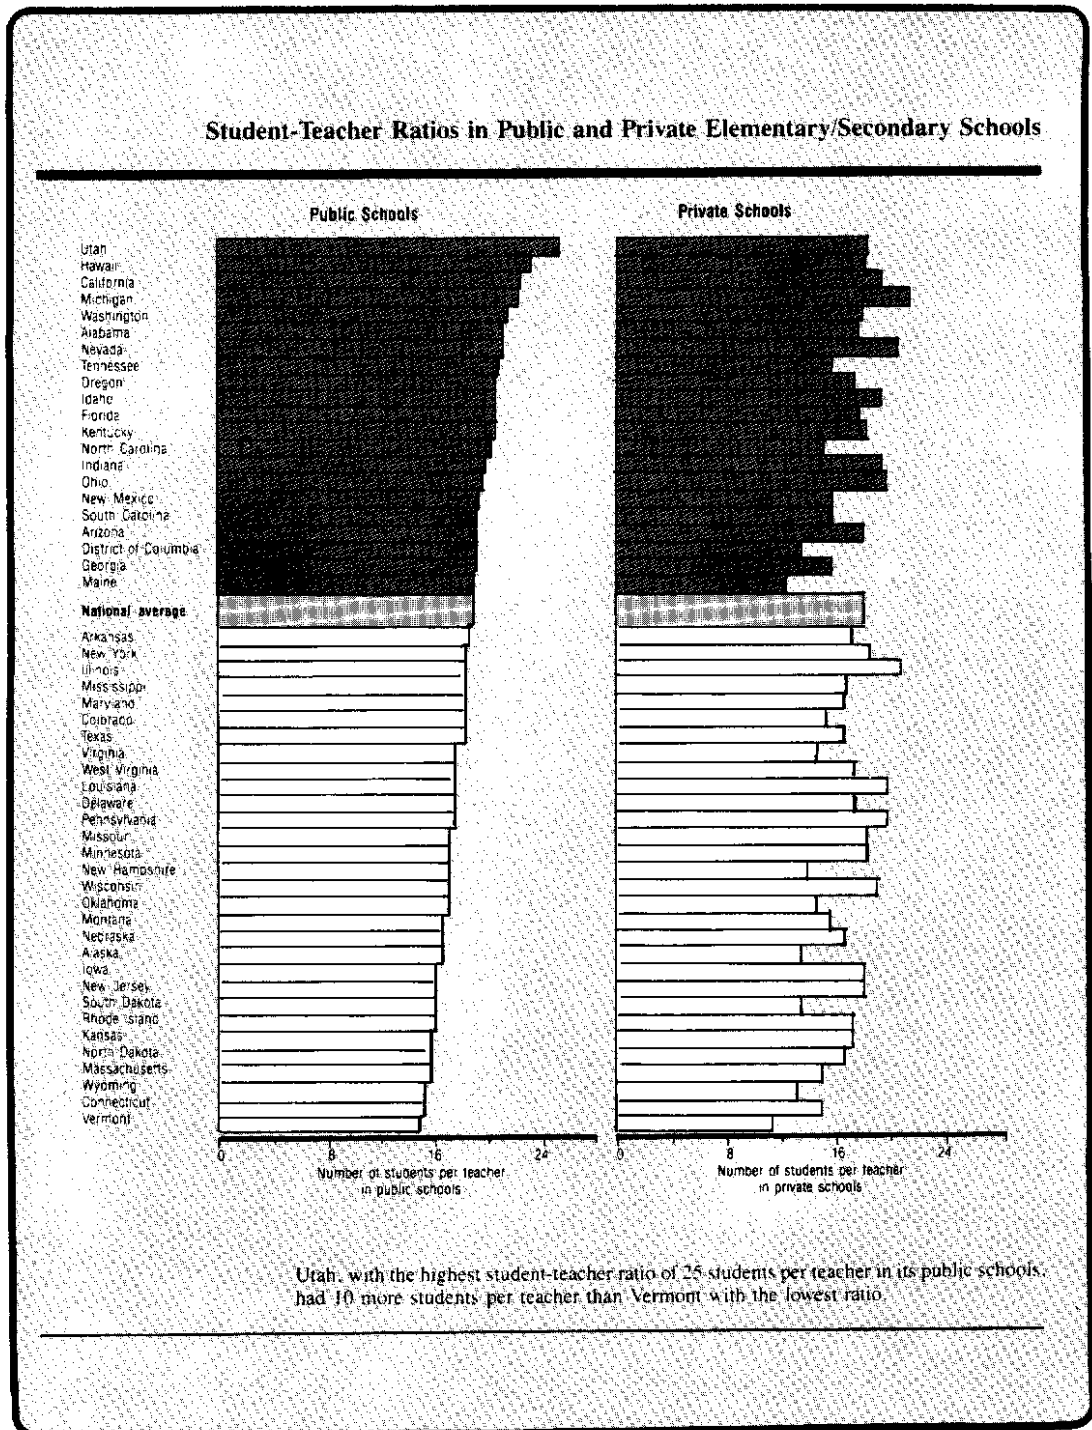

Special education classes, on the other hand, are concentrated in the smaller class size range (5-9, 10-14). This also applies to both elementary and secondary schools. Compensatory education classes in elementary schools are also concentrated in the smaller class range. Vocational education classes are concentrated in two medium class size ranges (15-19, 20-24).

As Table IV.6 indicates, the mean class size for regular education classes in the elementary grades is 24.83, while it is 22.39 in the regular secondary grades. Mean class size for special education classes for the elementary and secondary grade levels are 7.82 and 8.07 respectively.

Approximately 590,999 public and nonpublic students have been transported to and from school annually during the past decade. In the 1981-82 school year the State of Louisiana operated 7,390 school buses at an annual cost of approximately \$172.58 per

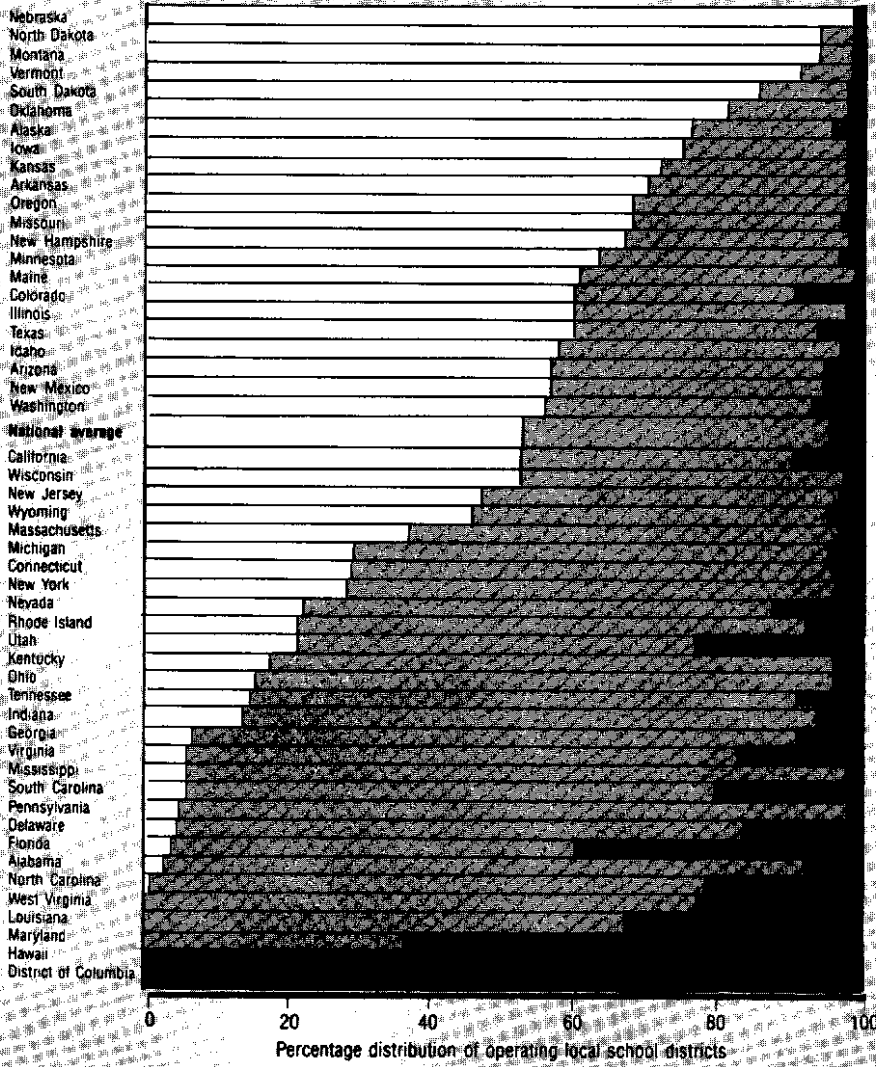

student. These buses have traveled an average of 480,000 miles this year. The cost for this transportation, on an annual basis, has risen steadily during the decade with the cost for the 1982-83 school year being over 100 million dollars. More information for school year 1982-83 can be obtained by examining Item 19 on the State Summary Profile.

Figure 5.

Louisiana has a relatively small number of basic administrative units operating public school districts: 66, one in each parish plus the cities of Monroe and Bogalusa. This is the eleventh smallest number of operating units in the nation. Compared to the rest of the nation, Louisiana's local school districts have a relatively high percentage of students per district as indicated in the figure below.

Enrollment Size Distribution of Operating Local School Districts

For the Nation as a whole and in 24 States, school districts of under 1,000 students represented the majority of districts in 1981-82.

Table IV.1
Number of Public and Nonpublic* Schools, 1973-83

- * The Bureau of Research depends on the voluntary reporting of nonpublic school data by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic schools.
- ** These percent changes are from the previous year.
- *** Lafayette Parish failed to report data on nonpublic schools for 1979-80. Data from 1978-79 were substituted for the missing 1979-80 data in compilation of the total number of schools for 1979-80.

V. EDUCATION FINANCE

A. Trends in Louisiana Education Finance

The trend in revenue from local, State, and Federal sources for education for the 1978-83 period is presented in Table V.1. Only the last five years of the decade were included in this trend analysis. Figure 7, below, illustrates the percentages of revenue from local, State, and Federal sources for 1982-83.

Figure 7.

Total revenue increased by 56.03% over this five-year period, from \$1,361,124,301 in 1978-79 to \$2,123,715,072 in 1982-83. The percent of total revenue from local sources increased 3.21% over this period, while the percent of the total from Federal sources decreased 5.3% and that from State sources increased 2.09%. According to the Education Consolidation Act of 1981 ESEA Title I funds would be phased out and replaced by ECIA funds. As indicated in Table V.2-A a much smaller amount of revenue from ESEA Title I funds was acquired in 1982-83, while replacement revenue under ECIA Chapter 1 and 2 was issued as shown in Table V.2-B. Total 1982-83 revenue from ESEA and ECIA funds increased 142% from 1973-74; however, the total amount actually decreased somewhat from the previous year.

The minimum foundation program for Louisiana for the past 10 years is presented in Table V.3. The overall cost of the program more than doubled (2.24 times higher in 1982-83 than

in 1973-74) over this 10-year period. However, the local support for the program increased only 24.2% during this same period. Thus, the percent of local support for the total cost of the program decreased from 9.93% in 1973-74 to 5.51% in 1982-83.

The expenditure of all State revenues (including Federal grants) and of State revenues (excluding Federal grants) for all government functions is found in Tables V.4 and V.5. These figures were taken from the Executive Budgets of the State of Louisiana for the past 10 years. The percent of all State and Federal revenues going to education ranged from a low of 31.83% in 1980-81 to a high of 36.95% in 1972-73. The percent of State revenues going into education ranged from a low of 35.21% in 1975-76 to a high of 42.13% in 1972-73. In 1982-83, 35.44% of all State and Federal revenues and 39.54% of State revenues were spent on education.

Education expenditures by function for the period 1978-83 are found in Table V.6. During this period total expenditures increased by 57.5%. The percent of the total amount spent for instruction and for supporting services stayed about the same during this period: approximately 43% to 47% for instruction and approximately 51% to 54% for supporting services. The largest relative increase for instruction occurred in adult/continuing education programs.

Expenditures per public school pupil for the past decade are found in Table V.7. The expenditure per registered student increased from \$868.51 in 1973-74 to \$2,462.09 in 1982-83. Similar increases in expenditure per pupil in average daily membership and expenditure per pupil in average daily attendance occurred during this period. The expenditure per pupil in average daily membership was \$2,501.40 in 1982-83, while it was \$2,779.76 per pupil in average daily attendance.

Total expenditures for special education in Louisiana increased exponentially during the past decade as can be seen in Table V.8. State expenditures on special education for 1982-83 were 7.5 times higher than those for 1973-74, while 1982-83 Federal expenditures were 9.4 times higher than those for 1972-73.

Expenditures in Vocational Education programs for the past 10 years are shown in Table V.9. Expenditures for vocational education more than doubled in the past decade. The expenditures for 1982-83, however, decreased from the previous year.

B. Financial Characteristics and Comparisons

Indebtedness for the State's parish/city school systems totalled \$905,416,164 in 1982-83; 98.9% of this debt was bonded debt. See Table V.10 for a breakdown of school system indebtedness for 1982-83. Also, see Table V.11 for the total

ending balances for cash, petty cash, and investments for parish/city school systems in 1982-83.

See Table V.12 for more details concerning revenues and expenditures for the State Department of Education for the fiscal year ending June 30, 1983.

In terms of personal income, Louisiana ranks low in income statistics and high in poverty indicators. As indicated in Table V.13, Louisianians earned only 90.73% of the national per capita income in 1981. Also in 1981 Louisiana ranked thirty-eighth in personal income per child of school age, averaging \$9,881 less per child than the national norm. This low average is a result of the high number of school aged children relative to the adult population and the low per capita income in the State. The 1980 ranking was also thirty-eight; however it was an increase from 1979, when Louisiana ranked forty-sixth in personal income per child of school age.

While Louisiana's per capita personal income is well below the national average, the State is only slightly below the average in per capita total general revenue of State and local governments. Given Louisiana's low per capita income, State taxes are relatively high. As indicated in Table V.13, the State ranked twelfth in 1981 in revenue of State and local governments as percent of personal income. It is interesting to note that these relatively high State taxes are not a function of property taxes, since Louisiana has the second lowest per capita property tax revenue in the nation.

In a supplement to its basic volume, Tax Wealth in Fifty States, 1977, the National Institute of Education presented tax capacity, effort, and collected revenue data for state and local governments¹⁶. This supplement concluded that Louisiana under-utilized property taxes and slightly over-utilized sales and gross receipt taxes. While the State ranks relatively high in revenue of State and local governments as percent of personal income according to the NEA rankings, the NIE report concludes that the State is taxing well below its capacity relative to other states. In fact, Louisiana has one of the largest negative values in the nation for amount collected less potential tax yield. The major taxes being under-utilized are property taxes on commercial and industrial firms, public utilities, and residences.

The National Education Association estimated that Louisiana ranked thirty-fourth in the nation in public school revenue receipts per pupil in average daily attendance in 1982-83. Compared with national figures, Louisiana receives relatively less of its revenue for public education from local sources and relatively more from State and Federal sources. The NEA estimated that Louisiana ranked seventeenth in the nation in percent of public education revenue from Federal sources in

1982-83, whereas the NEA estimated that the State ranked third in this category in 1981-82 as shown in Table V.14.

Table V.15 presents a comparison of Louisiana and national direct expenditures for all government functions and for education from 1973-81. For each of these nine years, the percent of per capita income that Louisiana spent on all government functions was above the national average, ranging from an excess of 1.1% to 2.4%.

In 1981, Louisiana's per capita personal income was 90.7% of the national per capita income. In school year 1980-81 the amount Louisiana spent per capita on education was approximately 97 percent (96.97) of the national amount spent. Thus, Louisiana's low ranking, thirty-fifth in amount spent per capita on education, is a function of its low per capita income rather than a lower percentage of commitment of personal income to education.

Comparisons of State and national expenditures per pupil in average daily attendance and membership are found in Table V.16. Louisiana spent approximately 90.6% to 96.5% of the national average expenditure for public schools per pupil in average daily attendance or membership for fiscal years 1981-82 and 1982-83. Although this expenditure is below the national average, the State did spend a higher percentage (4.53%) of its citizens' personal income on education in 1981 compared with the national average (4.20%). Thus, again, the State's low rank on school expenditure is a function of low personal income rather than low commitment to education.

The National Center for Education Statistics¹⁷ publishes an interesting comparison of the school systems of 20 large cities in the U.S. annually. In fiscal year 1977-78, the New Orleans public school system spent \$1,646 per pupil in average daily attendance, compared with the national average for large cities of \$2,195. Out of the 19 cities ranked on this dimension, New Orleans placed fourteenth. The city spent more money per pupil in average daily attendance than did Houston, Indianapolis, Memphis, Phoenix, or San Antonio.

Another publication by NCES presents the distribution of school districts by current expenditure per pupil. No school district in Louisiana spent more than \$1,999 per pupil in the school year ending 1980; nationally 18.1% of the school districts spent more than \$2,000 per pupil in this school year as shown in Table V.17. A more recent publication by NCES ranked the 50 states in current expenditure per pupil based on average daily attendance (see Figure 8).¹⁸

A comparison of the purposes for which Louisiana and the nation expended education funds in 1979-80 is found in Table V.18. Louisiana spent less than the national percent for administration, plant operation and maintenance, fixed

charges, attendance, and health services in this year. It spent more than the national percent for instruction, transportation services, other pupil services, including food services, and capital outlay.

^a Net expenditures for 1972-80 included all expenditures except capital outlay; net expenditures for 1980-82 included only instruction and supporting services.

^b This figure includes students in special education and kindergarten.

^c Plaquemines Parish failed to report financial data for 1979-80. Data from 1978-79 were substituted for the missing 1979-80 data in the compilation of the totals for 1979-80.

^d Union Parish failed to report financial data for 1982-83. Data from 1981-82 were substituted for the missing 1982-83 data in the compilation of the totals for 1982-83.

Table V.8
State and Federal Expenditures for Special Education, 1973-83*

Fiscal Year	State Expenditures	Federal Expenditures	Total Expenditures
1973-74	\$ 19,766,665	\$ 2,036,723	\$ 21,803,388
1974-75	32,768,332	1,966,764	34,735,096
1975-76	45,240,398	2,090,877	47,331,275
1976-77	50,726,050	4,070,828	54,796,878
1977-78	65,161,131	6,552,921	71,714,052
1978-79	75,929,655	15,944,240	91,873,895
1979-80	92,586,079	21,244,965	113,831,044
1980-81	97,204,327	22,382,895	119,587,222
1981-82	130,467,163	23,456,764	153,923,927
1982-83	148,872,431	19,086,871	167,959,302

* These figures were supplied by Ms. Linda Tindall of the Division of Special Education in the Louisiana State Department of Education.

Table V.9
Expenditures in Vocational Education Programs, 1973-83*

Year	Federal	State and Local	Total
1973-74	\$ 11,644,528	\$ 32,751,205	\$ 44,395,733
1974-75	12,571,809	38,542,238	51,114,047
1975-76	11,318,882	37,430,988	48,749,870
1976-77	12,299,757	48,243,380	60,543,137
1977-78	12,033,047	51,630,762	63,663,809
1978-79	9,120,119	54,871,572	63,991,691
1979-80	10,695,208	74,268,319	84,963,527
1980-81	15,539,589	109,727,079	125,266,668
1981-82	12,023,933	81,561,419	93,585,352
1982-83	13,474,117	77,825,940	91,300,057

* These data were provided by the Bureau of Administrative Services in the Office of Vocational Education in the Louisiana State Department of Education.

Table V.10

State Totals for Bonded and Other Debt
for Parish/City School Systems, 1980-83^a

	1980-81 ^b	1981-82	1982-83 ^c
Beginning Balance Bonded	\$706,087,753	\$771,105,847	\$795,925,000
Bonds Sold	99,692,300	68,432,700	160,590,000
Bonds Redeemed	42,106,361	44,759,000	60,657,000
Ending Balance Bonded	763,673,692	794,779,547	895,858,000
Short-Term Debt	35,071,699	2,713,231	2,544,265
Long-Term Debt	7,869,672	7,863,173	7,013,899
Total Indebtedness	\$806,615,063	\$805,355,951	905,416,164

^a Figures above were compiled from unaudited data furnished directly to the Louisiana State Department of Education from the parish/city school systems, which may include later audit changes to the beginning balance.

^b The short-term debt figure for this year includes payables, subsequent years do not.

^c Union Parish did not report this data; an estimate based on 1981-82 data was substituted in the compilation of state totals.

Table V.11

Total Ending Balances for Cash, Petty Cash
and Investments for Parish/City School Systems, 1982-83*

	June 30, 1982	June 30, 1983	Percent Increase (+) or Decrease (-)
Cash	\$ 79,060,881	\$111,863,893	+41.49
Petty Cash	11,993	2,579	-78.50
Investments	482,740,643	527,544,651	+9.28
Total	\$561,813,517	\$639,411,123	+13.81

* Figures above were compiled from unaudited data furnished directly to the Louisiana State Department of Education from the parish/city school systems.

** Union Parish did not report financial data for 1982-83; data from 1981-82 was substituted in the compilation of state totals.

Table V.18

Summary of Louisiana and National Expenditure by Specific Purpose for Public Elementary and Secondary Education as Percentage of Total Expenditure, 1979-80*

Total Expenditures all Schools	Current Expenditures for Elementary and Secondary Day Schools										Interest on School Debt	
	Total Administration ^a	Instruction	Plant Operation and Maintenance	Fixed Charges	Attendance and Health Services	Transportation Services	Other Pupil Services ^b	Other Programs ^c	Capital Outlay			
U.S. Percent	100.0	90.6	4.4	55.5	10.2	12.3	0.8	4.0	3.4	0.6	6.8	2.0
Louisiana Percent	100.0	88.8	4.3	56.1	8.7	4.7	0.7	6.5	7.7	0.2	8.5	2.6
Louisiana Percent Minus U.S. Percent	--	-1.8	-0.1	+0.6	-1.5	-7.6	-0.1	+2.5	+4.3	-0.4	+1.7	+0.6

* These percentages were calculated by the Louisiana State Department of Education from figures found in the National Center for Education Statistics publication entitled Digest of Education Statistics, 1982.

a Includes expenditure at all levels: state departments and state boards of education, intermediate administrative units, and local education agencies.

b Includes food services and pupil activities paid from tax revenues.

c Includes summer schools and community services.

d Includes capital outlays by state and local schoolhousing authorities.

VI. LOUISIANA AND THE SOUTHEAST REGION¹⁹

Louisiana is one of 12 member states of the Southeastern Regional Council for Educational Improvement (SRCEI). The other members are Alabama, Arkansas, Florida, Georgia, Kentucky, Massachusetts, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia. The SRCEI Council assists these member states and their State Departments of Education in studies of education-related policy issues, including teacher and school effectiveness, educational technology, and school building leadership. The Council also has developed the Southeastern Educational Information System (SEIS), which provides basic educational and demographic data by state, region, and nation.

The data provided indicate that the Southeast faces educational and socioeconomic difficulties greater than those of other regions. Yet, the Southeast has made great advances toward achieving "universal education"--a basic education for every citizen. Difficulties affecting the Southeast include such factors as declining enrollments, lower levels of educational attainment, lower per-capita income, lower education revenues, lower per-pupil expenditures and teachers' salaries, greater in-migration, a higher rate of population increase, higher rates of poverty, and higher age-dependency ratios. All of these factors and their impact on education in Louisiana and the Southeast Region will be discussed in this section. Where the U.S. Census term "south" is used, the Southeastern states are included, in addition to Delaware, the District of Columbia, Maryland, Oklahoma, and Texas. But unless otherwise indicated, this section concentrates on the Southeast and Louisiana specifically.

A. Enrollment:

Between 1970 and 1980, the nation experienced a decline in public school enrollment, while experiencing a total population increase. Therefore, the enrollment/population ratio for the nation had dropped from 22.58% in 1970 to 18.05% in 1980. The South had the largest proportion of enrollment as a percentage of 1980 census population figures (18.72%). Louisiana had an enrollment/population ratio of 18.57%. These figures were influenced by many factors such as in- and out-of-state migration patterns, the economy, postponement of childbirth, and changes in public school participation rates.

The North Central Region of the United States experienced the largest enrollment decline during the past decade (17.25%) while the South showed the smallest rate of public school enrollment decline (3.91%). While the Southeastern states showed the same pattern of declining public school enrollment as the entire nation (except Florida, which had an increase), the South held the largest share of the nation's 1980 public school enrollment (34.5%).

In the 1980-81 school year, the Southeastern region showed a larger proportion of public elementary enrollments (69.5%) than the national average (67.43%) or the proportions in each of the four U.S. Census Regions (South 69.38%, Northeast 65.10%, North Central 66.24%, and the West 67.97%). The Southeast's larger proportion of elementary enrollment could be attributed to its higher birth rates, younger population (except in Florida), and its growing in-migrating population.

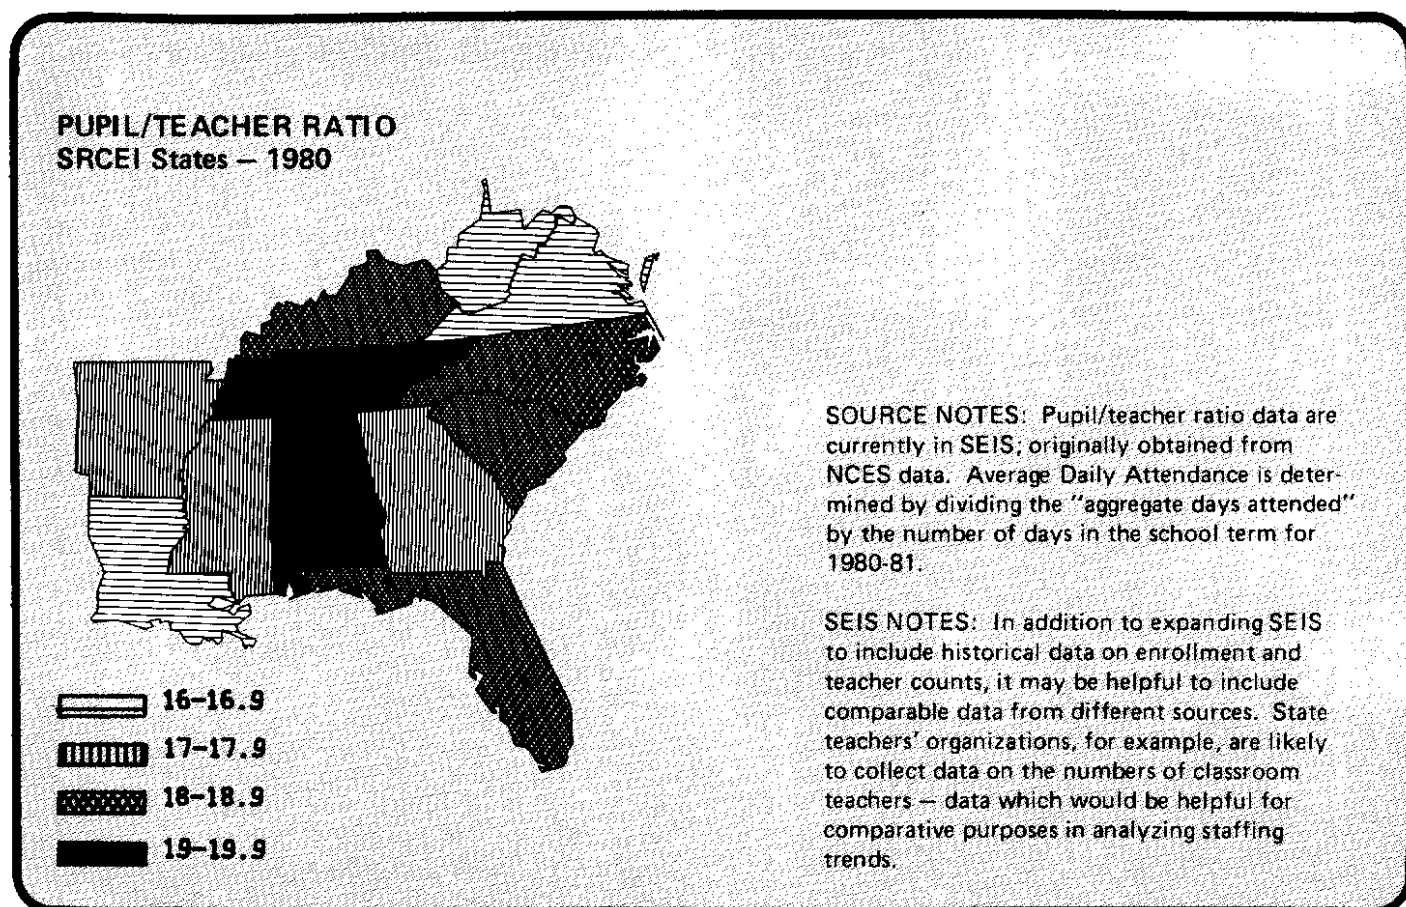

Louisiana's percentage of public school enrollment for 1980-81 was 69.91% which also was above the national, Southern, and Southeastern regional figures. Historically, the South has depended more on the public school systems than have other regions. Regional reliance on public education can be seen by comparing average private school enrollments in the Southeast (8.3%) with the national average (10.6%). In the Southeast, only Louisiana (20.2%) and Florida (11.4%) had private school enrollments above the national average. This can be attributed to the schools operated by the Catholic Church, with 72% and 36% private school enrollments respectively.

A comparison of the relative sizes of enrollments in early (1-4) and middle (5-8) grades provides information on the "pressures" on the public school system. Large enrollments in the early grades may indicate a need for expanded facilities and staffs. Fewer students may indicate a need for future cutbacks. For all regions except the West, each age group is smaller as the ages decrease. Louisiana is the only State within the Southeastern Region to exhibit the deviating pattern of the West, as both Louisiana and the West show populations that increase in size as the age cohort becomes younger.

According to information obtained from SEIS, public school enrollments in the Southeast states are more fully integrated than those of school systems elsewhere. Desegregation efforts of the last 25 years seem to have been successful in the Southeast, where students are more likely than those in other regions to attend schools with students of different races.

Pupil-teacher ratios, which are not the equivalent of class size, are found by dividing average daily attendance by the number of classroom teachers. The West had the largest number of pupils per teacher (18.54%), with the South following (17.42%). Among the Southeast Region States, Louisiana had the lowest 1980-81 pupil-teacher ratio (16.16%), and Alabama had the highest (19.72%). A decrease in the ratio of students to teachers is associated with an increase in intensive attention and instruction for each child. Figure 9 shows the pupil/teacher ratio for the SRCEI states in 1980.

Figure 9.

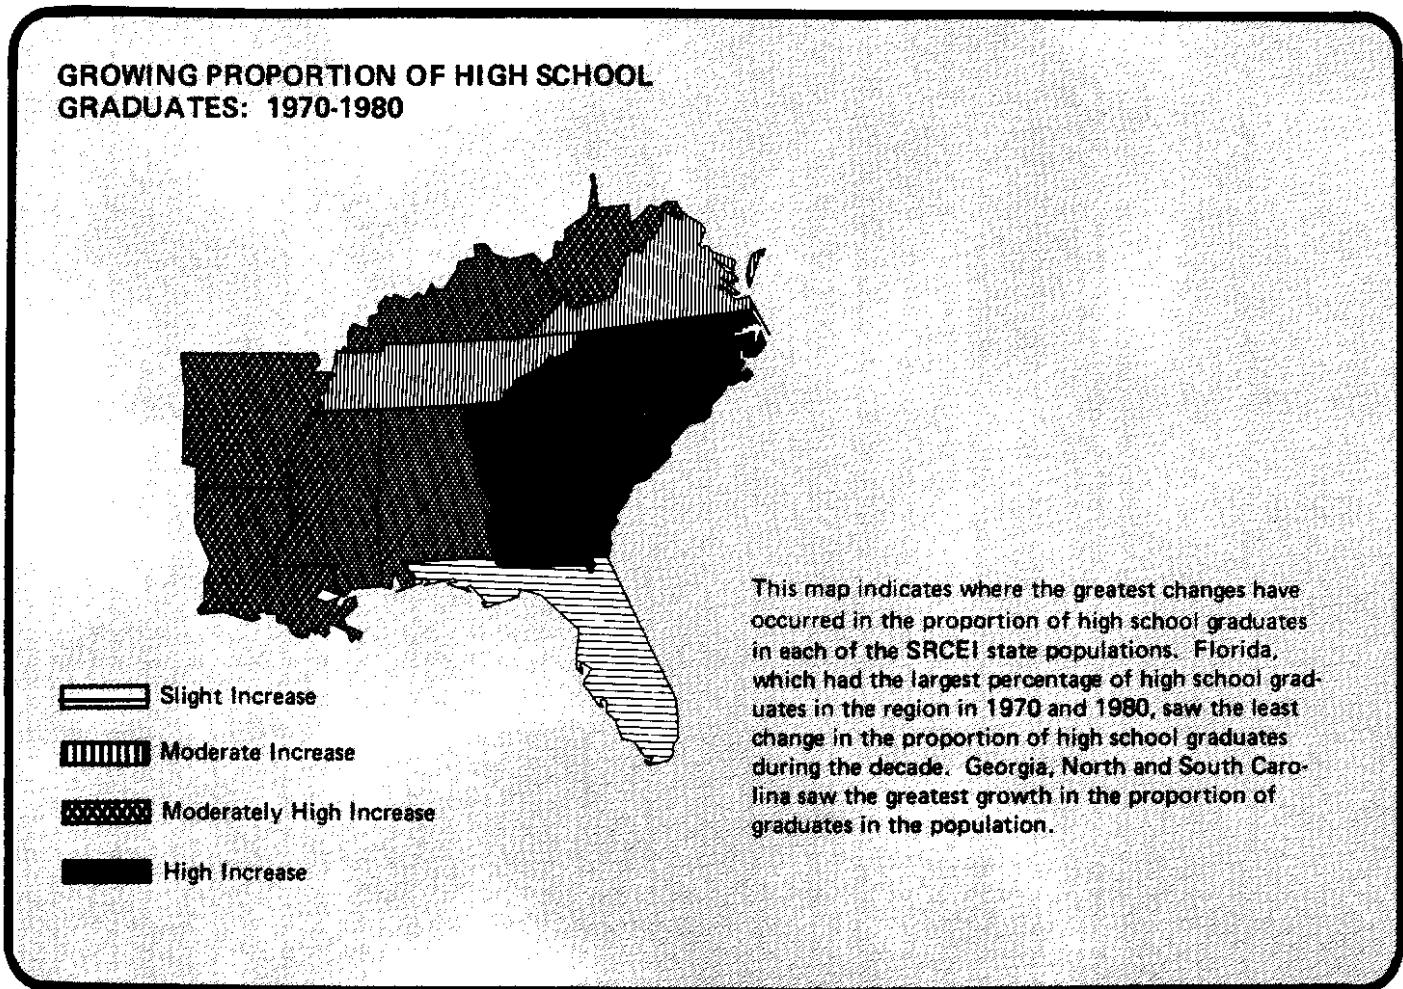

B. Education and the Public

The number of high school graduates increased substantially during the past decade for both the South and the Southeastern region. In 1970, only 42% of the Southeastern (SRCEI) population 25 years and over were high school graduates, compared with 52.3% of the national population. That was 80.3% of the national average. In 1980, the Southeast, while continuing to show the lowest percentage of high school graduates, pointed to 58.6% of the population as high school graduates. The Southeast now claimed 88.39% of the national average. This increase is probably the result of in-migration and increased efforts to educate all citizens.

In Louisiana, 42.2% of the population 25 and over graduated from high school in 1970 and 58.0% in 1980. Figure 10 shows the growing proportion of high school graduates during the 1970-1980 decade. Between 1950 and 1980, the median age of schooling completed by Southerners (and Louisianians) had risen from 8.4 years to 12.3 years. This indicates that half

of the Southeastern adult population, in 1980, had completed some education beyond high school. The median years completed for the United States rose from 9.6 years to 12.5 years. The increase in the number of high school graduates and those with educations beyond high school indicates the progress in Louisiana and the Southeast.

Figure 10.

An analysis of 1980 educational personnel data shows the South had a greater proportion of education-related employees who made up 4.3% of the total labor force. This proportion is greater than the nation (4.0%) and the three remaining Census regions (3.8%). Louisiana appears to be characteristic of the Southeast region (61.32%) with professionals constituting 60% of its educational personnel. (Refer to Table F.)

Table F.

EDUCATIONAL PERSONNEL, 1980

TABLE
EDUCATIONAL PERSONNEL

	Total Educa- tional Staff 1980 (x 1,000)	Professional Staff As % of Total	Non-Profes- sional Staff As % of Total	Total Educa- tional Staff As % of Civilian Labor Force
United States	4,168	62.67	37.33	4.0
SRCEI	972	61.32	38.68	4.3
South	1,431	61.64	38.36	4.3
Northeast	888	64.86	35.14	3.8
North Central	1,083	63.71	36.29	3.8
West	766	60.57	39.43	3.8
Alabama	64	67.19	32.81	3.9
Arkansas	45	62.22	37.78	4.6
Florida	157	61.15	38.85	4.0
Georgia	103	62.14	37.86	4.3
Kentucky	65	60.00	40.00	4.0
Louisiana	85	60.00	40.00	4.9
Mississippi	53	56.60	43.40	5.1
North Carolina	112	59.82	40.18	4.0
South Carolina	62	61.29	38.71	4.7
Tennessee	81	60.49	39.51	4.0
Virginia	106	63.21	36.79	4.2
West Virginia	40	62.50	37.50	5.2

The total number of educational personnel employed in the SRCEI region's public elementary and secondary schools was 972,000 in 1980-81. That figure was nearly a fourth (23.3%) of the U.S. total of 4.2 million. Sixty-one percent of the educational personnel in the Southeast were professional staff (including teachers, administrators, counselors), and 38.68% were non-professional employees (including food service personnel, custodial staff, transportation workers).

Within the SRCEI region, Alabama had the highest percentage of professional staff, while Mississippi had the highest percentage of non-professional employees.

To place these employment totals in perspective, the educational personnel are shown — in the map opposite — as a percent of the total civilian labor force. The South, including the 12 SRCEI states, has an education-related employment level of 4.3% of the total labor force. This proportion is greater than the rest of the nation (the remaining regions have identical 3.8%). In fact every SRCEI state has a percentage higher than that of the non-South area.

Within the SRCEI region, West Virginia and Mississippi have levels of education-related employment above 5% of the labor force, while Alabama has the lowest percentage — 3.9%.

Additional insights may be gained by reviewing these data in conjunction with those on employment, per capita income, teachers' salaries, and staff patterns by race, as well as pupil/teacher ratios.

In addition, the efforts of the accountability movement to improve the educational process, have resulted in programs implemented to improve teacher and staff effectiveness, to increase in-service training, and to upgrade and strengthen certification requirements.

C. Finance:

As illustrated in the following table (Table G), the South in 1980, relied on state revenues for 50.9% of its educational resources. This amount is second only to the Western region (61.0%). The South also claims the largest percentage of Federal revenues (11.8%), which may indicate that the South will be more sensitive to Federal budget variations concerning education. The Southeastern region relies on 12.7% of its educational revenue from the Federal government.

A comparison of all the regions shows the South allocates the largest proportion (38.93%) of total state expenditures for public education. This could be attributed either to the South's historically greater dependence on public education and its traditionally lower public service funding levels.

The South has the lowest per-pupil expenditure level of all four regions. It spends 80.13% of the national average. Figure 11 depicts 1980-81 per-pupil expenditures relative to the national average of \$2,381. Louisiana spent \$1,972 per pupil during 1980-81, which exceeded the expenditure of \$1,908 for the South and \$1,817 for the Southeastern region. Lower per-pupil expenditures in the South and Southeast region is perhaps a result of lower per-capita incomes. The Southeast has the greatest proportion of persons living below the poverty level. Education can provide an opportunity to increase earning potentials by providing increased skills and jobs.

Regionally, the Southeastern states have the lowest expenditure levels for education relative to personal income, although five of the states have expenditures higher than the national average (3.95%). These states are Virginia, Arkansas, Mississippi, North Carolina, and West Virginia. Expressing income results is a rough measure of a state's relative commitment to education.

Traditionally, the South has not experienced the wealth of other regions, but the gap is closing. In 1960, per capita personal income for the Southeast was \$1,258 or 73% of the national per capita income figure of \$1,850. In 1981, per capita income in the Southeast rose to \$9,014 compared with a national figure of \$10,491. Southeast per capita income increased to 85% of the national average.

EDUCATION REVENUE BY SOURCE, 1980-81

TABLE

EDUCATION REVENUE (BY SOURCE) 1980-81

	Total Revenue for Education 1980-81 (x \$1,000)	Percent of Total by Source			
		Federal	State	Local	Other*
United States	99616378	8.4	46.8	43.9	0.9
SRCEI	18114354	12.7	54.8	32.1	0.4
South	27848087	11.8	50.9	36.8	0.5
Northeast	24774451	5.5	38.2	56.3	0.0
North Central	25931893	7.4	39.0	52.3	1.3
West	21061947	8.6	61.0	28.2	2.2
Alabama	1056583	13.9	66.1	20.0	0.0
Arkansas	722236	14.4	51.4	34.2	0.0
Florida	3312609	10.5	55.6	33.8	0.1
Georgia	2072542	12.8	54.9	32.0	0.3
Kentucky	1247500	12.4	68.6	17.4	1.6
Louisiana	1540000	14.9	55.2	29.9	0.0
Mississippi	755069	17.1	59.4	23.4	0.1
North Carolina	2070718	12.6	64.0	23.4	0.0
South Carolina	1004753	17.0	49.7	32.3	1.0
Tennessee	1255231	14.0	42.8	40.0	3.2
Virginia	2343487	9.8	39.8	50.4	0.0
West Virginia	733626	11.3	57.9	30.7	0.1

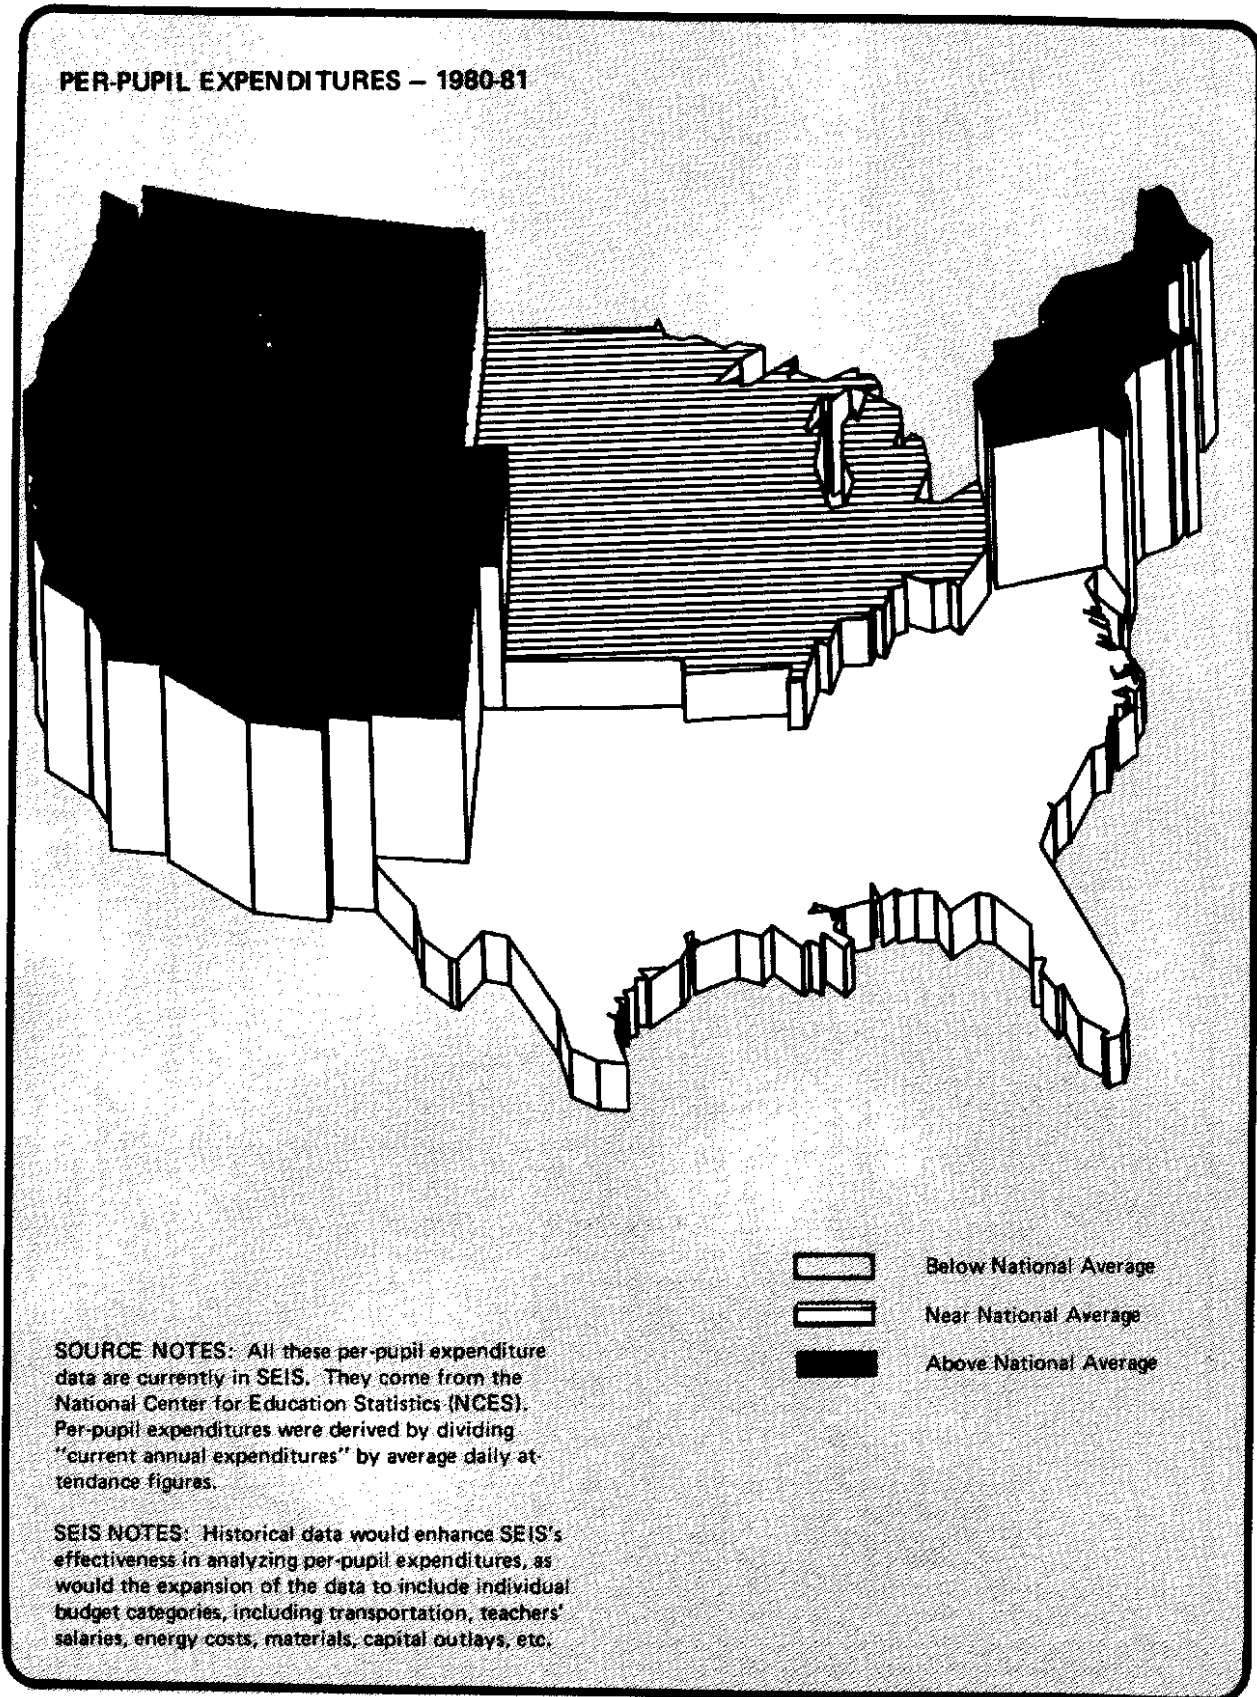

* Any funds collected by any intermediate governmental administrative unit or political subdivision between school districts (LEAs) and the state which are used for public education.

Of the \$18.1 billion in revenues collected to support education in the SRCEI region during 1980-81, 12.7% came from federal sources, 54.8% originated at the state level, and 32.1% was generated locally. The state and federal percentages for the SRCEI states are substantially higher than the corresponding national figures (and, conversely, the local figure is lower). Of the Census regions, only the West (61.0%) has a higher proportion of revenues generated at the state level.

The proportion of federal dollars supporting education in the SRCEI region is 2.3 times that for the Northeast, 1.7 times that for the North Central, and 1.5 times that for the West. These data underscore the sensitivity of education revenues in the region to variations in federal budget policies. Within the region, Mississippi and South Carolina utilize federal resources for over 16 percent of their education funds. Virginia utilizes the lowest percentage of federal resources within the region. However, at 9.8%, it is still above the national average.

The charts on the opposite page display the SRCEI states' relative dependency on the three main funding sources. While most rely primarily on state funds, Virginia depends on local revenue sources for 50.4% of its education dollars, and Tennessee relies on roughly equal amounts of state and local funding.

Figure 11.

Figures from the 1980-81 school session (Table H) indicate average teachers' salaries in the South (\$15,399) were below the national (\$17,360) and regional averages. The Southeastern states had lower average teachers' salaries (\$14,926). Furthermore, the average teachers' salary in the South experienced the smallest increase of the regions during the past decade.

D. Socio-economic Data:

The Southeast has increased its population at a rate twice that of the national growth rate during the past decade. In 1980, the Southeast had 23.24% of the nation's population. Southeastern States had the fastest rate of population growth during the 1970-80 period, with most of the increase attributed to net migration. This suggests a different population composition from that which would be caused by an increase in birth rates.

Figure 12 indicates the population ranges for the Southeast Region. The growth of the entire Southern population represented 54.03% of the change in national population figures. The Southeastern population increased by 8.9 million, representing 38% of the national population. The rate of increase for the Southeast (20.12%) was twice the national rate of 11.4%.

Louisiana experienced a 15.35% rate of increase during the past decade, which accounted for a growth in the State's population of approximately 559,000. During the years from 1970-1980, Louisiana experienced a natural (birth rate) increase that accounted for 66% of the change in population figures. Thirty-four percent of the change was due to net migration compared with the national increase of 40% and the Southeastern population change attributed to net migration of 63%.

U.S. Census data for 1980 indicate the racial composition of the U.S. population as 83.15% white, 11.6% black, and 5.6% consisting of Asian, American Indians, and "others." The Southeastern population is 78.5% white, 20.2% black, and 1.4% divided among the aforementioned three categories. Different racial compositions of a population may require that certain needs be met, for example, language proficiency courses for those who do not speak English.

The age composition of the national and Southeastern populations indicates that birth rates are declining and World War II baby boom children have graduated. Louisiana is the only State in the Southeast region with more children in the 4 years and under age group than in the 5-9 years age group.

Table H.

TEACHERS' SALARIES, 1980-81

TABLE
TEACHERS' SALARIES

	Average Teacher's Salary 1980-81 (\$)	Area Average As % of	
		US Average	SRCEI Average
United States	17360	100.00	116.31
SRCEI	14926	85.98	100.00
South	15399	88.70	103.17
Northeast	18544	106.82	124.24
North Central	17780	102.42	119.12
West	19212	110.67	128.71
Alabama	15413	88.78	103.26
Arkansas	13270	76.44	88.91
Florida	15563	89.65	104.27
Georgia	15444	88.96	103.47
Kentucky	15580	89.75	104.38
Louisiana	14900	85.83	99.83
Mississippi	13000	74.88	87.10
North Carolina	15858	91.35	106.24
South Carolina	14108	81.27	94.52
Tennessee	14073	81.07	94.29
Virginia	14649	84.38	98.14
West Virginia	14948	86.11	100.15

Average teachers' salaries in the South (\$15,399) were below the national average (\$17,360), and below all the Census regions in 1980-81. The 12 SRCEI states had a lower average teacher's salary: \$14,926. The highest average salaries were paid in the West (\$19,212) and the Northeast (\$18,544).

Within the SRCEI region, average salaries ranged from \$13,000 in Mississippi (74.88% of the national average) to \$15,858 in North Carolina (91.35% of the national average). All states in the region fell below the \$17,360 national average teacher's salary in 1980-81.

Further insights may be gained by reviewing teacher salary data with information on education-related employment, pupil/teacher ratios, and professional/non-professional employee ratios.

Figure 12.

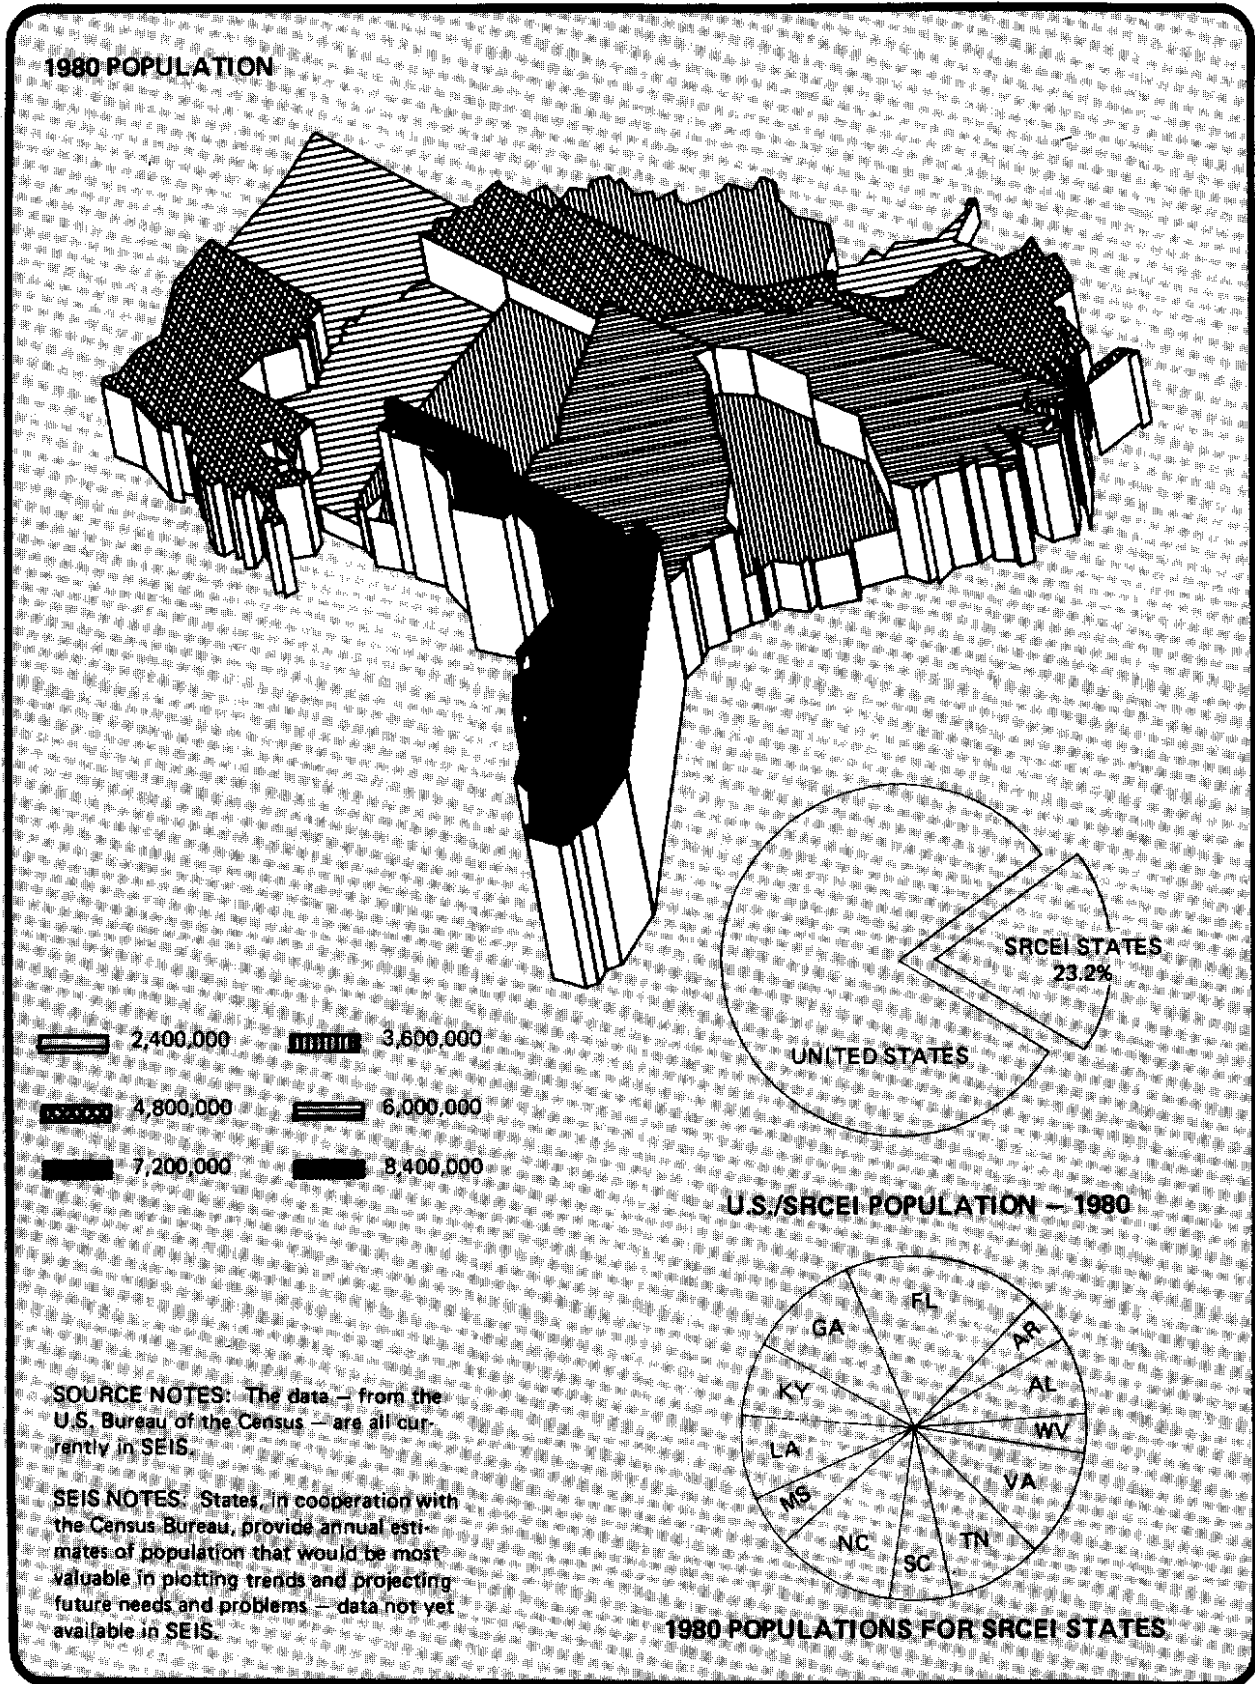

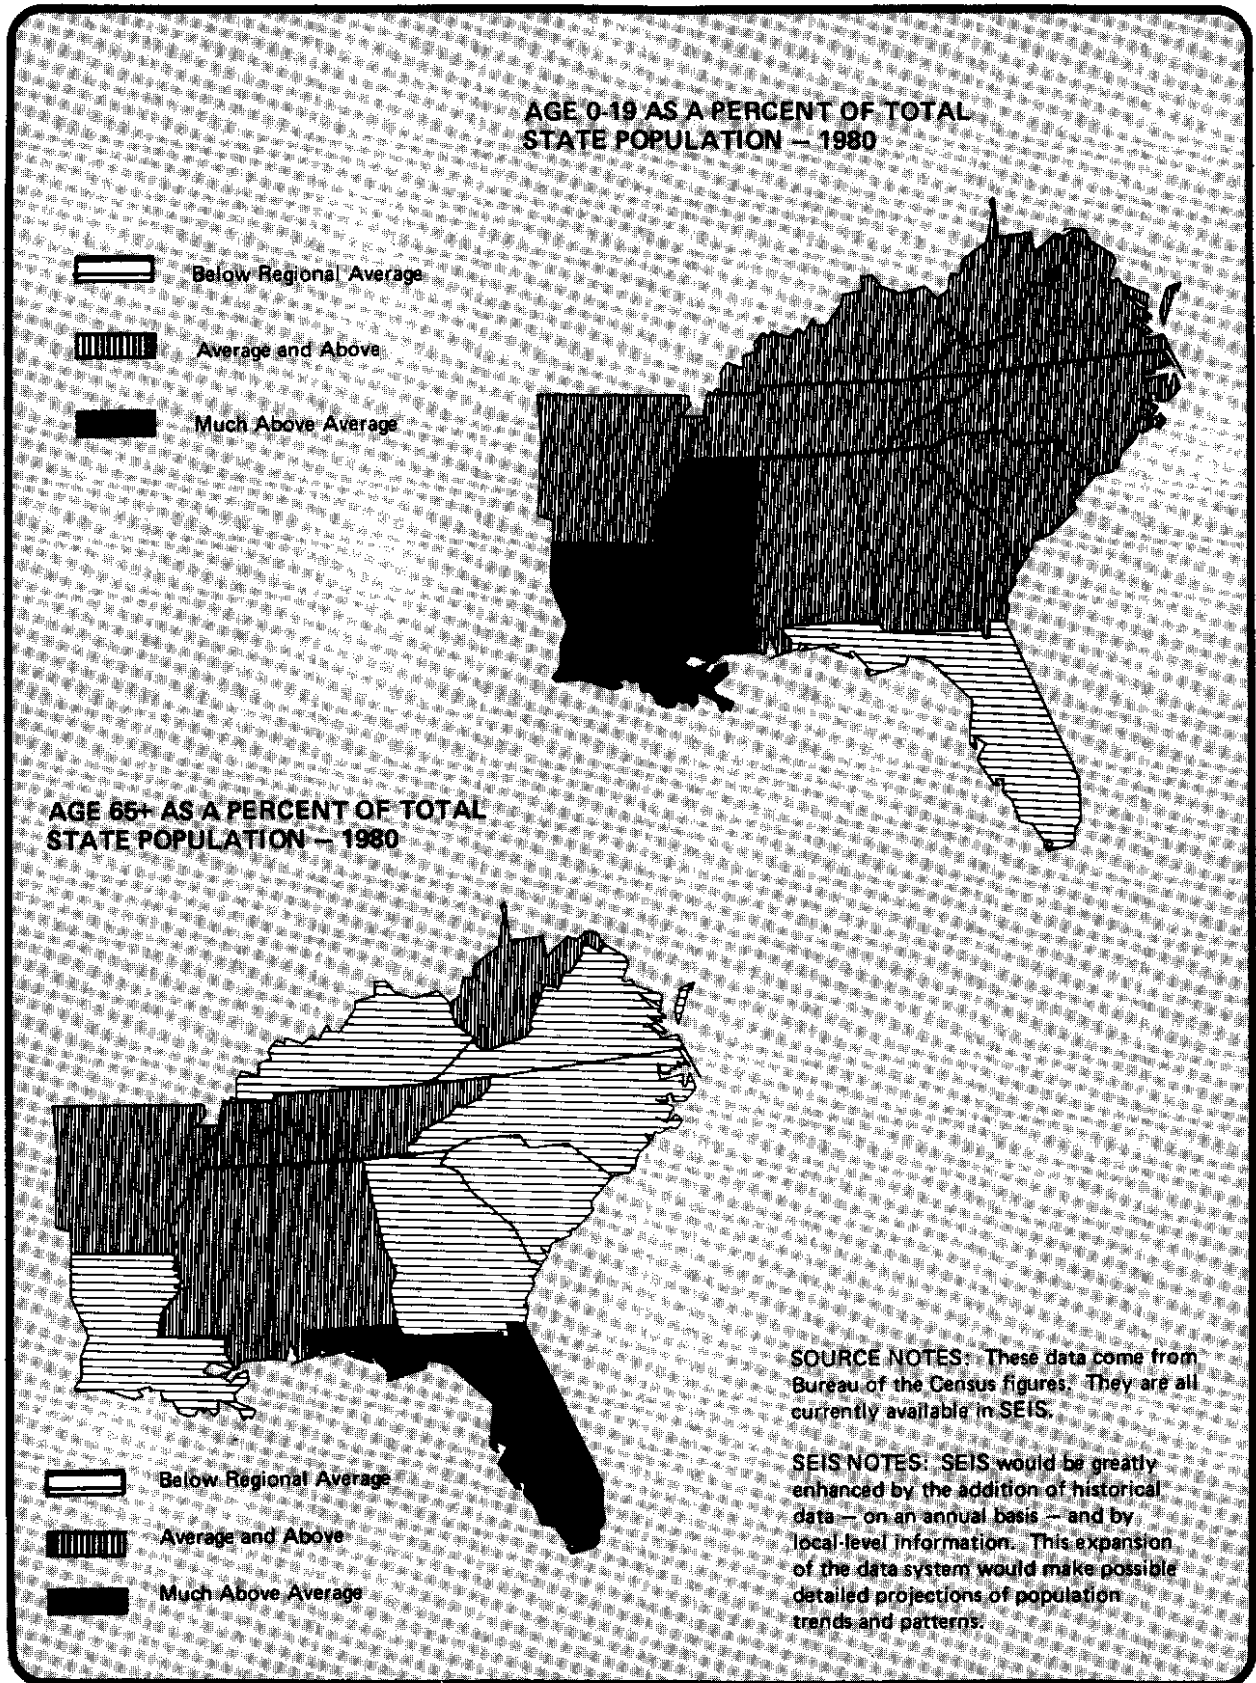

Figure 13 shows the age distribution of the population. Age figures are important from the perspective of financing education and planning educational needs and facilities. The 1980 figures for Louisiana show the State with a larger population aged 0-19 years than that of the average Southeastern population and a smaller percentage of its people aged 65 and over. This could indicate future problems for financing education, if there are not enough people to finance the present generation's education.

Figure 13.

VII. EDUCATION AND THE 1983 REGULAR SESSION OF THE LOUISIANA LEGISLATURE

The 1983 regular session of the Louisiana Legislature began April 18 and ended June 30, 12 days earlier than the time Constitutionally allotted. This session saw a noticeable decrease in the number of bills introduced and passed. The 1982 session introduced 2,946 bills, passing 953. The recent session introduced 2,043 and passed 760. More resolutions were passed this session (228) as compared with last year (207). Altogether, approximately 200 education-related bills and resolutions were introduced, with approximately 80 passing. There were no new education programs introduced or passed. The reason for the lack of new education programs is declining revenues.

The 1983 session was a battle of financing. The major goal for the Department of Education was maintaining and changing existing programs and services. Funding levels needed to be maintained and supplemental appropriations needed to be passed. Full funding difficulties were faced by the minimum foundation program, the professional improvement program (PIP), and the tuition exemption program. The 1982-83 minimum foundation program, for example, had to be fully funded by a supplemental appropriation.

In addition, there was a reduction of .87 percent of all line items in the appropriations bill, excluding certain retirement systems and the minimum foundation program.

The special education talented program was funded for 1983-84 after much deliberation. Appropriations for the Southwest Alternative Education Consortium, the State Plan Upgrading Reading, and for the State Funded Professional Development Centers were vetoed. Other major legislation which failed included the repeal of home study, mandatory kindergarten, and the incorporation of free enterprise into civics courses.

Legislation which would have affected teachers and other school personnel included attempts to require the state superintendent to develop a Louisiana certification exam for teachers, to deny tuition exemptions to those taking courses under PIP, and to provide tenure and sabbatical leave for social workers. There were several efforts to abolish or reduce PIP and to raise the teacher salary schedule.

Several major pieces of education legislation were passed. A number of these bills affected teachers. Many of these bills related to PIP--the Louisiana Educational Employees Professional Improvement Program. One such bill permits city and parish school superintendents to submit courses and training recommendations they feel are needed by teachers in their parish, to local pip committees. Another bill allows classroom teachers to take courses outside their certification area or job assignment, if such courses qualify them to be certified in areas in which a critical shortage of teachers exists. A third bill pertaining to the Louisiana Educational Employees Professional Improvement Program allows the

substitution of courses in colleges of education when a subject matter course is unavailable. Also, a bill determining a quota of self-improvement was set for PIP participants beginning July 1, 1985, with those obtaining 15 hours of college credit in their field, or the equivalent, and 75 hours of inservice education in a five year period meeting the requirements. A fifth piece of major legislation relating to PIP states that members of the teachers' retirement system can receive compensation after successfully completing a PIP program, based on the time spent in the Program. Furthermore a resolution was requested by the Senate urging the State professional improvement committee to allow PIP participants more flexibility in modifying their programs.

Examples of other bills affecting teachers includes one which states that school boards will provide for indemnification of costs and amounts of judgment when a teacher who conformed to board policy is sued by a student. Another requests city and parish school boards to establish a grievance procedure for teachers by January 1, 1984. One year emergency teaching permits may be extended indefinitely for those scoring within 10 percent of the required passing score for the original National Teacher Examinations (NTE).

Teachers and superintendents of public schools who are injured or disabled while acting in their official capacity, as a result of assault by a student or any other person, can get sick leave without reduction of pay or accrued sick days. The issue of leaves was also taken up by a House resolution urging school boards to allow teachers to take sick leaves for family emergencies. And finally, any teacher not returning to the school system which granted sabbatical leave, upon expiration of said leave, and who begins employment with a state-operated educational agency, department, school, college, or university, shall reimburse the school system any compensation paid to him while on such leave, excluding the State portion.

Several major pieces of legislation were produced for students as well. Senate Bill 276 calls for the suspension of a student for possession of alcoholic beverages or controlled dangerous substances. Also, students expelled from one parish or city school system shall be expelled from that system for the remainder of the school year and may not be admitted to any public school in any other parish or city school system in the State except upon the review and approval of the school board. Additionally, school boards are urged to advise students in grades 9-12 of statutes pertaining to carnal knowledge of juveniles, indecent behavior with juveniles, and contributing to the delinquency of juveniles.

School bus drivers were authorized to report to law enforcement authorities the color and license number of vehicles not stopping for a school bus, and the law provided for citation of such violators. Vehicles meeting or overtaking a school bus stopped along the shoulder of the road and discharging or receiving students, must stop, and the bus driver must activate visual signs and

signals. There was also a bill which provides procedures to remove school bus drivers and a bill to increase their operational expense, when funds are available.

Several Concurrent Resolutions were presented by the Legislature, including a House request to the Department of Education for a study on computer literacy in the State. This study is to look at existing computer-related educational programs in Louisiana schools and the nation, to study the technological advancements in the nation, and to make recommendations of skills necessary for computer literacy. This study is being conducted by the Louisiana Department of Education at this time.

A Senate Bill was passed to allow income tax credits to corporation, persons, estates, and trusts that donate computers and computer equipment to public, private, or parochial educational institutions.

In conclusion, the 1983 regular session of the Louisiana Legislature was an effort to maintain funding levels within the confinement of a tight State budget. No new programs were implemented, and many saw reduced funding. Education was provided for as well as possible in this tight budget year and will continue to be a high priority for Louisiana.

VIII. FORECASTING LOUISIANA EDUCATION IN THE 1980s.

The primary emphasis in education in the 1980s will be improvement of the quality of educational programs. Improvement will be effected by the following developments:

- The recommendations of the Board of Regents and the Louisiana Association of Business and Industry (LABI) to upgrade high school graduation requirements will be implemented. Four years of regular English, three years of mathematics (Algebra I and II, and Geometry), three years of science (including at least Biology and Chemistry), and three and one-half years of social science (American History, World History, Civics, and Free Enterprise) will be required.
- Special recognition will be given students who complete a rigorous college preparatory program. A special seal will be affixed to their diplomas.
- An extension of the State testing program will be a measurement of students' higher order thinking skills at the fifth, eighth, and eleventh grade levels. Both SAT and ACT results indicate a decline in students' ability to analyze, synthesize, and speculate.
- A mandatory kindergarten program will become law. Research indicates that students with a kindergarten experience achieve significantly higher than those without such background.
- Salaries for teachers will range from \$17,000 to \$40,000. The minimal salary will be increased from \$11,375 to \$17,000. A merit/incentive system will provide teachers with the option of working 10, 11, or 12 months, and enable 25 percent of them to earn up to \$40,000.
- Prospective teachers will be required to pass the general knowledge and communications skills tests of the National Teacher Examinations (NTE) prior to admission to a teacher preparatory program. The modular form of the NTE will enable institutions to implement such a development immediately.
- Students entering a teacher preparation program will be required to have an ACT score of 16. This is a recommendation of the Board of Regents based upon research related to academic success.
- A revised Minimum Foundation Program (MFP) will provide a new State-local partnership for funding public education. State requirements relative to teacher-pupil ratios will be waived, allocation will be based upon student membership, the State's share will be increased from 54 percent to 70 percent, and bonuses will be given to districts which reduce dropout rates and increase the number of students who pass advanced placement tests.

- Pre-service and in-service programs for principals will become very rigorous. Evidence is that the principal is the key educational leader. The success of any merit/incentive pay system for teachers will depend largely upon the quality of the principal as an observer and evaluator of classroom teacher performance.
- Educators will contract with parents for the latter to provide appropriate study facilities and quiet periods to enable students to complete increasing amounts of homework. It is evident that student workloads must be increased and that time spent watching television must be reduced dramatically.
- The school day will be lengthened by one hour and the school year increased from 180 to 190 days. Australia, Germany, Japan, the USSR, and the United Kingdom have school years ranging from 200 to 230 days.

School District Profiles

SCHOOL DISTRICT PROFILES

General Explanation

This is the fifth year of the Annual Report in which data gathered for each of the parish/city districts are in one place, rather than being spread throughout the report. This format aids readers interested in detailed information on a particular school district. A Louisiana State summary profile precedes the individual district profiles and includes aggregate data for the State. This State profile supplements the data found in the state summary tables.

Please note that the entry NA appears throughout the profiles. This entry means data were not available for that district on that piece of information.

Also, please note that percentages for several items (item 8, for example) are computer generated. Because of rounding, the sum of the percentages for some of these items may equal 99.9 or 100.1, rather than 100.0.

Footnotes are also found throughout the profiles. Instead of repeating each footnote for each profile, we have included the footnote only once in this general explanation. Please read the following footnotes before turning to the State and district profiles:

- A - Student registration is recorded at the beginning of the year and does not include gains or losses. Four districts (Allen, Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1982-83 school year. Ouachita Parish did not receive accurate data on the number of nonpublic students from its nonpublic schools for 1982-83. Therefore, NAs are reported for nonpublic student registration for these five districts for this year.
- B, E - The Bureau of Research is grateful to Mr. Larry Goux of the Board of Regents' staff for supplying the projections for school registration for 1983-87. Please note that there are no projection figures for registration in the cities of Monroe and Bogalusa. The projected registration figures for Monroe and Bogalusa are included in the projected registration figures for Ouachita and Washington parishes.
- C - The total public school registration figure in the State and parish profiles for 1982-83 includes 13 students who were postgraduates.
- D - The Bureau of Research depends on the voluntary reporting of nonpublic student registration by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic students. For example, Plaquemines and Pointe Coupee parishes reported significantly fewer nonpublic students in 1982-83 than in 1981-82 probably because of nonpublic schools not reporting complete information. Four districts (Allen, Franklin, Tensas, and Washington) reported at least one nonpublic school, but no

nonpublic students for the 1982-83 school year. Ouachita Parish did not receive accurate data on the number of nonpublic students from its nonpublic schools for 1982-83. Therefore, NAs are reported for nonpublic student registration and graduates for these five districts (Allen, Franklin, Ouachita, Tensas, and Washington) for this year. Also, discrepancies exist between the number of nonpublic twelfth grade students and the number of nonpublic graduates for five parishes (Avoyelles, East Baton Rouge, Pointe Coupee, Rapides, and St. Tammany) in 1982-83. These districts were unable to resolve the discrepancies because of lack of information from the nonpublic schools.

E - See B above.

F - These totals include special education and postgraduate students. The postgraduate students are included in the 9-12 totals. Four districts (Allen, Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1982-83 school year. Ouachita Parish did not receive accurate data on the number of nonpublic students from its nonpublic schools for 1982-83. Therefore, NAs are reported for nonpublic membership, adm, and ada for these five districts for this year.

G - The Bureau of Research depends on the voluntary reporting of nonpublic school data by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic graduates. For example, four districts (Allen, Franklin, Tensas, and Washington) reported at least one nonpublic school, but no nonpublic students for the 1982-83 school year. Ouachita Parish did not receive accurate data on the number of nonpublic students from its nonpublic schools for 1982-83. Therefore, NAs are reported for nonpublic student registration and graduates for these five districts (Allen, Franklin, Ouachita, Tensas, and Washington) for this year. Also, discrepancies exist between the number of nonpublic twelfth grade students and the number of nonpublic graduates for five parishes (Avoyelles, East Baton Rouge, Pointe Coupee, Rapides, and St. Tammany) in 1982-83. These districts were unable to resolve the discrepancies due to lack of information from the nonpublic schools.

H - A new computerized system for reporting dropout data was implemented in school year 1982-83. This new system will result in more consistent and complete data on dropouts in the State. Some districts experienced difficulty in switching from the old manual system to the new automated one. This may have resulted in an undercount of dropouts in some districts for school year 1982-83. Since Winn and Caldwell parishes reported no dropouts for 1982-83, their dropout data are reported as NA.

I - Other professional/technical personnel include part-time classroom teachers, visiting teachers, curriculum specialists, guidance counselors, librarians, media specialists, physicians, nurses, dentists, dental hygienists, social workers, psychologists, student workers, and others.

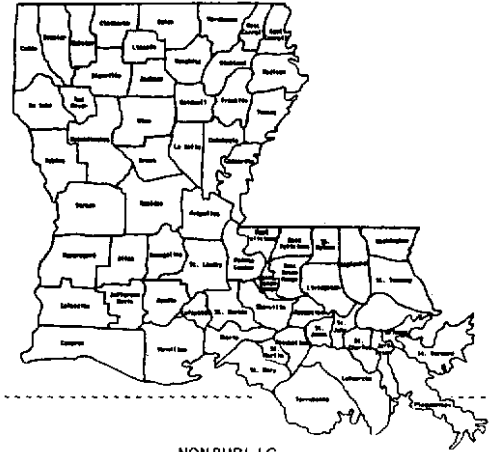

- J - Support staff includes office/clerical workers, crafts/trade workers, laborers, and service workers.
- K - The Bureau of Research depends on the voluntary reporting of nonpublic school data by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic schools.
- L - School year 1981-82 revenue figures do not include Federal Indirect Costs as in prior periods.
- M - The amounts indicated in the bonded indebtedness section are taken directly from the Parish Financial Statements. These statements are not derived from audited figures. Debt service amounts may be indicated as bonded debt in some instances.
- N - Total cost of school transportation data was obtained from the Louisiana Department of Education, Bureau of Transportation, and includes data pertaining to R.S. 17:1941 et seq.
- O - In Item 19, the districts were ranked from the one with the largest value (1) to the one with the smallest value (66) on all categories except one: the ratio of public students to teachers where the ranks were reversed.
- P - Current expenditures include only instruction and support services. As Union Parish failed to report expenditures for 1982-83, 1981-82 data were substituted.
- Q - Only full-time teachers are counted in computing this ratio.
- R - This percentage is based on the number of public high school graduates from the previous year who went on to public four year institutions, private four year institutions, or junior colleges. Iberia Parish did not report this information, so its data are reported as NA.
- S - Assistant principals are considered to be administrators in the computation of this ratio. There may be some inconsistency between districts in the reporting of certain individuals as assistant principals or as classroom teachers. This inconsistency in reporting may create variability in this ratio between districts.
- T - Per capita figures were not available for the cities of Monroe and Bogalusa. See per capita figures for the parishes of Ouachita and Monroe. Also, note that the 1980 figures have been revised by the United States Department of Commerce and are different from the 1980 figures reported in the 1981-82 Annual Statistical Report.
