## FOREWORD

This 1993-94 edition of the Annual Financial and Statistical Report is the 145th in a series of publications initiated during the last century. This report is prepared by the Bureau of School Accountability, Office of Research & Development, Louisiana State Department of Education. The provisions of the Louisiana Revised Statutes of 17:22(7) require reporting the condition, progress, and improvements in state public elementary and secondary education to the governor and the members of the legislature. The primary purpose of this publication is to provide a compilation of statistical information covering the broad field of Louisiana education from kindergarten through high school.

The publication is divided into two sections. Section I, "Statistical and Financial Tables", a collection of twenty-two tables, presents information on a variety of subjects proven to be of interest and value to researchers, officials in charge of planning educational reforms, the media, the business community, and the general public. This section includes information such as state and parish population trends; total number of educational personnel; total number of public schools, and students enrolled in these schools; adult education programs; along with comparisons of Louisiana and the nation's student enrollment and attendance. Student performance on ACT and SAT are reported also.

Section I also presents detailed financial information including expenditure of state source revenues for elementary and secondary education, special education, vocational education, and higher education; revenues and expenditures for the State Department of Education; Louisiana's Minimum Foundation Program; revenues from local, state and federal sources; along with local education agencies expenditures by function, and per pupil expenditures.

Section II, "State and School District Reports" presents detailed information on the condition of the state and individual parishes' public and nonpublic education. This section contains information on student registration with regard to ethnicity and gender; total membership at the end of the school year; average daily membership and average daily attendance; high school graduates; number and type of public and nonpublic schools; public and nonpublic educational personnel with regard to ethnicity and gender; years of experience for public school teachers; number of pupils being served by exceptional children programs; revenues from local, state, federal and other sources; school system bonded status and taxation; food services; along with current expenditure per student; assessed property evaluation, mean salary of public full-time teachers, and ratio of teachers to administrators.

Longitudinal data on different aspects of the state public education is presented in both sections. The longitudinal data may assist government officials in evaluating past conditions and planning for the future. Projected data on future student enrollment will assist state and local officials in foreseeing possible future educational needs.

Collection and presentation of data of this magnitude would not be possible without the collaboration of local school districts and the different bureaus of the State Department of Education. This is a joint venture of the state and local schools districts and one which serves the people of Louisiana.

Raymond G. Arveson  
Superintendent of Education

## General Explanation

Data gathered from the 66 parish/city systems are presented in the district profiles. The Louisiana State Summary Profile, preceding the district profiles, includes the same data aggregated to the state level plus the two East Baton Rouge Lab Schools. Please note that percentages for several items are computer generated. Because of rounding, the sum of the percentages for these items may vary from 99.5 to 100.5, rather than 100.0

Following are several points which will help the reader understand how the statistical items are generated.

**Student registration** reflects the count of students on the first day of the school year. Figures reported include pre-kindergarten.

Please note: there are no enrollment projection figures for Monroe and Bogalusa; these figures are included in the figures for Ouachita and Washington Parishes. **The state projections do not include LSU and Southern Lab Schools.**

**Nonpublic student registration**, graduates, number and type of school are reported voluntarily by the nonpublic schools in each district. **Some nonpublic schools do not report data as requested**, therefore any statistical information is not reflective of all nonpublic schools. This year, 345 nonpublic schools voluntarily participated in the data collection.

**Other professional/technical personnel includes** part-time teachers; teacher aides; speech/hearing therapists, special education therapists; curriculum, resource, and instructional specialists; guidance counselors; media specialists; physicians, nurses, dentists, hygienists, health services personnel; personnel specialists; social workers, psychologists, community service workers; research/evaluation/testing specialists; data processing analysts, programmers, finance/accounting analysts; consultants, engineers, and visiting teachers.

**Support staff includes** office/clerical personnel, secretary - School Board, school secretaries, office assistants, bookkeepers, library aides; crafts/trade and laborers: electricians, carpenters, plumbers, janitors, general maintenance; service workers: school lunch managers and workers, mechanics, school bus drivers, school transportation attendants, and school crossing patrolmen.

**Item 17:** the districts are ranked in descending order (i.e. from the highest to the lowest on all categories).

**Lincoln Parish** - the student count does not include Grambling and LA Tech Lab, but the financial information does include the two schools since the Office of Management and Finance does not separate the laboratory schools from district totals.
