STEM Renaissance Pathway Brief

COMPUTING & CYBERSECURITY

Computing & Cybersecurity

The Louisiana computing and cybersecurity pathway allows students to engage in a program of study that combines computer science, cybersecurity, and mathematics through project-based learning. Students will be able to apply computational thinking techniques in many different STEM disciplines and demonstrate proficiency in computing in many settings. Students will explore the implications of technology usage in social interactions, learn how to protect systems from possible cyberattacks, and create interactive websites and applications. Students will discuss the ethics of advancements in robotics and artificial intelligence as they consider the value of truly autonomous devices. They will build complex systems capable of multiple sensory inputs and advanced logic structures. Pathway coursework prepares TOPS University and Jump Start TOPS Tech diploma-seeking students to compete in the 21st century by immersing them in the fundamentals of the field, and its impacts and applications in the workplace.

College and Career Connections

Finding high-wage career opportunities directly out of high school can be challenging. It typically requires advanced capstone credentials accompanied by work experience and/or apprenticeships in the field of study.

High School to Career	Community/ technical College to Career	University to Career
Audio/Visual Support IT Support Specialist Junior Computer Programmer Web Designer	Computer Forensic Analyst Computer Programmer Data Security/ Data Analyst IT Auditor	AI Specialist Computer Engineer Cybersecurity Analyst Security Informatics

****This Louisiana STEM Pathway must be used for students entering grade 9 in the 2024-2025 school year and future cohorts. The “Archived Pathway” briefs must be followed for students that entered grade 9 prior to the 2024-2025 school year. Email STEM@la.gov with any questions.**
