Digital Design & Emergent Media

AN INITIATIVE OF  **LDOE**

Digital Design & Emergent Media

The Digital Design and Emergent Media Certification Pathway is designed with a 21st century approach to media production. It centers on developing the skills and creativity for producing digital media from the initial assets through to the final presentation. The pathway incorporates the multiple STEM disciplines to address the constantly transforming field of digital media by enabling: digital storytelling – no matter the media; production skills training and certification in a variety of media types; programming experience specializing in web and digital media; and engagement in emergent media practice culminating in group based projects, exhibition/performance, and portfolio development.

College and Career Connections

Finding high-wage career opportunities directly out of high school can be challenging. It typically requires advanced capstone credentials accompanied by work experience and/or apprenticeships in the field of study.
