

JUMP START

AUTOMATED TEXT RESPONSE SYSTEM

The 99008 automated text response system provides parents, students, teachers and counselors with a way to access information about Jump Start via their cell phone.

The 99008 system uses a series of keywords to provide information to users.

You can start by texting **JUMPSTART** (as one word) to **99008**.

You can then respond to each of the questions asked and experience how the system will work.

To start, you'll be asked to identify what type of user you are – **STUDENT, PARENT, TEACHER** or **OTHER**. Then, you'll then be asked to answer three questions:

1

Do you want to learn more about Jump Start?

If you text 1 to answer "Yes" then you'll receive a link to more information about Jump Start. Users will also be able to download the updated Jump Start brochure.

2

Do you want to know the pathways offered at your school?

If you text 1 to answer "Yes" then you'll receive a link to the All Things Jump Start web portal pages that provides tables for each district and charter school indicating which Jump Start pathways each high school in Louisiana supports.

3

Do you want to go to the Jump Start Video Network?

If you text 1 to answer "Yes" then you'll receive a link to the JSVN home page on the All Things Jump Start website.

At any time users can text **PATHWAYS** or **VIDEOS** to get directly to the information they want.

Users can also text in any question they have for Jump Start at any time – the Jump Start team will attempt to answer all questions within 48 hours, or as quickly as possible.
