

Virtual Workplace Experience II
General Resources

02-02	Industry Professional Introduction Email
--------------	---

Dear Professional,

This year our students are enrolled in the Virtual Workplace Experience II course. This course is focused on teaching high school students about the array of high-wage, high-demand career sectors across the state of Louisiana including:

- Healthcare and Pharmacy
- Construction Crafts / Skilled Trades
- Information Technology
- Automotive Service and Repair
- Advanced Manufacturing
- Transportation, Trade and Logistics
- Business Management and Finance
- Sales and Customer Service

Virtual Workplace Experience II offers students the opportunity to interact with industry professionals (such as you!) via the Nepris platform (www.nepris.com). These interactions will include whole class engagements such as traditional guest speaker presentations where students would like to learn more about you, your career, and the sector in which you specialize.

Students will also be asked to complete an array of small group projects where students will conduct informational interviews, sector-specific deep dives, and career ladder research. These activities will also be completed via the Nepris platform.

All of these interactions are meant to give students exposure to job opportunities they may have never otherwise imagined through real-life professional guidance from experts such as you.

If interested in partnering with teachers to share more about your career, you can follow these steps to get involved:

- 1) Sign up for a professional profile via www.nepris.com, today!
- 2) Be sure to fill out your Nepris profile as much as possible.
- 3) Email me to let me know you've signed up. This way I can connect with you via the platform when we have requests that match your expertise.

Thank you in advance for your partnership. We are certain that this course will be among student's most treasured high school experiences.

Sincerely,
