

STATE OF THE SECTOR PATHWAY INFORMATION

Transportation, Distribution & Logistics

OVERVIEW

Transportation, Distribution and Logistics mainly involves the planning, management and movement of people, materials and products by road, air, rail and water.

You might work as a driver, pilot, engineer, or captain. Or, you might work behind the scenes to make sure the products and people get to the right place on time.

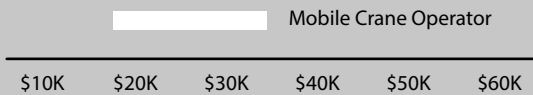

Transportation, Distribution and Logistics impacts every facet of our lives. All of the products we use on a daily basis, from the food we eat to the clothes we wear had to be delivered from a manufacturing facility to our homes
