Amatrol LMS System Requirements

The following are the minimum required system specifications to run the Flash multimedia and access all features on the LMS:

- 1 GHz processor
- 512MB RAM
- Windows 10 (may function under previous versions/different operating systems, but testing & support limited to Windows 10)
- Sound card (or onboard sound)
- Video card (or onboard video) capable of 800×600 resolution with 24bit color
- Firefox 50+, Chrome 55+, Edge 70+, or Safari 10+
- Flash Player 10.1.142 or newer*
- Broadband Internet access (DSL/Cable/T1) capable of 384 Kbps

The following are the minimum requirements for WebGL content and eBooks:

- Windows 10 64-bit (may function under previous versions/different operating systems, but testing & support limited to Windows 10)
- 8GB RAM
- Sound card (or onboard sound)
- Video card (or onboard video) with WebGL support
- 64-bit Browser with WebGL 2.0 support
- Broadband Internet access (DSL/Cable/T1) capable of 1 Mbps

Test the speed of your connection to our server with one of our bandwidth tests.

Flash Player 10.1.142 or newer

If you can see a message saying **Flash successfully installed**, then it is already installed. If not, you will need to click the button below:

Get ADOBE
FLASH PLAYER

You do not have the latest Flash Player installed.
Please click the button to the left to download the latest Flash Player.

* The Flash plugin is free and readily available on the internet. While viewing this page, if you don't already have the software installed, it should automatically install. But if for some reason Flash does not install, a button is provided at the bottom of the page that will link you to the appropriate website to download the plugin.

Firefox users: Firefox has recently disabled the Flash plugin up to version 18.0.0.203. If you are unable to launch content and see a notification that Firefox has prevented the outdated plugin Adobe Flash from running, please update the Flash plugin to the most recent version by visiting the official Adobe Flash Player download page.

Chrome users: Chrome has recently disabled the Flash plugin. If you are unable to launch content and see a notification that Chrome has prevented Adobe Flash from running, you can add an exception for www.mssctraining.com by clicking on the "View All Requirements" link, then clicking on the "Get Flash" button. A message will appear stating that the site is trying to run Flash and prompts you to allow Flash to run.
