

**RESPONSE TO R.S. 17:17.4 (Status of Health and Physical Education in Louisiana's Public Schools) and HOUSE CONCURRENT RESOLUTION 11 OF THE 2018 REGULAR SESSION**

---

**2024 School Health Report**

**March 15, 2024**

---

From the State Board of Elementary and Secondary Education

Prepared by the Louisiana Department of Education

# 2024 School Health Report

---

## Overview of the Resolution

House Concurrent Resolution 11 ([HCR 11](#)) urges and requests the state Department of Education to include school-level and system-level data in the annual report that it submits to the legislature regarding the status of health and physical education in public schools, pursuant to [R.S. 17:17.4](#), and to urge and request each public school and public school governing authority to cooperate in responding to the department's survey relative to such report so that such data can be gathered and reported.

Pursuant to Revised Statute 17:17.4, the Louisiana Department of Education is required to submit a written report to the Senate and House Committees on Education and the Senate and House Committees on Health and Welfare no later than March fifteen of each year regarding the status of health and physical education in the public elementary and secondary schools in the state.

## Requirements of the Resolution and Related Activities

Louisiana Revised Statute 17:17.4 provides that the Louisiana Department of Education (LDOE) employs a health and physical education coordinator to develop, implement, and monitor health and physical education curricula for all grade levels in the public elementary and secondary schools in the state. Input and guidance shall be sought from the following agencies and entities regarding the development and implementation of health and physical education curricula in public schools:

- Governor's Council on Physical Fitness and Sports;
- Louisiana Council on Obesity Prevention and Management;
- American Heart Association;
- Louisiana Association for Health, Physical Education, Recreation, and Dance (LAHPERD);
- Louisiana State University Agriculture Center, Department of Family and Consumer Sciences;
- and Louisiana Chapter, American Academy of Pediatrics.

In the 2023 Regular Legislative Session, [HB 121, Act 218](#) states that each public school that includes any grades kindergarten through five shall provide at least fifteen minutes of recess, consisting of supervised, unstructured free play, each school day.

The Louisiana Department of Education recognizes healthy and physically active students tend to have better grades, school attendance, cognitive performance, and classroom behaviors. Additionally, schools play a vital role in allowing students the opportunity for regular physical activity before, during, and after school. To recognize outstanding public elementary and secondary schools that are implementing an outstanding physical activity program, the Department will be recognizing and honoring exemplary schools through the [School Physical Activity Award program](#).

In 2017, LDOE and the Louisiana Department of Health (LDH) formed the Louisiana School Health Advisory Council (LA SHAC), a group of statewide leaders representing the Coordinated School Health model. The LA SHAC supports the development of healthy school environments across the state. The LA SHAC provides active leadership in the identification and dissemination of school health best practices and resources for school policymakers and educators. When students stay healthy and ready to learn, children develop the knowledge, skills, and attitudes needed to become healthy, successful adults.

In 2023, Louisiana was selected to receive a federal grant to improve student health and academic achievement through nutrition, physical activity, and the management of students' chronic health conditions. The grant, which is valued at \$390,000 a year for five years, benefits statewide student health initiatives, as well as targeted initiatives in one select school system.

The funding, secured by the Louisiana Department of Education and the Louisiana Department of Health, helps schools increase the number of students who consume nutritious food and beverages, who participate in daily physical education and activity, and who can effectively manage their chronic health conditions, including but not limited to poor oral health, asthma, food allergies, and diabetes.

While these activities are expected to be implemented statewide, the state education and health departments have selected one local school system to prioritize this work. The Department partners with elementary, middle, and high schools in schools in the public school systems in Madison Parish. This school system was selected based on need following a statewide evaluation of school environments and parish-wide health data.

In addition, LDOE is represented on the Louisiana Obesity Prevention and Management Commission, amended and reenacted by Act 186 of the 2016 Regular Session. The commission is charged with the following functions and duties:

- (1) Assisting the executive departments and agencies in achieving programmatic goals.
- (2) Assisting in conducting exploratory research as deemed necessary with the intent of achieving programmatic objectives.
- (3) Conducting public meetings to discuss obesity.
- (4) Advising and assisting participating agencies with the development and implementation of obesity programs.
- (5) Analyzing what other entities across the state are doing to combat obesity.
- (6) Advising the executive departments and agencies as to the implementation of the commission's recommendations.

## Methodology

In order to assess the school district's compliance with state health and physical education laws and regulations, a survey tool was developed and administered an online survey in November of 2023. It should be noted that the results are based on self-reported responses from the districts and have not been validated by external review.

## Findings

The highlights of the survey results are as follows:

### **Health, Physical Activity and Recess**

- One thousand two hundred twenty-five (1225) of 1500 public and charter schools (82%) responded to the survey. Respondents are listed in Appendix A.
- Of the schools responding, 76% reported that all physical education classes are taught by licensed teachers who are certified or endorsed to teach physical education.
- In all grades, 94% reported that physical education teachers use an age-appropriate, sequential curriculum that aligns with the Louisiana physical education standards.
- In all grades, schools reported the amount of minutes of Health Education taught per week:
  - 62% of schools reported 50+ minutes are taught per week
  - 17% of schools reported 31-50 minutes are taught per week
  - 11% of schools reported 16-30 minutes are taught per week
  - 10% of schools reported 0-15 minutes are taught per week
- In all grades, 77% of schools reported that all teachers of physical education are required to participate in physical education professional development annually.
- In grades K-8, 76% of schools reported providing at least 30 minutes of moderate to vigorous physical activity daily.
- In grades K-5, 65% of schools reported students are provided at least 15 minutes of recess during each school day.
- In grades 6-8, 41% of schools reported students provided at least 15 minutes of recess during each school day.
- In all grades, 13% of schools reported withholding recess as punishment.
- In all grades, 96% of schools report that they do not prohibit physical activity and/or withhold physical education class as punishment.
- In all grades, 47% of schools report that they implement a comprehensive school physical activity program (CSPAP) during the day and throughout the school year.
- In all grades, 94% of schools reported that all food and beverages served and offered during the school day meet the USDA's Smart Snacks in School nutrition standards.

- In all grades, 94% of schools reported that LEA has a wellness policy, as required by The Health, Hunger-Free Kids Act.
- Of those schools that have reported having a wellness policy, 45% reported that the policy has been updated in the last 3 years.
- In all grades, schools considered updating or implementing new policies, practices, or services in the next 6-12 months:
  - 12% of schools reported physical education
  - 12% of schools reported physical activity
  - 9% of schools reported school nutrition
  - 6% of schools reported supporting students with chronic conditions
  - 9% of schools reported other entries (food security or school nursing)
  - 52% of schools reported N/A
- Of the schools reporting, 60% reported having a full-time school nurse during the current school year.
- Sixty-eight percent (65%) of schools reported having a district-level School Health Advisory Council (SHAC) that advises the local school board on physical activity, physical and health education, nutrition, and overall student health.
- Of those schools that have established district School Health Advisory Councils, 40% reported having a school wellness council that collaborates with their district School Health Advisory Council.
- Of the schools reporting, 23% reported that the school wellness council conducted a school health assessment during the current school year.

### **Employee Training**

- In all grades, 97% of schools reported providing a minimum of 4 hours of bullying training for all employees who come in contact with students each year for new school employees and at least 2 hours each following year.
- In elementary school, 59% of schools report providing a minimum of 16 hours of substance abuse prevention education each school year.
- In high school, 26% of schools reported providing 16 hours of substance abuse prevention education for 9th graders and a minimum of 8 hours for grades 10-12.
- In all grades, 61% of schools reported including an opioid-specific component in the substance abuse prevention curriculum.
