

2024 Jason Flatt Act-Suicide Prevention Report

March 1, 2024

2024 Jason Flatt Act-Suicide Prevention Report

Overview of the Resolution

[Act 93](#) of the 2019 Regular Legislative Session amended Revised Statute 17:437.1, also known as the Jason Flatt Act. The law, which was enacted in 2008, requires the State Board of Elementary and Secondary Education (BESE) to prescribe rules, collaboratively with the Louisiana Department of Health's (LDH) Health Initiative, for a youth suicide prevention plan for public schools. The law also requires the BESE to adopt guidelines for in-service training of school employees in suicide prevention, identify suitable materials for use in such training, and adopt rules requiring public and approved non-public school employees to participate in at least two (2) hours of suicide prevention training annually.

BESE is required to survey secondary schools regarding compliance with the required in-service training and submit a report on the survey findings to the House and Senate Committees on Education and the House and Senate Committees on Health and Welfare no later than March first of each year.

The Jason Flatt Act further requires, in Revised Statute [17:282.4](#), that schools offering youth suicide prevention programs report such participation to the Louisiana Department of Education (LDOE). LDOE shall designate participating schools as Suicide Prevention Certified Schools and maintain a list of those schools on its website. Finally, the Jason Flatt Act requires the governing authority of each public and approved non-public secondary school to issue student identification cards to print the phone numbers for the National Suicide Prevention Lifeline and the local suicide prevention hotline, if available, on the cards beginning no later than the 2020-2021 school year.

Background

LDOE collaborated with LDH and other stakeholders to develop a Youth Suicide Prevention Training Module and a Model School District Policy for Suicide Prevention. LDOE has identified a Preventing Suicide Toolkit developed by the Substance Abuse and Mental Health Services Administration (SAMHSA), as well as training modules developed by the Jason Foundation. All of these resources are posted and are available on the [LDOE website](#).

In July of 2023, LDOE was invited by LDH to participate in the Policy Academy on Black Youth Suicide Prevention (BYSP) Academy. The goal of the BYSP initiative is to reduce the suicidal thoughts, attempts, and deaths of black youth and young adults between the ages of 5 through 24. After the BYSP Academy, the Louisiana state team identified:

- needs and gaps
- assets
- potential key informants
- policy recommendations, and
- to address Black youth suicide in our state.

Also, the Louisiana team developed an action plan with a timeline to implement strategies to reduce Black youth suicide in the state. The plan was presented at the Statewide Suicide Prevention Collaborative and Task Force on African-American Suicide.

Additionally, the LDOE Healthy Communities team has attended the Statewide Suicide Prevention Partner Collaborative sponsored by LDH. This collaborative focuses on suicide risks for children 12-17 and meets with a variety of Louisiana stakeholders to identify the greatest priorities that would successfully influence suicide prevention among teens in the next year. The Healthy Communities team also hosts a monthly community of practice call at which local education agencies (LEAs) are reminded about the Jason Flatt Act, suicide training laws, and the requirement to print the local suicide prevention hotline (988) on high school students' ID badges.

Methodology

A survey tool was developed to assess schools' compliance with the Jason Flatt Act and other school health requirements. The survey was administered online in November 2023 to all public school systems and charter schools. The reported results are based on self-reported responses from the schools and have not been validated by an external review.

Findings

One thousand two hundred twenty-five (1225) of 1500 public and charter schools (82%) responded to the survey.

Jason Flatt Act (Suicide Prevention Training)

- One thousand one hundred fifty-three (1153) of the 1225 schools (94%) reported compliance with the Jason Flatt Act. Respondents are listed in Appendix A.
- Seventy-two (72) of the 1225, or 6% of the respondents, indicated the training did not comply with the Jason Flatt Act.
- Schools identified the following training modules utilized for suicide prevention instruction:
 - 20% of schools utilize Youth Suicide: "A Silent Epidemic"
 - 20% of schools utilize the LDOE Youth Suicide Prevention Training Module
 - 9% of schools utilize the Prevention is the Key
 - 7% of schools utilize the Mental Health Issues Surrounding Suicidal Ideation
 - 44% of schools utilize other (not specific)
