

Jason Flatt Act Report

R.S. 17:437.1

March 2026

Overview

[R.S. 17:437.1](#) requires the governing authority of each secondary school to document and verify to the Louisiana Department of Education (LDOE), by December thirty-first of each year, that all school employees have received suicide prevention training. The Board of Elementary and Secondary Education (BESE) is required to annually develop a written report of the survey findings and any recommendations and submit such report to the Senate Committee on Education, the House Committee on Education, the Senate Committee on Health and Welfare, and the House Committee on Health and Welfare not later than March first of each year.

The Jason Flatt Act further requires, in [R.S. 17:282.4](#), that schools offering youth suicide prevention programs report such participation to the LDOE. LDOE shall designate participating schools as Suicide Prevention Certified Schools and maintain a list of those schools on its website.

Finally, the Jason Flatt Act requires the governing authority of each public and approved non-public secondary school that issues student identification cards to include the phone numbers for the National Suicide Prevention Lifeline and, if available, the local suicide prevention hotline printed on the cards, beginning no later than the 2020-2021 school year.

Background

Act [686](#) of the 2024 Regular Legislative Session repealed several previous statutory training requirements for teachers and students, including suicide prevention training. BESE policy in LAC 28:CXV.339 and LAC 28:LXXIX.121 now requires all educators to complete a minimum of one hour of training on suicide prevention in addition to other topics and maintain documentation of training completion. The LDOE created guidance, [Revisions to Required Training](#), to provide an overview of the impacted topics and recommended next steps for school and school system leaders.

LDOE collaborated with the Louisiana Department of Health (LDH) and other stakeholders to develop a Youth Suicide Prevention Training Module and a Model School District Policy for Suicide Prevention. LDOE has identified a Preventing Suicide Toolkit developed by the Substance Abuse and Mental Health Services Administration (SAMHSA) and training modules developed by the Jason Foundation. All of these resources are posted on the [LDOE website](#), the [Jason Foundation Website](#), and the [Peer Initiative website](#).

Since 2023, in collaboration with LDH, LDOE has participated in the Policy Academy on Black Youth Suicide Prevention (BYSP). The goal of the BYSP initiative is to reduce the suicidal thoughts, attempts, and deaths of black youth and young adults between the ages of 5 through 24. After the BYSP Academy, the Louisiana state team identified:

- needs and gaps
- assets
- potential key informants
- policy recommendations
- how to address black youth suicide in Louisiana.

Also, the Louisiana team developed an action plan with a timeline to implement strategies to reduce black youth suicide in the state. The plan was presented at the Statewide Suicide Prevention Collaborative and Task Force on African-American Suicide.

Since 2017, LDOE has been an active participant in the LDH Suicide Prevention Collaborative. This is an opportunity for multi-sectoral partners working in suicide prevention to collaborate, share, and strategize on how to reduce the number of suicides in our state. The group reviews progress reports, hears updates from some agencies, shares new data, discusses new priorities, and addresses gaps in suicide prevention.

LDOE, in partnership with the Louisiana Center for Safe Schools and the Behavioral Threat Assessment and Management (BTAM) team, continues to raise awareness of Suicide Prevention and Risk Assessment through statewide collaborations, conferences, and community-of-practice calls.

Additionally, the Louisiana Center for Safe Schools is working with Peer Initiative and the Louisiana Mental Health Association (LAMHA) under [SR 119 \(2025\)](#) to develop and implement a system to collect and report aggregate, non-identifiable data on suicide risk assessments conducted in public schools. All assessments will be documented in the Outreach System to support statewide data collection efforts.

In support of the Jason Flatt Act, LDOE and LDH partnered with the Legislative Youth Advisory Council (LYAC). This council is made up of 31 high school students from across Louisiana who help bridge communication between young people and the legislature on issues that matter to them — education, youth participation in government, youth-led initiatives, safety, and mental and physical health. LYAC has joined this effort and is now an active voice in the campaign workgroup, contributing youth-centered messaging, social media safety resources, and direct feedback from their council.

As a member of the LDH Whole Health, LDOE contributed to the planning of the 1st Annual Capital Area Trauma Summit, which took place on November 14, 2025. The summit sought to align trauma-informed efforts across Baton Rouge and the surrounding areas by bringing together service providers who support communities affected by trauma. Whole Health Louisiana sponsored the event.

Methodology

To compile data for the legislative report, a survey tool was developed to assess compliance at the school level with the Jason Flatt Act and other school health requirements. The survey was administered online in October 2025 to all public school systems, charter schools, and non-public schools. The results are based on self-reported school responses and have not been externally validated.

Survey Results

In total, 1207 of 1288 public and charter schools (94%) responded to the survey. Additionally, 145 of 355 non-public schools (41%) responded to the survey.

Jason Flatt Act (Suicide Prevention Training)

- One thousand one hundred eighty-four (1184) of the 1207 public and charter schools (98%) reported maintaining documentation that their teachers, counselors, and principals completed suicide prevention education training. Respondents are listed in Appendix A.
- One hundred and thirty-four (134) of the 145 non-public schools (92%) reported documenting that their teachers, counselors, and principals have completed suicide prevention education training. Respondents are listed in Appendix B.

For additional information, please contact healthyschools@la.gov
