

LASG_VIP_GUEST for Android

LASG_VIP_GUEST is an ssid designed to allow you connect your personal device to the wireless network and not have to login every day. The following process will “ONBOARD” your device. You will be required to authenticate using your State computer user account one time. The account needs to be entered in a very specific way. It is used to authenticate you and used to create a certificate that is then installed on your device. This certificate does not store any passwords or any other information about you. It is used to automatically authenticate your device to the wireless after being onboarded.

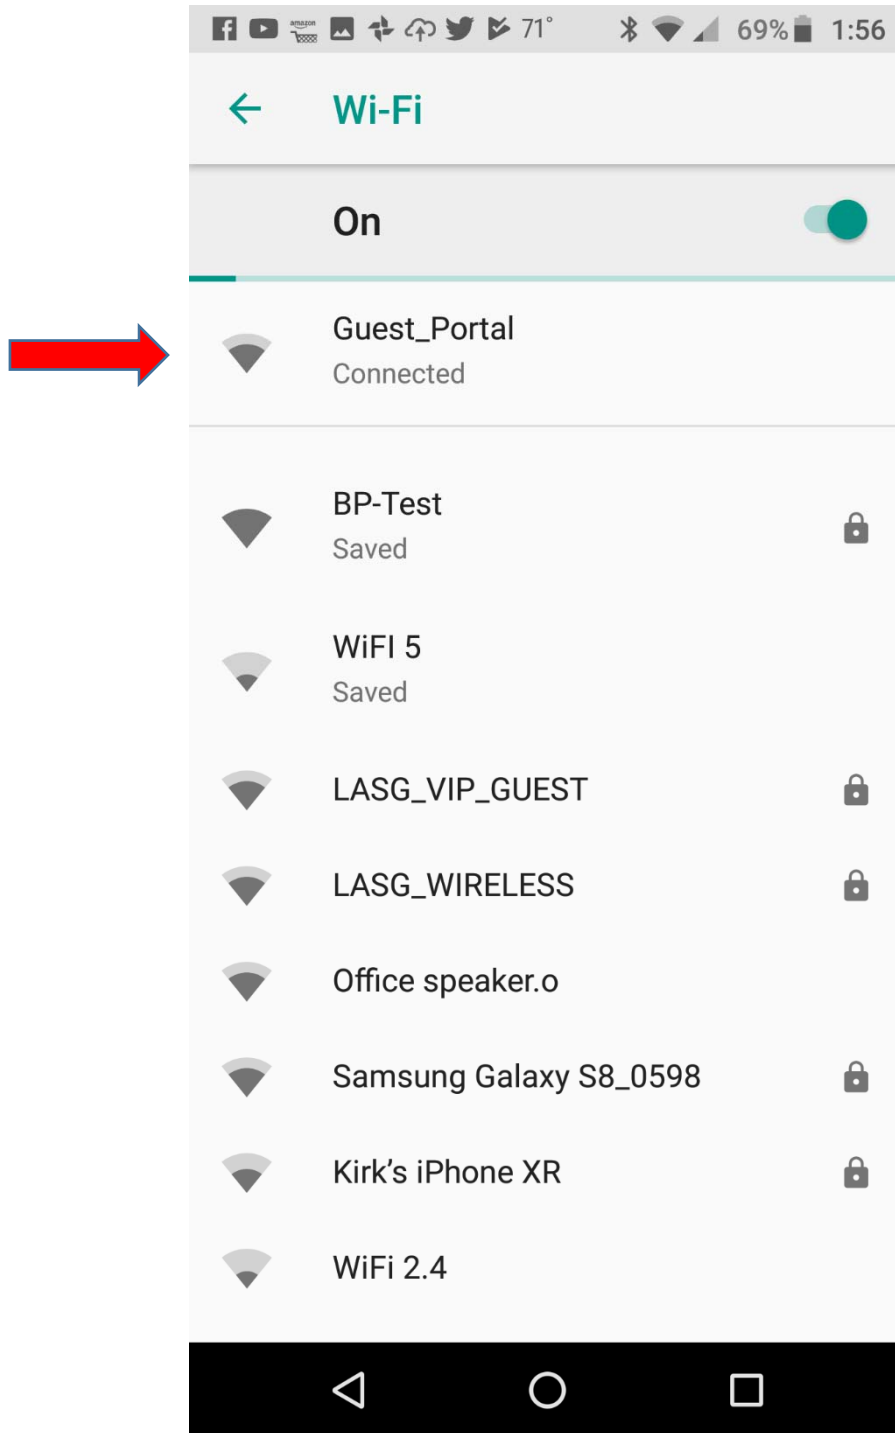

The installed certificate is good for 3 years so no need to change passwords or login to wireless.

The LASG_VIP_GUEST is common across many STATE Offices and coming soon to more. Once your device is onboarded, you should be able to connect to this SSID anywhere you see it being broadcast.

First connect to Guest_Portal:

You should see your device has a valid IP once it says "Connected"

Click on browser, here we are using Chrome App.

At this point you should be redirected to the Clearpass.la.gov splash page. You may have to type in an address of some sort into browser (Example: yahoo.com) and then you should be redirected to the Clearpass splash page.

Due to newer device and site security restrictions some sites may not permit the redirect to the registration page. A new STATE site was setup to help mitigate this issue. If you have issues with automatic redirection please browse to WifiWelcome.la.gov after connecting to Guest_Portal and the registration page should be displayed.

Account Status:

Enabled

[Log In](#)

Click Log In

You should be redirected to a WifiWelcome Page after registering.

Click on “If you need to onboard a device, [click here](#)”

You need to register your device. Enter your **username @domainname.la.gov**, eg [jdoe@.doa.la.gov](mailto:jdoe@doa.la.gov) in DOA's case. (Some domain name examples for other agencies are swe.la.gov, dps.la.gov, dhh.la.gov, doe.la.gov, wlf.louisiana.gov, dnrdomain.dnr.rev.state.la.us). Enter the same password you use to connect to that domain when logging in on your computer. Click the checkbox to accept terms of use and click on Login.

PLEASE READ CAREFULLY

Please pay close attention to the required format above for your username. It is NOT Domain\username. The required format is called User Principle Name (UPN). In some cases, your UPN may have been altered by AD personnel for another application. In all cases seen so far it was altered to reflect the domain as @LA.GOV which in most cases matches your email account.

The screenshot shows a mobile browser interface with the following elements:

- Top status bar: Facebook, YouTube, Amazon, icons, 71°, Bluetooth, Wi-Fi, 69% battery, 1:58.
- Address bar: <https://clearpass.la.gov/onbc>
- Page header: aruba | ClearPass
- Section header: Register Your Device
- Informational messages:
 - Info icon: Your certificate has been removed or has expired. Please re-provision your device using the form below.
 - Info icon: In order to connect to this network, your device must be configured for enhanced security. This wizard will guide you through the configuration process.
- Text: Login below using your State of Louisiana credentials. Please use format user@domain.com
- Form titled "Register Your Device":
 - Username: Jdoe@doa.la.gov (highlighted with a red arrow)
 - Password: (highlighted with a red arrow)
 - Terms: I accept the terms of use
 - Log In button (highlighted with a red arrow)
- Text: Contact OTS Support at otssupport@la.gov if you are experiencing difficulty logging in.
- Page footer: © Copyright 2019 Hewlett Packard Enterprise Development LP
- Bottom navigation bar: Android navigation icons.

Click on Install QuickConnect.

The screenshot shows a mobile browser interface. At the top, the status bar displays various icons including Facebook, YouTube, Amazon, and weather (71°), along with Bluetooth, Wi-Fi, signal strength, 69% battery, and the time 1:58. The address bar shows the URL <https://clearpass.la.gov/onbc> with a lock icon and a tab indicator showing '16' tabs. The page content features the 'aruba' logo and 'ClearPass' text. The main heading is 'Register Your Device'. Below this, an information icon (i) is followed by the text: 'In order to connect to this network, your device must be configured for enhanced security. This wizard will guide you through the configuration process.' A paragraph states: 'To apply the network profile, you first need to download and install the QuickConnect application from Google Play.' A prominent button with a green Android icon and the text 'Install QuickConnect' is highlighted by a red arrow. Below the button, there is a link with a blue arrow icon and the text 'I have already installed QuickConnect'. At the bottom of the page, the copyright notice reads '© Copyright 2019 Hewlett Packard Enterprise Development LP'. The Android navigation bar is visible at the very bottom.

This will bring you to the Google Play Store. Click on Install to install the QuickConnect App.

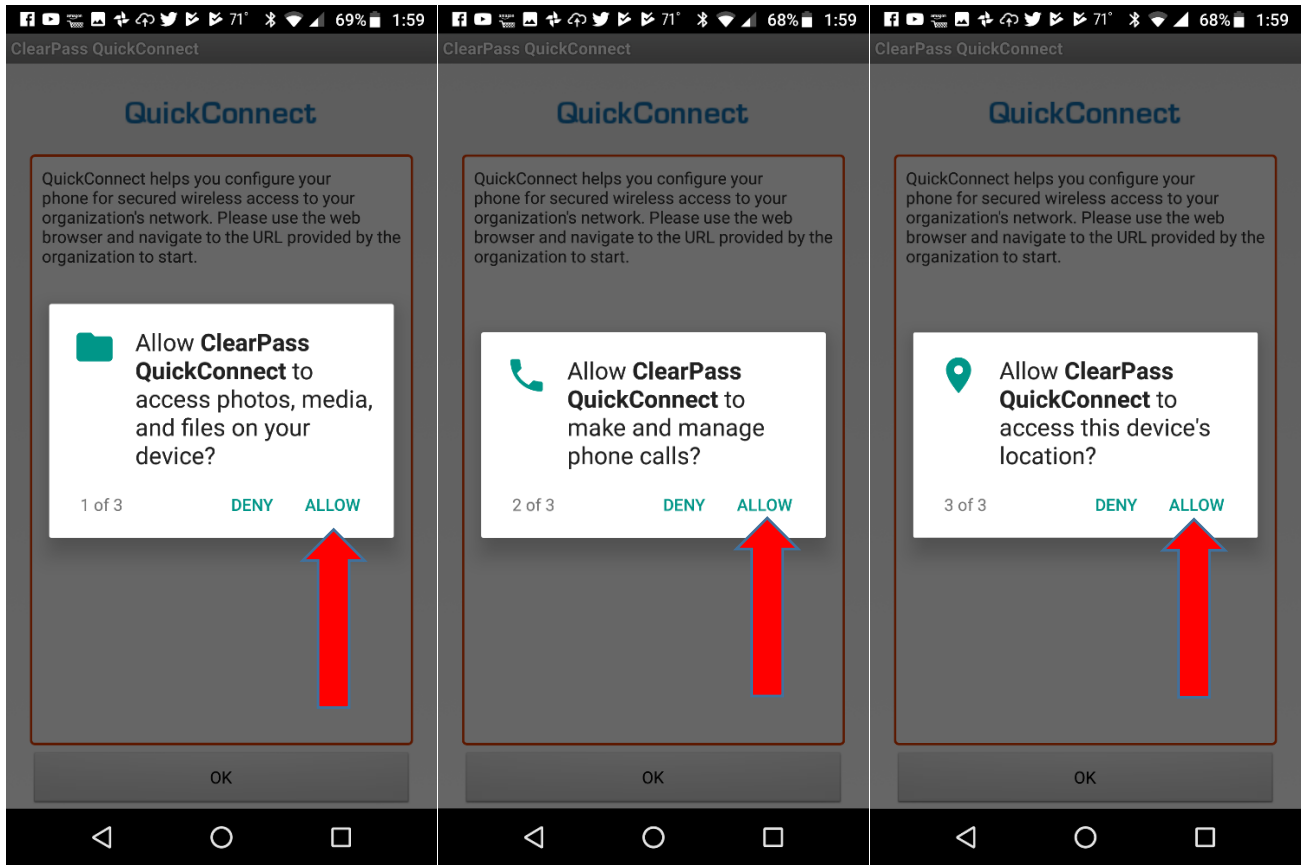

Once the App has installed you can click on Open or you can search for it in your Apps.

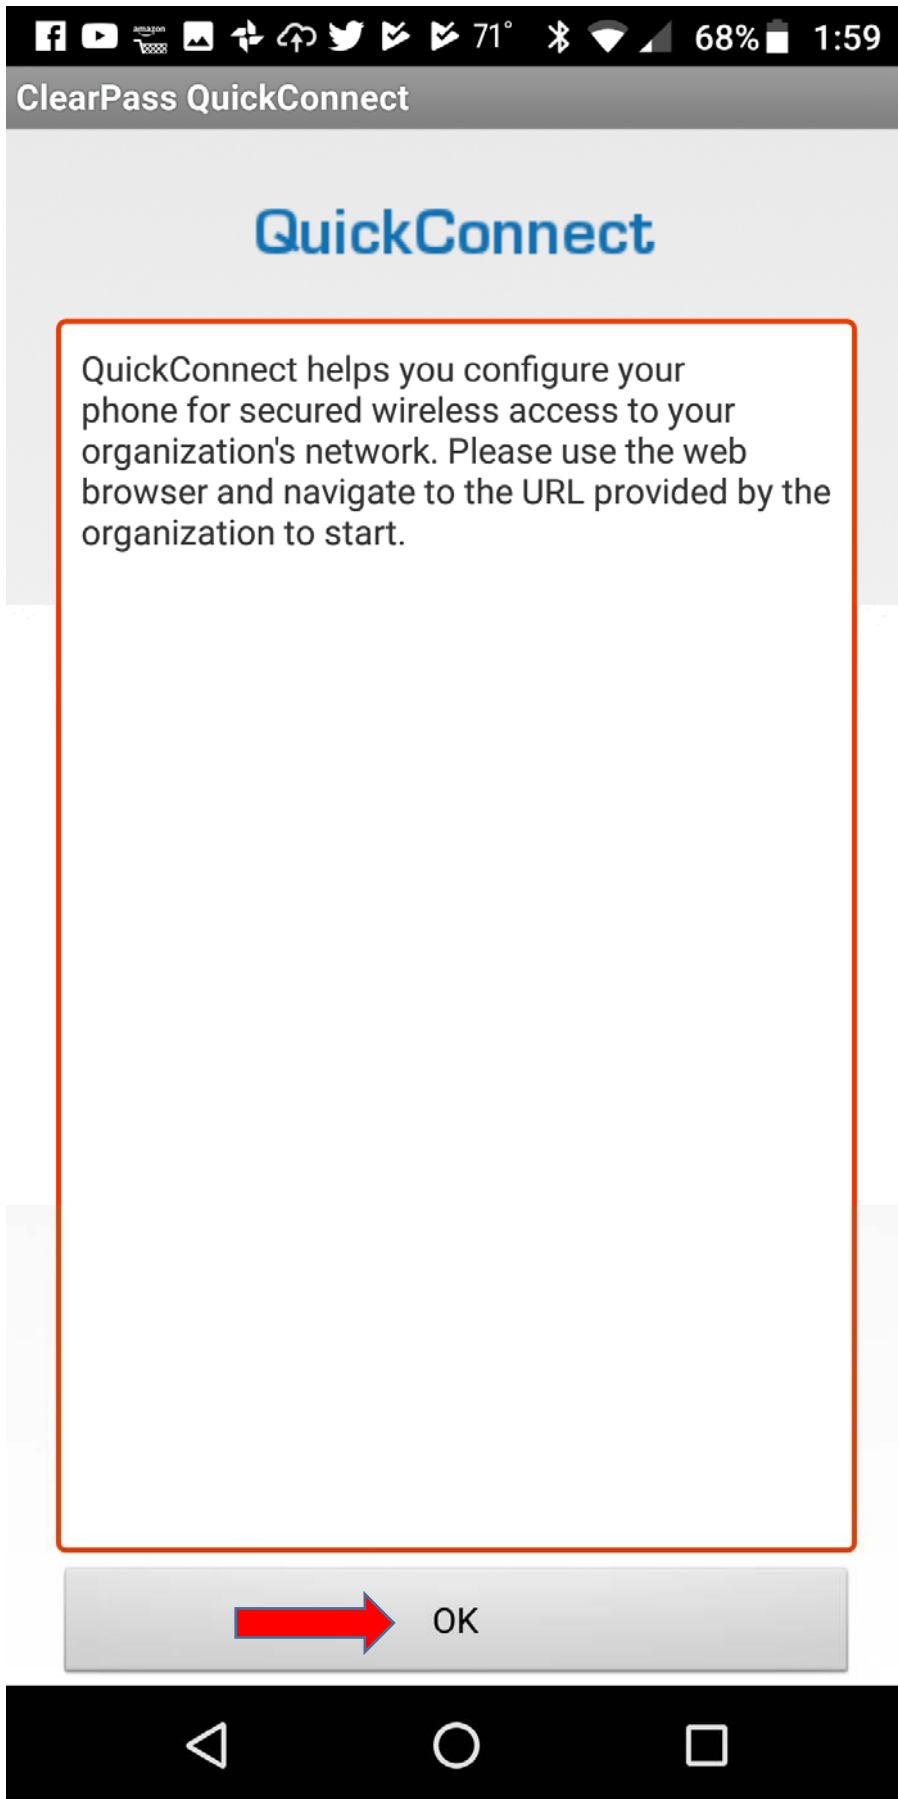

The following process gives the app permissions. Click continue.

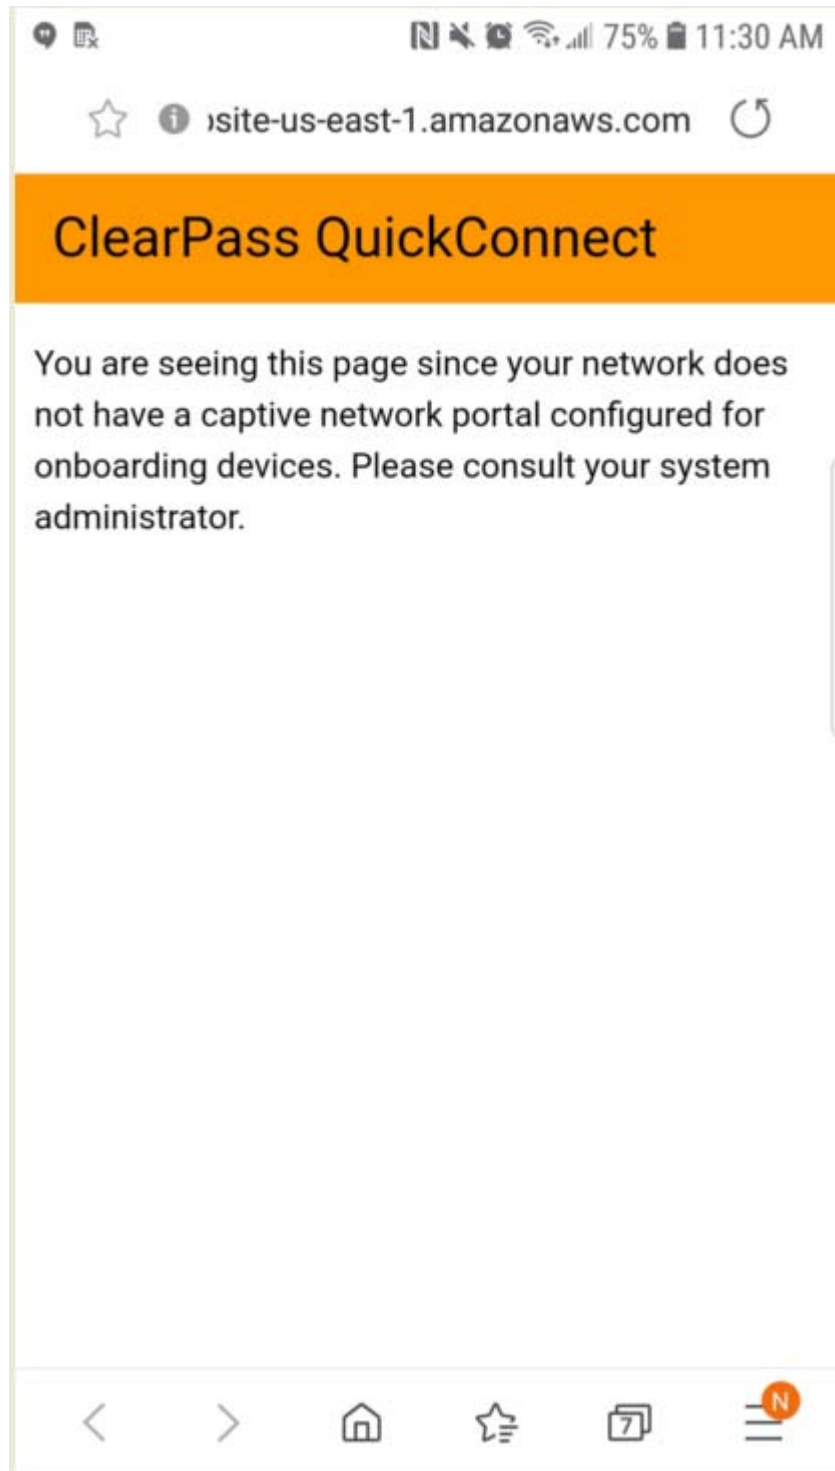

The next 3 permissions you MUST Allow. They can be turned off once the initial onboarding process is done.

Click OK on the next screen.

This popup opens in a new window. Please ignore. The next prompt is open behind it.

Quick Connect app should now point to the following which will install your profile for LASG_VIP_GUEST.

You may be asked to install quick1x.networkconfig. If so select Download.

The screenshot shows a mobile browser interface. At the top, the status bar displays various icons including signal strength, Wi-Fi, Bluetooth, and battery level at 78% with the time 9:16. The address bar shows the URL <https://clearpass.la.gov/onbc>. The page content features the Aruba and ClearPass logos, followed by the heading "Register Your Device". An information icon (i) is next to a paragraph: "In order to connect to this network, your device must be configured for enhanced security. This wizard will guide you through the configuration process." Below this, it states "QuickConnect will now apply the network profile to your device." At the bottom of the page, there is a copyright notice: "© Copyright 2019 Hewlett Packard Enterprise Development LP".

Overlaid on the bottom of the browser is a system dialog box with a download icon and a close button (X). The text in the dialog reads: "Do you want to download [quick1x.networkconfig](#) again?". Below the text are two buttons: "Cancel" and "Download".

At the very bottom of the image is the Android navigation bar with the back, home, and recents icons.

Click on [Open](#) to watch to connecting process.

Downloading...

quick1x (20).networkconfig downloaded [Open](#)

That process should look something like this.

If the connection to LASG_VIP_GUEST doesn't complete go to the Wi-Fi settings and click on LASG_VIP_GUEST. The profile should be filled in now. Click Connect.
