## Effective Lesson Planning with Eureka

January & February 2017

# Objectives

- Describe the steps of effective lesson planning with Eureka
- Identify opportunities in current structures for teachers to do effective lesson planning, barriers to effective planning, and next steps

# Effective Lesson Planning with Eureka

# Effective Lesson Planning with Eureka

1. Use the [Louisiana Guide for Implementing Eureka](#) and Eureka guidance to determine what standard(s) this lesson focuses on.
  - Define the standard(s) in your own words.
  - Identify the component(s) of rigor of the standard(s).

# Effective Lesson Planning with Eureka

## 2. Annotate the lesson.

- Work every problem.
- Review the “Concept Development” or “Classwork” piece. Write the 2-3 key student understandings on the side of the page.
- Determine what problems or sets of problems can be omitted. 
- Determine strategies for instruction (whole class <WC>, group work <GW>, individual work <IW>).
- Think through hot spots in the lesson, or places that students are likely to get stuck. Determine a plan to support students learning. 
- Think through ideal answers and how you will push students to explain their thinking and think deeper about a problem or idea.
- Review “Student Debrief” or “Closing.” 
  - Identify desired reflections and possible opportunities for clarification

# Effective Lesson Planning with Eureka

3. Determine how you will support students who miss the exit ticket items.

- Use the [remediation guides](#) to determine what standards serve as the foundation of the targeted standard(s).
- Identify resources to use for targeted remediation.
  - [EAGLE](#)
  - [Illustrative Mathematics](#)
  - [LearnZillion](#)
- Determine the plan and time structures in which you will address misconceptions or gaps.

# Effective Lesson Planning

In summary, to effective lesson planning in Eureka involves:

1. Identifying and digging into the targeted standard(s)
2. Annotating the lesson
3. Establishing remediation needs and approaches

\*Front-end planning for modules is also important. Eureka provides Module Overviews and other tools that give overall guidance for each module.
