

# UNIT PLANNING

## STANDARDS

Identify the content standards to be included in the unit.

## UNIT ASSESSMENT

Identify assessments which illustrate mastery of the content standards to determine what students should be able to do.

## OBJECTIVES & FORMATIVE TASKS

Create scaffolded lesson objectives and tasks aligned to the CCSS in order to prepare students to meet the expectations of the unit assessments.

## CONCEPTS & SKILLS

Identify the key concepts and skills students should learn in order to master objectives.

# STANDARDS FOR MATHEMATICAL PRACTICE

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.
