

American Rescue Plan (ARP) Emergency Assistance for Non-Public Schools (EANS)
Future Procurement Catalog

Catalog Overview

To assist schools in filling out the Future Procurement section of the ARP EANS Application, this document provides

- 1) a list of commonly requested technology items and Technology Contract Vendors,
- 2) a list of commonly requested non-technology goods, services, and assistance,
- 3) a list of Non-Technology State Contract Vendors and corresponding available categories of items, **and**
- 4) a list of Non-Technology Non-Contract Vendors and corresponding available categories of items,

The items listed in this Catalog may be requested in the Future Procurement section of your school's application. These items utilize the use of state contracts already in place, and therefore may result in quicker procurement, based on availability.

However, the ARP EANS Program **does not require** a school to request the services and assistance listed within this catalog nor does the Program preclude a school from requesting any services or assistance they deem necessary.

If a school requests goods or services and assistance from a vendor not listed within this Catalog, the school should determine if the vendor is registered with [OSRAP](#). If the vendor is not registered, the school should provide [registration instructions](#) to the vendor so the request can be completed.

Please note, the procurement of any requested goods, services and assistance are subject to the school's eligibility as well as an item's allowability based on program requirements.

Quotes Overview

Vendor quotes for requested services and assistance are not a requirement of your completed application. However, providing vendor quotes may help LDOE in facilitating the procurement process for approved services or assistance.

Services or assistance requested from approved State Contract Vendor's do not have purchasing limits and therefore do not require multiple quotes.

For services and assistance requested from Non-Contract Vendors (vendors not contracted with the Office of State Procurement), the Procurement rules may require multiple quotes prior to purchase. Providing these quotes with the submission of your application may help facilitate the procurement process.

Please see below for Non-Contract Vendors procurement thresholds:

- If the purchase is at or below \$10,000, a preliminary quote is not needed.
- If the purchase is between \$10,001 and \$20,000, three quotes are strongly encouraged.
- If the purchase is between \$20,001 and \$30,000, five quotes are strongly encouraged.
- If the purchase is at or above \$30,001, LDOE may initiate a bid process through the Office of State Procurement.

While not a necessity, should you have them, the Program encourages you to upload the quote(s) to your application in all circumstances as it will assist the LDOE with procuring approved future procurement requests as efficiently as possible.

If you are requesting the renewal of existing software, please upload the existing contract within your application as this will assist the LDOE with procuring approved future procurement renewal requests as efficiently as possible.
