The New Teacher Experience: Professional Learning Modules

The Department, in partnership with A+PEL, has developed monthly professional learning modules on topics that are critical for new teacher success. These modules include online asynchronous content followed by an in person learning lab where participants practice and apply these concepts. These five modules are designed to build learning throughout the year. Teachers are expected to complete the entire series of Professional Learning Modules.

This year, we are offering 245 complimentary seats. We are reserving half for the northern location (Monroe) and half for the southern location (Port Allen). Once those seats are exhausted, teachers may still attend but there will be a cost of \$1,272.00 per teacher to complete the series of modules. Systems are encouraged to cover the cost for the educator.

Teachers will be asked to receive approval to attend from their school leader. Once teachers complete the [registration](#), participants will receive details on selected training locations. Participants will also receive an invitation to access the online asynchronous modules.

Module 1: Classroom Management/Classroom Environment

Within this module, new teachers will gain knowledge about how to establish and maintain expectations and procedures that are efficient and effective. This module will ensure that participants can effectively lead a positive, inclusive classroom for all learners.
