TERMINOLOGY

Functional Annexes

Focus on critical operational functions and courses of action developed to carry them out. Need to be addressed in a comprehensive plan.

Functions may be developed separately, but they need to all flow from one function to the next as needed.

Hazard Specific Annexes

Describe the courses of action unique to a particular threat or hazard. Describe preparedness, response and recovery actions specific to a hazard.

Training

Tabletop Exercises – analysis of an emergency situation in an informal, stress-free environment.

Functional Training – simulated exercise that tests the capability of an organization to respond to a simulated event.

Drills – used to test a single specific operation or function.

Full-Scale Exercises – simulates a real event as closely as possible.

 - ▶ Counselors/Social Workers at school the following day
 - ▶ Videos pulled to provide to law enforcement
 - ▶ Alleged suspects on the loose – 3 days before buses ran for specific stops

TABLETOP EXERCISE

MEDICAL EMERGENCY

- ▶ **Initial Impact:** A staff member runs into the nurse's office and yells out that a student is down in the gym. She doesn't know what happened because she was not there when it happened. She did overhear someone say that they were playing volleyball and the student may have gotten hit in the head and passed out.
 - ▶ What should you do?
- ▶ **First 3 minutes:** When you get to the gym you immediately find an unconscious student face down on the floor. You take vitals and find that her pulse is irregular and she has shallow breathing. The other students who witnessed the event are crying and wondering if she is dead. You ask the teacher if she knows what happened and she says she does not. "She just fell to the ground"
 - ▶ What should you do next to ensure the students' safety?
- ▶ **Five minutes:** You've already sent 2 staff members to the office for an AED. They come back and ask you if you know how to use it, because they have never used it. You tell them you have been trained and begin applying the pads. Another staff member shows up and tells you her emergency contact has been notified and were advised she is allergic to peanuts and penicillin.
 - ▶ What should you do next?
- ▶ **Afternoon:** Later that afternoon, you get a call from the student's parents at the hospital thanking you for helping. You are advised that it was due to a cardiac abnormality. Subsequently you are told that rumors are going around that the student overdosed on drugs.
 - ▶ What should you do next?

**“The body won’t go
where the mind has
never been”**
