

A. Description of overall philosophy (200 word limit):

NOMMA believes in a collaborative and inclusive model of educational programming. Collaborative strategies include ongoing communication among regular classroom teachers, joint planning and support for classrooms with students with disabilities or learning difficulties, and co-teaching experiences.

NOMMA recognizes that it may not be possible within the regular classroom to meet the needs of some students with disabilities. A full range of special education services will be provided based on student needs. NOMMA will ensure due process and procedural safeguards are adhered to as they pertain to special education. This includes ensuring that required parental contacts are made, proper documentation is maintained, and students with disabilities are educated according to IEPs.

While NOMMA serves grades 8 – 12 and most students are identified prior to eighth grade, NOMMA will utilize the RtI process to provide interventions and then evaluations as needed to determine the need for additional services.

In the event that a student is noted or regarded as having a disability, and it is apparent that the disability limits one or more major life activity but does not require specialized instruction to access free and appropriate public education, the student will receive accommodations and/or related services under Section 504 of the Rehabilitation Act of 1973.
