Introduction

Development of K-12 Louisiana Student Standards for English Language Arts

The Louisiana English language arts student standards were revised to improve clarity and conciseness through a collaborative process that included input from teachers across the state and feedback from public comments. Building on the original vision, these revisions refine and strengthen the standards by providing grade-appropriate content, preserving high expectations, and strengthening coherence and progression of skills both within and across grades.

English Language Arts Goal

The goal for students in English language arts (ELA) is to

- Read
- Understand complex, grade-level texts
- Express their understanding of those texts through writing and speaking

Students in Louisiana are ready for college or a career if they can read, understand, and express their understanding of complex, grade-level texts. This means students should be able to pick up any text, such as a picture book, newspaper article, or painting, understand what the text means, and be able to speak or write about the ideas they learned or challenged from the text and why.

The Louisiana Student Standards are (1) research and evidence-based, (2) aligned with college and work expectations, and (3) rigorous. A particular standard was included in the document only when the best available evidence indicated that its mastery was essential for college and career readiness in a twenty-first-century, globally competitive society.

The goal of the Louisiana Student Standards for English Language Arts (ELA) is to produce a literate person in the twenty-first century. A literate person in the twenty-first century should

- demonstrate independence in reading, writing, speaking, listening, and language use;
- build strong content knowledge through reading and writing;
- adapt to the demands of various audiences, tasks, purposes, and subjects;
- comprehend as well as critique;
- cite specific evidence and evaluate others' use of evidence;
- use technology and digital media strategically and capably;
- understand other perspectives.

The standards for ELA establish grade-level expectations for all students meaning what students will learn. Decisions about how to teach these expectations are left up to local districts, schools, and teachers.

Reading the Standards and Interpreting their Codes

It is important for those using the standards to understand the terminology used. The purpose of this section is to explore the terminology used in the Standards for ELA.

Standard Coding

There are three parts to a Louisiana Student Standard code for ELA and Literacy, and each part is separated by periods:

Example:

In the example above, the strand code “RI” stands for “Reading Standards for Informational Text.” The number 2 refers to the fact that this is a grade 2 standard, and the number 1 tells you this standard refers back to anchor standard 1: “Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.”

If a standard is subdivided, the Standards use letters. The Standard number, then, would be followed by a letter. For example, Language Standard 1 for grade 2 has letters “a-f” underneath it. A code for this standard, then, would include the letter to indicate which part of the standard is included in the lesson, such as L.2.1c.

There are nine strand codes in the Louisiana Student Standards for ELA:

Abbreviation	RL	RI	RF	W	SL

Reading Standards for Foundational Skills

These standards are directed toward fostering students' understanding and working knowledge of concepts of print, the alphabetic principle, and other basic conventions of the English writing system. These foundational skills are not an end in and of themselves; rather, they are necessary and important components of an effective, comprehensive reading program designed to develop proficient readers with the capacity to comprehend texts across a range of types and disciplines. Instruction should be differentiated: good readers will need much less practice with these concepts than struggling readers will. The point is to teach students what they need to learn and not what they already know — to discern when particular children or activities warrant more or less attention. **Note: In kindergarten, children are expected to demonstrate increasing awareness and competence in the areas that follow.**

Vertical Progression

The standards for each grade should not be considered a checklist or taught in isolation. There is a flow or progression that creates coherence within a grade and from one grade to the next. The progressions are organized using anchor standards. An anchor standard is a skill that high school graduates should have to be ready for entry into the workplace or postsecondary education. The anchor standards are identical across all grades and content areas. Each of the progressions begins in Kindergarten and indicates a constant movement toward the high school standards. Progressions guarantee a steady, age-appropriate development of each topic and also ensure that gaps are not created in the English language arts education of Louisiana's students.

There are 10 reading and 10 writing anchor standards, and 6 speaking/listening and 6 language standards.

Resources

The Louisiana Department of Education (LDOE) is committed to ensuring that every classroom has access to a high-quality curriculum. In Louisiana, all districts can purchase instructional materials that are best for their local communities since those closest to students are best positioned to decide which instructional materials are appropriate for their district and classrooms.

English Language Arts Content Framework

Louisiana's ELA goal is for students to read, understand, and express their understanding of complex grade-level texts.

During unit internalization, teachers identify where the standards are present in their high-quality instructional materials (HQIM). Teachers identify how the assessments measure student understanding of the knowledge and skills students gained during their learning. Effective ELA instruction is structured so that students receive the right amount of support through whole-class activities, small-group reading, small-group writing, and independent reading. This blended approach helps students build the skills necessary to increase their reading proficiency level while pushing them to explore complex ideas at their grade level. This combination of reading and writing allows students to practice in authentic settings similar to how they will perform in college and careers.

Whole-Class Instruction

Whole-class instructional time is for grade-level instruction. All students should meet the grade-level standards for reading, writing, speaking and listening, and language with complex texts. Whole-class instruction provides a space for students to think about meaningful texts, talk with other students to develop and refine their thinking about a text, and write about their knowledge and understanding of texts.

Small-Group Reading Instruction

Small-group instructional time is for supporting student needs that cannot be met during whole-class instruction. The instruction is focused on targeting the needs of readers who are reading slightly below grade-level (up to 1 year below grade level) and addresses general vocabulary growth, additional practice of comprehension strategies, advanced word study, or fluency utilizing current grade-level texts (NOT a leveled version of a whole-class text). This allows students the opportunity to read/comprehend complex texts with appropriate scaffolding from the teacher, as well as to practice and build the fluency and comprehension skills necessary to grow their reading proficiency over time. All students need small-group support. For advanced readers, this is a place to challenge each other and explore above-grade-level texts and skills.

Instructional Materials Review

In Louisiana, all school systems purchase the instructional materials that are best for their local communities. The LDOE engages in an online review of instructional materials to determine the degree of alignment with state content standards to support school systems with these decisions. Each local school system should determine if its use is appropriate to meet the educational needs of its students.

Tier 1 - Exemplifies Quality: Meets all non-negotiable criteria and scored the best possible on all indicators of superior quality.

Tier 2 - Approaching Quality: Meets all non-negotiable criteria and some indicators of superior quality.

Tier 3 - Not representing Quality: Does not meet non-negotiable criteria.

The LDOE will continue to review and evaluate instructional materials based on the standards in place at the time of the review. Additionally, the LDOE will conduct additional reviews when standards change and publishers update their materials. Up-to-date annotated reviews of instructional materials are available on the [Curricular Resources Annotated Reviews web page](#).

Text Complexity

Text complexity can be defined as the level of difficulty in reading and understanding a text based on a series of factors: the readability of the text, the levels of meaning or purpose in the text, the structure of the text, the conventionality and clarity of the language, and the knowledge demands of the text.

The Importance of Text

Quality texts are critical for English language arts instruction. “Quality” means a text’s language is at or above grade level and the content of the text is appropriately complex and connected to themes, concepts, or topics students are learning. All students, even the most struggling

readers, must regularly have access to texts that are at or above grade level. This does not mean students do not also engage with texts on their reading level (they may during small groups or during independent reading to build background knowledge), but whole-group instruction must remain rigorous and complex.

Texts should be varied and include fiction or literary texts, nonfiction or informational texts, and nonprint texts (e.g., art, film, songs, etc.). Students should have the opportunity to formulate their own ideas about these texts and communicate them either in writing or orally to their peers. Grade-level standards provide the criteria for reading, formulating ideas, and expressing those ideas about quality texts. As such, the text, the use of standards with that text, and the connection of that text to other texts are among the most important choices an ELA teacher will make.

Text Quality

Texts must be both linguistically complex and instructionally useful based on the grade-level standards. Teachers use the following criteria to ensure texts are appropriate and meaningful for their students:

Texts are complex.

- Review all of the texts.

Texts are instructionally useful.

- Texts build student knowledge about universal themes, various cultures, and other perspectives (e.g., RL.2.9, RI.5.6, or RL.9-10.6.)

Texts are available and include commonly read authors, genres, or significant topics.

- Texts represent major historical events and time periods, popular science, music, and art, or connect to other content areas (e.g., RI.1.9, RI.3.3, or RI.8.9).
- Texts interest students or provide opportunities for building reading stamina and perseverance.

Texts include age-appropriate content.

- Decisions about content appropriateness must be made locally. Local systems, schools, and teachers should make the final determination of which texts will be read in Louisiana classrooms.

Texts are authentic.

- They are written by a published author and/or are high-quality and contain accurate information as opposed to short passages expressly written for the purpose of teaching a discrete ELA skill.

An Example of Text Complexity throughout the Standards

The following chart illustrates the different levels of text that meet the expectations of the English language arts standards.

Grade Level	English Language Arts Standard	Complexity of the Text	Use of Text
Kindergarten	Actively engage in group reading activities with purpose and understanding. (RL.K.10)	Texts with readability in grades 2 or higher	Read aloud by the teacher during whole-class instruction
Kindergarten	Read grade-level decodable texts with accuracy, automaticity, and understanding. (RF.K.4)	Texts that contain only the letter-sound correspondences or spelling patterns that have been taught	Read along with the teacher or read alone by the student during small-group instruction or independent reading
Grade 1	With prompting and support, read grade-level informational texts. (RI.1.10)	Texts with readability at the end of grade 1 or grades 2 or higher	Read aloud, read along, or read alone during whole-class instruction, small-group instruction, or independent reading
Grade 4	Read grade-level texts with sufficient accuracy and fluency to support comprehension. (RF.4.4) a. Read with automaticity and appropriate prosody or expression. b. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.	Texts with readability in grades 4-5	Read along or read alone during whole-class instruction, small-group instruction, or independent reading
Grade 8	By the end of the year, read and comprehend literature, including stories, dramas, and poems, at the high end of grades 6–8 text complexity band independently and proficiently. (RL.8.10)	Texts with readability in grades 6-8 or higher	Read aloud, read along, or read alone during whole-class instruction, small-group instruction, or independent reading

Questions for Reader and Task Considerations:

Determining Instructional Uses of Complex Texts

Before reading a text in the classroom, consider whether the text is appropriate for the age of the students. If not, the text should not be read with your students.

Use the information gathered from steps one and two of the process to plan for instruction. Consider the following:

What knowledge and skills should students demonstrate after reading this text?		Use the answer to this question to identify the grade-level English language arts standards to focus on with that text.
How can this text be used with other texts? How will students read this text? (e.g., Listen to the teacher reading aloud? Read along with a group? Read alone?)		Use the answers to these questions to determine when to teach this text in a unit. (e.g., Is it easier to read, so it goes well at the beginning? Does it require knowledge from other texts first, so it needs to go later in the unit?)
What aspects of the text will likely pose the most challenge for your students?		Use the answer to this question to design your instructional supports so that all students (even those who struggle) can access the text independently and proficiently through multiple and purposeful rereadings of the text.

Reader's Circles

Reading is the process by which we make meaning of written words. The meaning making process is complex and happens out of sight in our brains, making it difficult to see when it is working and when it is not working. A teacher's job is to help students make meaning of text independently. While many factors contribute to making meaning, this guide will focus on a few factors that teachers can focus on to support students in making meaning from text.

The Meaning Making Process

Making meaning is an interaction between what the author writes and what the reader thinks. Strong readers make connections when they read. They notice when patterns exist and use that information to predict what a character might do or say or how an author might support a claim. They think about how the parts of a text interact with each other and put the parts together to come up with the text's meaning or purpose. Strong readers also take notice when there are shifts in the text, as those contrasts signal a change in direction and develop meaning. The [Reader's Circles](#) illustrate the thinking process readers engage in when making meaning from text.

Science/Social Studies/Technical Literacy Standards

The Science/Social Studies/Technical Literacy Standards were not included in the standards revision process. These standards are necessary to extend literacy into these content areas.

Reading Standards for Literacy in History/Social Studies 6–8

The standards below begin at grade 6; standards for K–5 reading in history/social studies, science, and technical subjects are integrated into the K–5 Reading standards. The anchor standards and high school standards in literacy work in tandem to define college and career readiness expectations — the former providing broad standards, the latter providing additional specificity.

Key Ideas and Details

1. Cite specific textual evidence to support analysis of primary and secondary sources.
2. Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
3. Identify key steps in a text’s description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).

Craft and Structure and Structure

4. Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
5. Describe how a text presents information (e.g., sequentially, comparatively, causally).

Integration of Knowledge and Ideas

7. Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
8. Distinguish among fact, opinion, and reasoned judgment in a text.
9. Analyze the relationship between a primary and secondary source on the same topic.

Range of Reading and Level of Text Complexity

Writing Standards for Literacy in History/Social Studies, Science, and Technical Subjects 6–8

The standards below begin at grade 6; standards for K–5 writing in history/social studies, science, and technical subjects are integrated into the K–5 Writing standards. The anchor standards and high school standards in literacy work in tandem to define college and career readiness expectations — the former providing broad standards, the latter providing additional specificity.

Text Types and Purposes

1. Write arguments focused on discipline-specific content.
 - a. Introduce claims about a topic or issue, acknowledge and distinguish the claims from alternate or opposing claims, and organize the reasons and evidence logically.
 - b. Support claims with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources.
 - c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claims, counterclaims, reasons, and evidence.
 - d. Establish and maintain a formal style.
 - e. Provide a concluding section that follows from and supports the argument presented
2. Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
 - a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension.
 - b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples.
 - c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts.
 - d. Use precise language and domain-specific vocabulary to inform about or explain the topic.
 - e. Establish and maintain a formal style and objective tone.
 - f. Provide a concluding section that follows from and supports the information or explanation presented.
3. (See note; not applicable as a separate requirement)

Production and Distribution of Writing

4. Produce clear and coherent writing in which the development, organization, and style are appropriate to the task, purpose, and audience.

5. With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well the purpose and audience have been addressed.
6. Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

Research to Build and Present Knowledge

7. Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
8. Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
9. Draw evidence from informational texts to support analysis, reflection, and research.

Range of Writing

10. Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Note: Students' narrative skills continue to grow in these grades. The Standards require that students be able to incorporate narrative elements effectively into arguments and informative/explanatory texts. In history/social studies, students must be able to incorporate narrative accounts into their analyses of individuals or events of historical import. In science and technical subjects, students must be able to write precise enough descriptions of the step-by-step procedures they use in their investigations or technical work that others can replicate them and (possibly) reach the same results.
