

# 2026 Math Standards Institutes Resources

---

These resources are intended to support math leaders in re-delivering professional learning to classroom teachers, providing a clear and coherent overview of the updated [Louisiana Student Standards for Mathematics](#). The materials are designed to build shared understanding of grade-level expectations, highlight the major work of the grade, and reinforce the instructional shifts of focus, coherence, and rigor.

The ideal presenter is a math leader who has attended a Louisiana Department of Education (LDOE) standards institute. This prior experience provides a strong foundation in the standards' intent, institute structure, and key messages. When used as designed, these resources should enable math leaders to:

- Facilitate meaningful conversations about grade-level content and expectations;
- Support teachers in identifying the most critical concepts for instruction;
- Make connections across grade levels to strengthen coherence; and
- Model and reinforce high-quality instructional practices aligned to the standards.

Materials are not intended to be used in isolation, but rather as part of a broader system of ongoing professional learning.

Important Notes:

- Resources should be used as provided and should not be altered or edited to preserve the accuracy and intent of the content.
- Materials are designed to provide an overview and do not represent the full scope of all changes to the mathematics standards.

## Full Standards Institute Training Resources

Links to the resources for the full 6-hour Standards Institute training are below. For questions about redelivery or implementation, please contact [math@la.gov](mailto:math@la.gov).
