PARCC Regional Training**

WELCOME

14-15 Assessment Plan

Grade	Subject	13-14 Assessment	14-15 Assessment
Grades 3 to 8	ELA	LEAP and iLEAP	PARCC
	Math	LEAP and iLEAP	PARCC
	Science	LEAP and iLEAP	LEAP and iLEAP
	Social Studies	LEAP and iLEAP	LEAP and iLEAP
High School	All subjects	ACT Advanced Placement	ACT Advanced Placement
	ELA	English II EOC English III EOC	English II EOC English III EOC
	Math	Algebra I EOC Geometry EOC	Algebra I EOC Geometry EOC
	Science	Biology EOC	Biology EOC
	Social Studies	US History EOC	US History EOC
Alternate Assessments	ELA, Math, Science (varies by grade level)	LAA1	LAA1
	ELA, Math, Science, Social Studies (varies by grade level)	LAA2	LAA2 for eligible re-testers (high school)
	English Language	ELDA	ELDA

Why PARCC?

- 1. Our students can demonstrate that they are on par with their peers across the country,** through scores that are comparable across 19 states.
- 2. Students will be asked to think independently, not just fill in bubble tests.** PARCC is a “test worth taking” as it mirrors the demands of every day life.
- 3. Our state's educators have been involved in test development,** including item reviews and policy making.
- 4. Online testing allows increased accessibility features for all students and more comprehensive accommodations for students with disabilities.** Accessibility features include highlighters, adjusted font size, masking tool to block eliminated answer choices, line readers, etc. Accommodations include videos of human interpreters, closed captioning, word prediction, etc.
- 5. The state will pay the same price for a higher-quality assessment.**

PARCC Testing Components

Component	Format and Administration
PHASE I Performance-Based Assessment (PBA) <i>Hand scored</i>	Format <ul style="list-style-type: none"> • Approximately 75% of the way through the year • 3 ELA sessions (40-80 min/session) • 2 math sessions (50-55 minutes/session) Administration <ul style="list-style-type: none"> • 20 day testing window for Computer Based Tests (CBT): March 2-27, 2015 • 5 day testing window for Paper Based Tests (PBT): March 16-20, 2015
PHASE II End-of-Year Assessment (EOY) <i>Computer scored</i>	Format <ul style="list-style-type: none"> • Approximately 90% of the way through the year • 2 ELA sessions (40-70 minutes/session) • 2 math sessions (55-70 minutes/session) Administration <ul style="list-style-type: none"> • 20 day testing window for Computer Based Tests (CBT) : April 27-May 22, 2015 • 5 day testing window for Paper Based Tests (PBT): May 4-8, 2015

For the first year only, results will not be available until early Fall 2015. Therefore, no summer retests for PARCC will be offered for Summer 2015. Please consider this in defining 4th and 8th grade promotion policies.

PARCC Spring 2014 Field Test Participation

The majority of districts will have exposure to PARCC prior to implementation.

- 65 traditional districts and 33 nontraditional schools/charters elected to participate (645 schools and approximately 50,000 students)
- Sampling eased the burden for participation
 - only 2-3 grade levels within a school
 - only selecting 1-2 classes within a grade level
- Students will participate in either the ELA or math component, not both
- Students will participate in either the PBA, EOY or both components ranging from 2-5 sessions

Testing dates: **PBA:** March 24-April 11, 2014 and **EOY:** May 5-June 6, 2014

Field Test District Support

Three **one-day sessions** will provide district test and technology coordinators with in-depth guidance on system usage and navigation for the PARCC Field Test:

- January 21, 2014- Jefferson Parish
- January 22, 2014- East Baton Rouge Parish
- January 24, 2014- Bossier Parish

Two **follow-up sessions** will provide further administration guidance:

- February 12, 2014-Technology Support (in person)
- February 18, 2014- Test Administration (webinar)

On-demand modules available on PearsonAccess:

- Technical Setup Training
- Test Administration for CBT Training
- Test Administration for PBT Training
- Emerging Technologies and Security with CBT
- Accessibility Features and Accommodations with CBT Training

Next Steps

Classroom Selection

1. Based on the school/class selections in your district, randomly select the required number /type of classes at each school
2. For the selected schools/classes, create a class/section
3. Upload completed file to LDOE
4. LDOE will create and upload student roster files to Pearson

Action	Date
Instructions for Class Selection Released via Newsletter	January 21, 2014
Additional Class Selection Information/QA	January 21,22, 24
Selection File Due LDOE	February 5, 2014

Regional Workshop for PARCC Field Test

SPRING 2014

Agenda

9:00 AM – 9:30 AM **Introduction**

9:30 AM – 10:30 AM **Part I: Technology Set Up**

- Introduction to computer-based testing
- Preparing your environment for computer-based testing

10:30 AM – 10:45 AM **Break**

10:45 AM – 11:30 AM **Part I: Technology Set Up (continued)**

- Preparing your environment for computer-based testing
- Providing technology support during testing
- Conducting an Infrastructure Trial
- New technologies – Virtualization, tablets

11:30 AM – 12:30 PM **Lunch on your own** (no lunch provided)

12:30 PM – 2:15 PM **Part II: Administrator Training**

- Overview of PearsonAccess
- User access and user roles
- Computer-based assessment
- Paper-based assessment

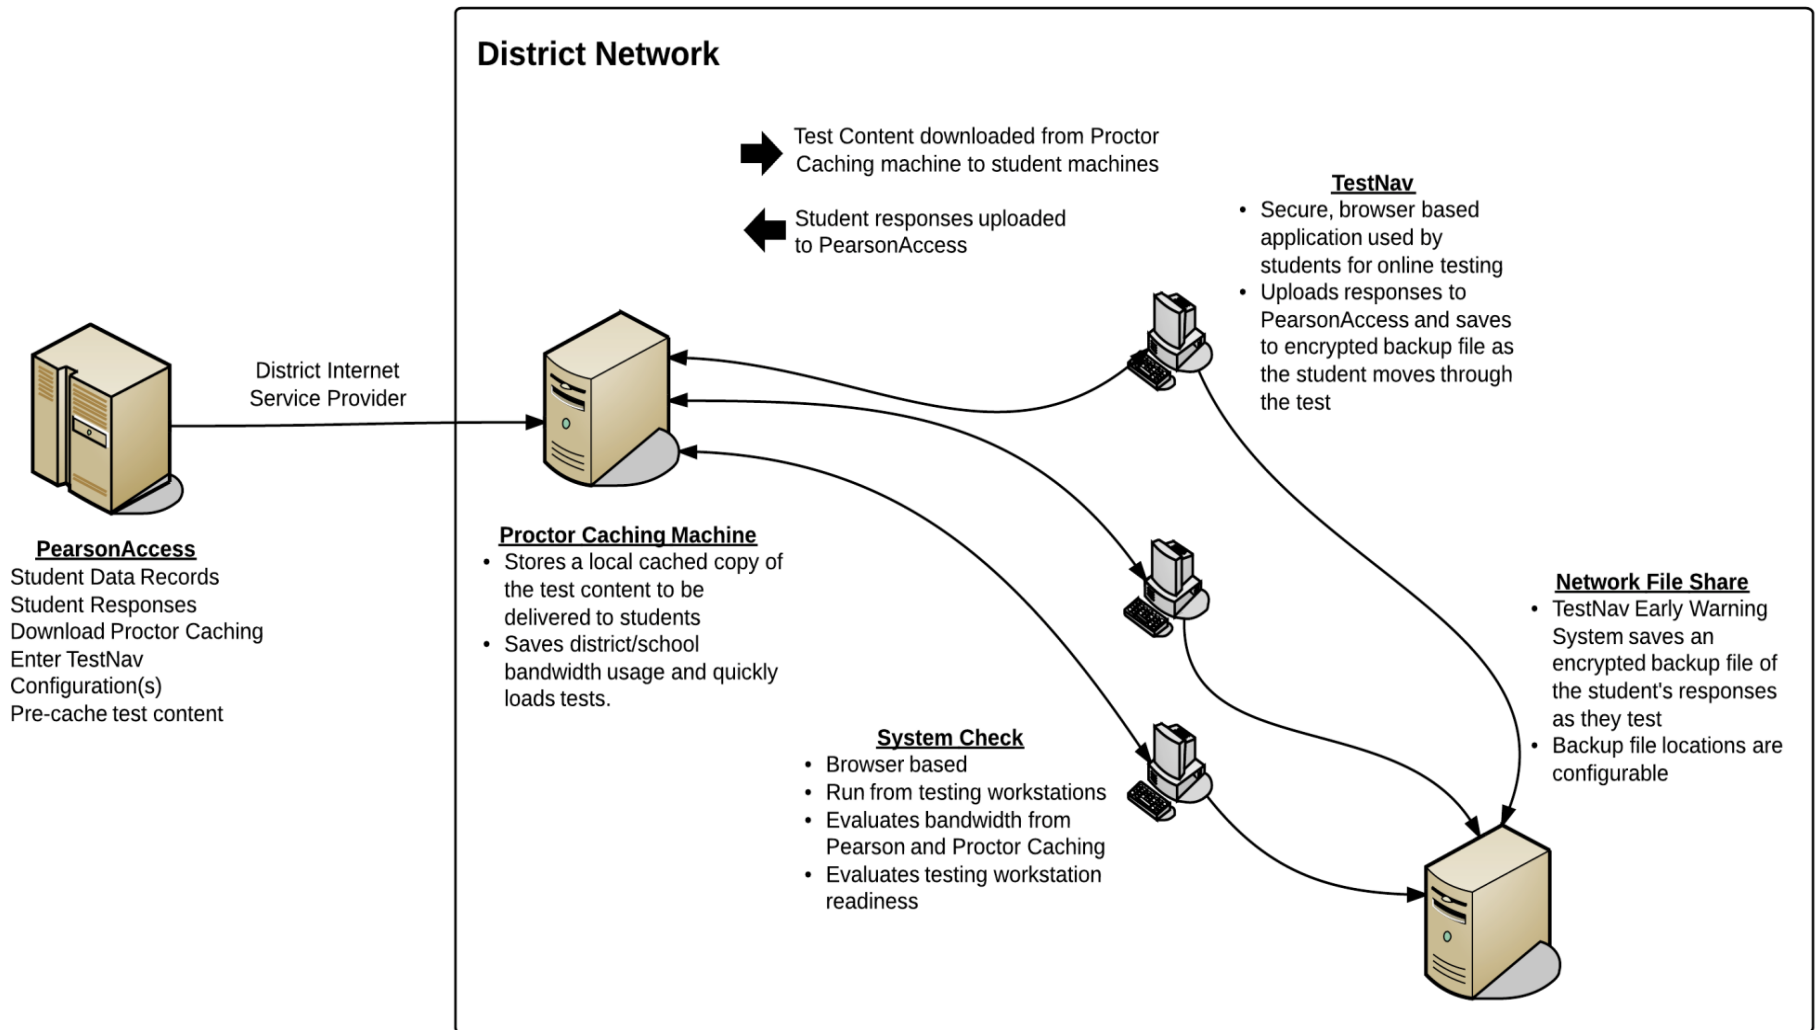

2:15 PM – 2:30 PM **Break**

2:30 PM – 3:30 PM **Part III: Accessibility Features & Accommodations with Computer-Based Testing**

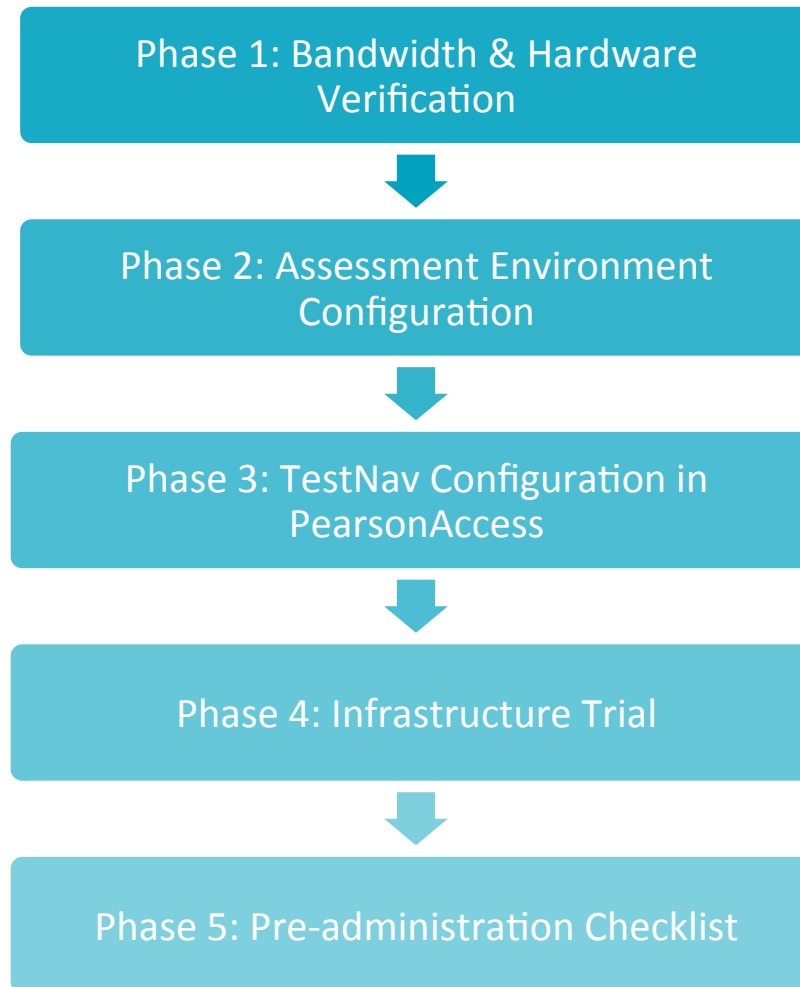

- Types of accessibility features and accommodations
- Assigning accommodated test forms

Part I: Technology Set Up

Computer-Based Testing Components

Technology Activities: Preparing your Environment

Phase 1: Bandwidth & Hardware Verification

Phase 1: Bandwidth & Hardware Verification

The first phase is to verify bandwidth and hardware readiness.

- ✓ Set firewall and content filter permissions
- ✓ Install and setup proctor caching
- ✓ Complete SystemCheck verification on all assessment environments

Phase 2: Assessment Environment Configuration

Phase 2: Assessment Environment Configuration

Phase 2 will verify device configurations and settings.

- ✓ Disable applications that could launch automatically
- ✓ Use SystemCheck to verify all test devices meet minimum system requirements
- ✓ Verify that the TestNav content and certificates are trusted on testing workstations.

Phase 3: TestNav Configuration in PearsonAccess

Phase 3: TestNav Configuration in PearsonAccess

Phase 3 focuses on TestNav configurations for designating proctor caching computers and student response file save locations

The screenshot displays the PearsonAccess web application interface. At the top, there is a navigation bar with links for 'Your Account', 'Administrative Management', 'Support', and 'Logout'. Below this is a secondary navigation bar with tabs for 'Home', 'Organizations', 'Student Data', 'Test Setup', 'Test Management', and 'Test Results'. The current organization is identified as 'PARCC Dept of Education (PC)'. The main content area features the PearsonAccess logo and a welcome message. A table of navigation options is presented below, with the 'Test Setup' column highlighted. The 'Configure TestNav' link is specifically highlighted with a red box.

Organizations	Student Data	Test Setup	Test Management	Test Results
View Organizations <ul style="list-style-type: none">View Organizations Send Organization File <ul style="list-style-type: none">Send Organization File	Send Student Data <ul style="list-style-type: none">Send student files to the systemCheck for problems with sent files Student Data Information <ul style="list-style-type: none">Filter and sort studentsView total student countsChange student dataCreate rostered classes	Enter Administration Details <ul style="list-style-type: none">Submit supplemental test administration information Manage Participation Counts <ul style="list-style-type: none">Enter student counts to order test materials Order Additional Materials and Tracking <ul style="list-style-type: none">Order additional materialsTrack orders and view shipment information Configure TestNav <ul style="list-style-type: none">Manage proctor caching settingsManage TestNav client settings	Register Students <ul style="list-style-type: none">Assign students to paper & online testsUpdate student demographic data before testingView student counts by administration Manage Test Sessions <ul style="list-style-type: none">View online test sessionsAdd registered students to a test sessionProctor test sessions Resolve Student Test Alerts <ul style="list-style-type: none">Examine and resolve issues with completed tests	View Published Reports <ul style="list-style-type: none">View, download and print access to daily published reports and extracts by organization

Phase 4: Infrastructure Trial

Phase 4: Infrastructure Trial

The Phase 4 Infrastructure Trial will serve as a “dress rehearsal” of a computer-based assessment to ensure

- ✓ Proper configuration and setup of the TestNav system and testing devices
- ✓ Network capacity
- ✓ Participating staff are prepared

This phase can be repeated numerous times in order to address any gaps and deficiencies identified during the “dress rehearsal”

Phase 5: Pre-administration Checklist

Phase 5: Pre-administration Checklist

Phase 5 is the final step in your preparations for the live PARCC Field-Test Assessment

- ✓ Review Phase 1-3 Activities for final setup and configurations
- ✓ Communicate any final testing protocols
- ✓ Communicate with your ISP and other vendor resources
- ✓ Review technical and test administration support protocols
- ✓ Perform final setup and configurations

Technology Setup Checklist

1. Identify technology coordinators/staff
2. Configure firewall, content filter, proxy server and spam filter
3. Identify the testing rooms and the number of workstations to be used for testing
4. Identify location site(s) (schools and/or district data center) where Proctor Caching will be installed
5. Identify the Proctor Caching machine(s) and install Proctor Caching
6. Complete the SystemCheck tests to verify testing workstation readiness and the number of concurrent testers supported using Proctor Caching
7. Update testing workstations to comply with TestNav hardware/software requirements
8. Enter TestNav configuration(s) in PearsonAccess
9. Pre-cache test content from PearsonAccess site
10. Conduct an Infrastructure Trial
11. Support testing during the computer-based administration

HOME / AVAILABLE TESTS / T 1 / 3 OF 41

Which person listed below served the longest period of time as president of the United States?

- A. George Washington
- B. Grover Cleveland
- C. Franklin D. Roosevelt
- D. George Bush

TestNav Technology Requirements

- Firewalls, content, and spam filters must be set to allow access to Pearson domains
- Minimum screen resolution of 1024 x 768 is required
- Browser Requirements:
 - Java runtime plugin version 1.5 or higher
 - Windows firewall configured to allow javaw.exe to communicate
 - Accept Java applet
 - Allow pop-ups for Pearson sites
 - Allow local file access to home directory
- TestNav will save student responses to an encrypted backup file during testing and when the student exits the system to avoid losing response data.
 - TestNav, by default, saves student response data to:
<home dir>/Pearson/<student>/SRF

Complete requirements for TestNav 8 can be found at:

<http://PARCC.Pearson.com/TN8Requirements>

Firewalls, Content Filters & Spam Filters

The following domains and ports must be allowed to pass through your Internet firewalls, content filters, or spam filters.

*testnav.com 80, 443

*pearsonaccess.com 80, 443

*amazonaws.com 80, 443

NOTE: Districts using IP-based content filters must contact Pearson Technical Support to receive the allowed IP addresses and Pearson support agents will change a setting in PearsonAccess so that the correct URL prints on the Student Authorization Tickets.

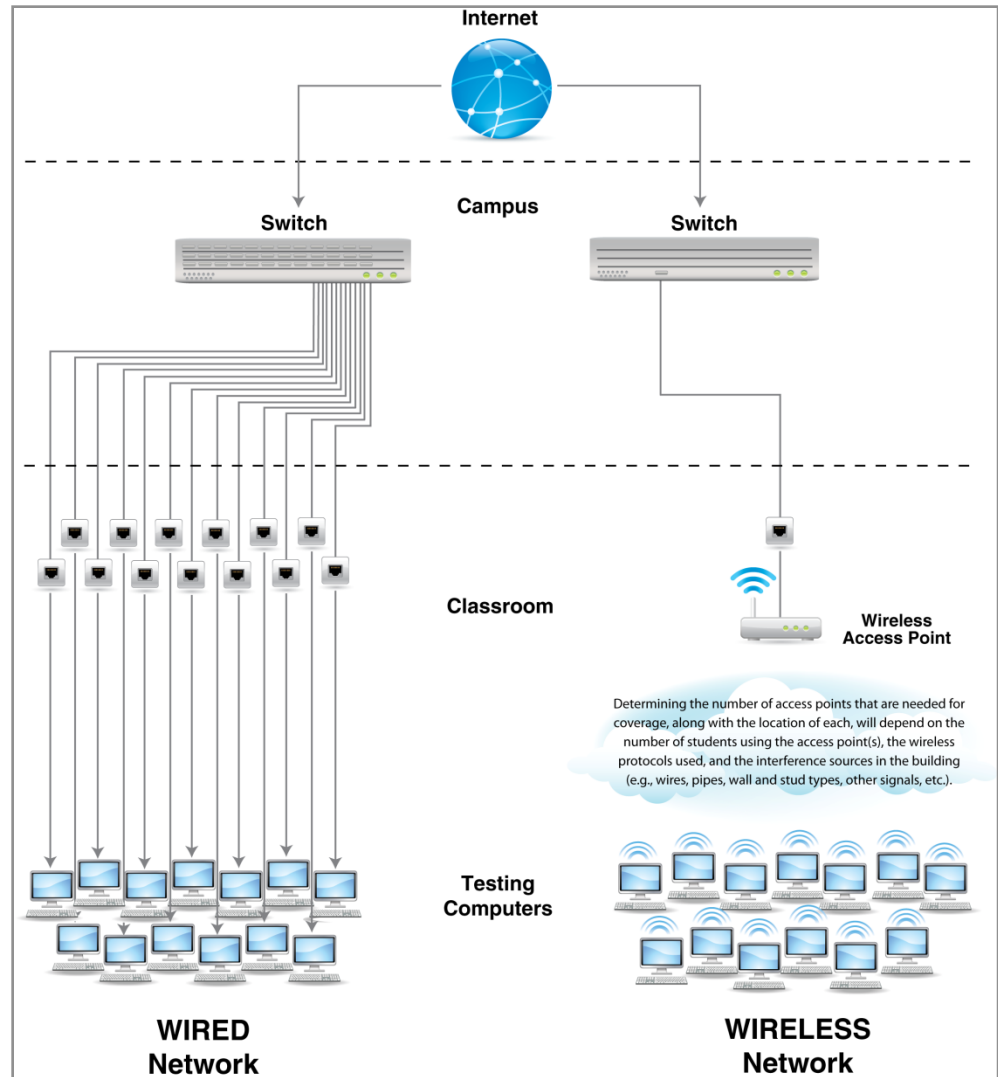

PARCC Call Center phone number: **1-888-493-9888**

PARCC Customer Support E-mail: **PARCC@support.pearson.com**

Wireless Testing for Computer-Based Testing

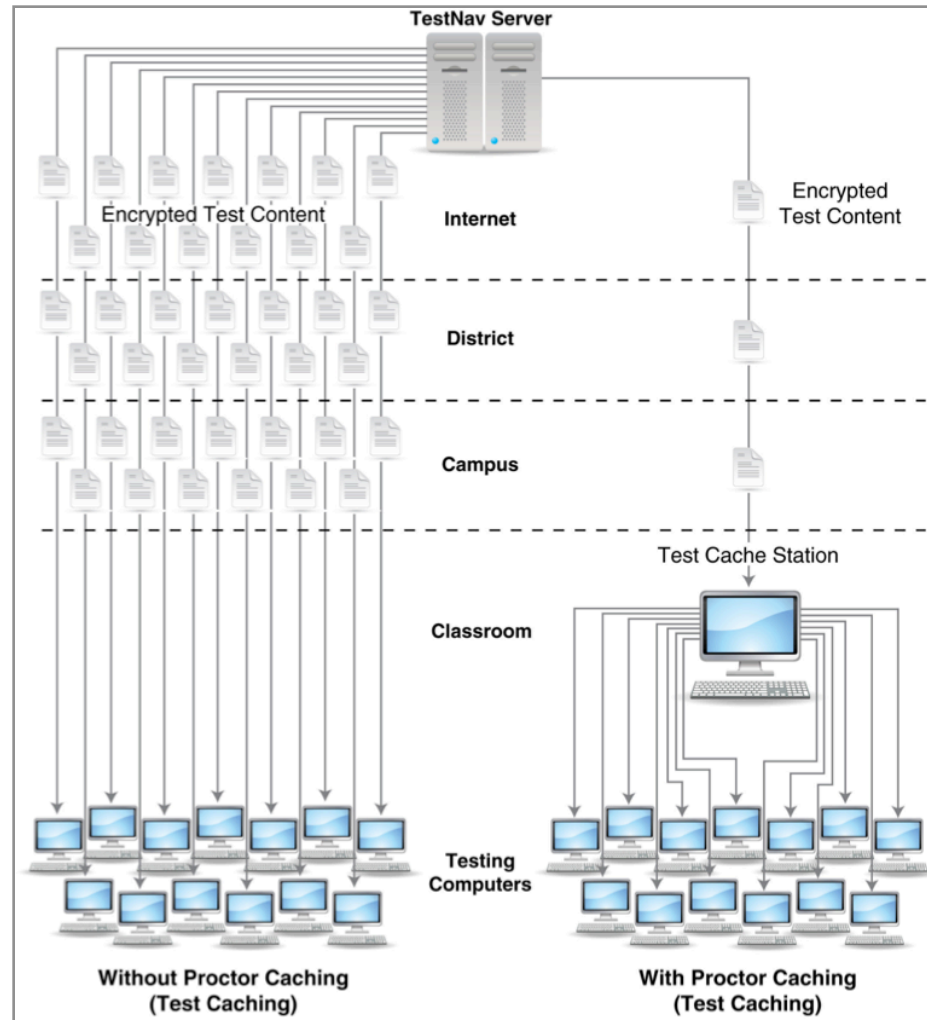

Wireless networks are acceptable for computer-based testing

PARCC Field Test Spring 2014

PROCTOR CACHING

How Proctor Caching Works

Where to Proctor Cache

- District Level
 - Proctor caching can be handled at the district level if the District's WAN connection and caching sever is able to handle the total connections from its combined school population
- School Level
 - Proctor caching can be done at the school level if a school does not have adequate WAN connectivity to the District's Data Center
- Classroom Level
 - Proctor caching can be done at the classroom level if a school does not have adequate LAN connectivity

Proctor Caching Setup

- Download Proctor Caching installer from PearsonAccess.
- Run the installer and Start Proctor Caching if it is not already started by the installer.
- Use SystemCheck from client computer to verify that Proctor Caching is functional.
- Create a Proctor Caching setup or add a Proctor Caching computer within PearsonAccess at the district or school level.

SystemCheck for TestNav

SystemCheck for TestNav Overview

TESTNAV SystemCheck

Check Your System Testing Capacity

PARCC System Check ▶ Start Print Friendly

 Not Started

Computer Name: AUSTXWL-494QZW1
Computer IP Address: 10.27.91.185

CHECKS PERFORMED	RESULTS
Browser	
Java Environment	
Operating System	

- SystemCheck was developed for customers to validate that their testing workstations meet the minimum requirements needed to run TestNav.
- To gather realistic results, SystemCheck should be run from a student testing machine, in a testing lab, on the same day of week/time of day as when you anticipate performing online testing. Since SystemCheck is Java based, it will not run on iPads or Chromebooks. A TestNav app will be available early 2014 to launch TestNav on these devices.
- Learn more about using SystemCheck by visiting <http://PARCC.Pearson.com/Support> and selecting the *SystemCheck* training module.
- Launch SystemCheck from <http://PARCC.Pearson.com/SystemCheck>

VERIFICATION

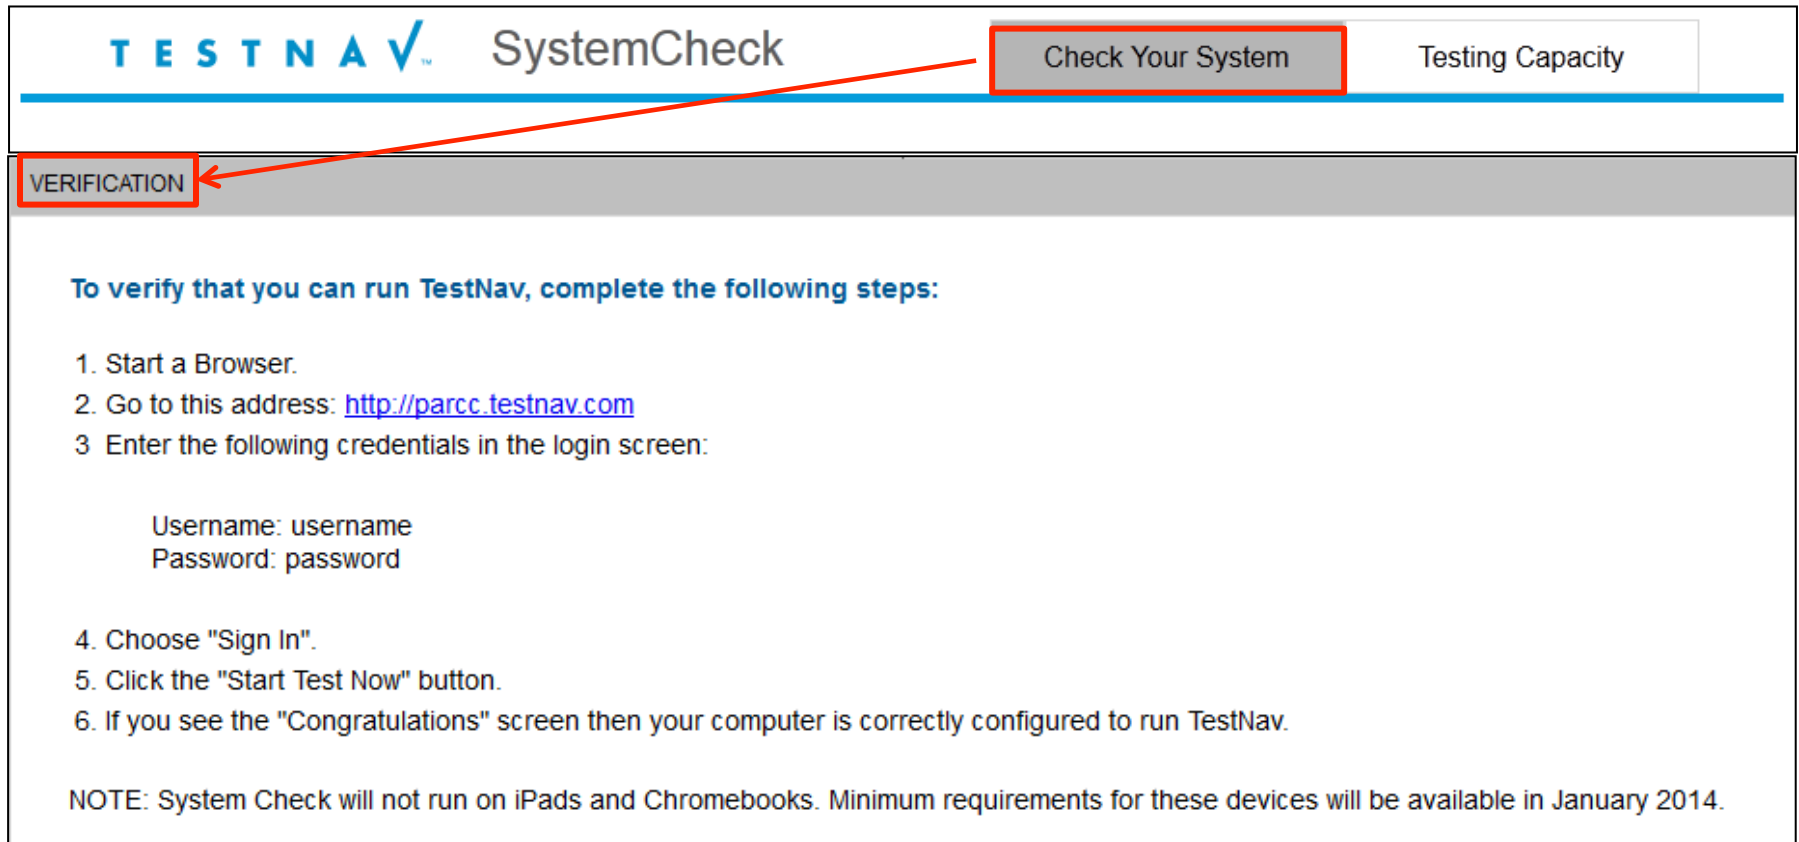

Check Your System:

- Validates system requirements are met on testing workstations
- Provides steps to verify whether TestNav can run on the workstation

Testing Capacity:

- Bandwidth testing for Internet and Proctor Caching connections
- Volume estimates for capacity planning

Check Your System: TestNav Verification

TESTNAV SystemCheck

Check Your System Testing Capacity

VERIFICATION

To verify that you can run TestNav, complete the following steps:

1. Start a Browser.
2. Go to this address: <http://parcc.testnav.com>
3. Enter the following credentials in the login screen:

Username: username
Password: password
4. Choose "Sign In".
5. Click the "Start Test Now" button.
6. If you see the "Congratulations" screen then your computer is correctly configured to run TestNav.

NOTE: System Check will not run on iPads and Chromebooks. Minimum requirements for these devices will be available in January 2014.

- Verifies that workstation can run TestNav

PARCC FIELD TEST 2014

Early Warning System

Early Warning System (EWS)

The Early Warning System (EWS) is integrated functionality that gives TestNav a high degree of fault tolerance and provides additional fail-safes in the event of unexpected network disruptions during computer-based testing.

Student Responses: SRF Files

- The Early Warning System writes continuously in the background to the student response files (SRF). Both the Primary and Alternate files are written to at the same time.
- The SRF file has a response data threshold that, once reached, triggers TestNav to send response data to Pearson servers.
- Uploading of response data is continuous. If an upload to the Pearson servers fails, student responses continue to be saved locally and TestNav cycles and attempts another upload.
- If the response data upload is successful, TestNav creates a new empty SRF file and begins the process again. TestNav only deletes an SRF file once it is successfully uploaded to the Pearson servers.

TestNav Early Warning System: Triggers

Scenario 1:

TestNav determines that neither Saving Response File Location is viable.

- Results in an immediate Test Proctor Click Here notification.

Scenario 2:

TestNav is unable to download portions of the test.

- Results in an immediate Test Proctor Click Here notification.

Scenario 3:

TestNav is unable to upload student responses to Pearson.

- Results in a Test Proctor Click Here notification only if the student attempts to Exit or Submit the test.

PARCC FIELD TEST 2014

Infrastructure Trial

Infrastructure Trial Introduction

What is an Infrastructure Trial?

Answer:

An Infrastructure Trial is a “dress rehearsal” of a computer-based assessment. It does not use real student information.

This is low-stakes, dry run for final confirmation that:

- ✓ TestNav is configured correctly
- ✓ Devices can successfully run TestNav
- ✓ Network will bear the full load
- ✓ Participating staff know what to do for computer-based assessment

Infrastructure Trial Introduction

Who should be involved in an Infrastructure Trial?

Answer:

Everyone within the LEA and the school who will have a role in the computer-based PARCC assessments should be included in the Infrastructure Trial.

- ✓ District and School Test Coordinators
- ✓ Test Administrators
- ✓ LEA technology staff
- ✓ School technology staff

Infrastructure Trial Introduction

Where do I access the Infrastructure Trial?

Answer:

The Infrastructure Trial is conducted using the PARCC Training Center at <http://PARCC.Pearson.com/TrainingCenter> . The PARCC Training Center offers the ability to create “dummy” students in bulk to reduce preparation time for the Infrastructure Trial.

- ✓ Set up login access for your staff
- ✓ Create “dummy” students in PARCC Training Center for the Infrastructure Trial and assign to test sessions
- ✓ Confirm technology setup and configuration using Infrastructure Trial test

Infrastructure Trial Introduction

When is the Infrastructure Trial?

Answer:

Plan to conduct an Infrastructure Trial only after you have confirmed site and staff readiness. The Infrastructure Trial window begins in January 2014 and is available through March 2014.

- ✓ Complete training activities
- ✓ Confirm network and assessment environment configuration
- ✓ Develop a communication plan

Infrastructure Trial Introduction

Why is the Infrastructure Trial necessary?

Answer:

Reviewing set up and communications prior to testing in an Infrastructure Trial can avoid possible problems and delays during the live assessment.

- ✓ Provides practice for all participating users
- ✓ Minimal additional activities are needed to conduct an Infrastructure Trial
- ✓ Students and test results are not affected
- ✓ Provides practice of communication plans to be sure everyone knows who to contact for help
- ✓ Validates device and system configuration set up

Infrastructure Trial Introduction

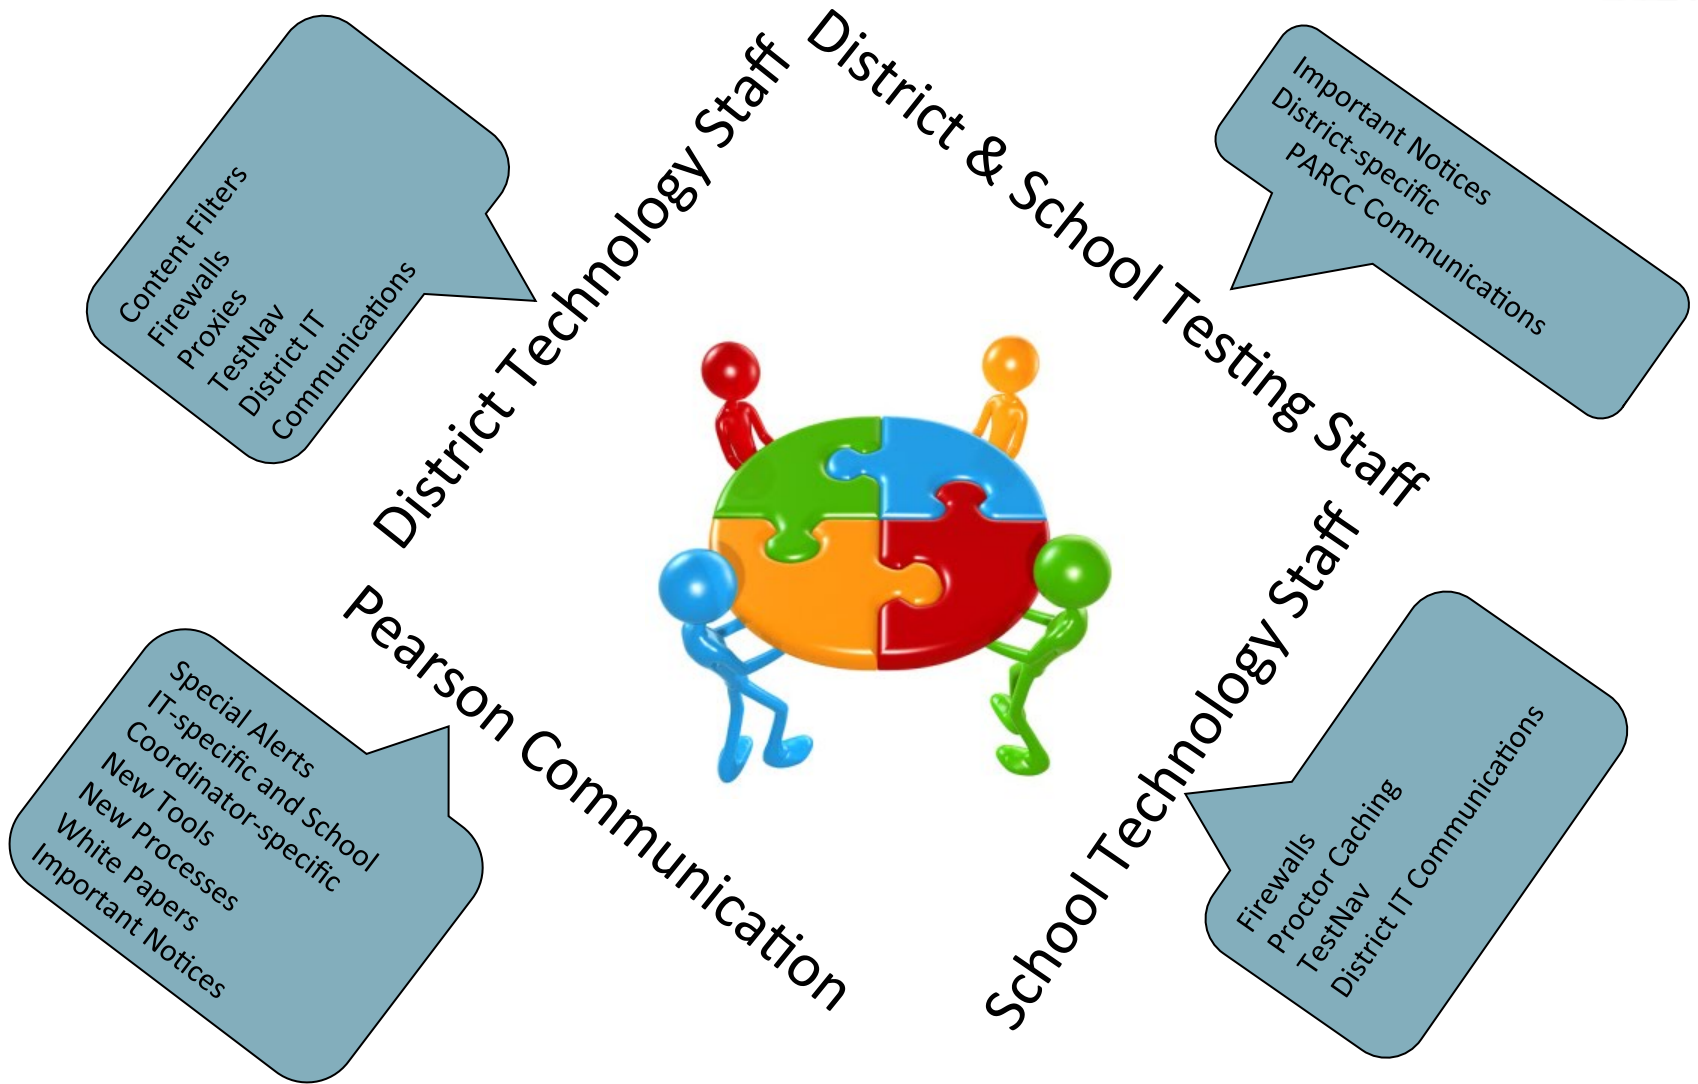

How do I know when the Infrastructure Trial is complete?

Answer:

The Infrastructure Trial is complete when you can confirm that you are ready for the computer-based assessment. You may use the trial as needed to confirm readiness.

- ✓ Check progress with schools
- ✓ Correct configurations and environment settings
- ✓ Try again if needed
- ✓ Make changes to communication plan as needed

Communication between staff is critical

Getting Started: Support Materials

For Technology Coordinators and Technology Staff:

Training Modules

- SystemCheck for TestNav
- Technical Setup
- Emerging Technologies and Security with Computer-Based Testing

Guides and Manuals

PARCC Training Center Log In

The Infrastructure Trial is conducted in the secure PARCC Training Center.

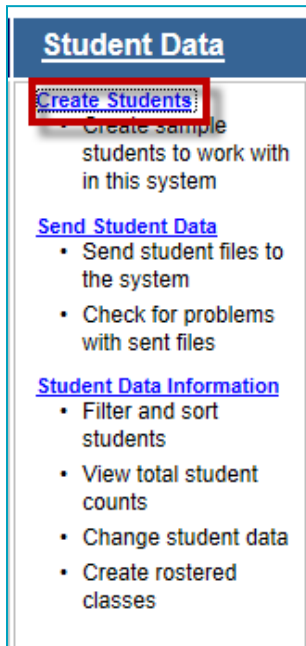

The screenshot displays the PARCC Training Center website. At the top left is the PARCC logo and the text "Partnership for Assessment of Readiness for College and Careers". To the right, it says "Powered by PearsonAccess". A navigation bar contains "Home", "Support", and "Training Center", with "Training Center" highlighted by a red box. Below the navigation bar is a large image of a woman and two children looking at a document. Underneath the image, the text reads "Training Center" and "Welcome to the PARCC Program Training Center." On the right side of the page, there is a "SIGN IN TO YOUR ACCOUNT" section. It contains the text "To access the Training Center used by PARCC districts and schools, please sign in below." and a "SIGN IN" button, which is also highlighted by a red box. A red arrow points from the "SIGN IN" button to the "SIGN IN" button. Below this section are "CONTACT US" and "RELATED LINKS" sections. The footer contains "ALWAYS LEARNING" and "PEARSON".

NOTE: You will have a separate login and password for the PARCC Training Center and PARCC operational PearsonAccess site from you state assessment PearsonAccess sites. A PARCC logo will be present in the header to help identify the site.

Creating "Dummy" Students

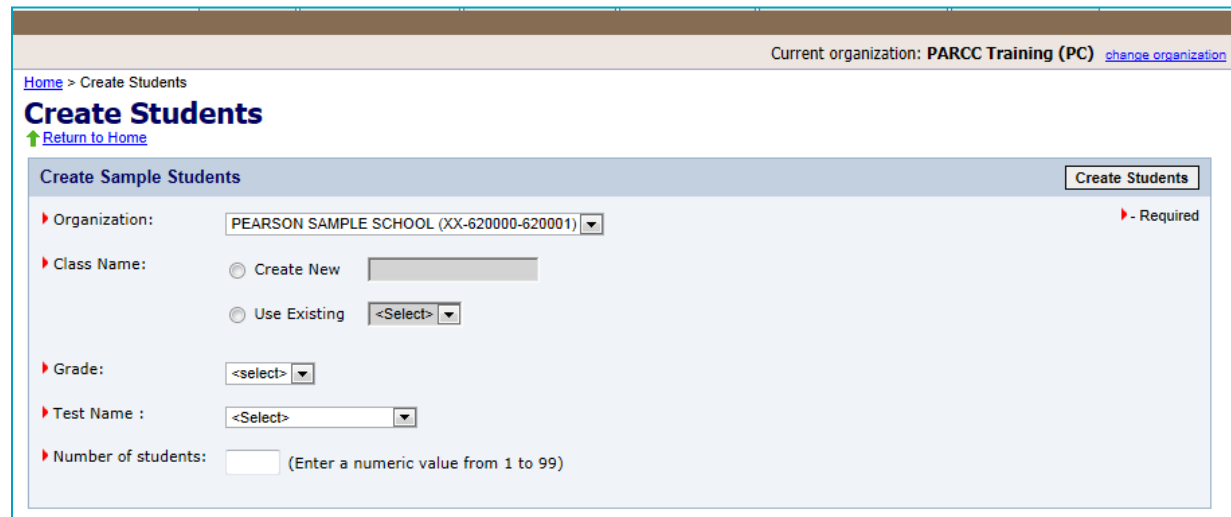

Create "Dummy" Student Data for Practice

Create mock students using the *Create Students* option from the Student Data menu. Create as many students as needed to represent the number of students that would be tested on a typical day during the live test window.

Student Data

- Create Students**
 - Create sample students to work with in this system
- Send Student Data**
 - Send student files to the system
 - Check for problems with sent files
- Student Data Information**
 - Filter and sort students
 - View total student counts
 - Change student data
 - Create rostered classes

Part I: Technology Set Up

Emerging Technologies: Virtualization and Tablets

iPads & Computer-based Testing

Apple iPads have some unique challenges for TestNav

- iPads can not run Java so TestNav can't lock down the device properly like "standard" computers via the browser

Pearson has developed an iPad TestNav app which will be available from the App Store in early February 2014

- Student Response Files (SRFs) will be saved locally through the application

Districts must take steps to configure iPads to deliver tests securely

- Disable screen capture
- Disable Home button functionality
- Enable "single app" mode

iPads & Computer-based Testing

There are multiple options on how to enable “single app” mode

- Manually enable Guided Access single app mode on iOS 6 or iOS 7
- Manage iPads (iOS 6 & iOS 7) via Apple Configurator and use Apple Profile Manager or 3rd party Mobile Device Manager (MDM) to push secure testing configuration
- Manage iPads (iOS 7 only) via Apple Configurator and 3rd party MDM to provide on-demand secure configuration using app-requested single-app mode

Trainings on iOS setup and configuration will be held on February 18, 20 and 21st

Virtualization

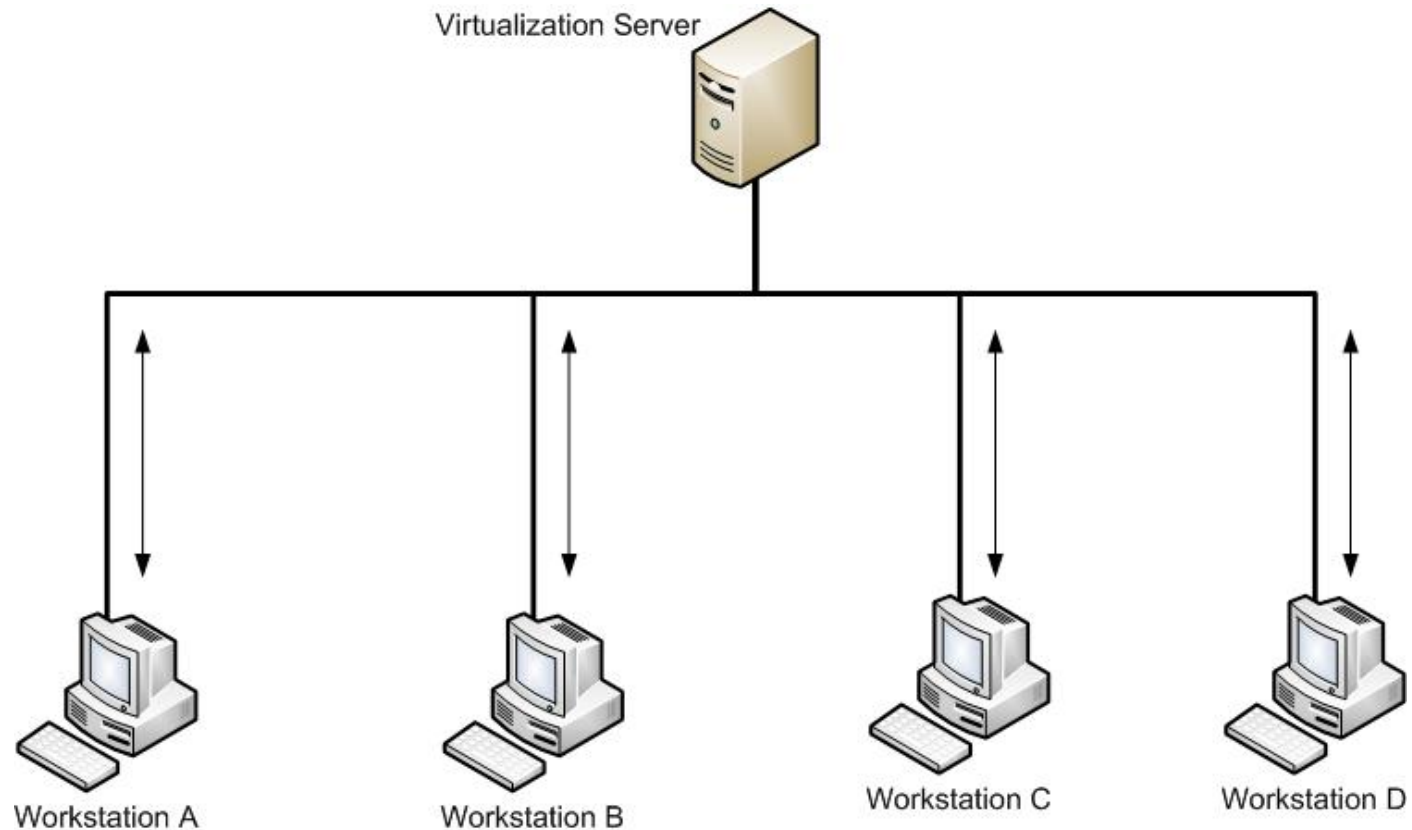

What is Virtualization?

- Using your monitor/keyboard/mouse to look at and run software on some other computer

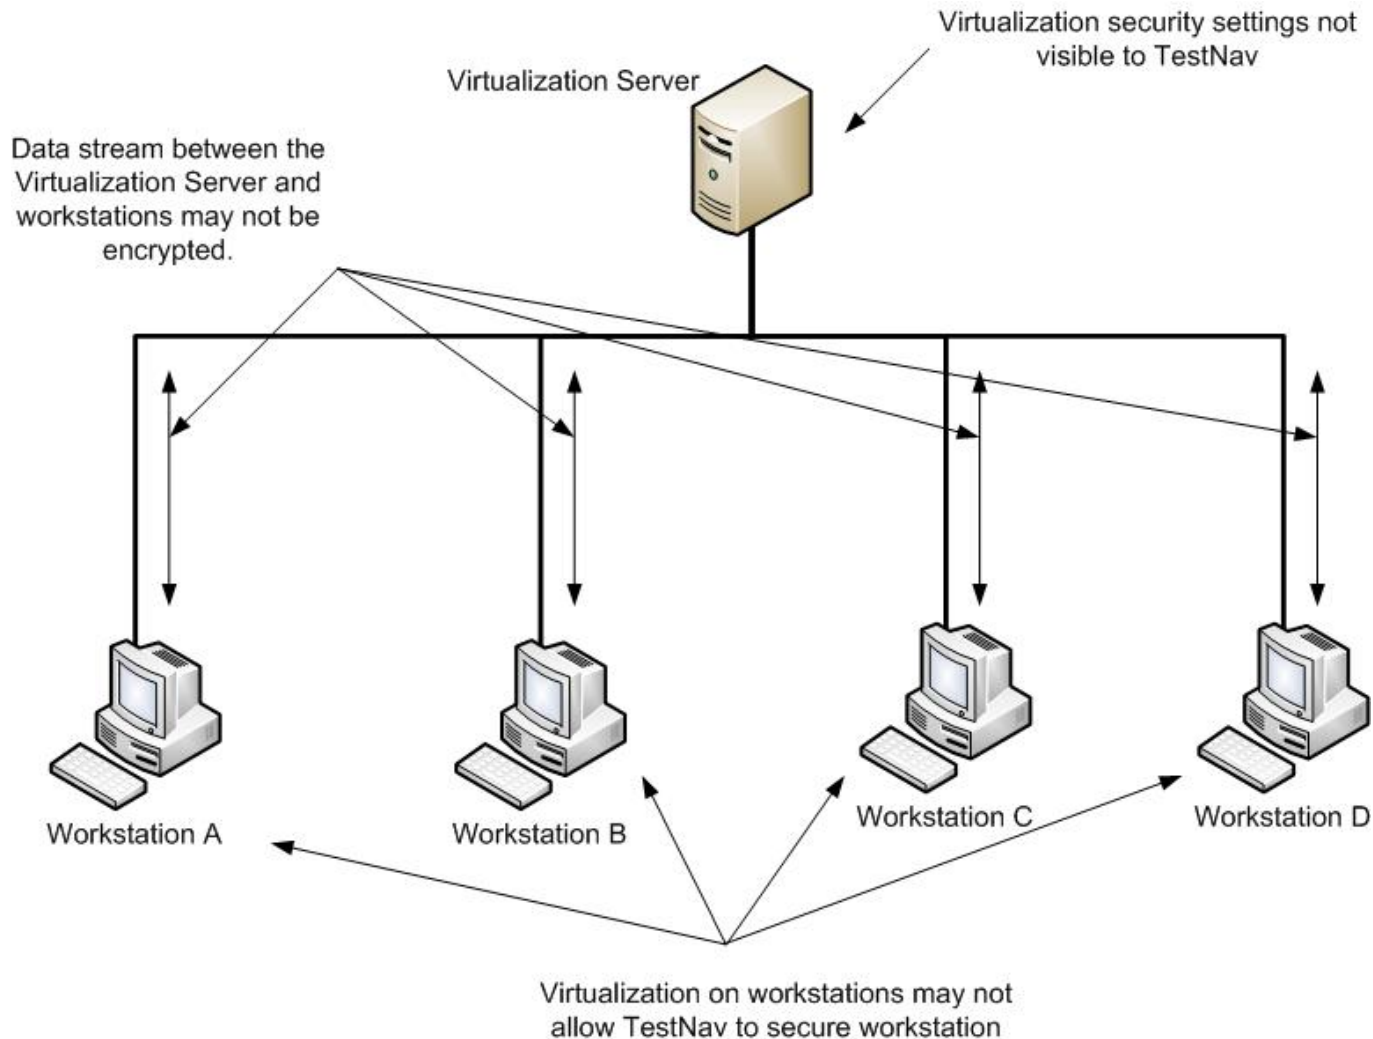

- “Thin Clients” are one type of virtualization
- VDI (Virtual Desktop Infrastructure) is becoming popular as a way of turning aging computers into terminals, instead of retiring them

Virtualization Network

A Virtualized environment runs on a central server and streams the user interface to workstations.

Virtualization Security Concerns

Other Technology Considerations

Additional Training Modules for Technology Setup:

SystemCheck for TestNav

- Evaluating device readiness
- Evaluating network readiness

Setting up an Infrastructure Trial

- Purpose and description of Infrastructure Trial
- Infrastructure trial readiness checklist

Technical Setup

- Components of computer-based testing
- Minimum requirements and technology setup tasks

Emerging Technologies and Security with Computer-Based Testing

- Using thin clients and virtual desktops
- Computer-Based testing on iPads and Chromebooks
- Security and room layout considerations for computer-based testing

Part II: Test Administration Training

Agenda

- Accessing PearsonAccess
- Resources in PearsonAccess
- PearsonAccess Functionality
 - Administrative Management
 - Student Data
 - Test Setup
 - Test Management and test results
- Training Center
- Additional Resources

View and Create Individual User Accounts

Authorized district and school personnel will be able to view and create staff user accounts within PearsonAccess manually or by submitting a file.

The screenshot displays the PearsonAccess web interface. At the top, there is a navigation bar with links for [Your Account](#), [Administrative Management](#) (highlighted with a red box), [Support](#), and [Logout](#). Below this is a secondary menu with buttons for [Home](#), [Organizations](#), [Student Data](#), [Test Setup](#), [Test Management](#), and [Test Results](#).

The main content area is titled **Administrative Management** and includes a breadcrumb trail: [Home](#) > [Administrative Management](#). A [Return to Home](#) link is also present. On the left, there is a green sidebar with a **Help** section and a description of administrative functions. Below the description, a **Note** states: "You see only those".

The main content area features a **Security** section with two links: [View User Accounts](#) (highlighted with a red box) and [Send User Account File](#). The [View User Accounts](#) link is accompanied by a lock icon.

View User Accounts

View User Accounts lets authorized personnel view and update existing accounts, as well as create new accounts manually.

Send User Account File

User Accounts can also be created or maintained by submitting a user account file; this is especially helpful when working with accounts in bulk.

The screenshot displays a web application interface for Administrative Management. On the left is a green sidebar with a 'Help' header and a '<< ?' icon. Below it, the 'Administrative Management' section is titled, followed by a paragraph: 'Many program-level administrative functions are accessed from Administrative Management, such as organizations, user accounts and roles, reports, and system status.' A 'Note' at the bottom of the sidebar states: 'Note: You see only those'. The main content area has a breadcrumb trail 'Home > Administrative Management' and a title 'Administrative Management' in large blue font. Below the title is a 'Return to Home' link with an upward arrow. A 'Security' section header is present, followed by two links: 'View User Accounts' (with a lock icon) and 'Send User Account File' (with a green checkmark icon and a red box around it). A yellow horizontal bar is at the bottom of the main content area.

User Account File

By using the **Export to Excel** button on the *View User Accounts* page, a template is created for submitting a User Account file.

User Account File fields

The User Account File template, and some important fields.

	A	B	C	D	E	F	G	H	I	J	K	L
1	Action	User Id	First Name	Middle Name	Last Name	Email	Authorized Organizations	Roles	Locked	Start Date	End Date	Deleted
2												
3												
4												

Valid values are:
C (create)
U (update)

Contains the User ID. Must be unique. If the User ID entered to create a new account is already taken, an error message will be received upon upload.

Optional field. This field is required at the end of the file complete.

Valid values are:
TRUE
FALSE

An account marked as deleted "TRUE" cannot be accessed by the user. Because the account is only marked as deleted, you can revive the account by populating the Deleted field with "FALSE" (not deleted).

Colon-delimited field. Multiple roles must be delimited (i.e., separated) with a colon.

Valid values are:

:mm
month
day
it year
hour (24-hour clock)
minute.

For example, if a start date is March 31, 2011, at 5:00 PM (CT), it should be entered into this field as 3/31/2011 17:00.

Student Data

Student Data

Student Data refers to student demographic data and other testing-specific information about individual students.

The screenshot shows a web application interface for 'Student Data'. At the top, there is a navigation bar with links for 'Your Account', 'Administrative Management', 'Support', and 'Logout'. Below this is a secondary navigation bar with buttons for 'Home', 'Organizations', 'Student Data' (which is highlighted), 'Test Setup', 'Test Management', and 'Test Results'. A third navigation bar contains links for 'Overview', 'Send Student Data', and 'Student Data Information'. The main content area is titled 'Student Data Overview' and includes a breadcrumb trail 'Home > Student Data Overview'. A 'Task' section lists two main actions: 'Send Student Data' and 'Student Data Information', each with a list of sub-tasks. A left sidebar contains a 'Help' section with a 'Student Data' heading and descriptive text.

Student Data

Student data refers to student demographic data and other test-related information about individual students. Student data must be uploaded or entered into the system before students can be registered for a test or receive a pre-ID student label.

You can send student data files from your student information system to the database at any time during the test registration window.

Send Student Data - Resources

Resources for creating a student data upload (SDU) file can be located on the Support > Resources > Templates page.

Home > [Support](#) > Resources

Resources

[Return to Support](#)

Send Student Data

Submitting an SDU file to mass upload students for testing is the most common way students are registered.

The screenshot shows a web browser window with the following content:

- Help** << ? [Home](#) > [Student Data](#) > Send Student Data
- Send Student Data**
- Status of your file upload is shown below:
 - Submitter: Sample Coordinator
 - Organization: IA993258
 - Status: Problems
 - File Name: PARCC SDU test.csv
 - Sent Date: 08/30/2013 10:51 AM
 - Completion Date: 08/30/2013 10:51 AM
- 1 of 2 records (50% of the file) had data problems.
- Next Steps: Correct the problems in the file and send the entire file again. 1 record of 2 (50%) of the file were placed into the Assessment System.
- 1 of 2 records (50% of the file) had data problems. Problems are encountered when the content of your file does not match the specified file format or data in the file is incorrect.
- RECORDS DATA PROBLEMS**
- 1 invalid organization code

On the right side of the browser window, there is a vertical navigation pane with a red box around a button labeled 'of 2' and a link 'f 1 e) had'.

Send Student Data - Status

Once an SDU is submitted, PearsonAccess provides detailed status updates, along with applicable error information.

Student Data Information

Student Data Information allows you to search for students, add or delete students, update enrollment, and view reports.

The screenshot displays the 'Student Data Information' web application interface. At the top right, it shows 'Current organization: TEST2' with a 'change organization' link. The breadcrumb trail is 'Home > Student Data > Student Data Information'. The main heading is 'Student Data Information' with a 'Return to Student Data' link. Below this, there are two red boxes: one around the 'View By' section (radio buttons for 'Schools' and 'Students', with 'Students' selected) and another around the 'Search' section (radio buttons for 'Current Organization Only' and 'Unenrolled Students', with 'Current Organization Only' selected). The search area includes a search bar with 'last name, first name' entered, and input fields for 'PA Unique ID', 'Student Identifier', 'School', and 'School Code', all labeled 'starts with'. There are also 'Hide Search' and 'Clear All Filters' buttons. The interface shows '0 Students Selected' and 'Results: 0 to 0 of at least 100'. A toolbar contains icons for 'New Student', 'Delete', 'Add Enrollment', 'Reports', and 'Request Student File'. Below the toolbar is a table header with columns: 'Name', 'PA Unique ID', 'Student Identifier', 'School', and 'School Code'. The table body is empty, and the text 'Search Required' is displayed. At the bottom right, it says 'Results: 0 to 0 of at least 100'.

Student Data Information - Search Results

After executing a search, selecting an individual student provides the *Student Details* with the student record and enrollments.

The screenshot displays a web application interface for student data. At the top, there is a breadcrumb trail: [Home](#) > [Student Data](#) > Student Data Information. Below this is the main heading "Student Data Information" and a link to "Return to Student Data".

The "View By:" section has two radio buttons: "Schools" (unselected) and "Students" (selected). The "Search:" section has two radio buttons: "Current Organization Only" (selected) and "Unenrolled Students" (unselected). Below the search options are three input fields: "Name starts with" (containing "last"), "PA Unique ID starts with", and "Student Identifier starts with".

A search bar contains a magnifying glass icon, a "Hide Search" button, a "Clear All Filters" button with a red 'X' icon, and a status indicator "0 Students Selected". On the right side of the search bar, it says "Results: 1 to 2 of 2".

The "Student Details" section is highlighted with a blue border. It has a "Return to Student Data Information" link and two tabs: "Student Details" (active) and "Enrollments". Below the tabs is a "Student Master Record" section with three buttons: "Edit", "Change History", and "Go back to Student List".

The "Student Master Record" contains the following information:

- Student Identifier: 090909090
- Last Name: LASTNAMESAMPLE
- First Name: FIRSTNAMESAMPLE
- Middle Name:
- Student State: TX

Enrollments

The *Enrollments* tab shows current enrollment for a student, and allows you to manually update enrollment as needed.

Order Additional Materials

Use *Order Additional Materials and Tracking* to order additional paper materials than originally provided in your initial distribution.

- Orders can be submitted by users with the following roles:
 - LEA/District Test Coordinator
 - Non-School/Institution Test Coordinator
 - School/Institution Test Coordinator.
- Ordering additional materials is a three-step process.
 - Verify the shipping information is correct. If it is not correct, contact your State Field Test Contact.
 - Enter a quantity in the *Quantity* column for each type of material that you want to order.
 - Review the order, and then click **Save** to complete the ordering process.

Order Additional Materials

Review orders carefully; quantities should take into account if materials are packaged singly or in packs of 5 or more.

Test Management

Test Management

The primary test management activities are registering students and managing test sessions.

The screenshot displays a web application interface for Test Management. At the top, there are navigation links: [Your Account](#), [Administrative Management](#), [Support](#), and [Logout](#). Below these are tabs for [Home](#), [Organizations](#), [Student Data](#), [Test Setup](#), [Test Management](#) (which is the active tab), and [Test Results](#). Under the **Test Management** tab, there are sub-links: [Overview](#), [Register Students](#), [Manage Test Sessions](#), and [Resolve Student Test Alerts](#). The current organization is identified as **TEST2** with a [change organization](#) link. The main content area shows the breadcrumb [Home](#) > Test Management Overview, followed by the heading **Test Management Overview** and a [Return to Home](#) link. The current test session is **PARCC Field Test 2014 - EOY** with a [Change](#) button. A **Task** section lists three main activities: **Register Students** (with a sub-image of students), **Manage Test Sessions** (with a sub-image of hands on a keyboard), and **Resolve Student Test Alerts** (with a sub-image of a pencil on a document). Each activity has a list of sub-tasks.

PARCC Field Test 2014 - EOY [Change](#)

Task

Register Students

- Assign students to paper & online tests
- Update student demographic data before testing
- View student counts by administration

Manage Test Sessions

- View online test sessions
- Add registered students to a test session
- Proctor test sessions

Resolve Student Test Alerts

- Examine and resolve issues with completed tests

- *Register Students* allows you to manually assign students to paper & online tests, update student demographic data before testing, and view student counts by administration.
- *Managing Test Sessions* is one of the main activities for computer-based testing.

Register Students - Manual Registration

Students are typically registered via an SDU file, but can be registered manually.

The screenshot displays the 'Register Students' web application interface. At the top right, it indicates the current organization is 'TEST2' with a 'change organization' link. The breadcrumb trail shows 'Home > Test Management > Register Students'. The main heading is 'Register Students' with a 'Return to Test Management' link. Below this, the test administration is identified as 'PARCC Field Test 2014 - EOY' with a 'Change' link. The 'Registered Students' section is active, showing a list of students with a 'View' button next to the selected student. The 'Student Registration Record' form for 'LASTNAME SAMPLE, FIRSTNAME SAMPLE' is displayed, including fields for 'PA Unique ID: 100000041', 'Student Identifier: 090909090', and a list of test administrations with 'ASCHOOLWE (TX-000003-456632)' selected. Other fields include 'Grade Level When Assessed' (a dropdown menu), 'Birthdate (YYYY-MM-DD)' (a date picker), and 'Sex' (a dropdown menu). 'Register Student' and 'Cancel' buttons are located at the top right of the form area.

Register Students

Register Students also allows you to run reports to help you manage student registrations.

- Use the registration file to:
 - view student registration information, and
 - update information (such as change from paper to computer-based (online) testing, update students' grade levels, or update demographics) and then upload the updated student information using the registration file via Send Student Data.
- Use the registration summary file to:
 - view counts of unregistered students, registered students, students being tested, students with existing test assignments, students with valid test attempts, and students with failed test attempts.
 - The report includes only schools that are participating in the selected test administration.

Register Students - View/Update/Remove Registrations

From the *Register Students* screen, you can also view, update, or remove registrations.

Manage Test Sessions

Most activities associated with computer-based test sessions will be performed on *Manage Test Sessions*.

The screenshot shows the 'Manage Test Sessions' interface for the 'PARCC Field Test 2014 - PBA' organization. The interface includes a breadcrumb trail, a title, a 'Return to Test Management' link, and a 'View By' selector set to 'Test Sessions'. A toolbar contains 'Clear All Filters', '0 Selected Test Sessions', and 'Results: 0-0 of 0'. Below the toolbar is a row of action links: 'New Session', 'Delete', 'Currently Scheduled Sessions', 'Students not assigned to session', and 'Session List Download'. A table header is visible with columns: 'Session Name', 'Status', 'Start Date', 'Test', 'Students', 'School', and 'Test Location'. The table body contains the message 'There are no sessions to display.'

- To view or edit an existing session, click on the session name.
- To create a new session, click ***New Session***.
- To delete a session, place a check mark next to the session name and then click ***Delete***.
- To view details about currently scheduled test sessions, click ***Currently Scheduled Sessions***.
- To view a CSV file with students registered to test but not in a session, click ***Students not assigned to session***.
- To download the session list as a CSV file, click ***Session List Download***.

Create Test Sessions

Before students can take a computer-based test, test sessions must be created.

- Click the **New Session** button.
- Enter a session name and select a school.
- Enter the remaining session details. Required fields are designated with a red arrow.
- If applicable, select “No” from the Read Aloud by Test Examiner drop-down menu.
- For administrations in which there is only one form, “Main” must be selected from the Form Group Type drop-down menu.
- If applicable, a proctor caching computer should be selected from the Proctor Caching Computer drop-down menu.
- To grant school-level users the ability to assign district-level proctor caching computers to test sessions, select the “Include caching computers defined for the District” checkbox.
- You may add students now, or you can add students later.
- Click the **Save** button after completing all session details.

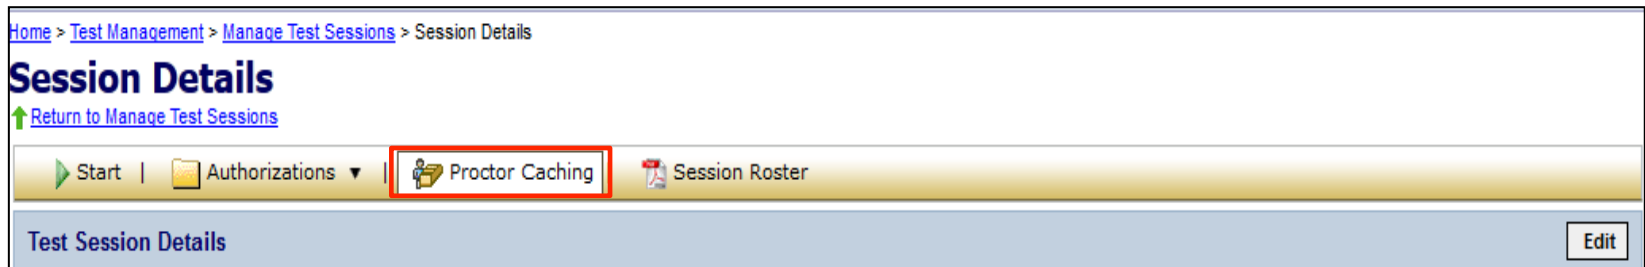

Session Details

The *Session Details* screen allows you to manage the details of each test session.

- In the Session Details screen, you can:
 - start and stop a test session,
 - print Student Authorizations and/or seal codes,
 - print Proctor Authorizations (for oral administrations),
 - proctor cache test content,
 - print a session roster,
 - update TestNav configurations,
 - monitor individual student's tests,
 - resume a student's test,
 - mark a test complete, and
 - add/remove/move students.

Proctor Caching Test Content

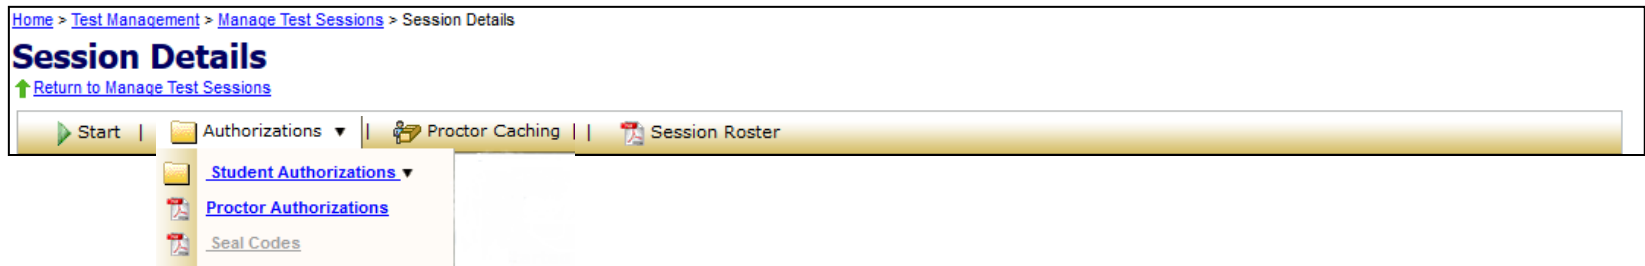

Proctor caching refers to downloading encrypted test content from the Pearson testing server to a secure local computer prior to starting a test session.

- Proctor caching is completed at the session level, on the *Session Details* screen.
 - The **Proctor Caching** button will be disabled and you will not be able to cache the test content for the test session if you do not have access to proctor caching or if you are not within the proctor caching window.
- Proctor caching is available up to one week before an administration; districts will receive notification when it is available.

Student and Proctor Authorizations

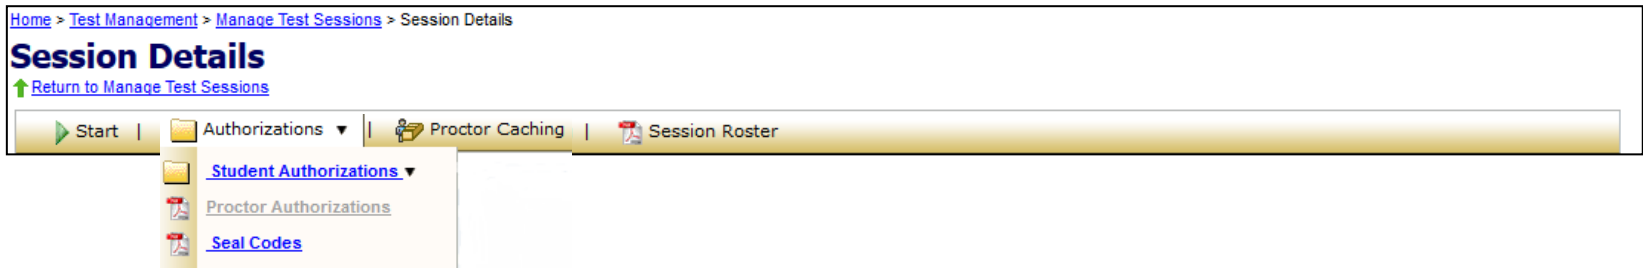

Student and Proctor authorizations are needed to perform certain functions at the session level.

- Each student must have an authorization in order to log in to a test.
- Proctor authorizations (log in for test administrator) are only for Oral Administrations.
- Authorizations contain:
 - the URL to access tests through the browser-based TestNav,
 - a unique login ID, and
 - the test code needed to log in.
- Student authorizations also contain the keystrokes available for navigating through TestNav.

Authorizations - Seal Codes

Seal codes are the electronic equivalents of the adhesive tabs that are used to seal sections of paper test booklets.

- There will be one set of seal codes assigned to each test session.
- Before students in a test session can go to the next sealed section of an electronic test, they must enter the appropriate four-digit seal code.
- Seal codes for a specific test session are listed on the seal codes document.

Starting Test Sessions

A test session must be started before students can begin testing.

- Scheduling a date and time for a new test session is intended primarily for planning purposes.
- A test session will not start until you click the **Start** button on the *Session Details* screen, regardless of the scheduled start date and time.

NOTE: If you do not have access to start a test session, the **Start** button will be disabled and you will not be able to start the test session. Users with Organization and Technology Coordinator Roles only do not have access to start or stop sessions.

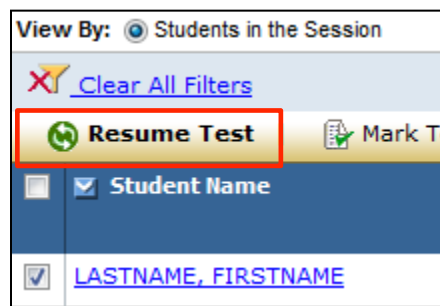

Monitoring Test Sessions

The table below gives an explanation of the possible statuses for students as they test.

Status	Meaning
Ready	The student has not yet started the test.
Active	The student has logged in and started the test.
Exited	The student has exited TestNav but has not submitted test responses, e.g. took a break. (Student must be resumed by a test administrator to continue testing.)
Resumed	The student has been authorized by a test administrator to resume the test.
Resumed-Upload	The student has been authorized to resume the test, and any responses saved locally can be uploaded when the student is ready to continue testing.
Completed	The test has been submitted by the student through TestNav and the data has been processed.
Marked Complete	The student has exited TestNav and will not resume the same test, e.g left due to illness.

Resuming a Student's Test

A test administrator must resume an Exited student's test in order for the student to complete testing.

- Select the checkbox for the student on the *Session Details* screen.
- Click the **Resume Test** button. The student's status will change to "Resumed" (if the student was in "Exited" status) or "Resumed-Upload" (if the student was in "Active" status).
 - The student's test will be resumed from the point at which it was exited or interrupted. Any saved test responses that the student entered will be uploaded when the connection to the Pearson testing server is reestablished.
- Have the student log in using their original student authorization.

View Test Progress

The Status column in the *Session Details* allows administrators to view test progress.

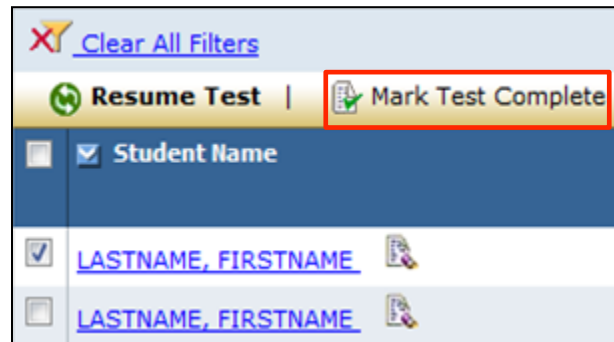

- When available, select the student's *View Progress* link to review test progress. Users with Organization and Technology Coordinator Roles only do not have access to view progress.

Status	Meaning
Visited/No Response Required	Student has visited the item but no response is required.
Visited/Answered	Student has visited the item and entered a response.
Visited/Not Answered	Student has visited the item but has not entered a response.
Not Visited	Student has not visited the item.

Mark Test Complete

If a student has exited a test and **will not resume testing**, the test can be manually marked “complete.”

- Select the checkbox for the student on the *Session Details* screen.
- Click the **Mark Test Complete** button. You will be prompted to enter a reason for marking the test “complete.”
- Click the **Save** button.
- The student’s status will change to “Marked Complete.”

Stopping Test Sessions

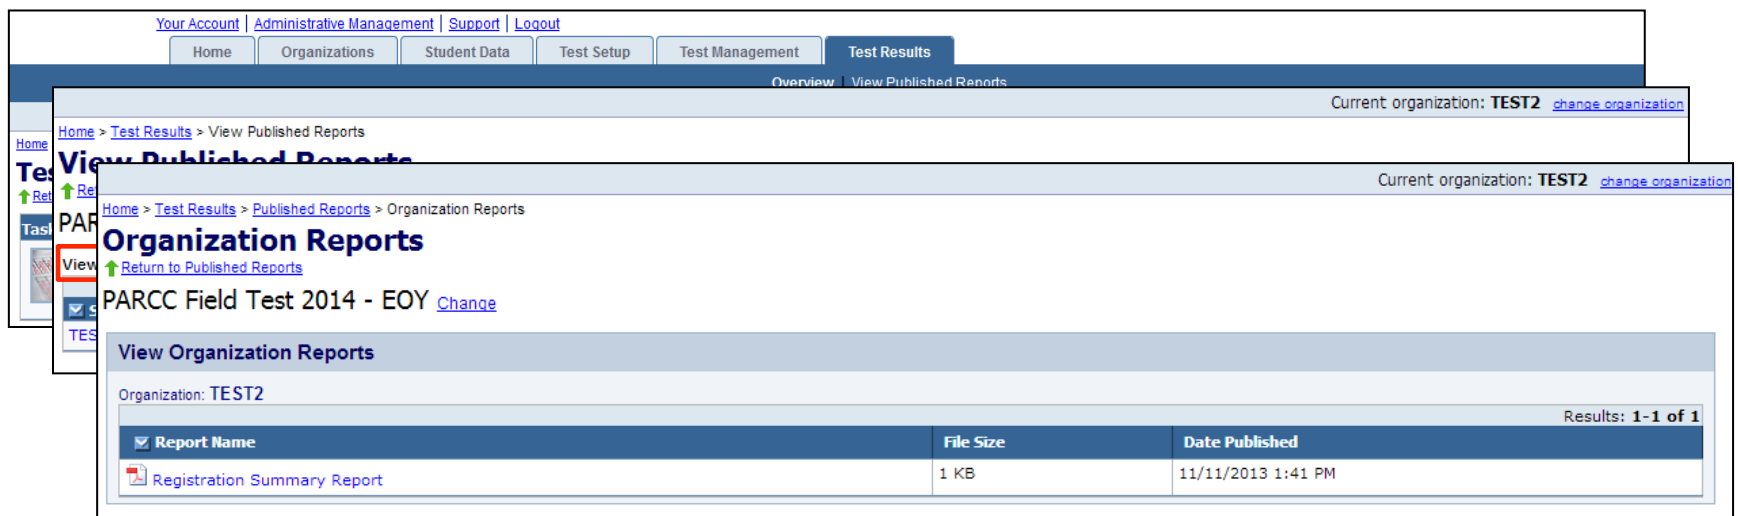

You cannot stop a test session until all students in the session are in “Completed” or “Marked Complete” status.

- After all students have completed the test and submitted their responses, or been marked “complete,” you should stop the session.
- Click the **Stop** button.
- **NOTE:** A session does not stop until you click the **Stop** button. The system will **NOT** automatically start or stop a session. Once a session has been stopped, it can no longer be modified.

Test Results - View Published Reports

Reports in Spring 2014 include data extracts that are available for viewing, downloading, and printing.

The screenshot shows the 'View Published Reports' page for organization TEST2. The page title is 'Organization Reports' and it lists one report: 'PARCC Field Test 2014 - EOY'. A red box highlights the 'View' link next to this report. Below the list, a table displays the details of the selected report:

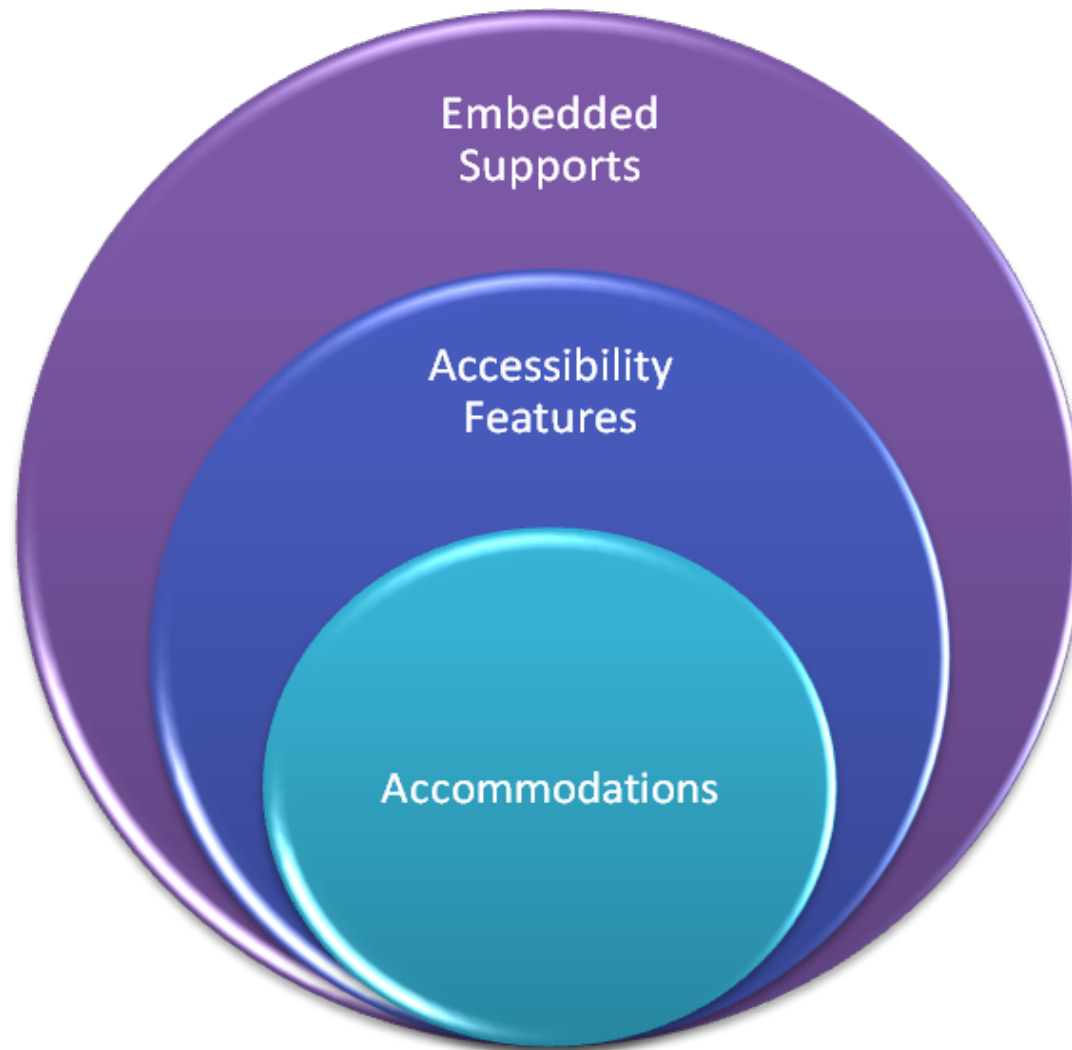

Report Name	File Size	Date Published
Registration Summary Report	1 KB	11/11/2013 1:41 PM

- Go to Test Results > View Published Reports to see a list of available reports.
- If necessary, click the *Change* link and select the correct administration.
- From the **View by** options set, select the correct organization type.
- Click on the organization link in the available list.
- Open the desired report(s); icons designate the report's format.

Part III: Accessibility Features & Accommodations

Accessibility Features and Accommodations
with Computer-Based Testing

Types of Accessibility Features and Accommodations

2014 PARCC Field Test Accessibility Features and Accommodations

Computer-Based Accessibility Features and Embedded Accommodations

During the PARCC field test administration, some accessibility features and accommodations will not be available due to ongoing development and research that is required to ensure that all accessibility features and accommodations provide a valid reflection of what students know and can do. In addition, some specific accessibility features and accommodations may not be available on specific devices such as Chromebooks, and Android and Linux devices.

The following slides will summarize which accessibility features and computer-based accommodations will be supported for the PARCC Field Test versus the 2014-2015 operational assessment.

More detailed information about PARCC accessibility can be found in the PARCC Accessibility Features and Accommodations Guidelines (<http://www.parcconline.org/parcc-draft-accommodations-manual>).

Part III: Accessibility Features & Accommodations

Assigning Accommodated Test Forms

Oral Administrations

An oral administration is an accommodation for eligible students.

- A separate test session must be created for each test subject to be orally administered. These are sometimes called “read-aloud” sessions.
- You may add multiple students to the session, as long as they are all receiving an oral administration.
- Students receiving an oral administration should be tested separately from students who are not receiving an oral administration.
- To create an oral administration testing session, select “Yes” in the Read Aloud by Test Examiner drop down on the *New Test Sessions* screen.

NOTE: If the drop down is unavailable (grayed out) then the oral accommodation is not valid for the test to be administered.

Other Accommodations

Assigning Alternate Forms Groups for Other Accommodations

- A separate test session must be created for each test subject where an accommodation applies.
- You may add multiple students to the session, as long as they are all receiving an the same accommodation.
- To assign an accommodated form, select the appropriate Form Group Type from the dropdown during the “Create New Session” activity.

LOUISIANA FIELD TEST 2014

Additional Steps

Additional Steps

- Districts and schools should use the Technology Test Preparation Checklist as a template for ensuring they have completed all steps to the test preparation and readiness process.
- District should run a Network Utilization tool to track and monitor network connectivity and traffic across their WANs and LANs. Districts needing support and guidance on this step should email our Technology staff at EdTech@la.gov.
- Upon completion of all device and network tests districts and school will submit results via the Technology Test Preparation Survey. The survey will located at:
<https://www.surveymonkey.com/s/3RYD76X>
