

Phase 2: STEM Pathway Coursework Proposal

During Phase 2, potential providers will submit full digital copies of all materials including student- and teacher-facing materials. All materials will be reviewed to determine the alignment to the [STEM Pathway Design Criteria](#).

To be eligible for review, materials must:

- have been created on or after 2012;
- be available for review online or in a digital format;
- contain units or modules to be used over an extended period of time; and
- include both student- and teacher-facing materials.

Providers must submit written authorization of use if the course contains copyrighted material or open-source material that does not expressly belong to the provider.
