

Phase 2: STEM Pathway Teacher Training Proposal

During Phase 2, potential providers will give details about teacher pedagogical and content training related to the proposed course. Teachers must receive training from the course provider, demonstrate proficiency in the content, and comply with the provider’s guidelines for curriculum usage in order to teach a course.

Potential providers agree to:

- offer feedback and guidance to teachers who do not demonstrate proficiency;
- have a plan for ongoing teacher support during the scholastic year;
- maintain and share a database of trained teachers and the course(s) that teachers are authorized to teach;
- provide annual updates and refresher training when curriculum is updated; and
- submit written authorization of use if the training involves copyrighted material or open-source material that do not expressly belong to the provider.
