Executive Summary

Louisiana Law ([R.S. 17:182](#)) and policy (Bulletin 741) established by the Louisiana Board of Elementary and Secondary Education (BESE) require that school systems administer a literacy screener not later than thirty days after the beginning of each school year to all students in kindergarten through grade 3. This requirement aligns with [research](#) demonstrating that annual screening is vital for ensuring that all students are on the right track to become proficient readers by the end of third grade.

School systems can choose among [four research-based screening assessments](#). In 2020-2021, the *Dynamic Indicators of Basic Early Literacy Skills (DIBELS) Next* assessments were renamed and are now called *Acadience Reading*.

The screening assessments measure a particular skill or set of skills that are typically predictive of later reading success. The skills build upon each other from one grade level to the next and are appropriately matched to children’s ages and developmental stages. The skills are also linked to standards children should be able to master at the beginning of each school year. The key skills measured at each grade level follow:

Kindergarten: **Phonemic Awareness**

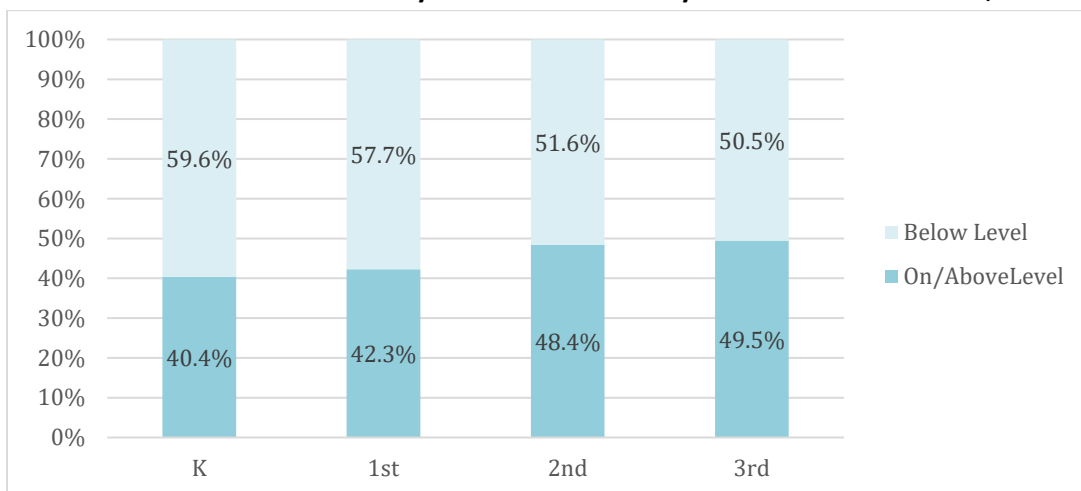

First Grade: **Basic Phonics**

Second Grade: **Oral Reading Fluency**

Third Grade: **Reading Comprehension**

Students’ scores at each grade level are reported as either “On or Above Benchmark” or “Below Benchmark.” Students who score “Below Benchmark” are considered “at risk” for reading difficulties according to the developers of the assessments. Fall 2020 results revealed that 40.4% of kindergarten students, 42.3% of first graders, 48.4% of second graders, and 49.5% of third graders scored “On or Above Benchmark” for the measured skills.

Figure 1. Statewide Performance Level by Grade for All Literacy Assessments Combined, Fall 2020

Overall, literacy screening results over the past three years have declined (see Table 3). This means fewer children are reading on grade level and more children are identified as “at risk” for reading failure each year. The decline in scores from 2019 to 2020 is, in part, a result of the COVID-19 pandemic resulting in a loss of instruction in the spring of 2020.

Literacy screener results identify many children as “at risk” for reading problems. In past years, the literacy screener results were mirrored in Louisiana’s third grade ELA LEAP outcomes. Though LEAP scores have increased slightly over the last three years, still fewer than half of all third graders achieved mastery in reading. In Spring 2019, 46% of third grade students achieved mastery. Due to the COVID-19 pandemic, the LEAP assessment was not administered in spring 2020.

These findings call for a new set of actions focused on improving literacy in the early years. To bolster this effort, Louisiana established the Early Literacy Commission through Louisiana Senate Resolution 182 and [Louisiana House Resolution 222](#). To achieve Louisiana’s vision of reading proficiency for all children, in Fall 2019, the Commission developed a long-term plan to improve early literacy in Louisiana with short-term and mid-term milestones along the way. The [Early Literacy Commission Report](#) describes the plan, including nine goals and 17 policy recommendations to achieve these goals. The Department has worked alongside the commission to make progress toward the 17 recommendations. The Department is exploring the option of moving to one literacy screener over the next year based on the recommendation of the Early Literacy Commission in order to eliminate the challenges that exist with using multiple assessments to measure statewide progress.

Assessing Students' Reading Abilities Using Acadience Reading, Dynamic Indicators of Basic Early Literacy Skills (DIBELS 8th), System to Enhance Educational Progress (STEEP), and Strategic Teaching and Evaluation of Progress (STEP)

Acadience Reading, Dynamic Indicators of Basic Early Literacy Skills (DIBELS 8th), System to Enhance Educational Progress (STEEP), and Strategic Teaching and Evaluation of Progress (STEP) are a set of standardized, individually-administered measures for assessing the acquisition of early literacy skills from kindergarten through third grade. These are brief fluency measures designed to regularly monitor the development of early reading skills. The critical skills necessary for successful beginning reading include phonemic awareness, phonics, fluency, vocabulary, and comprehension. The four benchmarking assessment measures assess students on four of these five critical skills directly—all of the critical skills listed above other than vocabulary, which is measured indirectly through comprehension. The assessments provide teachers with information about student reading and how well the student is progressing on a particular early reading skill.

The results are reported based on a student's level of skill attainment towards the benchmark goals. These empirically-derived benchmark goals are criterion-referenced target scores that represent adequate reading progress. They are based on research that examines the predictive validity of a score when compared to later measures and external assessments. Consequently, attainment of a benchmark goal indicates a student is likely to achieve the next benchmark goal and other important reading outcomes. Students who score below benchmark are determined to be at risk of remaining and falling further behind in literacy and school without being provided interventions of various degrees.

Results within this report are based on the particular measure given to students in the fall of 2020 depending on their grade level. Each measure assesses the skills expected of the student at the assessment period (specifically, at the beginning of the school year) and at a particular grade level. Across the four reported grades, 45.1 percent (51.5 percent last year) of the 191,264 assessed Louisiana students were considered "On/Above" level, (synonymous with "at benchmark").

Data systems were enhanced with error checks to ensure accuracy and reliability of scores reported by school systems. Additional data quality measures were put in place to increase reporting which included data submission review and strategic outreach to school system staff to ensure data accuracy and completeness.

Table 1. Subtests Administered by Grade for DIBELS 8th, Acadience Reading, STEEP and STEP

GRADE	ASSESSMENT	SUBTEST NAME
Kindergarten	DIBELS 8 th	Phonemic Segmentation Fluency

Assessment Results for School Systems and Schools

Data Suppression/Privacy

The Louisiana Department of Education has modified and/or suppressed data reported to protect the privacy of students in compliance with the Family Educational Rights and Privacy Act (FERPA) codified at 20 U.S.C. 1232g. The strategies used to protect privacy vary and may include rounding or other techniques but do not substantially affect the general usefulness of the data. Because of the privacy protections, numerical and percentage totals may not add precisely to the sum of the row or column to which the total refers. The symbol ~ is used for all percentages where the totals test takers in a particular grade and site are fewer than 10, and percentages greater than 95 percent and lower than 5 percent are replaced by >95% and <5%, respectively. An “NA” value indicates there were no testers in that grade at the school. An “NR” value indicates that results cannot be reported.

Table 5: Percentage of Students by Performance Level, School System, and School for Kindergarten through Third Grade, Fall 2020

LEA/Site Code	LEA/Site Name	Assessment	Kindergarten		First		Second		Third

Gifted Screening Summary

Act 688 adds that students who score above grade level on the literacy screener shall be considered for gifted evaluation. In Fall 2020, LDOE administered a survey requesting information from school systems on the number of children who were referred for gifted evaluation as a result of their screening results. The results of the survey are presented in Table 6. Seventy-four traditional system systems and 52 charters responded to the survey. **Overall, results indicate that around 4,500 non-gifted students were referred for additional gifted screening and approximately 700 of those were referred for gifted evaluation.** Results show that second graders were referred for additional gifted screening more than first and third graders. Results were relatively consistent across grades with slightly more second and third graders likely to be referred for follow up evaluation than first graders.

Table 6. Gifted Screening Data

Grade	Number of students who scored <i>Above Average</i> on the literacy screener that were referred for additional Gifted Screening	Number of students who scored <i>Above Average</i> on the literacy screener and received additional Gifted Screening that were referred for Gifted Evaluation
1st	1286	186
2nd	1767	277
3rd	1662	283
Statewide	4715	746

Note: Gifted screening and evaluation procedures in Kindergarten are based on intellectual abilities and performance on a reading and math achievement test standardized at the first grade level per state regulations.
